Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Alice Amar Froemming shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available: *Provided,* That the natural father of the beneficiary shall not, by virtue of such parentage, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANCIS X. FOLEY AND DORIS W. FOLEY, HIS WIFE

The Clerk called the bill (H.R. 1659) for the relief of Francis X. Foley.

Mr. ANDERSON of Illinois. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

MRS. HELEN VESELENAK

The Clerk called the bill (H.R. 8000) for the relief of Mrs. Helen Veselenak.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the requirements relating to time in section 202(h) (1) (B) and 202(p) of the Social Security Act that proof of support be filed by the dependent parent of an insured individual within a specified period after the date of such individual's death in order to qualify for parent's insurance benefits on the basis of such individual's wages and self-employment income shall not apply with respect to the application of Mrs. Helen Veselenak, Byesville, Ohio, for parent's insurance benefits under section 202(h) of such Act on the basis of the wages and self-employment income of her son Joseph Veselenak, Junior (Social Security Account Number 275-16-7991), if she files such application, together with such proof of support, within the six-month period beginning on the date of the enactment of this Act.

With the following committee amendment:

Page 1, line 3, after "requirements" insert the words "relating to time".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DWIGHT W. CLARAHAN

The Clerk called the bill (H.R. 9995) for the relief of Dwight W. Clarahan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Dwight W. Clarahan, of Sigourney, Iowa, the sum of $227.02 in full settlement of all his claims against the United States for the difference between the salary which he was paid and the salary to which he was lawfully entitled as an employee in the Sigourney, Iowa, post office, during the period from April 1, 1948, through April 1, 1950. Such underpayment was the result of administrative error, which was not corrected within the time allowed by statute because of the failure of the postmaster at Sigourney to comply with a memorandum directing corrective action: *Provided,* That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 5, strike "in excess of 10 per centum thereof".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JUDY JOSEPHINE ALCANTARA

The Clerk called the bill (H.R. 1463) for the relief of Josephine Abuan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Josephine Abuan shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following: "That, for the purposes of sections 101(a)(27)(A) and 205 of the Immigration and Nationality Act, Judy Josephine Alcantara shall be held and considered to be the natural-born alien minor child of Mr. and Mrs. Camilo George Alcantara, citizens of the United States: *Provided,* That the natural parents of the beneficiary shall not, by virtue of such parentage, be accorded any right, privilege, or status under the Immigration and Nationality Act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The title was amended to read as follows: "A bill for the relief of Judy Josephine Alcantara."

A motion to reconsider was laid on the table.

JACQUES TAWIL

The Clerk called the bill (H.R. 1678) for the relief of Jacques Tawil.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Jacques Tawil shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

KENYON B. ZAHNER

The Clerk called the bill (H.R. 10501) for the relief of Kenyon B. Zahner.

Mr. ANDERSON of Illinois. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

HENRY E. KEISER

The Clerk called the bill (H.R. 11552) for the relief of Henry E. Keiser.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That sections 15 through 20, inclusive, of the Federal Employees Compensation Act are hereby waived in favor of Henry E. Keiser of Seattle, Washington, and his claim for compensation and disability benefits arising out of injuries alleged to have been received by him on or about October 24, 1945, in an automobile accident, while in the performance of his duties as an employee of the Department of the Navy, shall be acted upon under the remaining provisions of such Act if he files such claim with the Bureau of Employees' Compensation, Department of Labor, within the six-month period which begins on the date of enactment of this Act: *Provided,* That no benefits shall accrue by reason of the enactment of this Act for any period prior to its enactment, except in the case of such medical or hospitalization expenditures as may be deemed reimbursable.

With the following committee amendment:

Page 1, lines 3 and 4, strike "Employees" and insert "Employees' ".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SHELBURNE HARBOR SHIP & MARINE CONSTRUCTION CO., INC.

The Clerk called the bill (H.R. 11773) for the relief of the Shelburne Harbor Ship & Marine Construction Co., Inc.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Shelburne Harbor Ship and Marine Construction Company, Incorporated (hereafter in this Act referred to as the "company"), of Shelburne, Vermont, is hereby relieved of all liability to pay to the United States the principal amount of $19,793.76, together with all accrued interest thereon. Such liability of the company arose from an order of March 10, 1958, of the Renegotiation Board with respect to profits of the company from a contract between the company and the Department of the Navy.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. HEMPHILL. Mr. Speaker, I ask unanimous consent that the further call of bills on the Private Calendar be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

HENRY ARMSTRONG, ADMINISTRATOR OF THE ESTATE OF ELLA ARMSTRONG

Mr. TOLL. Mr. Speaker, I ask unanimous consent that the bill (H.R. 6940) for the relief of Henry Armstrong, administrator of the estate of Ella Armstrong, be restored to the Private Calendar on its next call.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMITTEE ON APPROPRIATIONS

Mr. CANNON. Mr. Speaker, as the Members of the House are aware, the Committee on Appropriations has been endeavoring to report out the annual supply bills at the rate of one a week.

However, we are now in a position to report out two bills this coming week. The military construction appropriation bill for the fiscal year 1963 has already been scheduled for floor action on Tuesday, August 14. In order to report out the public works appropriation bill in the same week we would like permission to consider it on the floor on Thursday, August 16. It will be reported by the full committee on Tuesday, the 14th. So, instead of waiting 3 days, we would like to bring it to the floor with 2 days' notice.

Therefore, Mr. Speaker, I ask unanimous consent that it be in order for the Committee on Appropriations to report to the House the public works bill which will be reported by the full committee on Tuesday, August 14, and to bring it to the floor on Thursday, August 16, in order to get two bills passed next week instead of one.

The SPEAKER pro tempore. In order to consider it on Thursday of that week?

Mr. CANNON. In order to consider it on Thursday of that week.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. GROSS. Mr. Speaker, reserving the right to object, I trust that all of the information that the committee has with respect to this bill will be available as promptly as possible so that in view of the shortness of time Members may do their best to acquaint themselves with the action taken by the committee.

Mr. CANNON. Yes; the hearings are now available, and on Tuesday, August 14, the bill itself, as well as the report, will be available to any Member of the House.

Mr. GROSS. Mr. Speaker, I withdraw my reservation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

UNIFORM LIMITED PARTNERSHIP ACT IN THE DISTRICT OF COLUMBIA

Mr. WHITENER. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 11019) to provide that the Uniform Limited Partnership Act shall apply in the District of Columbia.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act to provide for the formation of limited partnerships in the District of Columbia and to make uniform the law with respect thereto, shall be in effect in the District of Columbia on and after the date of the enactment of this Act.

LIMITED PARTNERSHIP DEFINED

SECTION 1. A limited partnership is a partnership formed by two or more persons under the provisions of section 2, having as members one or more general partners and one or more limited partners. The limited partners as such shall not be bound by the obligations of the partnership.

FORMATION

SEC. 2. (1) Two or more persons desiring to form a limited partnership shall—

(a) sign and swear to a certificate, which shall state—

I. the name of the partnership,

II. the character of the business,

III. the location of the principal place of business,

IV. the name and place of residence of each member; general and limited partners being respectively designated,

V. the term for which the partnership is to exist,

VI. the amount of cash and a description of and the agreed value of the other property contributed by each limited partner,

VII. the additional contributions, if any, agreed to be made by each limited partner and the times at which or events on the happening of which they shall be made,

VIII. the time, if agreed upon, when the contribution of each limited partner is to be returned,

IX. the share of the profits or the other compensation by way of income which each limited partner shall receive by reason of his contribution,

X. the right, if given, of a limited partner to substitute an assignee as contributor in his place, and the terms and conditions of the substitution,

XI. the right, if given, of the partners to admit additional limited partners,

XII. the right, if given, of one or more of the limited partners to priority over other limited partners, as to contributions or as to compensation by way of income, and the nature of such priority,

XIII. the right, if given, of the remaining general partner or partners to continue the business on the death, retirement, or insanity of a general partner, and

XIV. the right, if given, of a limited partner to demand and receive property other than cash in return for his contribution;

(b) file for record the certificate in the Office of the Recorder of Deeds of the District of Columbia.

(2) A limited partnership is formed if there has been substantial compliance in good faith with the requirements of paragraph (1).

BUSINESS WHICH MAY BE CARRIED ON

SEC. 3. A limited partnership may carry on any business which a partnership without limited partners may carry on.

CHARACTER OF LIMITED PARTNER'S CONTRIBUTION

SEC. 4. The contributions of a limited partner may be cash or other property, but not services.

A NAME NOT TO CONTAIN SURNAME OF LIMITED PARTNER; EXCEPTIONS

SEC. 5. (1) The surname of a limited partner shall not appear in the partnership name, unless—

(a) it is also the surname of a general partner, or

(b) prior to the time when the limited partner became such the business had been carried on under a name in which his surname appeared.

(2) A limited partner whose name appears in a partnership name contrary to the provisions of paragraph (1) is liable as a general partner to partnership creditors who extend credit to the partnership without actual knowledge that he is not a general partner.

LIABILITY FOR FALSE STATEMENTS IN CERTIFICATE

SEC. 6. If the certificate contains a false statement, one who suffers loss by reliance on such statement may hold liable any party to the certificate who knew the statement to be false—

(a) at the time he signed the certificate, or

(b) subsequently, but within a sufficient time before the statement was relied upon to enable him to cancel or amend the certificate, or to file a petition for its cancellation or amendment as provided in section 25(3).

LIMITED PARTNER NOT LIABLE TO CREDITORS

SEC. 7. A limited partner shall not become liable as a general partner unless, in addition to the exercise of his rights and powers as a limited partner, he takes part in the control of the business.

ADMISSION OF ADDITIONAL LIMITED PARTNERS

SEC. 8. After the formation of a limited partnership, additional limited partners may be admitted upon filing an amendment to the original certificate in accordance with the requirements of section 25.

RIGHTS, POWERS, AND LIABILITIES OF A GENERAL PARTNER

SEC. 9. (1) A general partner shall have all the rights and powers and be subject to all the restrictions and liabilities of a partner in a partnership without limited partners, except that without the written consent or ratification of the specific act by all the limited partners, a general partner or all of the general partners have no authority to—

(a) do any act in contravention of the certificate,

(b) do any act which would make it impossible to carry on the ordinary business of the partnership,

(c) confess a judgment against the partnership,

(d) possess partnership property, or assign their rights in specific partnership property, for other than a partnership purpose,

(e) admit a person as a general partner,

(f) admit a person as a limited partner, unless the right so to do is given in the certificate,

(g) continue the business with partnership property on the death, retirement, or insanity of a general partner, unless the right so to do is given in the certificate.

RIGHTS OF A LIMITED PARTNER

SEC. 10. (1) A limited partner shall have the same rights as a general partner to—

(a) have the partnership books kept at a principal place of business of the partnership, and at all times to inspect and copy any of them,

(b) have on demand true and full information of all things affecting the partnership, and a formal account of partnership affairs whenever circumstances render it just and reasonable, and

(c) have dissolution and winding up by decree of court.

(2) A limited partner shall have the right to receive a share of the profits or other compensation by way of income, and to the return of his contribution as provided in sections 15 and 16.

STATUS OF PERSON ERRONEOUSLY BELIEVING HIMSELF A LIMITED PARTNER

SEC. 11. A person who has contributed to the capital of a business conducted by a person or partnership erroneously believing that he has become a limited partner in a limited partnership is not, by reason of this exercise of the rights of a limited partner, a general partner with the person or in the partnership carrying on the business, or bound by the obligations of such person or partnership: *Provided,* That on ascertaining the mistake he promptly renounces his interest in the profits of the business, or other compensation by way of income.

ONE PERSON BOTH GENERAL AND LIMITED PARTNER

SEC. 12. (1) A person may be a general partner and a limited partner in the same partnership at the same time.

(2) A person who is a general, and also at the same time a limited, partner shall have all the rights and powers and be subject to all the restrictions of a general partner, except that, in respect to his contribution, he shall have the rights against the other members which he would have had if he were not also a general partner.

LOANS AND OTHER BUSINESS TRANSACTIONS WITH LIMITED PARTNER

SEC. 13. (1) A limited partner also may loan money to and transact other business with the partnership, and, unless he is also a general partner, receive on account of resulting claims against the partnership, with general creditors, a pro rata share of the assets. No limited partner shall in respect to any such claim—

(a) receive or hold as collateral security any partnership property, or

(b) receive from a general partner or the partnership any payment, conveyance, or release from liability, if at the time the assets of the partnership are not sufficient to discharge partnership liabilities to persons not claiming as general or limited partners.

(2) The receiving of collateral security, or a payment, conveyance, or release in violation of the provisions of paragraph (1) is a fraud on the creditors of the partnership.

RELATION OF LIMITED PARTNERS INTER SE

SEC. 14. Where there are several limited partners the members may agree that one or more of the limited partners shall have a priority over other limited partners as to the return of their contributions, as to their compensation by way of income, or as to any other matter. If such an agreement is made it shall be stated in the certificate, and in the absence of such a statement all the limited partners shall stand upon equal footing.

COMPENSATION OF LIMITED PARTNER

SEC. 15. A limited partner may receive from the partnership the share of the profits or the compensation by way of income stipulated for in the certificate: *Provided,* That after such payment is made, whether from the property of the partnership or that of a general partner, the partnership assets are in excess of all liabilities of the partnership except liabilities to limited partners on account of their contributions and to general partners.

WITHDRAWAL OR REDUCTION OF LIMITED PARTNER'S CONTRIBUTION

Sec. 16. (1) A limited partner shall not receive from a general partner or out of partnership property any part of his contribution until—

(a) all liabilities of the partnership, except liabilities to general partners and to limited partners on account of their contributions, have been paid or there remains property of the partnership sufficient to pay them,

(b) the consent of all members is had, unless the return of the contribution may be rightfully demanded under the provisions of paragraph (2), and

(c) the certificate is canceled or so amended as to set forth the withdrawal or reduction.

(2) Subject to the provisions of paragraph (1) a limited partner may rightfully demand the return of his contribution—

(a) on the dissolution of a partnership, or

(b) when the date specified in the certificate for its return has arrived, or

(c) after he has given six months' notice in writing to all other members, if no time is specified in the certificate either for the return of the contribution or for the dissolution of the partnership,

(3) In the absence of any statement in the certificate to the contrary or the consent of all members, a limited partner, irrespective of the nature of his contribution, has only the right to demand and receive cash in return for his contribution.

(4) A limited partner may have the partnership dissolved and its affairs wound up when—

(a) he rightfully but unsuccessfully demands the return of his contribution, or

(b) the other liabilities of the partnership have not been paid, or the partnership property is insufficient for their payment as required by paragraph (1a) and the limited partner would otherwise be entitled to the return of his contribution.

LIABILITY OF LIMITED PARTNER TO PARTNERSHIP

Sec. 17. (1) A limited partner is liable to the partnership—

(a) for the difference between his contribution as actually made and that stated in the certificate as having been made, and

(b) for any unpaid contribution which he agreed in the certificate to make in the future at the time and on the conditions stated in the certificate.

(2) A limited partner holds as trustee for the partnership—

(a) specific property stated in the certificate as contributed by him, but which was not contributed or which has been wrongfully returned, and

(b) money or other property wrongfully paid or conveyed to him on account of his contribution.

(3) The liabilities of a limited partner as set forth in this section can be waived or compromised only by the consent of all members; but a waiver or compromise shall not affect the right of a creditor of a partnership, who extended credit or whose claim arose after the filing and before a cancellation or amendment of the certificate, to enforce such liabilities.

(4) When a contributor has rightfully received the return in whole or in part of the capital of his contribution, he is nevertheless liable to the partnership for any sum, not in excess of such return with interest, necessary to discharge its liabilities to all creditors who extended credit or whose claims arose before such return.

NATURE OF LIMITED PARTNER'S INTEREST IN PARTNERSHIP

Sec. 18. A limited partner's interest in the partnership is personal property.

ASSIGNMENT OF LIMITED PARTNER'S INTEREST

Sec. 19. (1) A limited partner's interest is assignable.

(2) A substituted limited partner is a person admitted to all the rights of a limited partner who has died or has assigned his interest in a partnership.

(3) An assignee, who does not become a substituted limited partner, has no right to require any information or account of the partnership transactions or to inspect the partnership books; he is only entitled to receive the share of the profits or other compensation by way of income, or the return of his contribution, to which his assignor would otherwise be entitled.

(4) An assignee shall have the right to become a substituted limited partner if all the members (except the assignor) consent thereto or if the assignor, being thereunto empowered by the certificate, gives the assignee that right.

(5) An assignee becomes a substitued limited partner when the certificate is appropriately amended in accordance with section 25.

(6) The substituted limited partner has all the rights and powers, and is subject to all the restrictions and liabilities of his assignor, except those liabilities of which he was ignorant at the time he became a limited partner and which could not be ascertained from the certificate.

(7) The substitution of the assignee as a limited partner does not release the assignor from liability to the partnership under sections 6 and 17.

EFFECT OF RETIREMENT, DEATH, OR INSANITY OF A GENERAL PARTNER

Sec. 20. The retirement, death, or insanity of a general partner dissolves the partnership, unless the business is continued by the remaining general partners—

(a) under a right so to do stated in the certificate, or

(b) with the consent of all members.

DEATH OF LIMITED PARTNER

Sec. 21. (1) On the death of a limited partner his executor or administrator shall have all the rights of a limited partner for the purpose of settling his estate, and such power as the deceased had to constitute his assignee a substituted limited partner.

(2) The estate of a deceased limited partner shall be liable for all his liabilities as a limited partner.

RIGHTS OF CREDITORS OF LIMITED PARTNER

Sec. 22. (1) On due application to a court of competent jurisdiction by any judgment creditor of a limited partner, the court may charge the interest of the indebted limited partner with payment of the unsatisfied amount of the judgment debt; and may appoint a receiver, and make all other orders, directions, and inquiries which the circumstances of the case may require.

(2) The interest may be redeemed with the separate property of any general partner, but may not be redeemed with partnership property.

(3) The remedies conferred by paragraph (1) shall not be deemed exclusive of others which may exist.

(4) Nothing in this Act shall be held to deprive a limited partner of his statutory exemption.

DISTRIBUTION OF ASSETS

Sec. 23. (1) In settling accounts after dissolution the liabilities of the partnership shall be entitled to payment in the following order:

(a) Those to creditors, in the order of priority as provided by law, except those to limited partners on account of their contributions, and to general partners.

(b) Those to limited partners in respect to their share of the profits and other compensation by way of income on their contributions.

(c) Those to limited partners in respect to the capital of their contributions.

(d) Those to general partners other than for capital and profits.

(e) Those to general partners in respect to profits.

(f) Those to general partners in respect to capital.

(2) Subject to any statement in the certificate or to subsequent agreement, limited partners share in the partnership assets in respect to their claims for capital, and in respect to their claims for profits or for compensation by way of income on their contributions respectively, in proportion to the respective amounts of such claims.

WHEN CERTIFICATE SHALL BE CANCELED OR AMENDED

Sec. 24. (1) The certificate shall be canceled when the partnership is dissolved or all limited partners cease to be such.

(2) A certificate shall be amended when—

(a) there is a change in the name of the partnership or in the amount or character of the contribution of any limited partner,

(b) a person is substituted as a limited partner,

(c) an additional limited partner is admitted,

(d) a person is admitted as a general partner,

(e) a general partner retires, dies, or becomes insane, and the business is continued under section 20,

(f) there is a change in the character of the business of the partnership,

(g) there is a false or erroneous statement in the certificate,

(h) there is a change in the time as stated in the certificate for the dissolution of the partnership or for the return of a contribution,

(i) a time is fixed for the dissolution of the partnership, or the return of a contribution, no time having been specified in the certificate, or

(j) the members desire to make a change in any other statement in the certificate in order that it shall accurately represent the agreement between them.

REQUIREMENTS FOR AMENDMENT AND FOR CANCELLATION OF CERTIFICATE

Sec. 25. (1) The writing to amend a certificate shall—

(a) conform to the requirements of section 2(1)(a) as far as necessary to set forth clearly the change in the certificate which it is desired to make, and

(b) be signed and sworn to by all members, and an amendment substituting a limited partner or adding a limited or general partner shall be signed also by the member to be substituted or added, and when a limited partner is to be substituted, the amendment shall also be signed by the assigning limited partner.

(2) The writing to cancel a certificate shall be signed by all members.

(3) A person desiring the cancellation or amendment of a certificate, if any person designated in paragraphs (1) and (2) as a person who must execute the writing refuses to do so, may petition the United States District Court for the District of Columbia to direct a cancellation or amendment thereof.

(4) If the court finds that the petitioner has a right to have the writing executed by a person who refuses to do so, it shall order the Recorder of Deeds of the District of Columbia where the certificate is recorded to record the cancellation or amendment of the certificate; and where the certificate is to be amended, the court shall also cause to be filed for record in said office a certified copy of its decree setting forth the amendment.

(5) A certificate is amended or canceled when there is filed for record in the office of the Recorder of Deeds of the District of Columbia where the certificate is recorded—

(a) a writing in accordance with the provisions of paragraph (1) or (2), or

(b) a certified copy of the order of court in accordance with the provisions of paragraph (4).

(6) After the certificate is duly amended in accordance with this section, the amended certificate shall thereafter be for all purposes the certificate provided for by this Act.

PARTIES TO ACTIONS

SEC. 26. A contributor, unless he is a general partner, is not a proper party to proceedings by or against a partnership, except where the object is to enforce a limited partner's right against or liability to the partnership.

NAME OF ACT

SEC. 27. This Act may be cited as the "Uniform Limited Partnership Act".

RULES OF CONSTRUCTION

SEC. 28. (1) The rule that statutes in derogation of the common law are to be strictly construed shall have no application to this Act.

(2) This Act shall be so interpreted and construed as to effect its general purpose to make uniform the law of those States which enact it.

(3) This Act shall not be so construed as to impair the obligations of any contract existing when the Act goes into effect, nor to affect any action on proceedings begun or right accrued before this Act takes effect.

RULES FOR CASES NOT PROVIDED FOR IN THIS ACT

SEC. 29. In any case not provided for in this Act the rules of law and equity, including the law merchant, shall govern.

PROVISIONS FOR EXISTING LIMITED PARTNERSHIPS

SEC. 30. (1) A limited partnership formed under any statute of this State, prior to the adoption of this Act, may become a limited partnership under this Act by complying with the provisions of section 2: *Provided*, That the certificate sets forth—

(a) the amount of the original contribution of each limited partner, and the time when the contribution was made, and

(b) that the property of the partnership exceeds the amount sufficient to discharge its liabilities to persons not claiming as general or limited partners by an amount greater than the sum of the contributions of its limited partners.

(2) A limited partnership formed under any statute of this State, prior to the adoption of this Act, until or unless it becomes a limited partnership under this Act, shall continue to be governed by the provisions of Thirty-first Statutes at Large, page 1415, chapter 854, sections 1498–1506, 1508, 1510–1528, as amended, except that such partnership shall not be renewed unless so provided in the original agreement.

REPEAL

SEC. 31. Except as affecting existing limited partnerships to the extent set forth in section 30, Thirty-first Statutes at Large, page 1415, chapter 854, sections 1498–1506, 1508, 1510–1528, as amended, is hereby repealed.

With the following committee amendments:

On page 19, line 8, following the word "formed", strike "under any statute of this State", and insert in lieu thereof the following: "under the Act approved March 3, 1901, as amended,".

On page 19, line 21, following the word "formed", strike "under any statute of this State", and insert in lieu thereof the following: "under the Act approved March 3, 1901, as amended,".

The committee amendments were agreed to.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. WHITENER. I would be happy to yield to the gentleman from Iowa.

Mr. GROSS. What is the difference between this bill, H.R. 11019, and H.R. 12675? They both deal with partnerships, do they not?

Mr. WHITENER. Yes. But there is as much difference in the two bills as there is between an airplane and an automobile. One deals with limited partnerships, and one deals with general partnerships, which are entirely different types of legal creatures.

Mr. GROSS. One deals with limited partnerships and the other deals with general partnerships; are those the words the gentleman used?

Mr. WHITENER. That is right. This bill deals with limited partnerships. It is the Uniform Limited Partnership Act which is now in effect in 40 States of the Union, including Maryland, Virginia, and Iowa.

Mr. GROSS. I thank the gentleman.

Mr. WHITENER. Mr. Speaker, the purpose of the bill is to substitute the Uniform Limited Partnership Act for the present law in the District—act of March 3, 1901, 31 Stat. 1415; District of Columbia Code, 1961 edition, sections 41–101 and the following.

Present law has not been revised in the 60 years of its existence, and despite the growth of multiple and complex business and professional interrelationships, no effort has been made to modernize the law to facilitate the organization of limited partnerships which would have practical application in the expanding economy.

The Uniform Act was approved by the National Conference of Commissioners on Uniform State Laws—chosen from the legal profession—46 years ago, and since then the Uniform Act, approved by the American Bar Association, has been adopted and is in effect in 40 States, including Maryland and Virginia.

H.R. 11019 incorporates the Uniform Act in its entirety, and its enactment would conform the District's law to that of other jurisdictions. The bill repeals present law with respect to limited partnerships formed subsequent to the effective date of its enactment, and substitutes a precise and comprehensive formula for establishing limited partnerships, carefully delineating the rights and obligations of the limited partners inter se and in relation to the partnership as a whole.

The bill also provides for filing of certificate of limited partnership, and any amendment or cancellation thereof, with the recorder of deeds. Present law contains a provision, anomalous in these times, requiring the filing of the certificate of limited partnership in the office of the clerk of the U.S. District Court for the District of Columbia.

Need for the adoption of the Uniform Act was stressed at the hearings because:

First. Of the inadequacy of existing law under which limited partnerships may be formed only for mercantile, mechanical, or manufacturing businesses, and have not more than six limited partners who must contribute cash in order to obtain limited liability. H.R. 11019 would enable the use of limited partnerships in various fields, such as real estate, construction, and ownership.

Second. To meet economic growth in this area, businessmen and investors have long been forced to resort to more unusual and complex forms of business arrangements to achieve some of the benefits of limited partnership form of business organization. The bill would obviate such arrangements.

Third. Of desire for uniformity in this area, bringing the law of the District into conformity with that of Virginia and Maryland, so that business ventures may be conducted in any one or all three jurisdictions without difficulty, and the disparity among their laws will be eliminated.

No opposition to the bill was expressed at the hearings. It is endorsed by the Bar Association of the District of Columbia, the Board of Commissioners of the District of Columbia, and by the Metropolitan Washington Board of Trade.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. WHITENER. Mr. Speaker, I ask unanimous consent that I may insert in the RECORD at the time of consideration of each of these bills an explanatory statement.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

FORMATION OF PARTNERSHIPS IN DISTRICT OF COLUMBIA

Mr. WHITENER. Mr. Speaker, by direction of the Committee on the District of Columbia I call up the bill (H.R. 12675) to provide for the formation of partnerships in the District of Columbia and to make uniform the law with respect thereto.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act to provide for the formation of partnerships in the District of Columbia and to make uniform the law with respect thereto shall be in effect in the District of Columbia on and after the date of the enactment of this Act.

PART I

Preliminary provisions

SECTION 1. NAME OF ACT.—This Act may be cited as the "Uniform Partnership Act".

SEC. 2. DEFINITION OF TERMS.—In this Act, "court" includes every court and judge having jurisdiction in the case.

"Business" includes every trade, occupation, or profession.

"Person" includes individuals, partnerships, corporations, and other associations.

"Bankrupt" includes bankrupt under the Federal Bankruptcy Act or insolvent under any law of the District of Columbia.

"Conveyance" includes every assignment, lease, mortgage, or encumbrance.

"Real property" includes land and any interest or estate in land.

Sec. 3. Interpretation of Knowledge and Notice.—(1) A person has "knowledge" of a fact within the meaning of this Act not only when he has actual knowledge thereof, but also when he has knowledge of such other facts as in the circumstances show bad faith.

(2) A person has "notice" of a fact within the meaning of this Act when the person who claims the benefit of the notice—

(a) states the fact to such person, or

(b) delivers through the mail, or by other means of communication, a written statement of the fact to such person or to a proper person at his place of business or residence.

Sec. 4. Rules of Construction.—(1) The rule that statutes in derogation of the common law are to be strictly construed shall have no application to this Act.

(2) The law of estoppel shall apply under this Act.

(3) The law of agency shall apply under this Act.

(4) This Act shall be so interpreted and construed as to effect its general purpose to make uniform the law of those jurisdictions which enact it.

(5) This Act shall not be construed so as to impair the obligations of any contract existing when the Act goes into effect, nor to affect any action or proceedings begun or right accrued before this Act takes effect.

Sec. 5. Rules for Cases Not Provided for in This Act.—In any case not provided for in this Act the rules of law and equity, including the law merchant, shall govern.

PART II

Nature of a partnership

Sec. 6. Partnership Defined.—(1) A partnership is an association of two or more persons to carry on as coowners a business for profit.

(2) But any association formed under any other statute of this jurisdiction, or any statute adopted by authority, other than the authority of this jurisdiction is not a partnership under this Act, unless such association would have been a partnership in this jurisdiction prior to the adoption of this Act; but this Act shall apply to limited partnerships except insofar as the statutes of the District of Columbia relating to such partnerships are inconsistent herewith.

Sec. 7. Rules for Determining the Existence of a Partnership.—In determining whether a partnership exists, these rules shall apply:

(1) Except as provided by section 16 persons who are not partners as to each other are not partners as to third persons.

(2) Joint tenancy, tenancy in common, tenancy by the entireties, joint property, common property, or part ownership does not of itself establish a partnership, whether such coowners do or do not share any profits made by the use of the property.

(3) The sharing of gross returns does not of itself establish a partnership, whether or not the persons sharing them have a joint or common right or interest in any property from which the returns are derived.

(4) The receipt by a person of a share of the profits of a business is prima facie evidence that he is a partner in the business, but no such inference shall be drawn if such profits were received in payment—

(a) as a debt by installments or otherwise,

(b) as wages of an employee or rent to a landlord,

(c) as an annuity to a widow or representative of a deceased partner,

(d) as interest on a loan, though the amount of payment varies with the profits of the business,

(e) as the consideration for the sale of the goodwill of a business or other property by installments or otherwise.

Sec. 8. Partnership Property.—(1) All property originally brought into the partnership stock or subsequently acquired by purchase or otherwise, on account of the partnership, is partnership property.

(2) Unless the contrary intention appears, property acquired with partnership funds is partnership property.

(3) Any estate in real property may be acquired in the partnership name. Title so acquired can be conveyed only in the partnership name.

(4) A conveyance to a partnership in the partnership name, though without words of inheritance, passes the entire estate of the grantor unless a contrary intent appears.

PART III

Relations of partners to persons dealing with the partnership

Sec. 9. Partner Agent of Partnership as to Partnership Business.—(1) Every partner is an agent of the partnership for the purpose of its business, and the act of every partner, including the execution in the partnership name of any instrument, for apparently carrying on in the usual way the business of the partnership of which he is a member binds the partnership, unless the partner so acting has in fact no authority to act for the partnership in the particular matter, and the person with whom he is dealing has knowledge of the fact that he has no such authority.

(2) An act of a partner which is not apparently for the carrying on of the business of the partnership in the usual way does not bind the partnership unless authorized by the other partners.

(3) Unless authorized by the other partners or unless they have abandoned the business, one or more but less than all the partners have no authority to—

(a) assign the partnership property in trust for creditors or on the assignee's promise to pay the debts of the partnership,

(b) dispose of the goodwill of the business,

(c) do any other act which would make it impossible to carry on the ordinary business of a partnership,

(d) confess a judgment,

(e) submit a partnership claim or liability to arbitration or reference.

(4) No act of a partner in contravention of a restriction on authority shall bind the partnership to persons having knowledge of the restriction.

Sec. 10. Conveyance of Real Property of the Partnership.—(1) Where title to real property is in the partnership name, any partner may convey title to such property by a conveyance executed in the partnership name; but the partnership may recover such property unless the partner's act binds the partnership under the provisions of paragraph (1) of section 9, or unless such property has been conveyed by the grantee or a person claiming through such grantee to a holder for value without knowledge that the partner, in making the conveyance, has exceeded his authority.

(2) Where title to real property is in the name of the partnership, a conveyance executed by a partner, in his own name, passes the equitable interest of the partnership, provided the act is one within the authority of the partner under the provisions of paragraph (1) of section 9.

(3) Where title to real property is in the name of one or more but not all the partners, and the record does not disclose the right of the partnership, the partners in whose name the title stands may convey title to such property, but the partnership may recover such property if the partners' act does not bind the partnership under the provisions of paragraph (1) of section 9, unless the purchaser or his assignee is a holder for value, without knowledge.

(4) Where the title to real property is in the name of one or more or all the partners, or in a third person in trust for the partnership, a conveyance executed by a partner in the partnership name, or in his own name, passes the equitable interest of the partnership, provided the act is one within the authority of the partner under the provision of paragraph (1) of section 9.

(5) Where the title to real property is in the names of all the partners a conveyance executed by all the partners passes all their rights in such property.

Sec. 11. Partnership Bound by Admission of Partner.—An admission or representation made by any partner concerning partnership affairs within the scope of his authority as conferred by this Act is evidence against the partnership.

Sec. 12. Partnership Charged With Knowledge of or Notice to Partner.—Notice to any partner of any matter relating to partnership affairs, and the knowledge of the partner acting in the particular matter, acquired while a partner or then present to his mind, and the knowledge of any other partner who reasonably could and should have communicated it to the acting partner, operate as notice to or knowledge of the partnership, except in the case of a fraud on the partnership committed by or with the consent of that partner.

Sec. 13. Partnership Bound by Partner's Wrongful Act.—Where, by any wrongful act or omission of any partner acting in the ordinary course of the business of the partnership or with the authority of his copartners, loss or injury is caused to any person, not being a partner in the partnership, or any penalty is incurred, the partnership is liable therefor to the same extent as the partner so acting or omitting to act.

Sec. 14. Partnership Bound by Partner's Breach of Trust.—The partnership is bound to make good the loss:

(a) Where one partner acting within the scope of his apparent authority receives money or property of a third person and misapplies it; and

(b) Where the partnership in the course of its business receives money or property of a third person and the money or property so received is misapplied by any partner while it is in the custody of the partnership.

Sec. 15. Nature of Partner's Liability.—All partners are liable—

(a) jointly and severally for everything chargeable to the partnership under sections 13 and 14,

(b) jointly for all other debts and obligations of the partnership; but any partner may enter into a separate obligation to perform a partnership contract.

Sec. 16. Partner by Estoppel.—(1) When a person, by words spoken or written or by conduct, represents himself, or consents to another representing him to anyone, as a partner in an existing partnership or with one or more persons not actual partners, he is liable to any such person to whom such representation has been made, who has, on the faith of such representation, given credit to the actual or apparent partnership, and if he has made such representation or consented to its being made in a public manner he is liable to such person, whether the representation has or has not been made or communicated to such person so giving credit by or with the knowledge of the apparent partner making the representation or consenting to its being made.

(a) When a partnership liability results, he is liable as though he were an actual member of the partnership.

(b) When no partnership liability results, he is liable jointly with the other persons, if any, so consenting to the contract or representation as to incur liability, otherwise separately.

(2) When a person has been thus represented to be a partner in an existing partnership, or with one or more persons not actual partners, he is an agent of the persons consenting to such representation to bind them to the same extent and in the

same manner as though he were a partner in fact, with respect to persons who rely upon the representation. Where all the members of the existing partnership consent to the representation, a partnership act or obligation results; but in all other cases it is the joint act or obligation of the person acting and the persons consenting to the representation.

Sec. 17. Liability of Incoming Partner.—A person admitted as a partner into an existing partnership is liable for all the obligations of the partnership arising before his admission as though he had been a partner when such obligations were incurred, except that this liability shall be satisfied only out of partnership property.

PART IV

Relations of partners to one another

Sec. 18. Rules Determining Rights and Duties of Partners.—The rights and duties of the partners in relation to the partnership shall be determined, subject to any agreement between them, by the following rules:

(a) Each partner shall be repaid his contributions, whether by way of capital or advances to the partnership property and share equally in the profits and surplus remaining after all liabilities, including those to partners, are satisfied; and must contribute toward the losses, whether of capital or otherwise, sustained by the partnership according to his share in the profits.

(b) The partnership must indemnify every partner in respect of payments made and personal liabilities reasonably incurred by him in the ordinary and proper conduct of its business or for the preservation of its business or property.

(c) A partner, who in aid of the partnership makes any payment or advance beyond the amount of capital which he agreed to contribute, shall be paid interest from the date of the payment or advance.

(d) A partner shall receive interest on the capital contributed by him only from the date when repayment should be made.

(e) All partners have equal rights in the management and conduct of the partnership business.

(f) No partner is entitled to remuneration for acting in the partnership business, except that a surviving partner is entitled to reasonable compensation for his services in winding up the partnership affairs.

(g) No person can become a member of a partnership without the consent of all the partners.

(h) Any difference arising as to ordinary matters connected with the partnership business may be decided by a majority of the partners; but no act in contravention of any agreement between the partners may be done rightfully without the consent of all the partners.

Sec. 19. Partnership Books.—The partnership books shall be kept, subject to any agreement between the partners, at the principal place of business of the partnership, and every partner shall at all times have access to and may inspect and copy any of them.

Sec. 20. Duty of Partners To Render Information.—Partners shall render on demand true and full information of all things affecting the partnership to any partner or the legal representative of any deceased partner or partner under legal disability.

Sec. 21. Partner Accountable as a Fiduciary.—(1) Every partner must account to the partnership for any benefit, and hold as trustee for it any profits derived by him without the consent of the other partners from any transaction connected with the formation, conduct, or liquidation of the partnership or from any use by him of its property.

(2) This section applies also to the representatives of a deceased partner engaged in the liquidation of the affairs of the partnership as the personal representatives of the last surviving partner.

Sec. 22. Right to an Account.—Any partner shall have the right to a formal account as to partnership affairs—

(a) if he is wrongfully excluded from the partnership business or possession of its property by his co-partners,

(b) if the right exists under the terms of any agreement,

(c) as provided by section 21,

(d) whenever other circumstances render it just and reasonable.

Sec. 23. Continuation of Partnership Beyond Fixed Term.—(1) When a partnership for a fixed term or particular undertaking is continued after the termination of such term or particular undertaking without any express agreement, the rights and duties of the partners remain the same as they were at such termination, so far as is consistent with a partnership at will.

(2) A continuation of the business by the partners or such of them as habitually acted therein during the term, without any settlement or liquidation of the partnership affairs, is prima facie evidence of a continuation of the partnership.

PART V

Property rights of a partner

Sec. 24. Extent of Property Rights of a Partner.—The property rights of a partner are (1) his rights in specific partnership property, (2) his interest in the partnership, and (3) his right to participate in the management.

Sec. 25. Nature of a Partner's Right in Specific Partnership Property.—(1) A partner is coowner with his partners of specific partnership property holding as a tenant in partnership.

(2) The incidents of this tenancy are such that:

(a) A partner, subject to the provisions of this Act and to any agreement between the partners, has an equal right with his partners to possess specific partnership property for partnership purposes; but he has no right to possess such property for any other purpose without the consent of his partners.

(b) A partner's right in specific partnership property is not assignable except in connection with the assignment of rights of all the partners in the same property.

(c) A partner's right in specific partnership property is not subject to attachment or execution, except on a claim against the partnership. When partnership property is attached for a partnership debt the partners, or any of them, or the representatives of a deceased partner, cannot claim any right under the homestead or exemption laws.

(d) On the death of a partner his right in specific partnership property vests in the surviving partner or partners, except where the deceased was the last surviving partner, when his right in such property vests in his legal representative. Such surviving partner or partners, or the legal representative of the last surviving partner, has no right to possess the partnership property for any but a partnership purpose.

(e) A partner's right in specific partnership property is not subject to dower, curtesy, or allowances to widows, heirs, or next of kin.

Sec. 26. Nature of Partner's Interest in the Partnership.—A partner's interest in the partnership is his share of the profits and surplus, and the same is personal property.

Sec. 27. Assignment of Partner's Interest.—(1) A conveyance by a partner of his interest in the partnership does not of itself dissolve the partnership, nor, as against the other partners in the absence of agreement, entitle the assignee, during the continuance of the partnership, to interfere in the management or administration of the partnership business or affairs, or to require any information or account of partnership transactions, or to inspect the partnership books; but it merely entitles the assignee to receive in accordance with his contract the profits to which the assigning partner would otherwise be entitled.

(2) In case of a dissolution of the partnership, the assignee is entitled to receive his assignor's interest and may require an account from the date only of the last account agreed to by all the partners.

Sec. 28. Partner's Interest Subject to Charging Order.—(1) On due application to a competent court by any judgment creditor of a partner, the court which entered the judgment, order, or decree, or any other court, may charge the interest of the debtor partner with payment of the unsatisfied amount of such judgment debt with interest thereon; and may then or later appoint a receiver of his share of the profits, and of any other money due or to fall due to him in respect of the partnership, and make all other orders, directions, accounts, and inquiries which the debtor partner might have made, or which the circumstances of the case may require.

(2) The interest charged may be redeemed at any time before foreclosure, or in case of a sale being directed by the court may be purchased without thereby causing a dissolution:

(a) With separate property, by any one or more of the partners, or

(b) With partnership property, by any one or more of the partners with the consent of all the partners whose interests are not so charged or sold.

(3) Nothing in this Act shall be held to deprive a partner of his right, if any, under the exemption laws, as regards his interest in the partnership.

PART VI

Dissolution and winding up

Sec. 29. Dissolution Defined.—The dissolution of a partnership is the change in the relation of the partners caused by any partner ceasing to be associated in the carrying on as distinguished from the winding up of the business.

Sec. 30. Partnership Not Terminated by Dissolution.—On dissolution the partnership is not terminated, but continues until the winding up of partnership affairs is completed.

Sec. 31. Causes of Dissolution.—Dissolution is caused: (1) Without violation of the agreement between the partners—

(a) by the termination of the definite term or particular undertaking specified in the agreement,

(b) by the express will of any partner when no definite term or particular undertaking is specified,

(c) by the express will of all the partners who have not assigned their interests or suffered them to be charged for their separate debts, either before or after the termination of any specified term or particular undertaking,

(d) by the expulsion of any partner from the business bona fide in accordance with such a power conferred by the agreement between the partners;

(2) In contravention of the agreement between the partners, where the circumstances do not permit a dissolution under any other provision of this section, by the express will of any partner at any time;

(3) By any event which makes it unlawful for the business of the partnership to be carried on or for the members to carry it on in partnership;

(4) By the death of any partner;

(5) By the bankruptcy of any partner or the partnership;

(6) By decree of court under section 32.

Sec. 32. Dissolution by Decree of Court.—(1) On application by or for a partner the court shall decree a dissolution whenever—

(a) a partner has been declared a lunatic in any judicial proceeding or is shown to be of unsound mind,

(b) a partner becomes in any other way incapable of performing his part of the partnership contract,

(c) a partner has been guilty of such conduct as tends to affect prejudicially the carrying on of the business,

(d) a partner willfully or persistently commits a breach of the partnership agreement, or otherwise so conducts himself in matters relating to the partnership business that it is not reasonably practicable to carry on the business in partnership with him,

(e) the business of the partnership can only be carried on at a loss,

(f) other circumstances render a dissolution equitable.

(2) On the application of the purchaser of a partner's interest under sections 27 and 28—

(a) after the termination of the specified term or particular undertaking,

(b) at any time if the partnership was a partnership at will when the interest was assigned or when the charging order was issued.

Sec. 33. General Effect of Dissolution on Authority of Partner.—Except so far as may be necessary to wind up partnership affairs or to complete transactions begun but not then finished, dissolution terminates all authority of any partner to act for the partnership—

(1) with respect to the partners—

(a) when the dissolution is not by the act, bankruptcy or death of a partner; or

(b) when the dissolution is by such act, bankruptcy or death of a partner, in cases where section 34 so requires;

(2) with respect to persons not partners, as declared in section 35.

Sec. 34. Right of Partner to Contribution From Copartners After Dissolution.—Where the dissolution is caused by the act, death, or bankruptcy of a partner, each partner is liable to his copartners for his share of any liability created by any partner acting for the partnership as if the partnership had not been dissolved unless—

(a) the dissolution being by act of any partner, the partner acting for the partnership had knowledge of the dissolution, or

(b) the dissolution being by the death or bankruptcy of a partner, the partner acting for the partnership had knowledge or notice of the death or bankruptcy.

Sec. 35. Power of Partner To Bind Partnership to Third Persons After Dissolution.—(1) After dissolution a partner can bind the partnership except as provided in paragraph (3)—

(a) by any act appropriate for winding up partnership affairs or completing transactions unfinished at dissolution;

(b) by any transaction which would bind the partnership if dissolution had not taken place, provided the other party to the transaction,

(I) had extended credit to the partnership prior to dissolution and had no knowledge or notice of the dissolution; or

(II) though he had not so extended credit, had nevertheless known of the partnership prior to dissolution, and, having no knowledge or notice of dissolution, the fact of dissolution had not been advertised in a newspaper of general circulation in the place (or in each place if more than one) at which the partnership business was regularly carried on.

(2) The liability of a partner under paragraph (1)(b) shall be satisfied out of partnership assets alone when such partner has been prior to dissolution—

(a) unknown as a partner to the person with whom the contract is made; and

(b) so far unknown and inactive in partnership affairs that the business reputation of the partnership could not be said to have been in any degree due to his connection with it.

(3) The partnership is in no case bound by any act of a partner after dissolution—

(a) where the partnership is dissolved because it is unlawful to carry on the business, unless the act is appropriate for winding up partnership affairs; or

(b) where the partner has become bankrupt; or

(c) where the partner has no authority to wind up partnership affairs; except by a transaction with one who,

(I) had extended credit to the partnership prior to dissolution and had no knowledge or notice of his want of authority; or

(II) had not extended credit to the partnership prior to dissolution, and, having no knowledge or notice of his want of authority, the fact of his want to authority had not been advertised in the manner provided for advertising the fact of dissolution in paragraph (1)(b)(II).

(4) Nothing in this section shall affect the liability under section 16 of any person who after dissolution represents himself or consents to another representing him as a partner in a partnership engaged in carrying on business.

Sec. 36. Effect of Dissolution on Partner's Existing Liability.—(1) The dissolution of the partnership does not of itself discharge the existing liability of any partner.

(2) A partner is discharged from any existing liability upon dissolution of the partnership by an agreement to that effect between himself, the partnership creditor and the person or partnership continuing the business; and such agreement may be inferred from the course of dealing between the creditor having knowledge of the dissolution and the person or partnership continuing the business.

(3) Where a person agrees to assume the existing obligations of a dissolved partnership, the partners whose obligations have been assumed shall be discharged from any liability to any creditor of the partnership who, knowing of the agreement, consents to a material alteration in the nature or time of payment of such obligations.

(4) The individual property of a deceased partner shall be liable for all obligations of the partnership incurred while he was a partner but subject to the prior payment of his separate debts.

Sec. 37. Right To Wind Up.—Unless otherwise agreed the partners who have not wrongfully dissolved the partnership or the legal representative of the last surviving partner, not bankrupt, has the right to wind up the partnership affairs: *Provided, however,* That any partner, his legal representative or his assignee, upon cause shown, may obtain winding up by the court.

Sec. 38. Rights of Partners to Application of Partnership Property.—(1) When dissolution is caused in any way, except in contravention of the partnership agreement, each partner, as against his copartner and all persons claiming through them in respect of their interests in the partnership, unless otherwise agreed, may have the partnership property applied to discharge its liabilities, and the surplus applied to pay in cash the net amount owing to the respective partners. But if dissolution is caused by expulsion of a partner bona fide under the partnership agreement and if the expelled partner is discharged from all partnership liabilities, either by payment or agreement under section 36(2), he shall receive in cash only the net amount due him from the partnership.

(2) When dissolution is caused in contravention of the partnership agreement the rights of the partners shall be as follows:

(a) Each partner who has not caused dissolution wrongfully shall have—

(I) all the rights specified in paragraph (1) of this section, and

(II) the right, as against each partner who has caused the dissolution wrongfully, to damages for breach of the agreement.

(b) The partners who have not caused the dissolution wrongfully, if they all desire to continue the business in the same name, either by themselves or jointly with others, may do so, during the agreed term for the partnership and for that purpose may possess the partnership property, provided they secure the payment by bond approved by the court, or pay to any partner who has caused the dissolution wrongfully, the value of his interest in the partnership at the dissolution, less any damages recoverable under clause (2)(a)(II) of this section, and in like manner indemnify him against all present or future partnership liabilities.

(c) A partner who has caused the dissolution wrongfully shall have—

(I) if the business is not continued under the provisions of paragraph (2)(b) all the rights of a partner under paragraph (1), subject to clause (2)(a)(II) of this section,

(II) if the business is continued under paragraph (2)(b) of this section, the right as against his copartners and all claiming through them in respect of their interests in the partnership to have the value of his interest in the partnership, less any damages caused to his copartners by the dissolution, ascertained and paid to him in cash, or the payment secured by bond approved by the court, and to be released from all existing liabilities of the partnership; but in ascertaining the value of the partner's interest the value of the goodwill of the business shall not be considered.

Sec. 39. Rights Where Partnership Is Dissolved for Fraud or Misrepresentation.—Where a partnership contract is rescinded on the ground of the fraud or misrepresentation of one of the parties thereto, the party entitled to rescind is, without prejudice to any other right, entitled—

(a) to a lien on, or right of retention of, the surplus of the partnership property after satisfying the partnership liabilities to third persons for any sum of money paid by him for the purchase of an interest in the partnership and for any capital or advances contributed by him; and

(b) To stand, after all liabilities to third persons have been satisfied, in the place of the creditors of the partnership for any payments made by him in respect of the partnership liabilities; and

(c) To be indemnified by the person guilty of the fraud or making the representation against all debts and liabilities of the partnership.

Sec. 40. Rules for Distribution.—In settling accounts between the partners after dissolution, the following rules shall be observed, subject to any agreement to the contrary:

(a) The assets of the partnership are—

(I) the partnership property,

(II) the contributions of the partners necessary for the payment of all the liabilities specified in clause (b) of this paragraph.

(b) The liabilities of the partnership shall rank in order of payment, as follows:

(I) Those owing to creditors other than partners,

(II) Those owing to partners other than for capital and profits,

(III) Those owing to partners in respect of capital,

(IV) Those owing to partners in respect of profits.

(c) The assets shall be applied in the order of their declaration in clause (a) of this paragraph to the satisfaction of the liabilities.

(d) The partners shall contribute, as provided by section 18(a), the amount necessary to satisfy the liabilities; but if any, but not all, of the partners are insolvent, or, not being subject to process, refuse to contribute, the other partners shall contribute their share of the liabilities, and, in the relative proportions in which they share the profits, the additional amount necessary to pay the liabilities.

(e) An assignee for the benefit of creditors or any person appointed by the court shall have the right to enforce the contributions specified in clause (d) of this paragraph.

(f) Any partner or his legal representative shall have the right to enforce the contributions specified in clause (d) of this paragraph, to the extent of the amount which he has paid in excess of his share of the liability.

(g) The individual property of a deceased partner shall be liable for the contributions specified in clause (d) of this paragraph.

(h) When partnership property and the individual properties of the partners are in possession of a court for distribution, partnership creditors shall have priority on partnership property and separate creditors on individual property, saving the rights of lien or secured creditors as heretofore.

(i) Where a partner has become bankrupt or his estate is insolvent the claims against his separate property shall rank in the following order:

(I) Those owing to separate creditors,

(II) Those owing to partnership creditors,

(III) Those owing to partners by way of contribution.

Sec. 41. Liability of Persons Continuing the Business in Certain Cases.—(1) When any new partner is admitted into an existing partnership, or when any partner retires and assigns (or the representative of the deceased partner assigns) his rights in partnership property to two or more of the partners, or to one or more of the partners and one or more third persons, if the business is continued without liquidation of the partnership affairs, creditors of the first or dissolved partnership are also creditors of the partnership so continuing the business.

(2) When all but one partner retire and assign (or the representative of a deceased partner assigns) their rights in partnership property to the remaining partner, who continues the business without liquidation of partnership affairs, either alone or with others, creditors of the dissolved partnership are also creditors of the person or partnership so continuing the business.

(3) When any partner retires or dies and the business of the dissolved partnership is continued as set forth in paragraphs (1) and (2) of this section, with the consent of the retired partners or the representative of the deceased partner, but without any assignment of his right in partnership property, rights of creditors of the dissolved partnership and of the creditors of the person or partnership continuing the business shall be as if such assignment had been made.

(4) When all the partners or their representatives assign their rights in partnership property to one or more third persons who promise to pay the debts and who continue the business of the dissolved partnership, creditors of the dissolved partnership are also creditors of the person or partnership continuing the business.

(5) When any partner wrongfully causes a dissolution and the remaining partners continue the business under the provisions of section 38(2)(b), either alone or with others, and without liquidation of the partnership affairs, creditors of the dissolved partnership are also creditors of the person or partnership continuing the business.

(6) When a partner is expelled and the remaining partners continue the business either alone or with others, without liquidation of the partnership affairs, creditors of the dissolved partnership are also creditors of the person or partnership continuing the business.

(7) The liability of a third person becoming a partner in the partnership continuing the business, under this section, to the creditors of the dissolved partnership shall be satisfied out of partnership property only.

(8) When the business of a partnership after dissolution is continued under any conditions set forth in this section, the creditors of the dissolved partnership, as against the separate creditors of the retiring or deceased partner or the representatives of the deceased partner, have a prior right to any claim of the retired partner or the representative of the deceased partner against the person or partnership continuing the business on account of the retired or deceased partner's interest in the dissolved partnership or on account of any consideration promised for such interest or for his right in partnership property.

(9) Nothing in this section shall be held to modify any right of creditors to set aside any assignment on the ground of fraud.

(10) The use by the person or partnership continuing the business of the partnership name, or the name of a deceased partner as part thereof, shall not of itself make the individual property of the deceased partner liable for any debts contracted by such person or partnership.

Sec. 42. Rights of Retiring or Estate of Deceased Partner When the Business Is Continued.—When any partner retires or dies, and the business is continued under any of the conditions set forth in section 41 (1), (2), (3), (5), (6), or section 38(2)(b), without any settlement of accounts as between him or his estate and the person or partnership continuing the business, unless otherwise agreed, he or his legal representative, as against such persons or partnership, may have the value of his interest at the date of dissolution ascertained, and shall receive as an ordinary creditor an amount equal to the value of his interest in the dissolved partnership with interest, or, at his option or at the option of his legal representative, in lieu of interest, the profits attributable to the use of his right in the property of the dissolved partnership; provided that the creditors, or the representative of the retired or deceased creditors of the dissolved partnership as against the separate partner, shall have priority on any claim arising under this section, as provided by section 41(8) of this Act.

Sec. 43. Accrual of Right to Account.—The right to an account of his interest shall accrue to any partner, or his legal representative, as against the winding up partners or the surviving partners or the person or partnership continuing the business, at the date of dissolution, in the absence of any agreement to the contrary.

Mr. WHITENER. Mr. Speaker, the purpose of the bill is to establish statutory authority for the formation and conduct of partnerships in the District of Columbia, and to make the law more certain and uniform with respect thereto by enacting into law the Uniform Partnership Act, already in effect in three-fourths of the States.

Existing law in the District of Columbia was enacted over 60 years ago—act of March 3, 1901, 31 Stat. 1414; District of Columbia Code, 1961 edition, sections 41-201 through 41-204—and has been in effect without change or modification since. Inadequate of itself, nevertheless it will be retained as a desirable supplement to the more basic and fundamental provisions of H.R. 12675.

The Uniform Partnership Act was approved by the National Conference of Commissioners on Uniform State Laws in 1914, and by the American Bar Association the following year. Since then, it has been adopted by and is in effect in 39 States, including Maryland—in 1916—and Virginia—in 1918.

The present statutory law in the District of Columbia is most inadequate and extremely limited in application. It applies solely to the composition by a partner of his liability to a partnership creditor upon dissolution of the partnership.

This aspect of partnership law, though important, is only a small part of the general body of partnership law as developed through the centuries by courts in this country and abroad. Existing law in the District does not cover the more basic and fundamental facets of partnership law such as, first, the nature of the partnership relationship itself; second, the relationship of the partners inter se; third, the property rights of partners; fourth, the dissolution and termination of the partnership; and, fifth, relations of the partners to third persons dealing with the partnership other than the composition of liability therewith upon dissolution of the partnership. These are embodied in the Uniform Partnership Act embraced within H.R. 12675.

Uniformity of law becomes a practical necessity in a metropolitan area such as this, where the zone of commercial activity spans three separately governed jurisdictions. Frequently, residents of Virginia and Maryland desire to join together with District of Columbia residents to conduct a partnership business which may be located in any one or all three jurisdictions. Enactment of the reported bill would eliminate many incongruities and inequities implicit in such circumstances by bringing the law of the District into conformity with the laws of its neighboring States, Maryland and Virginia.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONCERNING GIFTS TO MINORS IN DISTRICT OF COLUMBIA

Mr. WHITENER. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 11018) to amend the act concerning gifts to minors in the District of Columbia, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act concerning gifts of securities to minors in the District of Columbia", approved August 3, 1956 (70 Stat. 1028; D.C. Code, sec. 21-214), is amended to read as follows:

"Section 1. As used in this Act, the following terms shall have the meaning ascribed to each:

"(1) 'Adult': one who has attained the age of twenty-one years.

"(2) 'Bank': any person or association of persons carrying on the business of banking, whether incorporated or not, in the District of Columbia.

"(3) 'Broker': one who is lawfully engaged in the business of effecting transactions in securities for the account of others; a bank which effects such transactions; and one who is lawfully engaged in buying and selling securities for his own account, through a broker or otherwise, as a part of a regular business.

"(4) 'Court': The United States District Court for the District of Columbia.

"(5) 'Custodial property':

"(A) All securities and money, under the supervision of the same custodian for the same minor as a consequence of a gift or gifts made to the minor in the manner prescribed in this Act;

"(B) The income from the custodial property; and

"(C) The proceeds, immediate and remote, from the sale, exchange, conversion, investment, reinvestment, or other disposition of such securities, money, and income.

"(6) 'Custodian': one so designated in the manner prescribed in this Act.

"(7) 'Guardian of a minor': the general guardian, guardian, tutor, or curator of the minor's property, estate or person.

"(8) 'Issuer': one who places or authorizes the placing of his name on a security (other than as a transfer agent) to evidence that it represents a share, participation or other interest in his property or in an enterprise or to evidence his duty or undertaking to perform an obligation evidenced by the security, or who becomes responsible for or in place of any such person.

"(9) 'Legal representative': the executor or the administrator, general guardian, committee, conservator, tutor, or curator of a person's property or estate.

"(10) 'Member of a minor's family': any of the minor's parents, grandparents, brothers, sisters, uncles, and aunts, whether of the whole blood or the half blood, or by or through legal adoption.

"(11) 'Minor': one who has not attained the age of twenty-one years.

"(12) 'Security': any note, stock, treasury stock, bond, debenture, evidence of indebtedness, certificate of interest or participation in an oil, gas, or mining title or lease or in payments out of production under such a title or lease, collateral trust certificate, transferable share, voting trust certificate, or, in general, any interest or instrument commonly known as an interim certificate, receipt, or certificate of deposit for, or any warrant or right to subscribe to or purchase, any of the foregoing. 'Security' does not include a security of which the donor is the issuer. A 'security' is in 'registered form' when it specifies a person entitled to it or to the right it evidences and its transfer may be registered upon books maintained for that purpose by or on behalf of the issuer.

"(13) 'Transfer agent': one who acts as authenticating trustee, transfer agent, registrar, or other agent for an issuer in the registration of transfers of its securities or in the issue of new securities or in the cancellation of surrendered securities.

"(14) 'Trust company': a bank authorized to exercise trust powers.

"SEC. 2. (a) An adult may, during his lifetime, make a gift of a security or money, to one who is a minor on the date of the gift, if the subject of the gift is a security—

"(1) in registered form, by registering it in the name of the donor, another adult, or a trust company followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act';

"(2) not in registered form, by delivering it to an adult other than the donor or a trust company, accompanied by a statement of gift in the following form, in substance, signed by the donor and the designated custodian:

"GIFT UNDER THE DISTRICT OF COLUMBIA UNIFORM GIFTS TO MINORS ACT

"I, (name of donor), hereby deliver to (name of custodian) as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act, the following security(ies); (insert an appropriate description of the security or securities delivered sufficient to identify it or them).

____

(signature of donor)

Dated:______________

(Name of custodian) hereby acknowledges receipt of the above described security(ies) as custodian for the above minor under the above Act.

____

(signature of custodian)

Dated:______________

"(3) If the subject of the gift is money, by paying or delivering it to a broker or a bank for credit to an account in the name of the donor, another adult, or a bank with trust powers, followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act'.

"(b) Any gift made in the manner prescribed in subsection (a) may be made to only one minor.

"(c) A donor who makes a gift to a minor as prescribed in subsection (a) shall promptly do all things within his power to put the subject of the gift in the possession and control of the custodian, but neither the donor's failure to comply with this subsection, nor his designation of an ineligible person as custodian, nor renunciation by the person designated as custodian shall affect the consummation of the gift.

"SEC. 3. (a) A gift made as prescribed in this Act shall be irrevocable and convey to the minor indefeasibly vested legal title to the security or money, given, but no guardian of the minor shall have any right, power, duty, or authority with respect to the custodial property except as provided in this Act.

"(b) By making a gift in the manner prescribed in this Act, the donor incorporates in his gift all the provisions thereof and grants to the custodian, and to any issuer, transfer agent, bank, broker, or third person dealing with a custodian, the respective powers, rights, and immunities provided in this Act.

"SEC. 4. (a) Only one person may be the custodian. He shall collect, hold, manage, invest, and reinvest the custodial property.

"(b) The custodian shall pay over to the minor for expenditure by him, or expend for the minor's benefit, so much of or all the custodial property as the custodian deems advisable for the support, maintenance, education, and benefit of the minor in the manner, at the time or times, and to the extent that the custodian in his discretion deems suitable and proper, with or without court order, with or without regard to the duty of himself or of any other person to support the minor or his ability to do so, and with or without regard to any other income or property of the minor which may be applicable or available for any such purpose.

"(c) The court, on the petition of a parent or guardian of the minor or of the minor, if he has attained the age of fourteen years, may order the custodian to pay over to the minor for expenditure by him or to expend so much of or all the custodial property as is necessary for the minor's support, maintenance, or education.

"(d) To the extent that the custodial property is not so expended, the custodian shall deliver or pay it over to the minor on his attaining the age of twenty-one years or, if the minor dies before attaining that age, he shall thereupon deliver or pay it over to the estate of the minor.

"(e) The custodian, notwithstanding statutes restricting investments by fiduciaries, shall invest and reinvest the custodial property as would a prudent person of discretion and intelligence who is seeking a reasonable income and the preservation of capital, except that he may, in his discretion and without liability to the minor or his estate, retain a security given to the minor in the manner prescribed in this Act.

"(f) The custodian may sell, exchange, convert, or otherwise dispose of custodial property in the manner, at the time or times, for the price or prices, and upon the terms he deems advisable. He may vote in person or by general or limited proxy a security which is custodial property. He may consent, directly or through a committee or other agent, to the reorganization, consolidation, merger, dissolution, or liquidation of an issuer, a security which is custodial property, and to the sale, lease, pledge, or mortgage of any property by or to such an issuer, and to any other action by such an issuer. He may execute and deliver any and all instruments in writing which he deems advisable to carry out any of his powers as custodian.

"(g) The custodian shall register each security which is custodial property and in registered form in the name of the custodian, followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act'. He shall hold all money which is custodial property in an account with a broker or in a bank in the name of the custodian, followed, in substance, by the same words. He shall keep all other custodial property separate and distinct from his own property in a manner to identify it clearly as custodial property.

"(h) The custodian shall keep records of all transactions with respect to the custodial property, and make them available for inspection at reasonable intervals by a parent or legal representative of the minor or by the minor, if he has attained the age of fourteen years.

"(i) A custodian shall have and hold as powers in trust, with respect to the custodial property, in addition to the rights and powers provided in this Act, all the rights and powers which a guardian has with respect to property not held as custodial property.

"SEC. 5. (a) A custodian shall be entitled to reimbursement from the custodial property for his reasonable expenses incurred in the performance of his duties.

"(b) A custodian may act without compensation for his services.

"(c) Unless the custodian is a donor, he may receive from the custodial property reasonable compensation for his services determined by one of the following standards in the following order:

"(1) A direction by the donor when the gift is made;

"(2) Any statute of the District of Columbia applicable to custodians;

"(3) Any statute of the District of Columbia applicable to guardians;

"(4) An order of the court.

"(d) Except as otherwise provided in this Act, a custodian shall not be required to give a bond for the performance of his duties.

"(e) A custodian not compensated for his services shall not be liable for losses to the custodial property unless they result from his bad faith, intentional wrongdoing, or gross negligence or from his failure to maintain the standard of prudence in investing the custodial property provided in this Act.

"SEC. 6. (a) Only an adult member of the minor's family, a guardian of the minor, or a trust company shall be eligible to become successor custodian. A successor custodian shall have all the rights, powers, duties, and immunities of a custodian designated in the manner prescribed by this Act.

"(b) A custodian, other than the donor, may resign and designate his successor by—

"(1) executing an instrument of resignation designating the successor custodian; and

"(2) causing each security which is custodial property and in registered form to be registered in the name of the successor custodian followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act'; and

"(3) delivering to the successor custodian the instrument of resignation, each security registered in the name of the successor custodian, and all other custodial property together with any additional instruments required for the transfer thereof.

"(c) A custodian, whether or not a donor, may petition the court for permission to resign and for the designation of a successor custodian.

"(d) If the person designated as custodian is not eligible, renounces or dies before the minor attains the age of twenty-one years, the guardian of the minor shall be successor custodian. If the minor has no guardian, a donor, his legal representative, the legal representative of the custodian, an adult member of the minor's family, or the minor, if he has attained the age of fourteen years, may petition the court for the designation of a successor custodian.

"(e) A donor, the legal representative of a donor, an adult member of the minor's family, a guardian of the minor or the minor, if he has attained the age of fourteen years, may petition the court that, for cause shown in the petition, the custodian be removed and a successor custodian be designated or, in the alternative, that the custodian be required to give bond for the performance of his duties.

"(f) Upon the filing of a petition as provided in this section, the court shall grant an order, directed to the persons and returnable on such notice as the court may require, to show cause why the relief prayed for in the petition should not be granted and, in due course, grant such relief as the court finds to be in the best interests of the minor.

"SEC. 7. (a) The minor, if he has attained the age of fourteen years, or the legal representative of the minor, an adult member of the minor's family, or a donor or his legal representative may petition the court for an accounting by the custodian or his legal representative.

"(b) The court, in a proceeding under this Act or otherwise, may require or permit the custodian or his legal representative to account and, if the custodian is removed, shall so require and order delivery of all custodial property to the successor custodian and the execution of all instruments required for the transfer thereof.

"SEC. 8. No issuer, transfer agent, bank, broker, or other person acting on the instructions of or otherwise dealing with any person purporting to act as a donor or in the capacity of a custodian shall be responsible for determining whether the person designated by the purported donor or purporting to act as a custodian has been duly designated or whether any purchase, sale, or transfer to or by or any other act of any person purporting to act in the capacity of custodian is in accordance with or authorized by this Act, and shall not be obliged to inquire into the validity or propriety under the provisions of this Act of any instrument or instructions executed or given by a person purporting to act as a donor or in the capacity of a custodian, and shall not be bound to see to the application by any person purporting to act in the capacity of a custodian of any money or other property paid or delivered to him.

"SEC. 9. (a) The provisions of this Act shall be construed to effectuate the general purpose thereof to make uniform the law of those States which enact such provisions.

"(b) This Act shall not be construed as providing an exclusive method for making gifts to minors.

"SEC. 10. If any provision of this Act or the application thereof is held invalid, the other provisions or applications of such provisions shall not be affected thereby.

"SEC. 11. This Act may be cited as the 'District of Columbia Uniform Gifts to Minors Act'."

SEC. 2. (a) All laws or parts of laws in conflict with any provision of this Act are hereby repealed.

(b) The amendments made to the Act of August 3, 1956 (70 Stat. 1028; D.C. Code, secs. 21-214 et seq.), by the first section of this Act shall not affect any right or liability under such Act of August 3, 1956, existing on December 31, 1962.

SEC. 3. This Act shall take effect January 1, 1963.

With the following committee amendments:

On page 2, line 12, strike out "and money" and insert in lieu thereof ", money, life insurance and annuity contracts".

On page 2, line 21, following the word "money," insert "life insurance and annuity contracts,".

On page 3, immediately after line 13, insert the following:

" 'Life insurance and annuity contracts': shall include only insurance and annuity contracts on the life of a minor or a member of the minor's family as herein defined."

On page 3, lines 14, 18, and 20, strike out "(10)", "(11)", and "(12)", and insert in lieu thereof "(11)", "(12)", and "(13)" respectively.

On page 4, line 2, strike out the word "an" and insert in lieu thereof: "a security, or any certificate of interest of participation in, any temporary or."

On page 4, lines 10 and 15, strike out "(13)" and "(14)", and insert in lieu thereof "(14)" and "(15)", respectively.

On page 4, line 18, strike out "or money" and insert in lieu thereof ", money, life insurance or annuity contract".

On page 5, immediately before line 5, insert the following:

"(3) If the subject of the gift is a life insurance or annuity contract, the ownership of the contract shall be registered by the donor of such contract in his own name or in the name of an adult member of the guardian of the minor, followed by the words minor's family or in the name of any 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act', and such contract shall be delivered to the person in whose name it is thus registered as custodian. If the contract is registered in the name of the donor, as custodian, such registration shall of itself constitute the delivery required by this section."

On page 5, line 5, strike out "(3)" and insert in lieu thereof "(4)".

On page 6, line 7, strike out "or money" and insert in lieu thereof ", money, life insurance or annuity contract".

On page 6, line 14, immediately after "broker," insert "insurance company,".

On page 7, line 13, immediately after "or pay" insert "it".

On page 9, immediately after line 8, insert the following:

"(j) If the subject of the gift is a life insurance or annuity contract, the custodian shall have all of the incidents of ownership in the contract which he may hold as custodian to the same extent as if he were the owner thereof personally. The designated beneficiary of any such contract held by a custodian shall be the minor or, in the event of his death, the minor's estate."

On page 10, lines 11 and 12, strike out "member of the minor's family".

On page 10, line 22, immediately after "registered form" insert "and each life insurance or annuity contract".

On page 11, line 5, immediately after "successor custodian," insert "each life insurance or annuity contract registered in the name of the successor custodian,".

On page 12, line 20, immediately after "broker," insert "insurance company,".

The committee amendments were agreed to.

Mr. WHITENER. Mr. Speaker, the purpose of the bill is to substitute the "Uniform" Gifts to Minors Act for the present District of Columbia "Model" Gifts to Minors Act, approved August 3, 1956—70 Stat. 1028; District of Columbia Code, 1961 edition, sections 21-204 and the following. The effect will be to broaden the old "model" present law to permit gifts of money and insurance, as well as securities, to a minor; to enlarge the choice of custodians; and to permit compensation to said custodians.

Early experience in various States—14—with the Model Act led to the drafting of a shorter, improved version, called the Uniform Gifts to Minors Act, which was approved by the National Conference of Commissioners on Uniform State Laws and by the American Bar Association, and is the basis of H.R. 11018. The Uniform Act has had almost nationwide acceptance. As of today it has been enacted and is in effect in 47 States; only three—Alaska, Georgia, and New Jersey—and the District of Columbia still use the earlier model law.

H.R. 11018, as reported, defines "custodial property" to mean "securities, money, life insurance, and annuity contracts." Eight of the States which have adopted the Uniform Act, Illinois, Kentucky, New Hampshire, North Carolina, Ohio, Wisconsin, Massachusetts, and Michigan—likewise include "insurance" in their Uniform Acts. It is recommended by the American Life Convention and the Life Insurance Association of America, having a combined membership of 306 life insurance companies—representing 94 percent of the legal reserve life insurance business in the United States—150 of which do business in the District of Columbia.

The committee intends the phrase "life insurance" to include endowment policies, it having been advised by the local insurance associations that this is a proper interpretation of said language in this jurisdiction. The specific amendments reported with respect to insurance follow closely the provisions in the North Carolina and Kentucky statutes, and they restrict the life insurance under the bill to insurance on the life of a minor or a member of the minor's family.

With respect to custodians, the bill, as reported, provides that the donor may select as custodian any adult person in whom he has confidence, and this includes banks and trust companies. These, as well as the guardian of the minor, may also qualify as successor custodian.

Under present law, a custodian receives no compensation unless he is a court appointed guardian, and the property is held by him as guardian. To compensate the nonfamily types of custodians, permitted under the reported bill, provision is made to permit compensation to the custodians.

As with present law, the bill provides that the gifts permitted under the bill vest indefeasible legal title in the minor, and may not be revoked by the donor. The bill also follows the Uniform Act by broadening existing law to permit gifts of money for investment under the "prudent man" rule prescribed in section 4(e).

No opposition to the bill was expressed in the public hearings held. In addition to those mentioned, the Bar Association of the District of Columbia, the Association of Stock Exchange Firms of New York, and the Board of Commissioners of the District of Columbia also urge the passage of this bill.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REPORTS OF COLLISIONS IN DISTRICT OF COLUMBIA

Mr. WHITENER. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill—H.R. 8737—to amend section 10 of the District of Columbia Traffic Act, 1925, as amended, so as to require reports of collisions in which motor vehicles are involved, and ask unanimous consent that it be considered in the House as in Committee of the Whole.

The **SPEAKER.** Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 10 of the District of Columbia Traffic Act, 1925, as amended (43 Stat. 1124; sec. 40-609(a), D.C. Code, 1951 ed.), is amended (a) by adding at the end of the first paragraph the following: "In addition to the preceding requirements with respect to the action to be taken immediately in cases involving personal injury or substantial damage to property, every person who, in the District of Columbia, operates a motor vehicle which is involved in a collision with any person or object, shall, within forty-eight hours from the time such collision occurs, make a written report thereof to the Chief of Police, on a form prescribed by him. Such written report shall be made without regard to the extent or amount of the damage or degree of personal injury resulting from such collision. In the event the operator of a motor vehicle involved in a collision is injured or otherwise disabled to such an extent as to render him incapable, in the opinion of his attending physician, of making any report of the collision within the time required by this subsection, such operator shall make such report within forty-eight hours after the date on which, in the opinion of his attending physician, he can reasonably be expected to have recovered from his injury or other disability to the extent of being able to prepare and submit the required report."; and (b) by striking "substantial" in the third paragraph.

SEC. 2. Nothing in this Act shall be construed so as to affect the authority vested in the Commissioners by Reorganization Plan Numbered 5 of 1952 (66 Stat. 824). The performance of any function vested by this Act in the Commissioners or in any office or agency under the jurisdiction and control of said Commissioners may be delegated by said Commissioners in accordance with section 3 of such plan.

With the following committee amendments:

Page 2, beginning line 1, strike out the words "with any person or object, shall, within forty-eight hours from the time such collision occurs" and substitute in lieu thereof the words "which has resulted in damage to the property of any one person in excess of $100 or in bodily injury to or in the death of any person, shall immediately".

Page 2, line 5, strike out the words "extent or amount of the damage or".

Page 2, line 10, strike out the words "within the time" and substitute in lieu thereof the word "as".

The committee amendments were agreed to.

Mr. WHITENER. Mr. Speaker, at present, only those motor vehicle collisions in the District of Columbia which involve personal injury are required to be reported to the Police Department. In addition, collisions which result in property damage in excess of $100 must be reported to the District of Columbia Safety Responsibility Officer, who functions as part of the Department of Motor Vehicles. However, these reports do not reach the Police Department, and hence the only motor vehicle accidents not involving personal injury which come to the attention of the District of Columbia Police Department are those which are voluntarily reported to them.

This situation came to our attention a year or more ago, when it developed in a hearing that the Police Department was unable to furnish statistics as to the frequency of motor vehicle accidents in a certain heavily traveled area of the city, because only those accidents resulting in personal injury would necessarily have been reported to them.

We were informed that during fiscal year 1962, some 9,000 motor vehicle accidents involving substantial property damage in the District of Columbia were never reported in any way to the Police Department. This situation is unsatisfactory for several important reasons.

The safety responsibility officer's chief function is to ascertain the financial ability of the drivers of the vehicles in collisions to satisfy claims which are brought against them as a result, and in some cases to take steps which may lead to the suspension or revocation of drivers' permits. While this is of course a useful and important service, the fact remains that the Safety Responsibility Division cannot initiate court action against any of the drivers in these 9,000 accidents per year, and in many such cases, particularly those involving repeat offenders, legal prosecution is the only adequate means of serving the interest of public safety.

Also, the Police Department's accident reports are made available to the Bureau of Traffic Engineering of the District of Columbia Highway Department, where they serve as an invaluable guide to the identification of dangerous areas in the city's street system. The reports to the safety responsibility officer, on the other hand, are said not to be suitable for this purpose, and hence 9,000 possible indications of need for correction of perilous street conditions are lost each year.

I feel that these conditions should not be allowed to continue, and that the protection of the public demands the improvements which will be possible only when all such motor vehicle accidents are required to be reported immediately to the Chief of Police.

Mr. GROSS. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, will the gentleman give us a brief explanation of the purpose of this bill?

Mr. WHITENER. I am happy to. At present in the District of Columbia only those motor vehicle collisions which involve personal injury are required to be reported to the Police Department. In addition, collisions which result in property damage in excess of $100 must be reported to the safety responsibility officer through a functionary of the Department of Motor Vehicles. These reports do not reach the Police Department and therefore the only motor vehicle accidents not involving personal injury which come to the attention of the Police Department are those which are voluntarily reported to them.

Briefly, I can tell the gentleman that according to the testimony before the committee there were some 9,000 motor vehicle accidents involving substantial property damage in the District of Columbia during 1962 fiscal year which were never reported to the Police Department. This came up in the hearings on another matter before the subcommittee of which I am the chairman and hence this bill was introduced. While we feel that the reporting to the Safety Responsibility Division is important from the standpoint of civil damages and statistical data as to highway safety we also feel that the Police Department should be the recipient of this information where the damage exceeds $100 to the property of any person involved.

Mr. GROSS. The bill states as follows, "shall immediately make a written report thereof to the Chief of Police, on a form prescribed by him."

I take it that in the case of an accident involving an estimated damage of $100 or more, it would be sufficient for the person or persons involved in the accident to go to any precinct police station, and this would meet the requirement of making a report to the Chief of Police?

Mr. WHITENER. There is no question about that. In many cases the report can be made at the scene of the collision to the investigating officer.

Mr. GROSS. There is nothing in the bill to that effect. It says only that the report must be made to the Chief of

Police. The bill does not state that the report can be made to the investigating officer or to any precinct station. I am confident the gentleman is correct and it is my purpose only to establish legislative intent.

Mr. WHITENER. We have to presuppose as we use the words "Chief of Police" that we are referring to the Department. That is the intent, and I am sure that there will be no problem created by the legislation such as the gentleman means to convey.

Mr. GROSS. The gentleman probably cannot answer this question and I am not addressing it to him, but I assume that had the accident in which a Mr. Powers, an employee at the White House, and his family, was involved last Friday evening, using a White House car and an Army chauffeur to drive him to the President's rest haven up at Camp David, occurred in the District the details would have been reported to the police since there was at least one serious injury. I am sure the gentleman from North Carolina and the gentleman from Iowa regret injury to anyone in an accident, but otherwise we seem to be unable to find out how White House cars and White House rest havens are being used for the weekend pleasure of White House employees and their families. So if this bill will require a reporting of information that the public might not otherwise obtain, I am glad to support the legislation.

Mr. WHITENER. I am not familiar with the case the gentleman mentions.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MUNICIPAL COURT FOR THE DISTRICT OF COLUMBIA

Mr. WHITENER. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 12708) to increase the jurisdiction of the municipal court for the District of Columbia in civil actions, to change the names of the court, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the court established by the first section of the Act entitled "An Act to consolidate the Police Court of the District of Columbia and the Municipal Court of the District of Columbia, to be known as 'the Municipal Court for the District of Columiba', to create 'the Municipal Court of Appeals for the District of Columbia', and for other purposes", approved April 1, 1942, as amended (56 Stat. 190; D.C. Code, sec. 11-751), hereafter shall be known as the "District of Columbia Court of General Sessions". Whenever reference is made in any Act of Congress (other than this Act or the amendments made by this Act) or in any regulation to the Municipal Court for the District of Columbia, such reference shall be held to be a reference to the District of Columbia Court of General Sessions.

Sec. 2. Subsection (a) of section 4 of such Act, approved April 1, 1942, as amended (D.C. Code, sec. 11-755(a)), is amended to read as follows:

"(a) The District of Columbia Court of General Sessions, as established by this Act, shall consist of the criminal, civil, and small claims and conciliation, and domestic relations branches. The court and each judge thereof shall have and exercise the same powers and jurisdiction as were heretofore had or exercised by the Municipal Court for the District of Columbia or the judges thereof on the day before the effective date of this amendatory subsection, and in addition the said court shall have exclusive jurisdiction of civil actions commenced after the effective date of this amendatory subsection, including such actions against executors, administrators and other fiduciaries, in which the claimed value of personal property or the debt or damages claimed, does not exceed the sum of $10,000 exclusive of interest and costs, and, in addition, shall have jurisdiction of all cross-claims and counterclaims interposed in all actions over which it has jurisdiction regardless of the amount involved: *Provided, however,* That nothing herein shall deprive the United States District Court for the District of Columbia of jurisdiction over counterclaims, cross-claims, or any other claims whether or not arising out of the same transaction or occurrence and interposed in actions over which the United States District Court for the District of Columbia has jurisdiction. The District of Columbia Court of General Sessions shall also have jurisdiction over all cases properly pending in the Municipal Court for the District of Columbia on the effective date of this amendatory subsection."

Sec. 3. Subsection (a) of section 5 of such Act approved April 1, 1942, as amended (D.C. Code, sec. 11-756(a)), is amended to read as follows:

"(a) If, in any action, other than an action for equitable relief, pending on the effective date of this amendatory subsection or thereafter commenced in the United States District Court for the District of Columbia, it shall appear to the satisfaction of the court at or subsequent to any pretrial hearing but prior to trial thereof that the action will not justify a judgment in excess of $10,000, the court may certify such action to the District of Columbia Court of General Sessions for trial. The pleadings in such action, together with a copy of the docket entries and of any orders theretofore entered therein, shall be sent to the clerk of the said Court of General Sessions, together with any deposit for costs, and the case shall be called for trial in that court promptly thereafter; and shall thereafter be treated as though it had been filed originally in the said Court of General Sessions, except that the jurisdiction of that court shall extend to the amount claimed in such action, event though it exceed the sum of $10,000."

Sec. 4. Subsection (c) of section 5 of such Act approved April 1, 1942, as amended (D.C. Code, sec. 11-756(c)), is amended to read as follows:

"(c) The District of Columbia Court of General Sessions shall have the power to compel the attendance of witnesses by attachment and any judge thereof shall have the power in any case or proceeding whether civil or criminal to punish for disobedience of any order, or contempt committed in the presence of the court by a fine not exceeding $50 or imprisonment not exceeding thirty days. At the request of any party subpenas for attendance at a hearing or trial in the District of Columbia Court of General Sessions shall be issued by the clerk of the said court. A subpena may be served at any place within the District of Columbia, or at any place without the District of Columbia that is within one hundred miles of the place of the hearing or trial specified in the subpena. The form, issuance and manner of service of a subpena shall be as prescribed by Rule 45 of the Federal Rules of Civil Procedure."

Sec. 5. (a) Section 1114 of the Act entitled "An Act to establish a code of law for the District of Columbia", approved March 3, 1901 (31 Stat. 1189; D.C. Code, sec. 11-1520), is hereby repealed.

(b) The paragraph relating to witness fees under the heading "District of Columbia" in the Act entitled "An Act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June thirtieth, nineteen hundred and two, and for prior years, and for other purposes", approved July 1, 1902 (32 State 552, 561; D.C. Code, sec. 11-1520a), is amended by striking "cases in the police court of the District of Columbia" and inserting in lieu thereof "criminal cases in the District of Columbia Court of General Sessions".

(c) The fees and travel allowances to be paid any witness compelled by subpena to attend any branch of the District of Columbia Court of General Sessions other than the criminal branch shall be the same amount as paid a witness compelled to attend before the United States District Court for the District of Columbia.

Sec. 6. The court established by section 6 of the Act of April 1, 1942 (56 Stat. 190; D.C. Code, sec. 11-771), hereafter shall be known as the "District of Columbia Court of Appeals". Wherever reference is made in any Act of Congress (other than this Act) or in any regulation to the Municipal Court of Appeals for the District of Columbia, such reference shall be held to be a reference to the District of Columbia Court of Appeals.

Sec. 7. This Act shall take effect on the first day of the first month which begins after the sixtieth day following the date of its enactment.

Mr. WHITENER. Mr. Speaker, the pending measure, H.R. 12708, a bill to increase the jurisdiction of the municipal court for the District of Columbia, to change its names, and for other purposes, is a clean bill. Following hearings on the original bill, H.R. 12202, by a subcommittee of the Committee on the District of Columbia, changes were approved by the subcommittee and H.R. 12708 was introduced.

The purposes of H.R. 12708 are the following: First, to change the name of the municipal court of the District of Columbia to the District of Columbia Court of General Sessions; second, to change the jurisdiction of the court as to the value in controversy by increasing the amount from the present maximum of $3,000 to $10,000; to give the court of general sessions the power to secure the attendance of witnesses within a radius of 100 miles of the place of the hearing or trial; and third, to change the name of the municipal court of appeals of the District of Columbia to the District of Columbia Court of Appeals.

The present maximum jurisdiction amount for the municipal court was established at $3,000 by the act of April 1, 1942—56 Stat. 190. In 1958, when Congress was studying methods of relieving the U.S. district courts of their increasing burden, it was proposed that the jurisdictional amount of the U.S. district courts be increased to a minimum of $10,000.

Such legislation—Public Law 85-554; 72 Stat. 415—was approved and the new jurisdictional minimum has been operative in other U.S. district court jurisdictions but not in the District of Columbia.

The question of increasing the jurisdictional amount of the municipal court of the District of Columbia from $3,000 to $10,000 and the proposal to empower the court to secure attendance of witnesses within a radius of 100 miles came before the Judicial Conference for the District of Columbia in May 1960. Thereafter, study committees were set up to review the problems involved in the proposed changes and to make recommendations for legislative action. The study committee recommendations were reviewed and further views and recommendations were expressed by the judicial council, the judicial conference and the bar association. The pending bill, H.R. 12708, represents the product of this careful legislative effort.

At hearings on the legislation, the committee was advised that the bill was approved by the Judicial Conference for the District of Columbia, the Bureau of the Budget, the Commissioners for the District of Columbia, and the bar association. Favorable testimony was received by the committee in behalf of the chief judge of the U.S. District Court for the District of Columbia, and the chief judge of the U.S. Court of Appeals for the District of Columbia. Similar approval and support for the bill was expressed by representatives of the municipal court of appeals and the municipal court for the District of Columbia. No witness nor any communication to the committee expressed any objection to the legislation.

The first section of the bill provides that the municipal court established by the act of April 1, 1942, shall be known as the District of Columbia Court of General Session. This, the committee believes, is in keeping with the dignity and importance of the court.

Section 2 of the bill provides that the court of general sessions and its judges shall have the same powers and jurisdictions as were available to the court immediately preceding the effective date of these amendments. In addition, the court shall have exclusive jurisdiction of civil actions, including actions against executors, administrators and other fiduciaries where the value in controversy does not exceed $10,000, exclusive of interest and costs. The court of general sessions shall also have jurisdiction of all cross-claims and counterclaims interposed in all actions regardless of the amount of such claims. The section also assures that the U.S. District Court for the District of Columbia shall continue to exercise the same powers as to all actions over which it has jurisdiction.

Section 3 provides that in any action for other than equitable relief, pending on the effective date of these amendments or commenced thereafter in the U.S. District Court for the District of Columbia, if the court is satisfied at or after any pretrial hearing but before trial that the action will not justify a judgment in excess of $10,000, the court may certify the action to the District of Columbia Court of General Sessions. In such case, the pleadings, docket entries, court orders, and any deposit for costs shall be sent to the clerk of the court of general sessions. The case shall be treated as though it had been originally filed in the court of general sessions which shall have jurisdiction even though the amount claimed is in excess of $10,000.

Under the terms of section 4, the court of general sessions is given the power to compel the attendance of witnesses in cases pending before it and enforce its orders. The court may serve subpenas within a 100-mile radius of the place of hearing or trial. The procedure for the service of subpena shall be as prescribed in rule 45 of the Federal Rules of Civil Procedure.

Section 5 of the bill repeals the present provisions of law as to the payment of fees and travel allowances to witnesses in civil cases who are compelled to attend the municipal court of the District of Columbia and provides that such fees and travel allowances shall be the same as in cases before the U.S. District Court for the District of Columbia. This section also continues the present witness fees for the court of general sessions as are provided for the municipal court in criminal cases.

Section 6 of the bill provides for the changing of the name of the "District of Columbia Municipal Court of Appeals" to the "District of Columbia Court of Appeals."

Section 7 provides the effective date for the act. This date is the first day of the first month which begins 60 days after the enactment of the bill.

This bill, H.R. 12708, was reported to the House by the full Committee on the District of Columbia, all members present concurring in recommendation of its approval by the House.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDMENT OF FOREIGN SERVICE BUILDINGS ACT, 1926

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 741 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11880) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. DAVIS of Tennessee. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

The SPEAKER pro tempore. On this rollcall, 303 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

AMENDING THE FOREIGN SERVICE BUILDINGS ACT

The SPEAKER pro tempore. The Chair recognizes the gentleman from Indiana [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, I yield 30 minutes to the gentleman from California [Mr. SMITH]; and pending that I yield myself such time as I may require.

Mr. Speaker, House Resolution 741 provides for the consideration of H.R. 11880, a bill to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations for the acquisition of sites and buildings in foreign countries for use by the United States, and for other purposes. The resolution provides for an open rule with 2 hours of general debate.

The purpose of H.R. 11880 is to authorize an appropriation of $31,806,000 for the purchase, construction, major alteration, and long-term leasing of buildings overseas needed by the Department of State in connection with the operation of its 293 posts. The amount authorized in the reported bill will make available to the Department sufficient funds to carry out the 2-year building program justified to the committee. The bill also authorizes the appropriation of such additional sums as may be necessary for the operational activities of the building program such as maintenance, repair, and furnishing. Finally, the bill deletes from existing law all references to the Foreign Service Buildings Commission.

Mr. Speaker, I urge the adoption of House Resolution 741.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 741 provides for the consideration of H.R. 11880, on an open rule with 2 hours of general debate.

The purpose of H.R. 11880 is to authorize an appropriation of $31,806,000 for the purchase, construction, major alteration and long-term leasing of buildings overseas which are maintained by the Department of State in connection with the operation of its 293 posts. This is a 2-year building program. In addition to this money there will be approximately $11 million per year for alterations, repairs and the like.

There is undoubtedly some waste in this program. There are undoubtedly some buildings that will cost more than perhaps we should pay to construct them. But this is the type of program, in my opinion, that is extremely difficult to police. Certainly the Members of the House individually are not able to go around the world and check on the building of these various buildings to determine whether the cost is correct or whether we especially need them. In that regard we rely upon the committee.

The report, in my opinion, is a very good report. I think the testimony of the members of the committee before the Committee on Rules was entirely honest and straightforward.

When this program was originally submitted to the committee on a 4-year basis with $100 million requested, they sent it back to the administration, as I understand it, and said, "We will not do it on a 4-year basis, we are going to reduce this to a period of 2 years. You are asking for too much money." The administration came in with the request for a little over $40 million, and the committee has reduced that to about $32 million.

They have said in all honesty that there are too many people overseas. If they provide fewer facilities for them they think there may be less desire to send more people overseas.

I was impressed by the gentleman from Indiana [Mr. Adair] who stated that in his 10 years on this committee he believes this is the most thorough review this program has ever had. The gentleman from Ohio [Mr. Hays] was very straightforward in saying that the committee intended to police this program to see that there are no waste or unnecessary expenditures therein. We will probably have some questions on Africa, as to whether the buildings there are necessary.

I think the program was considered in a very able way by the committee. I support the bill, and I know of no objection to the rule.

Mr. MADDEN. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

Mr. HAYS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11880) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11880, with Mr. Davis of Tennessee in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. HAYS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I well realize that this piece of legislation is not one which will grip the Committee with consuming interest all the way through it, but I will say that the subcommittee of which I am chairman was faithful in its attendance. We did hear the administration witnesses and examined them thoroughly.

As has been stated in the debate on the rule, we told them to submit a 2-year program, that we felt 4 years was too long for us to give an authorization and try to police it. They did come back with a 2-year program.

We were concerned with the foreign buildings. We hope that we can reduce the amount of money we pay out in rents and quarters allowance and by acquisition we can save the Government money.

In the case of Africa which caused the most questioning in the Committee on Rules, we pointed out that we are paying at the present time in Africa the sum of $1,236,802 for leases. Many of these leases are written in such a way that when they expire, the rental goes up. Space is in very short supply in Africa and rentals are exceedingly high. We have a 2-year program of $5,747,000 for residential buildings which will take care of about half of the personnel that are presently in Africa. I might say, we lectured the Department at length about keeping the number of personnel down. If this building program is carried through, it will result in an annual savings in rents of $707,303 per year; or in 8 years we will have saved enough to pay for the cost of the building program.

The committee felt that this makes sense. We, therefore, have cut the requests for Africa less percentagewise than in any other area.

There were some questions about the situation in Paris. This is a matter to which the committee has given a good deal of study. The problem in Paris as it exists today is that the offices for American personnel are scattered all over the city. We own a lot of property in Paris. There are four different major locations. It is proposed to consolidate and to dispose of some of the property so as to get away from so much driving around from place to place, by consolidating our activities in one place. Although the total appropriation in the bill may seem large, actually the sale of property, the money from which will revert to the Treasury will cut that down to a rather negligible figure.

Mr. CEDERBERG. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman.

Mr. CEDERBERG. With reference to this Paris situation, can the gentleman enlighten us on just what is contemplated? As a member of the appropriations subcommittee handling this very same question, I wonder if the Department of State has really come to a decision as to what they are going to do in the way of consolidation and whether the matter of a new residence for the Ambassador has come up for discussion.

Mr. HAYS. As the gentleman, perhaps, knows, we have an embassy residence on the Avenue Gabrielle. At the moment it is proposed to sell that at quite a good price which is, I believe, approximately a million dollars. We also own property known as the Rothschild property which is about two doors from the chancellery. This property will need extensive rehabilitation, if it is to become usable. But, at the moment it is standing there almost unused. It is one of the most valuable pieces of real estate in Paris. Even by spending a considerable amount of money—more than we will get from the Avenue Gabrielle property—to rehabilitate it, it will be property which will be worth more and which, in my opinion, will go up in value all the time.

The gentleman is familiar with the situation in the Bois de Boulogne where the NATO building is. The French Government has just about agreed to let us have a piece of property directly across the circle which is now part of a park where we can put up an office building so that the people who are directly concerned with the NATO operations will be able to save a lot of time instead of having to drive through Paris from the Talleyrand Palace and other places through heavy traffic. This way they can merely walk across the street to NATO headquarters. But it is the opinion of the subcommittee that it will make a difference of about a million dollars which will be released from the sale of the property from what this program would cost not including the cost of construction of a new office building.

Mr. CEDERBERG. The reason I raise the question is because on this matter of consolidation, I believe, we have about five properties there now and, if I understand correctly, on the Avenue Gabrielle where the main Embassy is at the present time, that will remain intact and we will build another building to be used for the NATO building.

Mr. HAYS. That is correct.

Mr. CEDERBERG. So we will still have two buildings instead of five?

Mr. HAYS. That is right. Then the Ambassador's residence will be moved to the Rothschild property, which is about a half block from the chancellery. This will not require travel through heavy traffic.

Mr. CEDERBERG. The reason I have questioned the Ambassador's residence is because I recognize that in the neighborhood of the present Ambassador's residence you have a traffic problem that does cause some concern. However, in 1948 we paid $1,459,000 for this building and the gentleman knows that if we were to restore the present property it would cost another million and a half. I am taking figures from the hearings in the gentleman's committee. So the expense would be considerable.

I was over there with my colleague, the gentleman from California [Mr. LIPSCOMB]. We went through that Rothschild property. It seemed to us that this would be a good place to build an office building. I understand, however, that they want to be closer to NATO. I realize there are a lot of employees of the present Embassy working under almost intolerable conditions, but I have a deep and serious concern about the fact that we would have some $4 million tied up in a residence for the Ambassador, and that just seems to me exorbitant.

Mr. HAYS. I am sure the gentleman knows the nature of the property. It would be used not only for a residence but many offices would be in the area, so we would get some additional office space. It looks high as the gentleman states it, and his figures are as sound as anything any of us have, but when the gentleman realizes that the purchase of this property was made with counterpart funds, and they are funds we could not use except for acquisitions of this kind that we would probably have lost on conversion, the price is not so high, especially when it is realized we can sell the Avenue d'Ilena property.

Another factor that has to be considered is that it must be in keeping with other buildings in the area—the British Embassy is next to ours. Another factor is adequate space for conferences at the Presidential level and the secretarial level, a problem which arose, as the gentleman will remember, when former President Eisenhower was there with his staff.

The figures look high as the gentleman states them, but as you evaluate them further they do not seem so high.

Another factor that has to be taken into consideration is the Paris Beaux Arts Commission. While the Rothschild mansion may be a shell, French authorities do not want it turned into a high-rise office building.

Mr. CEDERBERG. I realize there is some question with the Beaux Arts people, but I understood that the office could be erected on the back side of the Rothschild property. I had understood the project could be handled so it would be in line with the regulations.

Mr. HAYS. The exterior would have to conform at least to the wishes of the Beaux Arts Commission. You cannot build a high-rise office building within the limitations. I do not know whether the gentleman is familiar with the site by the NATO building. There is space for an office building there no matter what we do with the Rothschild site.

Mr. CEDERBERG. If the gentleman will yield for another question, there is no escaping the fact that the present property needs modernizing; I think it certainly needs it. Is there any thought of moving the entire Embassy out to this NATO area now that we are getting this international complex out there?

Mr. HAYS. If there is, it has not been brought out. We feel this is a sensible solution. The committee was unanimous in its decision as was the subcommittee, and I am sure this can be testified to by the gentlewoman from Ohio [Mrs. BOLTON], and the gentleman from Ohio [Mr. ADAIR], who were very regular in attendance.

We were convinced that is the feasible thing to do, with a very little cash expenditure when you consider what we would be taking in.

Mr. BARRY. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from New York.

Mr. BARRY. The gentleman stated that this property was purchased with counterpart funds. Would the construction of a new building in NATO and the repair of the Rothschild Building be also with counterpart funds?

Mr. HAYS. We put in the report we expected them to use local currency funds whenever it was available and feasible. I understand there will be an amendment submitted which will write that into the bill. The committee is prepared to accept that amendment. We thought putting it in the report would do the job, but if it is written into the bill, that is fine with me and fine with the other members of the committee, because we consulted with them. Exactly what local currency funds are available in France I do not know, but I think there is sufficient that would probably see this thing through.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Iowa.

Mr. GROSS. On page 2 of the report it is stated that the subcommittee recommends $31,806,000. On page 5 of the report there is a table which states that the committee recommendation is $27,250,000. Can the gentleman tell me why this difference in figures?

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Indiana.

Mr. ADAIR. I have a copy of the bill here and I may say to the gentleman if he will turn to page 2 of the bill, paragraphs (F) and (G) will total to the amount necessary to increase the $27 million figure to the $31.8 million figure.

Mr. GROSS. So it is then as the committee report states on page 2, $31,806,000?

Mr. HAYS. Yes. That includes the U.S. Information Agency funds. The first figure included only the State Department.

Mr. GROSS. Is this the total expenditure for these buildings or is there other money authorized to be expended by way of counterpart funds that do not show up here?

Mr. HAYS. No. I will say to the gentleman we had intended, and had written into the bill, a continuing authorization for maintenance and repairs. In other words, under the present law, if the wind blows the roof off a building, they have to have money authorized and appropriated to fix it. We met with some questions and resistance in the Rules Committee, I will be very frank with the gentleman, so the committee has an amendment authorizing a specific fund for annual maintenance and repairs for 2 years. I propose at the proper place to offer that amendment. It will be on page 3, line 8, of the bill and will make specific authorization for each of the fiscal years 1963 and 1964. That will run in the neighborhood of $11 million a year. So that the total amount authorized and including new construction, the U.S. Information Agency, maintenance and repairs will total $53 million.

Mr. GROSS. The maintenance and repair item is in addition to the $31 million?

Mr. HAYS. Yes. The $31,806,000 is for acquisition and new construction.

Mr. GROSS. That will total around $50 million.

That would be, then, the total expenditure for new construction, for maintenance and repair, and for renovation and remodeling; is that approximately correct?

Mr. HAYS. That is correct.

Mr. GROSS. What is the situation then with respect to counterpart funds? Will they be purchased out of these funds?

Mr. HAYS. That is right. The local currency funds are held by the Treasury. If we authorize $53 million and if the Committee on Appropriations appropriates substantially that amount, wherever they use local currency funds, it would actually be a bookkeeping transaction. They would take dollars appropriated and pay the Treasury for the like amount of local currency funds and use that currency in construction.

I might tell the gentleman the total amount expended over the years for this program is about 85 percent in local currency funds and not in dollars. Page 4 of the committee report gives the details. We have had a very fine record on that. We have accumulated a substantial amount of property around the world for which we are not paying rent and which we obtained with money which we could not otherwise have used.

I might say further that out of around $241 million total expenditures—all but about $32 million have been local currency funds. About $209 million have been local currency funds.

Mr. GROSS. If the gentleman will yield further, we can thank the farmers of this country and their surpluses disposed of under Public Law 480 for some help in this direction—a small part of the help in this direction?

Mr. HAYS. Yes; very definitely. I would anticipate—and I am speaking only for myself—that there would be some Public Law 480 funds used in this particular program.

Mr. GROSS. I would hope so.

Mr. HAYS. And, the amendment will provide that to the maximum extent possible they be used. We hope that that will represent a very high and substantial amount.

Mr. GROSS. The gentleman spoke of space and rentals. I do not want to take all of the gentleman's time. Does the gentleman care to yield further?

Mr. HAYS. I would be glad to yield further to the gentleman from Iowa.

Mr. GROSS. The gentleman spoke of space being scarce and rentals high in Africa. The space would not be so scarce and the rentals so high if this Government did not have so many people over there. Does the gentleman agree or disagree with that statement?

Mr. HAYS. The gentleman will agree, and I am sure the distinguished gentleman from Iowa has probably read the hearings more thoroughly than anyone not on the committee.

Mr. GROSS. Yes, I have read the hearings, I will say to the gentleman and they are the most informative that have come out of the Foreign Affairs Committee in years. I commend the gentleman from Ohio and his subcommittee.

Mr. HAYS. The gentleman I think would find in the hearings that the chairman of the subcommittee who is now speaking lectured the representatives of the various agencies and departments repeatedly about the number of people they have. I think we have made some impression upon them, and we are going to keep on doing it, because I could not agree more that many of these African countries, as small as they are, with a small population require a certain basic number of people to run any kind of embassy, but there is no use ballooning the staffs. Therefore, we have made it perfectly clear that within a period of 2 years they are going to get into serious trouble if that situation is not corrected and if these staffs are not brought within reasonable figures.

Mr. GROSS. Is there any evidence of a change in this sort of a situation—and I gleaned this from your hearings—in the request for a $70,000 residence for the Ambassador in Uganda as well as a $175,000 house for the Ambassador in Somalia? Did the committee take a position with respect to changing those plans?

Mr. HAYS. Yes. The committee told them that it thought these figures were too high. I am sure the gentleman can gather this from the hearings: No one was harder on them than I was.

Mr. GROSS. I agree with that. The gentleman repeatedly made his position clear.

Mr. HAYS. But, taking Somalia, for example, it looks like a high figure, and it is a high figure. But one has to take into consideration the fact that there is no water supply, no sewage system, and there is no electricity for this Ambassador's residence and compound. We have to provide our own electrical plant, water system, and a sewage disposal system. These items are what runs the price up in that particular instance. I am against that kind of money being expended in any country like that. We made it clear to them that we expect those figures to be cut down. I am sure the gentleman read about the fight with reference to the Ambassador's residence in Cypress where they wanted $300,000 for the Ambassador's residence.

We told them that this was ridiculous and to forget the plans which they had for such construction, and to obtain some new ones and start over and cut it down at least by 50 percent or better.

If these people who represent the Department will do as we suggest—and frankly I say this without any fear of reservation—they will all try, and if I am chairman of the subcommittee when they come back in the next Congress and they have not done as the subcommittee has indicated or tried to save money, and hold down costs, they will have a real rough time getting any funds at all on which to operate in the future.

Mr. GROSS. Mr. Chairman, I hope that through this and other devices they will be impressed with the necessity of getting rid of some of the surplusage of personnel they have in these foreign countries. As the gentleman from Ohio well stated in the hearings time after time, "You have altogether too many chiefs for the number of Indians you have." I hope the committee will bear down and bear down hard upon this surplus of personnel overseas that brings about unnecessary spending to house and otherwise take care of them.

With respect to Somalia, the gentleman made a very good point in the hearings, I thought, that within 10 years or even less, there may be no Somalia as an independent country, as an entity. If that is true then this Government is going to spend a lot of money to really no good purpose.

Mr. HAYS. Mr. Chairman, I might tell the gentleman an interesting little story about that, and I think I shall take a minute to do it. He might be interested to know that the deskman for Africa came up and wanted me to delete that remark from the hearings because it might offend somebody in Somalia. I said, in the first place, I do not think anybody in Somalia is going to read these hearings; if they do and they are offended by an actual statement of fact, that is just too bad; they would have to be offended.

In other words, the people from the Department did not dictate to the subcommittee. We listened to them, we criticized them, sometimes we sympathized with them. But I think, and I am sure my colleagues on the gentleman's side of the aisle can testify, we made an impression on them.

Mr. GROSS. I thank the gentleman for yielding so much of his time and for his frankness in dealing with this subject.

Mrs. BOLTON. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I simply want to say that I echo in every regard what the chairman of the subcommittee has said. I have been on this committee some time and I can truthfully say that we have never had such thorough hearings, nor have we ever had such a responsive group from the administration. They listened to our complaints and assured us they would conform. We are going to see how much they really digested of what they were given.

The gentleman from Ohio [Mr. HAYS] is an exceedingly hard taskmaster, but he is exceedingly just. There were several times when he and I disagreed, but that is all right, too. The justice of his final word has been very much appreciated in the Department as well as by the other members of the subcommittee.

Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Chairman, I would urge the committee and the House to adopt this bill. It is a very carefully thought out and worked over piece of legislation. There are two or three things, perhaps, that might be pointed out about it in addition to what has already been said.

In the first place, when this legislation was brought before the subcommittee, it called for a 4-year program costing in the neighborhood of $100 million. It was immediately sent back with the admonition that we did not want that much of a program. When it was returned to us as a 2-year program, it called for the approximate amount of $40 million for the building and long-term leasehold aspects of it.

As has been pointed out, the subcommittee reduced that part of the bill to something over $31 million, a reduction of between $8 and $9 million.

The question always presents itself, I suppose, as to whether an authorization of this sort should be for the world at large without any regional political boundaries or whether it should be made for specific countries. The subcommittee chose neither. It chose, upon reflection and discussion, to make this authorization available by regions of the world. Those who are interested may refer to page 5 of the report and there find the five regions of the world, the amount of the executive request, and the committee recommendations for these various regions. It was felt, Mr. Chairman, that by this device certain elasticity and flexibility would be provided to the Committee on Appropriations to work within these boundaries. We would not be hampering them by tying them down to specific countries but we would be giving them the opportunity to work within these regions of the world. That is what we desire to do.

Reference has been made here earlier this afternoon to the use of local foreign currencies. It has been suggested that possibly an amendment along this line would be offered, and it is my intention to offer such an amendment. In the hearing before the Committee on Rules the gentleman from Kansas [Mr. AVERY] and others suggested that although we have wording in the report and although the hearings are replete with statements that local currencies would be used, and although the record indicates that such has been the case in the past, many would feel more assurance if we did actually write into the legislation the stipulation that these currencies must be used to the extent possible. Therefore, at the appropriate time this will be done.

Mr. Chairman, I should like to conclude by echoing a statement that has been made here today, that is, that I think within the experience of most of us now serving on the Committee on Foreign Affairs this proposal has received the most careful consideration by all odds of any such proposals as have come before us. We went over the situations country by country, city by city, and project by project. It is true that in many of these areas, and I would refer particularly to some of the newly independent nations of Africa, the costs seem excessive, but we made the closest inquiry upon these matters. We required assurance that the U.S. Government was not paying more than other countries or other individuals. In case after case we went into it on this basis. So that although the costs do seem high, as the chairman of the subcommittee has indicated, in practically all instances we believe they are comparable with costs for similar developments in the respective countries.

On the basis of the study that has been made and the assurances which have been given, and upon the further basis of the amendments which are to be offered, I would urge the adoption of this legislation.

Mr. HAYS. Mr. Chairman, I yield 5 minutes to the gentleman from Connecticut [Mr. MONAGAN].

Mr. MONAGAN. Mr. Chairman, I rise in support of this bill.

This is really a housekeeping bill. It is something that we as a nation are compelled to consider and act upon as a result of the many branches of our Foreign Service which represent us throughout the world. Certainly, it costs us a great deal of money but it is a necessity for the proper carrying on of our diplomatic service that the members of the Foreign Service and the office in which they do their work should be physically adequate. This is a somewhat complex matter because the buildings with which we are concerned are located all over the world. Many of them are situated in Africa, as the chairman has said, and the need for action there has come suddenly.

The birth of these new governments is something over which we have no control. That is beyond our power, but it is necessary, when governments are created, that we have representatives to deal with them and, therefore, this housekeeping or functional activity is necessary.

I want to express my appreciation too for the careful manner in which the hearings on this bill were conducted. I am proud to be on this committee which has so carefully gone into this very complex and difficult matter. The chairman was extremely cautious and extremely searching in his questioning of the witnesses who appeared before the subcommittee.

I should like to say too that the representatives of the Department of State were, in my opinion, exceedingly forthright and frank and cooperative. They are not often the recipients of bouquets on this floor, but I should like to be an exception to the rule and pass on a few compliments. I feel that the procedure in this committee might well serve as a model for other relations between the executive and legislative branches of Government in important matters such as the considerations with which this bill is concerned.

With reference to the use of foreign currency which was previously referred to, I should like to point out the table on page 4 of the committee report which shows that throughout the years from 1946 until the present time, the sum of $209 million has been appropriated for the use of foreign currency as against a U.S. dollar appropriation of $32,525,000. This is an important and constructive use of counterpart and has saved us many dollar expenditures.

I should like to say, too, that the Public Law 480 funds which the gentleman from Iowa [Mr. GROSS] referred to amount to $9,150,000 and that this sum in foreign currencies is in addition to the amounts contained in the table to which I refer.

There is one other point which I should like to mention and it is an important point. That is the interest that the committee has had, and this interest is set forth specifically on page 5 of the report, in requiring that buildings abroad be furnished with materials and equipment of American manufacture. Certainly, we do not want to be chauvinistic about this matter, but the fact remains there are many times when it is unnecessary that exclusively foreign materials be bought for our buildings and there are many times instead when it is appropriate from an esthetic point of view that American furniture and American equipment be used in these buildings. This has been pointed out in our report and, I am sure that the representatives of the department will bear this in mind in future purchases. It has importance at a time when we are concerned with our balance of payments.

So, Mr. Chairman, I believe this is a very constructive bill. I would call to the attention of the committee in closing the table on page 5, in which there is set forth a division of authorizations into regions and where the African countries, the American republics and so forth are considered separately rather than on a worldwide basis. I think this contributes to clearer thinking and better legislation than otherwise might be the case.

The CHAIRMAN. The time of the gentleman has expired.

Mrs. BOLTON. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. BARRY].

Mr. HAYS. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I take this time to say just one word about something I forgot that the gentleman from Connecticut [Mr. MONAGAN] brought out, that is the matter of furnishings and equipment for some of these embassies.

We made it very plain to the people in the State Department that an American Embassy was a bit of America abroad. When we found that they were buying their silver, for example, in Peru, their glassware in Sweden or some other foreign country, and the same with other things, we told them that American silver and glass manufacturers had a product which is beautiful, which is unique, and which should be used in the Embassy. I cited as an example the British Embassy here in Washington. They are very proud to serve visitors on British china and other products of the British Empire. I do not see any reason why we should not be proud to have our Embassy not exclusively using everything American, but at least a substantial part. It would have an effect on the outflow of gold, but also it would reflect some of the art and industry of America.

Mrs. BOLTON. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Chairman, I think the cart is before the horse in this bill and I doubt very much that I can support it to the tune of $53 million.

When I say the cart is before the horse, I think Congress ought to have some clear assurance that the State Department and other agencies will cut the personnel they have overseas before we build residences, apartments, and embassies to accommodate the surplus.

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. ADAIR. It can be said that by the reduction the committee has made in some of the requests in all probability a reduction in personnel will result; in other words, if there are not places to house people in a good many of these countries abroad, the newly independent ones particularly, in my opinion they are not going to send people there. I think that will serve as a governor upon the number of people.

Mr. GROSS. I will say to the gentleman that I am pleased to see the ranking members of the Appropriations Subcommittee on the floor at this time, the gentleman from New York [Mr. ROONEY] and the gentleman from Ohio [Mr. BOW]. It is my hope that when this bill is approved and goes to the Appropriation Committee for funds that they wade in, as I am sure they will, and find out the why of this overstaffing in so many oversea posts.

Mr. ADAIR. As I pointed out to others this afternoon, we certainly would welcome a very close scrutiny on the part of the Subcommittee on Appropriations that deal with this matter. We have tried by this legislation to set guidelines and general philosophy, but there is certainly plenty of room for the Committee on Appropriations to operate in.

Mrs. BOLTON. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentlewoman from Ohio.

Mrs. BOLTON. I want to make it very clear that the State Department itself does not occupy all of this property. You will note in the report that the Department of Agriculture, the USIA, and various other departments, including

Defense, have representatives over there. Instead of making it necessary for them to go out on their own and find housing for these people, which would be difficult, we have taken them all into this bill and we are insisting on a cut of personnel.

Mr. GROSS. I may say to the gentlewoman from Ohio that my remarks are not confined to the State Department. They are directed to all other agencies, including the Peace Corps, which I notice is coming in for quarters in some of these compounds and residences that are in existence and proposed to be built.

Mrs. BOLTON. I thank the gentleman for his assistance.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HAYS. This committee has no jurisdiction over authorizing money to pay the salaries of personnel. That is a continuing authorization. The committee headed by the gentleman from New York [Mr. ROONEY] and the gentleman from Ohio [Mr. BOW] has done a very good job in holding these figures down. I told the witnesses I did not mean any reflection of the two gentleman I just mentioned. However, these were ceilings and on past performance we expect they may not get up to the ceiling. I will say to the gentleman from New York [Mr. ROONEY] that his committee passes on the amounts to be allocated for salaries. I am sure the gentleman has read this in the testimony. When we questioned them about the number of people at a post, we found a minor number of them were State Department people. There were people over there from every other agency of Government. I am talking from memory now, but in Liberia we found in that country of a few million population that there were 501 American personnel.

Mr. GROSS. That is right.

Mr. HAYS. Which is one for every 2,000 Liberians. Again I am speaking from memory, but I think Mr. ROONEY and Mr. Bow had only authorized money for a very small number. The rest of the 501 came from the Department of Agriculture, the Department of Commerce, AID, and other departments and agencies. I think the State Department is getting into a crossfire not only from this subcommittee but also from the Subcommittee on Appropriations.

Mr. GROSS. What we are doing here, at least to some extent, is providing accommodations, residence, and what have you for all of these people.

Mr. HAYS. I may say to the gentleman not nearly all of them were State. We told them that they would have to cut their personnel down to fit the buildings.

Mr. GROSS. Your hearings show—and correct me if I am wrong—that 4 years ago the State Department had one officer in Brazzaville, however it is pronounced. I cannot pronounce any number of these names.

Mr. HAYS. The gentleman is right.

Mr. GROSS. Today, how many? Ten officers of one description or another. Do I understand that with other and lesser American employees and natives it all adds up to 501 people on our payroll in Brazzaville?

Mr. HAYS. No. That was in Liberia. I may say to the gentleman I brought that out in committee because I had been in Brazzaville 4 years ago. There was one person at that time. Now there are 32. But let me say I am not defending them because I was rough on them. Brazzaville is directly across the river from Léopoldville. Brazzaville is the capital of the Congo, which we knew as the French Congo.

The explanation was—and I think it was at least partially justified—that they had more people over there because of the sensitivity of the situation across the river. Once that quieted down they would not need nearly so many on the French side of the Congo. But these are two separate countries. You can cross the river there within 15 or 20 minutes by boat. This is the reason we have some people over there, which is another country where they are safe and where they can conduct their business without shooting in the streets, and what have you.

Mr. GROSS. In connection with Dakar—if that is the way it is pronounced—you questioned State Department officials and they stated that aside from the Deputy Chief of Mission they had two political officers, an economic officer as well as an administrative officer. I do not know whether one of those was the labor officer or not. You questioned whether there should be a labor officer in such a post, and so do I.

Mr. HAYS. I say to the gentleman again that I did question them. I again say that we have no authority in this committee to make them cut down. If they have too many at many of these posts, and I am sure, based upon what I have heard on the floor year in and year out, that the members of the Committee on Appropriations and others think so. I cannot say anything else to the gentleman.

Mr. GROSS. I agree with the gentleman. But it adds up to one thing: We are building housing accommodations for a substantial number of unnecessary employees and with servants' quarters so they will have them at their beck and call. Some of them never had it so good.

Then, there is another reason why there is apparently some overstaffing, which reason is to be found on page 86 of the hearings when Mr. Dumont said "Whether we like it or not in the Foreign Service, we have people come in under the recommendation of the Government—Agriculture, Members of Congress—and we have to take care of them. We are glad to take care of them. A lot of them are chores." Perhaps Congress can take credit for at least a little of this.

I am not opposed to oversea travel on the part of Members of Congress if those who engage in it work at the job of trying to ascertain how the taxpayers' money is being spent. I think the value of some of the traveling showed up in the questioning by various members of the subcommittee in eliciting information that we did not previously have out of the Foreign Affairs Committee. So I do not think all of this is bad. It is the outright junketing to which I take exception.

Mr. HAYS. If the gentleman will yield further, Mr. Dumont had a pretty rough time in the committee. He was probably a little provoked in what he said and, perhaps, what he said was right. But I will say this to the gentleman: I have traveled a good deal. As the gentleman said, many of the questions there came about because I had some personal knowledge of the situation. But in all the traveling I have done I have stayed exactly two nights at an American Embassy or American consulate. During all the rest of the time—the other 14 years—I have stayed at hotels. I will say something else which we have done: When I have traveled as chairman of the subcommittee, if there was any entertainment, we always sent out a telegram requesting that such entertainment be kept to a minimum. But on one occasion I remember in one of the African countries the Chief of State gave a dinner for us and we felt we had to reciprocate. I think it did some good. We found it was going to take most of the amount that the post had for representation. I ordered the staff to pay for the cost of that, which I think came to $150, out of counterpart funds authorized to us, and not to take it from the Embassy. Whenever the gentleman talks about freeloaders the gentleman is not talking about the chairman of this subcommittee, or others.

I think, anyway, what Mr. Dumont said is exaggerated. I have observed members of other committees who were traveling and I think they do the same as I do; they stay in hotels, and pay their bills out of funds allocated to them, so that it does not come out of the State Department's pocket.

Mr. GROSS. Mr. Chairman, I will say in conclusion that I think the bill is pretty rich under the circumstances. I do not see how I can support it. I hope that the Appropriations Subcommittee when it gets to the business of providing the cash will use a sharp pruning knife on it.

Mr. BARRY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. BARRY. I would like to say to the gentleman that even though the costs may appear high, especially in Africa, a great deal of it is for land costs. It may surprise us in America to think of land costs being high in some of these cities in Africa, but the fact is that they are high and if the United States wants to be represented in a location where other nations' embassies are, in the heart of the city, we have got to pay those costs.

Mr. HAYS. Mr. Chairman, I yield 5 minutes to the gentlewoman from New York [Mrs. KELLY].

Mrs. KELLY. Mr. Chairman, I am very happy to be a member of the Committee on Foreign Affairs and also happy to be a member of this Subcommittee on State Department Organization and Foreign Operations. I am proud to have the gentleman from Ohio [Mr. HAYS], as chairman of this subcommittee. In addition, the following members serve on the subcommittee: the gentleman from Wisconsin [Mr. ZABLOCKI], the gentleman from New York [Mr. FARBSTEIN], the gentleman from California [Mr. SAUND], the gentleman from Connecticut [Mr. MONAGAN], the gentlewoman from Ohio [Mrs. BOLTON], the gentleman from Indiana [Mr. ADAIR], and the gentleman from Connecticut [Mr. SEELY-BROWN].

We worked diligently in bringing to the House an outstanding bill. The administration requested $110 million for a period of 4 years. The subcommittee wisely decided on a 2-year authorization. The administration requested authorization of approximately $62 million. This request was reduced to $31 million.

Mr. Chairman, I would like to answer some of the questions raised by my colleague the gentleman from Iowa [Mr. GROSS]. There may be a large number of people representing the United States in many small countries. Nevertheless I only wish that we had one or more additional in Cuba before the Castro takeover and in Peru before the elections, including representatives of labor, so that we would know more what has happened or is expected to happen.

Mr. Chairman, I see on the floor the very able chairman of the Appropriations Subcommittee, the gentleman from New York [Mr. ROONEY]. I think he performs very nobly in his position. The seniority he has attained as a Member of the House and as chairman of the subcommittee is a tribute to the great service he has rendered to his country. I want to say to the Members of this House that I hope he will pay sympathetic attention to the revision of the Foreign Service Act by the Committee on Foreign Affairs for I feel that in some cases reductions on specific embassy projects have been too deep. I understand he has granted practically every cent requested by the State Department for the administration of our embassies abroad, which I think was very noble of him, but also I think some items should be increased, such as representation allowances for our ambassadors.

When I was in Yugoslavia, the amount allocated to our Ambassador at that time for entertainment was only $1,000. He had to take money out of his own pocket for entertainment in that country. I was very happy to reimburse him for my stay at the Embassy since hotels were not available. This was embarrassing to the Ambassador.

I have heard that our present Ambassador to France was forced to resign for the very same reason, finances. I think the time has come when we would like to have our ambassadors given a sufficient amount of money to run their embassies and that personal wealth should not be the basis for the selection of ambassadors. There are many in this country, meritorious civil servants, who would like to serve at these posts but are prevented because of their financial limitations.

Mr. Chairman, I think this is an outstanding bill. The committee did a very good service to our country by offering it and I hope it will pass as it was brought to the floor.

Mrs. BOLTON. Mr. Chairman, I yield such time as he may require to the gentleman from Indiana [Mr. BRUCE].

Mr. BRUCE. Mr. Chairman, I shall take only a minute or two to say that I do share some of the apprehensions expressed by the gentleman from Iowa [Mr. GROSS]. Also I would like to express my appreciation as a Member of the House to the chairman of this subcommittee and the members of the subcommittee for a very thorough and penetrating hearing.

As I read the hearings, for one of the few times I became encouraged at the decisiveness of the questioning. Anyone who could read these hearings and reach the conclusion that the subcommittee was a rubberstamp of the State Department or the Executive would be reading between the lines better than I could.

I want to express my thanks to the chairman and the members of the subcommittee for a very thorough piece of work in these hearings and in presenting this proposal.

Mr. HAYS. Mr. Chairman, I have no further requests for time.

Mrs. BOLTON. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. HARVEY].

Mr. HARVEY of Indiana. Mr. Chairman, I should like to direct this question to the chairman of the subcommittee, the gentleman from Ohio. I am sure the gentleman from Ohio recalls that several years ago we served together on a subcommittee that investigated the facility needs of our Foreign Service in the Middle East. I am sure the gentleman's interest in this problem has been a continuing one since that time.

At that time we found a great deal of diversity of opinion as to what type of facilities were needed and the extent of the facilities neded for the Information Agency. I have not had an opportunity to study the hearings, but I note that some of the provisions of authorization in here are for the Information Agency. I wonder if the gentleman would tell me just a bit in brief as to what type of facilities is proposed here and whether he feels that a better scheduling of the plans and arrangements for the use of these facilities is in being than has prevailed in the past.

Mr. HAYS. I may say to the gentleman that because of other commitments of the full committee, and I want to be very candid and honest about this, the subcommittee just simply did not have the time to go into the U.S. Information Agency request in detail as we did the others. We asked the building people what was the minimum amount they could usefully use, and they came up with a figure. Most of it is for reading rooms, places for dissemination of information about the United States. Most of the money will be used in new places where we have not had such facilities, such as in Africa. In their justifications they point out that there is need in these newly created nations for the dissemination of information. Also, being very candid, these new countries have one vote apiece in the United Nations. Not all the work of selling our point of view in the United Nations is done in the United Nations. A considerable amount of it is done in the nations themselves. We felt that the way they outlined their needs the money would be well spent, and we allotted it. We do plan on going into this in much greater detail in the next session, when they will be coming up with a bill for the fiscal years 1965 and 1966.

Mr. HARVEY of Indiana. I am not in any way criticizing the gentleman or the subcommittee. I hope he understands that. By way of suggestion I am saying that I think there is probably a considerable need in some of the nations that have recently become members of the United Nations to have more adequate facilities there. I am also at the same time suggesting that possibly some of the rather obvious errors we made in our initial efforts in this area can be overcome, and that we will thereby not continue making some of the mistakes we made in the past.

Mr. HAYS. I well recall this at the time it started in 1949, and I have followed this very closely since then.

Mr. HARVEY of Indiana. I am sure the gentleman has.

Mr. HAYS. I am sure the gentleman will agree they made a lot of mistakes then, and have continued to do so, but they have improved over the years.

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Indiana. I yield to the gentleman from Indiana.

Mr. ADAIR. May I say to the gentleman from Indiana that most of this information service money provided in this bill goes for three categories.

Principally, it goes for information centers where information relative to our Nation and our philosophy can be disseminated and made available to the peoples of the countries in which these centers are located. There is a little money for cultural centers and a little money for residences of public relations officers. In those three categories, however, lie almost all of the money, with emphasis on information centers.

Mr. HARVEY of Indiana. I thank the gentleman. In conclusion, I want to reiterate the fact that too often in the past we have been guilty of the error of feeling that if we hire so many people and build so many buildings, we are going to solve the problems. If there has been any one area where we have been remiss, it has been in this area and that is evidenced by the reaction I get from people in whom I have a good deal of confidence who have returned from visits to these various areas who have complained to me that they do not feel that we, as a country, have been putting forth our best image—that we have not projected ourselves properly and while they are not entirely critical, they feel in many respects we have done a good job, but there is always a feeling that we have not done nearly as good a job as we can. So I hope that we will improve in our tactics and our efforts as we move along.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORSE. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the Record and include extraneous matter.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MORSE. Mr. Chairman, although I will support H.R. 11880, I would like to call to the attention of this body an example of what I regard as a totally indefensible policy that concerns the furnishing of our embassies throughout the world.

I was troubled when I read in the New York Times of Friday, July 20, 1962, an article appearing on page 11 of that issue, entitled "Elegance Prevails in U.S. Embassies Throughout the World." In the course of the article, which appeared under the byline of Charlotte Curtis, appears a very disturbing paragraph. Let me read it:

> Although most furnishings ordered by the State Department are designed and made in the United States, some are bought abroad. Most of the sterling silver platters, trays, and flatware used in the official buildings abroad are made in Lima, Peru.

I cannot help but wonder what our American silversmiths, many of whom are located in my home State of Massachusetts, might think upon reading this report. I am reliably informed that for many years other nations have been pirating American patterns, producing exact duplicates which are heavy in silver but otherwise of inferior quality. Can the purchase by the State Department of Peruvian silver for use in our embassies be regarded as other than discrimination against the silverware industry of the United States which helps to pay the taxes that contribute to the support of those very embassies?

Although I supported the Trade Expansion Act which this House passed recently, I am convinced that the purchasing policies of the State Department require an immediate examination, as well as a continuing review.

And, it seems to me, when guests at our embassies abroad examine their shrimp forks, they should reasonably expect to find that they are American-made products, and I will welcome an explanation of this purchasing policy by the Secretary of State.

Mrs. BOLTON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Foreign Service Buildings Act, 1926 (22 U.S.C. 295), is amended by adding at the end thereof the following new subsection:

"(d) In addition to amounts authorized before the date of enactment of this section, there is hereby authorized to be appropriated to the Secretary of State—

"(1) for acquisition, by purchase or construction (not including acquisition of leaseholds) of sites and buildings in foreign countries under this Act, and for major alterations of buildings acquired under this Act, the following sums—

"(A) for use in Africa, not to exceed $10,500,000, of which not to exceed $6,000,000 may be appropriated for the fiscal year 1963;

"(B) for use in the American Republics, not to exceed $4,300,000, of which not to exceed $1,800,000 may be appropriated for the fiscal year 1963;

"(C) for use in Europe, not to exceed $7,500,000, of which not to exceed $2,250,000 may be appropriated for the fiscal year 1963;

"(D) for use in the Far East, not to exceed $2,250,000, of which not to exceed $2,000,000 may be appropriated for the fiscal year 1963;

"(E) for use in the Near East, not to exceed $2,800,000, of which not to exceed $2,100,000 may be appropriated for the fiscal year 1963;

"(F) for facilities for the United States Information Agency, not to exceed $1,854,000, of which not to exceed $759,000 may be appropriated for the fiscal year 1963; and

"(G) for facilities for agricultural and defense attaché housing, not to exceed $800,000, of which not to exceed $400,000 may be appropriated for the fiscal year 1963;

"(2) for acquisition of leaseholds under this Act, for payments under such leaseholds, and for contingencies, not to exceed $1,802,000, of which not to exceed $802,000 may be appropriated for the fiscal year 1963 for leaseholds; and

"(3) such additional sums as may be necessary to carry out the other purposes of this Act.

Sums appropriated pursuant to this authorization shall remain available until expended."

Sec. 2. (a) Section 2 of the Foreign Service Buildings Act, 1926 (22 U.S.C. 293), is repealed.

(b) The first section of such Act (22 U.S.C. 292) is amended—

(1) by striking out ", subject to the direction of the commission hereinafter established,";

(2) by striking out "under such terms and conditions as in the judgment of the commission may best protect the interests of the United States,";

(3) by striking out ", to the extent deemed advisable by the commission,"; and

(4) by striking out ", which buildings shall be appropriately designated by the commission, and the space in which shall be allotted by the Secretary of State under the direction of the commission" and inserting a period and the following: "The space in such buildings shall be allotted by the Secretary of State".

(c) Section 3 of such Act (22 U.S.C. 294) is amended—

(1) by striking out ", subject to the direction of the commission," and "in the judgment of the commission,"; and

(2) by inserting immediately before the period at the end thereof the following: "and without regard to section 3648 of the Revised Statutes of the United States (31 U.S.C. 529)".

(d) Section 4 of such Act (22 U.S.C. 295) is amended by striking out ", subject to the direction of the commission,".

(e) Section 9 of such Act (22 U.S.C. 300) is amended—

(1) by striking out "with the concurrence of the Foreign Service Buildings Commission,"; and

(2) by striking out ", as in the judgment of the Commission may best serve the Government's interest".

(f) Section 1(e) of Reorganization Plan Numbered II of May 9, 1939 (53 Stat. 1432), is repealed.

(g) All references to the Foreign Service Buildings Commission, originally established by the Foreign Service Buildings Act, 1926, in all laws of the United States are hereby repealed.

Mr. HAYS (during the reading of the bill). Mr. Chairman, this is a short bill, and I ask unanimous consent that the bill be considered as read and open for amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. HAYS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. Hays: On page 3, strike out lines 8 and 9 and insert in lieu thereof the following:
>
> "(3) for use to carry out the other purposes of this Act, not to exceed $22,093,000, of which not to exceed $10,893,000 may be appropriated for the fiscal year 1963."

Mr. HAYS. Mr. Chairman, this amendment, as I said in general debate, sets a specific ceiling for money to carry on the necessary maintenance, repairs, and other operating expenses for the next 2 years. We encountered some opposition to an open-end authorization in the Committee on Rules, and I gave an implied promise that we would correct that situation. This amendment attempts to do that. I want to say in all candor this is a ceiling. We did not go over these item by item, but we do know that the Appropriations Subcommittee will. This is a maximum amount that they can appropriate. They can appropriate any amount under that that they think is necessary to carry on these functions.

Mr. Chairman, I ask that the amendment be adopted.

Mrs. BOLTON. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentlewoman.

Mrs. BOLTON. May I say that the committee members on our side are happy to accept this amendment.

Mr. HAYS. I thank my colleague.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Iowa.

Mr. GROSS. I understand that the gentleman cannot commit the conferees on this bill, if a conference is called for, and a conference probably will be necessary in view of the upping nature of the other body. I wonder if the gentleman can give us any assurance—this bill being $8 million below the administration's request—whether we could have assurance that the conferees will stand firm against the other body putting that money into the bill?

Mr. HAYS. I will say to the gentleman as chairman, and I assume I will be, of the House conferees, you can have every assurance that we will stand firm. In the conference on foreign aid, the other body came down $690 million and we went up $3,500,000. So I think that was a pretty good deal—$3,500,000 for $690 million—and I expect to be about as generous in compromising with the other body on this bill as we were on that bill.

Mr. GROSS. I thank the gentleman for his statement.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. ADAIR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Adair: On page 3, line 11, immediately before the quotation mark insert the following new sentence: "To the maximum extent feasible, expenditures under this Act shall be made out of foreign currencies owned by or owed to the United States."

Mr. ADAIR. Mr. Chairman, this is the amendment to which I made reference earlier in the debate. It simply would write into law an understanding we have with representatives of the State Department. As was said earlier this was suggested in the Rules Committee. We on the committee had felt that the matter was sufficiently well understood. However, it was suggested that to assure that foreign currencies were continued to be used to the extent possible it might have a wholesome effect to have it stated in the bill. That is the purpose of the amendment. I urge its adoption.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. HAYS. Mr. Chairman, I move to strike out the last word and ask unanimous consent to proceed out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

NEAR-TRAGIC AIRPLANE ACCIDENT

Mr. HAYS. Mr. Chairman, I just wanted to remark that I am very happy to have the Chairman of the Committee of the Whole with us today. We have been reading in the newspapers recently of tragic airplane accidents, and we read of the near-tragic accident last evening in which our Chairman and one other Member were involved, an accident which could have been another disaster save for the intervention of the Almighty. He and 66 passengers and crew were spared.

Our Chairman was a member of my NATO committee last year and did yeoman service. I am always glad to have him with me, for he seems to bear a charmed life. He was present when the shooting occurred here several years ago and a number of Members were shot down, among them the Chairman who is presiding today. Fortunately his wound turned out to be not serious and he recovered rapidly.

So my advice to you if you are going on a trip is to take the gentleman from Memphis with you to insure your safety.

The CHAIRMAN. Thank you.

Under the rule the Committee rises.

Accordingly the Committee rose, and the Speaker having resumed the chair, Mr. Davis of Tennessee, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11880) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes, pursuant to House Resolution 741, he reported the bill back to the House with sundry amendments adopted in the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken and the Speaker announced that the ayes appeared to have it.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Pursuant to the previous order of the House further proceedings on the bill will be postponed until tomorrow.

Mr. GROSS. Mr. Speaker, I withdraw my point of order.

WARS OF NATIONAL LIBERATION

The SPEAKER. Under previous order of the House, the gentleman from Florida [Mr. Sikes] is recognized for 30 minutes.

Mr. SIKES. Mr. Speaker, I wish to discuss a matter of current singular importance in the national defense—the development of our capability to counteract the wars of national liberation so glowingly praised by Chairman Khrushchev. I recognize that a great deal of thought and effort, numerous studies, and other activities are in progress in this area. My investigation of the present situation leads to the conclusion that there is some confusion and misunderstanding in the minds of civilians as well as the military with regard to the relationship of the Air Forces counterguerrilla organization and the missions of the other services. In essence, the Air Force considers their counterinsurgency organization to be an aspect of one of their longstanding missions, that of conducting air operation in support of the ground forces.

I consider it most important that there be an air element in our modern-day counterguerrilla forces.

The Air Force, in April of last year established the so-called Jungle Jim organization at Eglin Air Force Base. This original Jungle Jim unit, equipped with propeller-driven aircraft specially modified for low-altitude, unprepared field operations, has practiced incessantly in developing techniques of airlifting personnel into guerrilla-infested areas, and identifying and attacking guerrilla units from the air.

The Jungle Jim unit has recently been succeeded by the Special Air Warfare Center with the mission of developing tactics and techniques for the application of airpower in operations against guerrillas. This organization is intended to provide a capability of accomplishing only those tasks which logically fall within the airpower spectrum. In order to support these tasks, the Air Force proposes to develop equipment, tactics, and techniques which would apply the scientific and technical capabilities of the United States to counterinsurgency air problems.

I might digress at this point to state that we cannot ever expect to meet Communist aggression throughout the world on a man-to-man basis. Accordingly, we must seek other areas in which to gain superiority. Our acknowledged technical and operational capabilities in the air warfare spectrum certainly deserve consideration as a counter to the Communist hordes.

This is not to say that we can expect miraculous results from airpower or any other approach in countering guerrilla operations. It is a slow, tedious task. However, there are specific airpower missions which can make major contributions in securing mobility for friendly forces, and delaying, harassing, and inflicting casualties on the insurgents. In order to accomplish these objectives the Air Force counterinsurgency organization will contain airlift, reconnaissance, and strike capabilities. Primarily, their purpose will be to train indigenous forces in order that local defense capabilities may be developed. Also, they will be able to conduct counterinsurgency operations on their own in support of host countries requesting this type of assistance. The organization will have no infantry capabilities. On the other hand, because of the remote areas in which these forces will be operating, the ground support personnel will have to be trained to protect themselves. The organization will also have combat control teams consisting of airmen who are trained parachutists who will have the job of marking airdrop and air-landing zones, and establishing airheads in the case of an airborne or air assault operation.

Eglin Air Force Base has been selected as the home of the Special Air Warfare Center. This center, commanded by Brig. Gen. Gilbert L. Pritchard, has two subordinate operations: a combat applications group whose purpose will be to seek out and develop equipment, tactics, and procedures for air operations in the counterinsurgency field, and an air commando group which will train Air Force personnel to apply these tactics and procedures in field operations.

The air commando group traces its parentage to the versatile and highly successful air commando organization of Col. Philip Cockran in the World War II Burma campaign. This successful application of airpower to surmount dense, virtually impassable, jungles and defeat an enemy who was living on the land is an inspiration to the present-day air commando unit.

The air commando unit will draw from the large reservoir of highly experienced and skilled pilots in the Air Force inventory. We can count on their years of training in propeller-driven aircraft to enable them to quickly orient themselves in this activity.

I am proud that the Air Force has chosen the unique Eglin Air Force Base area, with its 464,831 acres of superb training facilities as the home of this extremely important adjunct of our national defense capability. Eglin, in addition to its unequaled environmental testing facilities, has large areas suitable for exercises under both controlled conditions and those which might be expected to occur in the developing nations.

The total Eglin complex represents an investment of about $900 million. Not only is there the completely modern heavy bomber base at Eglin main base, but scattered throughout the reservation are a number of auxiliary airstrips ideally suited for training in counterinsurgency operations.

In summary, we must be prepared to meet the Communist challenge throughout the spectrum of warfare. Air Force recognition of the fact that this spectrum extends from guerrilla operations to thermonuclear warfare and their vigorous approach to all phases of the problem is a source of great personal satisfaction to me.

PUERTO RICO

Mr. KEITH. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. Bow] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOW. Mr. Speaker, the Congress has in the past and will again in the future be called upon to give attention to the political status of Puerto Rico.

President Kennedy has suggested that action should be taken to determine the ultimate solution to its status.

Gov. Muñoz Marín will convene the legislative assembly to put before it the need to hold a plebiscite.

The President and the Governor of Puerto Rico have every right to discuss these matters. The legislative assembly has the right to direct that a plebiscite be held.

However, the final determination will be the legislative responsibility of the U.S. Congress.

I suggest, Mr. Speaker, that orderly procedure would require that Congress be fully informed during the progress of these proceedings and that hearings also be held by the appropriate committees of Congress and that before a plebiscite be held, a resolution be passed by the Congress indicating that it be the sense of Congress that such plebiscite be submitted to the people of Puerto Rico.

Mr. Speaker, I believe in the political maturity of the people of Puerto Rico. I believe in the right of the people of Puerto Rico to express their desired political status. They have since the days of Public Law 600 proven their ability of self-government and have made rapid strides in their development.

My great concern is the probability of a plebiscite held without congressional accord that might later be found unacceptable. Such a situation would be to the detriment of all concerned and cause a serious blight on the long history of our relations with our loyal and patriotic citizens of Puerto Rico.

I trust that we approach this historic action with careful appraisal of all of the many problems it entails.

I call to the attention of the House an editorial from the newspaper El Mundo, of San Juan, P.R., of July 30, 1962, which I believe to be a sound approach:

PINPOINTING

Due to their vital and far-reaching results it is necessary to pinpoint, without delay, different aspects of the projected plebiscite.

Firstly, there is no reason to push these proceedings with undue haste especially since they have lain abandoned and ignored for so many years.

It is absurd to speed up the plebiscite as if it were a boat race. Such a step, of exceptional importance to the life of a country, requires time for thought and analysis. Time to orient. Time to think deeply of the far-reaching results of the vital decision to be taken.

We fail to understand the haste with which the legislative assembly is to be convened and even the idea of holding the plebiscite before the year ends.

We believe that the plebiscite requires at least several months to set up and could never be held before April 1963.

This is no matter to be disposed of in fit of rage as a question of little importance to which risks and errors are of no account.

Secondly, it must be made clear why this plebiscite is initiated in Puerto Rico, without the prior intervention of the Congress of the United States.

For obvious reasons, during many years we favored that the plebiscite should be originally sponsored by the Congress.

A plebiscite proposed by the Congress would mean prior recognition besides all the moral and effective support of the Nation. In fact, its results would bind the Congress.

On the other hand, a plebiscite originating in Puerto Rico, even with all the moral force it would muster, is not binding on the Congress.

Puerto Rico, however, cannot keep on disregarding an ultimate solution to its political status. We Puerto Ricans must know and are under the obligation to settle, once and for all, where we are going and what we are going to be. Thus, we must put our demands before the nation with the support of all the Puerto Rican people. A people that need to establish their destiny as the most important step toward the solution of all their other problems.

In the third place, a plebiscite is the supreme responsibility of all the people and should not be aired among the passions of political partisanship.

If the plebiscite is to be promoted and agitated among the political parties, it would be best not to hold it at all because that would mean deceiving the right of the people to settle its political future without the fatal pressures of opportunism and compromise.

Governor Muñoz-Marín will convene the legislative assembly to put before it the need to hold a plebiscite.

Whose need is it? Is it the need of the governing party? Does the so-called Commonwealth need to buttress itself as a political formula? Or, as it should be, is it not the need and the supreme obligation of the people of Puerto Rico to settle its political destiny?

The Governor has told President Kennedy that it would be convenient to show the whole world and especially Latin America, that Puerto Rico supports, through a plebiscite, this accommodating formula.

This is no legitimate reason to justify a plebiscite. The ultimate solution of our political destiny should not be used as a show for such and such a purpose.

The only reason to hold a plebiscite is the vital need of Puerto Ricans to settle what we are to be, now and forever. And this decision must be made on the basis of eternal formulas which would run no risk of withering or growing as transitory things.

That is why we have always insisted that the plebiscite must be held on the basis of statehood or independence since these are not formulas that would merely grow because in practice each means sovereignty. And if we have said that we would accept the plebiscite hindered by the ballast of Commonwealth it is only because we refuse to believe that, in this grave hour when we are about to settle our destiny forever, Puerto Ricans will disgrace themselves by voting for accommodating and transitory formulas subject to the seesaw of political partisanship.

We have already heard highly authorized voices from the Congress of the United States asking whether Puerto Rico wants a sweetened independence on the basis of an easy plebiscite to be shown to the world as evidence of American democracy and how it operates in Puerto Rico.

These voices would never dare to use such language were we to demand our inalienable right to settle our destiny within the time-honored and sovereign formulas of statehood or independence.

We proudly accept the plebiscite to definitely settle our political status. We repudiate the idea of a plebiscite based exclusively on the so-called need to buttress and to give more prestige to an accommodating formula.

DISARMAMENT COMMITTEE AT GENEVA

Mr. KEITH. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. HIESTAND] may extend his remarks at this point in the RECORD.

Mr. SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HIESTAND. Mr. Speaker, I wish to bring to your attention a recent statement by Secretary of State Rusk. He told the 18-nation Disarmament Committee at Geneva on July 24:

> The U.S. does not insist on foolproof arrangements in a disarmament agreement and is ready to share certain risks.

This statement, Mr. Speaker, is tragically absurd and should be repudiated. This country cannot afford to leave any loose ends when considering a disarmament agreement. I am shocked by Secretary Rusk's admission that this country is willing to share certain risks in a disarmament plan.

I do not like the militant nature of today's world any more than the ivory tower boys, but I realize that the surest way to invite disaster is to disarm by sharing certain risks without foolproof arrangements. The Soviet Union has shown itself to be wholly unreliable in honoring treaties and international agreements.

The Soviet Union's decision to resume nuclear testing is evidence they are only stringing us along at Geneva. The President said recently that we are very reluctant to test again. In my opinion, we must do whatever is necessary to protect ourselves—including nuclear testing. While I realize that disarmament negotiations seem to have become a permanent fixture of our tense world, we must never consider accepting any agreement that does not give us absolute guarantees.

The Secretary has also pointed out that studies are underway in the United States on all aspects of disarmament and that new possibilities were continually under consideration.

Mr. Speaker, I must emphasize that, in my opinion, the Secretary of State should, in the Nation's interest, repudiate his certain-risks statement.

ANOTHER BOOST

Mr. KEITH. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. MORSE] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MORSE. Mr. Speaker, the following editorial from my hometown newspaper, the Lowell Sun, describes the finest sort of teamwork between private, civic, and Federal efforts in solving the economic problems besetting so many communities:

ANOTHER BOOST

The expansion of Lowell Industrial Park through the reclamation of 63 acres of what might be called wasteland provides another insurance policy for the future of the city and the area in general.

There is a potential of 2,500 jobs according to the plans and expectations of the Lowell Industrial Commission and the Area Redevelopment Administration. A grant of $166,500 by the Federal Government has already been approved and there should not be too great a delay in getting this land, with roads and utility installations, ready for bids by industry.

According to the present needs of industry, this area is unquestionably one of the best in New England. Major highways stretch in all four directions of the compass and access to the city will be simple, convenient, and fast when the connector is opened several weeks hence.

Route 3, going north and south, and Route 495, running east and west, offer just about the best combination of modern, two-barreled roads at this intersection. For that reason, it is probable that Lowell industrial agents will have little difficulty in attracting industry.

And if Lowell and the nearby towns are going to have an additional 2,500 jobs right in their own backyard, we need have no fear about the economic stability of the area in the immediate future.

CAPTIVE NATIONS WEEK

Mr. HAYS. Mr. Speaker, I ask unanimous consent that the gentleman from Rhode Island [Mr. ST. GERMAIN] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ST. GERMAIN. Mr. Speaker, there are few individuals in our Nation who have taken a more active interest in the tragic difficulties which are faced by those who suffer under Communist oppression than has Mayor Robert F. Wagner, of New York City.

On Tuesday, July 17, the city of New York commemorated Captive Nations Week. Mayor Wagner was in Europe on that occasion visiting the divided city of Berlin. He was struck, as I was on my visit to that city last fall, with the awesome separation of the free from the enslaved which is symbolized by the Communist-erected wall which partitions the city.

Mr. Speaker, I will insert a cablegram, which Mayor Wagner sent to the Captive Nations Week observance, and the address delivered at the ceremony by Acting Mayor Paul R. Screvane at this point in the RECORD:

FRANKFURT, GERMANY,
July 16, 1962.

Hon. PAUL R. SCREVANE,
Acting Mayor, City of New York,
New York, N.Y.:

I know that tomorrow you will be officiating at a gathering on the steps of city hall, observing Captive Nations Week. My heart is with you.

I have just looked over the wall in Berlin and into the eyes of tyranny and slavery. There the tyrant forces have sought to build a structure high enough and strong enough to separate the free from the enslaved and to keep the enslaved from escaping to freedom. That wall in itself is a monument to slavery. In the name of the people of New York City, you are proclaiming Captive Nations Week. I join with you in vowing in the name of freedom's cause shall prevail against the total threat of slavery and enslavement. On the basis of what I have seen we may all be confident that one day all who love and still hope for freedom will enjoy its blessings.

ROBERT F. WAGNER.

CAPTIVE NATIONS WEEK

(By Acting Mayor Paul R. Screvane)

As acting mayor of the city of New York, I am honored to continue the tradition established last year by Mayor Wagner in proclaiming "Captive Nations Week" and holding this ceremony on the steps of city hall.

New York can rightly claim, in one sense, the proud title of being the capital city of the free world. It has earned this right, not only for its preeminence in many social, economic and cultural fields, but through the historic tradition it has established for all the world of hospitality and sanctuary for the homeless and friendless stranger. The upraised arm of the Statue of Liberty at the gates to our city beckons and bids the newest refugee from Cuba and Hungary welcome with the same humanity with which this city has welcomed its new arrivals for nearly three centuries. New York City has been the gateway to a new life for most of the millions who sought freedom from oppression by coming to this land of the United States. Many have remained here and, with the tender threads of memory, tradition and language, still keep a web of sympathy stretched between this, their new homeland, and the distant places whence came many of them and their forefathers.

The last 20 years has witnessed the greatest flood of refugees from tyranny in the whole history of mankind. Except for the barbed wire and watchtowers which wall in the totalitarian world, millions more would certainly have fled to the freedom they are denied. For those who escape and for that who long to escape, America remains a living beacon to their hopes.

In commemorating Captive Nations Week, we are, thus, living up to both our noblest traditions and highest ideals. It is a frightening thought that through modern technology, ill used, modern tyranny has become far more sinister and total than any tyranny dreamt of, by Nero or Caligula. There has never been a tyranny as complete as that fostered by the modern totalitarian state.

But it is unlikely there has ever been a time in history in which the love of liberty, which we sometimes take for granted, has burned as clearly and fervently as it does behind the walls which enemies of freedom have built as unknowing prisons for themselve. No wall can last as long as man's love of liberty. Eventually the walls will come down and tyranny, which is contrary to the spirit of man, must crumble with them.

In celebrating this Captive Nations Week, we are not acting as New Yorkers alone, but as Americans. We are carrying out the letter and the spirit of the congressional resolution of 1959 which established Captive Nations Week and the proclamation of President John F. Kennedy which he has issued again this year.

In his Fourth of July speech on the steps of Independence Hall in Philadelphia, President Kennedy issued a new declaration of interdependence of all free nations and eloquently reaffirmed America's dedication to the freedom of the peoples behind the Iron Curtain. He said that the union of the Atlantic world "would serve as a nucleus for the eventual union of all freemen, those who are now free and those who are vowing that someday they will be free."

And the President went on to explain the great issue which differentiates us from the Communists. He said: "If there is a single issue which divides the world it is independence—the independence of Berlin, or Laos, or Vietnam; the longing for independence behind the Iron Curtain, the peaceful transition to independence in those newly emerging areas whose troubles some hope to exploit."

"This Nation," the President concluded, "conceived in a revolution, nurtured in liberty, maturing in independence, has no intention of abdicating its leadership in that worldwide movement for independence to any nation or society committed to systematic human oppression."

The spirit of these words is a legacy that has been handed down to us from the days of Thomas Jefferson and Thomas Paine. It is today the continuing spirit and principle of American foreign policy. It is today the cause to which we rededicate ourselves during this commemoration of Captive Nations Week.

SET-ASIDES FOR SMALL BUSINESS IN THE CONSTRUCTION INDUSTRY MUST BE CONTINUED

Mr. HAYS. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. MULTER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. MULTER. Mr. Speaker, 15 bills have been introduced in the Congress of the United States which provide that the program under which Government contracts are set aside for small business concerns shall not apply to construction, maintenance, and repair procurements. The number of these bills indicates that the program, commonly known as the construction set-aside program, has engendered some controversy.

I shall directly demonstrate that it is based on erroneous information, doctored statistics, and misconceptions. I shall further demonstrate that, if enacted, these bills would be harmful to the Government, harmful to small business, harmful to the building construction industry, harmful to labor, and harmful to the country as a whole.

First, I should like the RECORD to show that under existing SBA size standards 90 percent of the construction industry contractors qualify as small business concerns. It follows, that those who oppose the construction set-aside program are doing battle for and on behalf of only 10 percent of the industry, and that all that sound and fury concerning the alleged injustices of the set-aside program in the construction industry originates with a handful of firms, the giants of the industry, who are using the Associated General Contractors of America—AGC—as their mouthpiece.

Who, you may ask, is this vociferous AGC, which seeks the elimination of the small contractor from the American scene? Does it speak for the industry, as it alleges that it does? Does its views on the construction set-aside program square with those of the 455,000 small construction contractors whose livelihood the AGC is threatening?

There are, Mr. Speaker, some 479,000 construction firms in the United States. Of these, only 7,300, or less than 2 percent, are AGC members, and the AGC does not speak even for all of these. In fact, the small contractors among the AGC members are frightfully aware of the AGC's assault upon their livelihood. Their deep concern is expressed in the multitude of letters pouring in from all over the country. Of these, I shall take the liberty of reading but three or four. One such letter, for instance, reads:

> It has been brought to my attention, that there are organizations, working to abolish the small business set-aside program.
>
> I trust that the Small Business Administration will do everything in its power to keep this program in operation.

Another letterwriter states briefly:

> We have heard that some pressure is being brought about to discontinue the set-a-side [sic] program for small business. We ask that you do everything you can so that this program is continued.

Another correspondent says:

> We understand that there has been a movement to try and abandon the Small Business Administration set-aside program. Being in this small business capacity, we are definitely opposed to this good program being abandoned.
>
> If this is done, it will put the bulk of the construction work back under the control of the major companies in their respective fields, leaving the smaller contractors to again fight a losing battle for survival.

Other letters from AGC members go even further, and directly disavow the position taken by their organization. One such letter, for instance, states:

> For some time we have been following the controversy between the Associated General Contractors and the Small Business Administration involving the reserving of the smaller construction contracts for the smaller firms.
>
> As our letter indicates, we are members of the Associated General Contractors and are a relatively small organization. Our views are not at all represented by the National Associated General Contractors organization. This is an extremely competitive field today, and a small organization with limited resources has a very difficult time surviving the cutthroat competition.
>
> I think you will find that all the noise and commotion is being caused by 5 or 10 percent of the AGC membership that represents the large, long-entrenched organizations that have the resources to survive in these competitive times and would like nothing better than to see their weaker and smaller competitors fall by the wayside.

A director of the Portland, Oreg., chapter of the AGC feels that the program has never been fully presented to the AGC membership. AGC opposition, he says, is that of the "large contractors who dominate the thinking and actions of the AGC."

I could go on reading many more such letters, but I believe that this sampling sufficiently conveys the idea that the AGC is out to establish a monopoly for its big wire pullers and that its small members know it and fear it.

The AGC's assumed position as an alleged spokesman for the construction industry has, thus, been severely shaken. In fact, a recent survey conducted by the SBA has clearly demonstrated that the AGC speaks neither for the industry nor for its small members. Although it does speak, it does not speak the truth.

Invited by the SBA to join it in an industrywide survey regarding AGC's members' views on the construction set-aside program, the AGC dodged participation. SBA thereupon proceeded with the survey on its own, polled 976 small business construction firms, including 401 AGC members.

Of these, Mr. Speaker, 86.7 percent favored the small business set-aside program while only 7 percent were against it.

How many small contractors were coerced into being AGC's yesmen I cannot say. I do venture to say that of the relatively few votes against the program, the majority came from the industry barons who, notwithstanding the set-aside program, are still receiving the lion's share of the dollar value of all Government construction contracts.

Although representing but 10 percent of the industry, big business is still receiving over 60 percent of all construction awards; and not only would they like to keep it thus, but their insatiable appetite is still growing.

Mr. Speaker, the sad truth is that at a time when 90 percent of the industry—all small business firms—is receiving less than 40 percent of all military construction awards; and, worse yet, when its share is still on the decline, a concerted effort is underway to accelerate this decline still further.

There was a time when small business concerns were awarded 72.8 percent of the dollar value of all military construction procurements. That was in fiscal year 1958.

A hue and cry was then raised against the small contractor, and successfully.

We knew then, as we know today, that giving in to big business clamor would ultimately result in the displacement of the little fellow. We were right. Immediately after suspension, in May 1959, of the construction set-aside program, the small business share of military construction contracts declined from the previous 72.8 to 65 percent. When it dropped still further to 50 percent in fiscal year 1960, the Department of Defense agreed to the reactivation of the set-aside program for construction contracts. But, even after this was done, an increase to only 54 percent was achieved in fiscal year 1961. Moreover, this small increase was only temporary. Since then a steep decline has set in anew, and during the first 9 months of fiscal year 1962 the figure sank to 39.6 percent.

These statistics speak for themselves. The small business share of military construction is still steadily declining and small construction firms, representing 90 percent of the industry's membership, are rapidly being displaced from Government work by the monopolists of the industry.

The construction set-aside program, Mr. Speaker, constitutes but one means, if not the only effective one, of arresting this dangerous trend. Without it, the figures cited would doubtlessly plunge to new lows.

The proposal, therefore, to discontinue the construction set-aside program is most inappropriate.

Such a step would be entirely inconsistent with the repeatedly expressed intent of Congress that small business shall share equitably in Government contracts. It would also be inconsistent with the expressed desire of the President of the United States that all Government procurement agencies adopt every feasible measure to increase the small business share of the procurement dollar.

In the light of this, and in the face of the continuing decline in the small business share of Government procurement, now is certainly not the time to tamper with the construction set-aside program. In its present phase it is a new program. It is, therefore, necessary that it be given a fair trial. It has been operational only since the latter part of 1960, and it is too young yet to be appraised properly as regards its effects on either large or small business.

The large construction firms and AGC know this to be true. In fact, I believe that their primary concern is really not the military construction program, although they would not mind gobbling this up too. The real purpose of their maximum effort, Mr. Speaker, is much bigger. It is designed to nip in the bud possible and well justified efforts that must be made to extend the set-aside program into those areas where big construction firms have today an almost absolute monopoly. I refer to the proposed programs for school construction, for highway construction, and for public housing.

The Honorable RUSSELL B. LONG, the distinguished Senator from Louisiana, in a hearing held by the Senate Select Committee on Small Business said:

> Why did you leave out Capehart housing? I know that down our way Capehart housing is one area where you should have made small business get some of it. It is a program in which one big fellow can get it all. If you break it up into 100 units at a time, the small fellows can get it.

> Why should not Capehart housing be included? That is one thing small business can do. (Hearings, Senate Select Committee on Small Business, 87th Cong., 1st sess., June 21, 1961, p. 25.)

That question, Mr. Speaker, was and still is a good one, and the answer thereto, supplied by SBA's capable Deputy Administrator for Procurement, Mr. Irving Maness, is simply that Capehart housing is now being excluded from the set-aside program solely because the military construction set-aside has created such a furor and controversy that SBA does not want to add new fuel to the already burning fires.

Let there be no mistake about it. The giants of the construction industry are not really concerned with the measly share of military construction awards made to the small construction firms of the country. The truth of the matter is that they are not dissatisfied with their present near monopolization of all Government construction contracts, including highway and public housing construction. Their clamor serves but one purpose, and one purpose only—to frighten the little fellow from reaching out for a share of Capehart housing and highway construction. This is now big business' exclusive domain, which it has, thus far, succeeded in keeping to itself. Theirs is, therefore, a policy of intimidation.

If you do not believe that their aim is monopoly on housing and school construction, read please the resolution adopted last January by the Montana Building Chapter of AGC. There, they openly state that they are determined "to prevent the set-aside program of the Small Business Administration from being extended to—the public housing program, the proposed school construction program—or future Federal construction programs that would in the future be awarded under this set-aside program."

Read please, also, a fairly recent issue of the Constructor, an official AGC publication. There, again, it is openly stated:

> SBA is increasing the already devastating competition in the industry by bringing in many new small firms, and now is getting into the highway program.

No one can doubt the true purpose of this anti-set-aside campaign. The cat is out of the bag. The issues raised are artificial, the criticisms unfounded, the statistics in support thereof manufactured. The only thing that is not fictitious in this whole sordid matter is tne purpose to destroy the set-aside program.

Although the issues raised are artificial, the arguments advanced in support thereof are even more so. They are based, as I said before, on erroneous or misinterpreted statistics, erroneous and misleading assumptions, and outright untruths. I shall not take up your time with the many inane and self-defeating accusations broadcast by the AGC in a widely distributed pamphlet of February 1962, entitled "What Every Taxpayer Should Know About the Small Business Administration." I will limit myself to the refutation of those statements which, without knowledge of the facts one might take seriously. Here they are:

First. They falsely claim that small contractors performing set-aside contracts are less efficient.

It is asserted that the small business set-aside program, as it relates to the construction industry, is subsidizing inefficient and marginal small business contractors at the expense of solid and responsible businessmen. Paralleling this allegation is the one that the set-aside program is bringing new contractors into a field in which competition is already acute and where the existing firms are by no means fully occupied. This, it is alleged, is accomplished by grants of loans to people who cannot obtain them elsewhere, because they are unable to show the loans would be sound investments. These firms, it is further said, are without sufficient skills, knowledge, and background, and, therefore, inferior in job performance; and they are only able to compete as a result of SBA's issuance of certificates of competency.

The facts are, of course, otherwise. SBA is not setting up anybody in business, nor does it make business loans unless there is a reasonable assurance that the loan can and will be repaid in full.

You are aware, no doubt, that the law does not authorize the making of a direct loan to a small business loan applicant, unless his inability to obtain such from a private lending institution has been satisfactorily evidenced. Those who interpret this as an indication that SBA is financing bad credit risks, overlook the fact that credit standing is not the sole determining factor of a bank's loan policies. The maturity length of loans, for instance, has a great effect upon their lending willingness. It is common knowledge that banks do not customarily make commercial loans in excess of 3 or 4 years. In fact, we hear repeatedly from the banks that bank examiners scrutinize their portfolios, and if they find too many long-term loans, these become criticized assets. This is one of the foremost reasons given by banks to prospective small business borrowers of reasonably good credit standing requiring loans for 7, 8, or up to 10 years. It is in cases like these, and where there is reasonable assurance of repaymnt of the loan, that SBA steps in and renders the necessary financial assistance. More often than not it is done in conjunction with private lending institutions on a participating or a deferred basis.

All loans, whether granted by SBA alone or in conjunction with a private lending institution must be of such sound value and so secured that there is reasonable assurance of repayment. In no event does SBA extend credit to a borrower who is considered a poor credit risk.

Please note, Mr. Speaker, in this connection, that due to the prudence exercised by SBA in this respect, the dollar rate of loss evaluated as of December 31, 1961, was only 1.6 percent in construction loans as against 1.3 percent of all other business loans. These figures are most significant in view of the false impression created by AGC and its satellites that 18 percent of SBA's construction loans will result in a dead loss. This is just not true.

Furthermore, the law and regulations require that all bidders, large or small, must be responsible and competent.

A new company finds it most difficult to prove its competency. Part of the proof of competency is past successful operation in the very field of business in which the award is to be made.

Part of the proof of responsibility is evidence of financial ability to perform. Just as the procurement office must find these facts, so too must the SBA official find them in order either to issue a certificate of competency or to approve an application for a loan.

The two applications by the same firm are rarely simultaneous or coincidental or dependent one on the other.

Second. They falsely assert that set-asides lower performance standards.

Neither is there any valid basis for big business' assertion that furnishing assistance to small business concerns lowers performance standards. The fact that a contractor obtained a contract under a set-aside procurement, or the fact that a contractor has an SBA loan, has no bearing whatsoever on his efficiency. His efficiency must be established in advance of either event.

I invite your attention to the fact that construction work inspection is a responsibility of the contracting agency and is carried on to the same degree with all contractors, large or small. This was established beyond question at a hearing before the House Appropriations Subcommittee last May, and at a February joint meeting of staff members of the Senate Committee on Banking and Currency and the Senate Select Committee on Small Business with representatives of the Small Business Administration, the Department of Defense, and the General Services Administration.

The Department of Defense and General Services Administration representatives indicated that contracts awarded under the construction set-aside program have been satisfactorily performed; that inspection by the procuring agency during the performance of the contract, as well as the inspection after the completion of the job, is the same in set-aside contracts as in other construction contracts entered into by the Government; and that these contractors are bonded by private bonding companies in the same manner under set-aside contracts as in other construction contracts.

Generally, the decision whether a particular firm can handle a contract is made by the contracting officer. The great bulk of the small concerns to which such contracts have been awarded, obtained them not because of SBA's intervention, but because the contracting officer made a favorable finding respecting their ability to perform. In these cases SBA did not participate in the award decision.

Where there is a doubt as to the capability of a small contractor—and such doubts are sometimes expressed by contracting officers—SBA pursuant to section 8(b)(7) of the Small Business Act, is empowered to certify that a small business concern has the capacity and credit to perform a specific contract. Such certification must be accepted by the procuring agency as conclusive.

In carrying out this certificate of competency program, SBA conducts a thorough and careful investigation and analysis of a small business concern's financial and technical ability to perform the specific contract. A certificate of competency will not be issued unless this investigation and analysis establish a reasonable assurance that the contract will be satisfactorily performed.

In the construction industry, where from 1953 to date SBA issued some 30 certificates of competency, not one of the contracts involved in these certifications have been terminated for default. This, I suggest, sufficiently proves that SBA does not certify competency unless it is there, nor does it bring into the program inefficient contractors.

It is, therefore, absurd to charge that the construction set-aside program places Government defense construction in the hands of less capable, less efficient contractors. Admiral Peltier, in testimony before the House Appropriations Subcommittee last May, was asked:

> To what degree do you exercise the same prerogative of checking competence in the award and set-aside with small business as compared to what you had in the regular routine procedure where you selected contractors in the usual way?

His answer was:

> We make the same check. Since so many people in the construction field are small business, they are competent. There is no question about that.

Third. They falsely claim that construction set-asides result in higher costs to the Government.

Another AGC misrepresentation relates to the claim that construction set-asides result in additional costs to the Government.

To my knowledge, there is no evidence to support this view. The evidence is to the contrary. People who make this allegation do not seem to realize that protection against unreasonable prices lies in the fact that pertinent regulations authorize the contracting officer to reject all bids and readvertise any proposed procurement, including a small business set-aside, if he determines that the prices submitted are unreasonable. The final determination in this regard rests with the Government procuring agency. Once all bids are rejected, the award based on the new bidding must go to the lowest competent, responsible bidder, big or small.

In this connection it is to be noted that the Government engineers designing the technical specifications for a construction contract, normally prepare an advance estimate of the costs involved. In fact, such an estimate is required in case of construction contracts which are expected to cost more than $10,000. The estimate, which is kept secret until the bids are opened, provides contracting officers with reliable guidance in determining whether the lowest bid received represents a reasonable price. This safeguard is just as effective in the set-aside program as it is in every other procurement program.

The procurement agencies of the Government have repeatedly asserted that they have no evidence that the small business construction set-aside program involves additional costs to the taxpayer. Former Secretary of the Navy Connally, in testifying not so long ago before the Senate Procurement Committee said:

> I do not know of a case where the Navy or the Government has wound up paying more money for an item as a result of doing business with small business firms.

And, in a report to the Senate Small Business Committee, on February 5, 1962, the Department of Defense included the following statement:

> Some questions have, in fact, been raised as to whether we have not overemphasized the role of small business in our construction programs at the cost of paying unreasonable prices to effectuate set-asides. We have, however, conducted a thorough review of construction contracts awarded during the 6 months ending June 1961, and have concluded that this allegation is unfounded.

And just the other day, on July 19, 1962, to be specific, in a hearing before the Senate Armed Services Committee, the Assistant Secretary of the Department of Defense, the Honorable Thomas D. Morris, reiterated that there is no evidence bearing out a charge of higher cost to the Government as a result of set-asides.

Where, then, does the higher prices allegation by those who parrot the AGC line stem from? I believe that it stems from the isolated few instances where a large contractor has submitted a lower, nonresponsive bid on a set-aside procurement. Since under a small business set-aside unsolicited bids by large contractors cannot be accepted, and large contractors are aware thereof, some have submitted lower than normal bids knowing that they can do so with impunity, for they cannot be called upon to perform at the low bid price. These ineligible large firms are, thus, free to bid unrealistically or even at a loss in order to discredit the bids offered by small firms who are bound by the prices they quote.

On the other hand, the records affirmatively disclose that during the last fiscal year alone, the SBA certificate of competency program saved our Government $4.5 million and at the same time provided employment to 1,360 workers who might have had no jobs.

Fourth. They also claim there is too much subcontracting.

Still another irresponsible complaint made against construction set-asides is that small firms which receive the contract subcontract too much of the work.

The AGC knows that in the construction industry a prime contractor rarely handles the whole project himself. They have no reason to believe that small construction firms subcontract more of the work than is customary in the industry. No less than their large competitors, these small firms assume all of the risks and burdens of prime contractors, and they deserve recognition as such. The fact is that the larger the contractor, the more the subcontracting.

Fifth. They falsely assert that SBA makes the set-asides.

Another charge, a double-barreled one, is that first, SBA arbitrarily determines the size of contracts to be set aside for small business; and second, SBA takes away from contracting authorities most of their discretionary power.

Neither of these charges is true. The dollar value is not one of the criteria.

Congress in sections 2(a) and 15 of the Small Business Act declared it to be the Government policy, and directed that all Government agencies utilize all means properly available to set aside a portion of all Government contracts exclusively for small business participation so as to assure small businesses the opportunity to bid on and receive a fair share thereof.

In order to effectuate this congressional mandate small business set-aside criteria have been developed not by SBA alone, but by it in cooperation with the military and civilian agencies of the Government.

The program is a relatively simple one. Its purpose being to assure small business the opportunity to bid on and receive a fair share of Government contracts, SBA has assigned representatives to as many major Government purchasing offices as can be covered by the agency's limited staff. These SBA representatives and the purchasing officials screen proposed purchases. Some of the agencies have small business specialists. These men are not employed by or resonsible to SBA. They are responsible only to the agency employing them. The representatives of the procurement agency and those of SBA jointly determine whether small firms can supply the items or services. They jointly evaluate the small business competition; and, if there is a reasonable expectation that sufficient responsible small business competition can be obtained, earmark the purchases for bidding by small firms. If they do not find at least three responsible and competent small business firms who will bid, there is no set-aside. If at least three do not bid, the set-aside is revoked.

Although the above procedure is followed in setting aside maintenance, repair, and construction contracts, AGC is persistently fostering a misunderstanding to the effect that all construction contracts between $2,500 and $500,000 are automatically set aside for small business. It is claimed, or at least suggested, that procurement officials have been deprived of discretion with respect to the award of such contracts. That is untrue, for no purchase can be set aside for small business by anyone but the procuring agency. SBA can only recommend, period.

When the set-aside program was first established, it was necessary for the SBA procurement center representative to review each procurement and to initiate individual set-aside action on each procurement meeting the established statutory and regulatory criteria for a set-aside—the availability of a sufficient number of qualified small business concerns to assure competition at fair and reasonable prices. Furthermore, it was necessary to repeat this action even when the same items were purchased recurrently and there had been no changes in conditions which justified the original set-aside. This resulted in a duplication of effort. In order to simplify and expedite the program the Congress amended the Small Business Act in 1958 to authorize set-asides, not only with respect to individual awards or contracts, but also for classes of awards or contracts.

Now, where SBA has reason to believe that the criteria are generally applicable to a class of contracts, it requests the procurement agency to treat each contract in such class as if it had been the subject of a specific set-aside recommendation by SBA. In no respect does this impair the right of procurement officials to reject a recommendation. In fact, they can and do call SBA's attention to those contracts in which the particular circumstances would not justify a set-aside. Where warranted the recommendation is rescinded.

In cases of disagreement section 15 of the Small Business Act specifically provides that—

> The matter shall be submitted for determination to the Secretary or the head of the appropriate department or agency.

Thus, all SBA can do in such cases is to appeal. The final authority is in the procuring agency.

The application of this procedure to construction contracts is merely an extension of the class recommendations made in other industries for items such as adhesives, ready-mix asphalt, boxes and crates, cement, various types of containers, and for services such as drycleaning, janitorial, guard, and watchman services.

As the procurement agencies gained experience in the field of construction, it became apparent that the class set-aside procedures are applicable to the bulk of construction contracts between $2,500 and $500,000. Accordingly it was agreed that the contracting officer should consider each requirement for construction within these dollar limitations as if SBA had made a specific recommendation to restrict it to small business. But he still retains full jurisdiction to exercise his own discretion.

An analysis prepared by the Department of Defense covering the first half of calendar year 1961 illustrates the workings of the system. During this period the Department of Defense awarded 5,291 construction contracts under $500,000. In approximately 20 percent of these cases the Department of Defense determined with the concurrence of SBA that the governing facts would not justify a set-aside. This record will hardly sustain the contention either that SBA arbitrarily determines the size of contracts to be set aside for small business or that it is taking away from the contracting authorities most of their discretionary power.

Sixth. Another falsehood is the claim that the small business size criteria are unrealistic.

Complaints have been voiced by the AGC and its minions, regarding SBA's definition of "small business" in the construction industry, especially that the criteria established are unrealistic.

In the construction industry, SBA's former size criteria were independent ownership and operation, nondominance in the field, and annual average receipts for the past 3 years not exceeding $5 million. SBA changed its size definition, effective as of August 1, 1962, thus allowing firms with average annual receipts of up to and including $7½ million to qualify as small construction firms. Although the changed definition will give an additional number of contractors an opportunity to participate in Government construction, the AGC is continuing its drum beating.

Anyone having a just complaint as to size standards may present it and get a full hearing and relief, if justified, either on a specific case basis or on an industrywide basis.

Seventh. Labor opposition is not justified.

In a separate category entirely is the grievance voiced by some representatives of labor against the construction set-aside program. This, Mr. Speaker, is the most painful aspect of this entire matter. The AGC and the enemies of labor have succeeded in persuading some labor representatives that labor's interests lie with the large construction firms. I am confident, however, that when all the facts are bared and understood, better judgment will prevail and the few opposing labor leaders will realize that their interest and that of the public lies not in the destruction, but in the support of the small construction firms of the country.

Let us examine for a moment the allegations concerning labor.

(a) They mistakenly assert that small contractors are not required to pay prevailing wage scales.

They say that contractors performing set-aside contracts are not required to pay prevailing wage scales and therefore the set-aside program is undermining union wage rates.

This criticism is as unjust as it is untrue. Nothing could be further from the truth, and labor should be well aware of that. Witness the legislative program of 1962 of their building and construction trades department presented at the eighth annual legislative conference held March 5–8 at the Sheraton Park Hotel in Washington, D.C.

Although they there opposed the set-aside program, they did not do so on the wage account, but for the alleged and equally unjustified reason that the program causes unemployment.

If unemployment, however, is labor's concern, little do they realize that their opposition to the small business set-asides equally spells the death knell of the labor set-asides, a measure designed solely to alleviate unemployment in labor surplus areas. Their position, then, is contrary to their very own vital interests and demonstrates incomprehensible shortsightedness. This is why I say that if all facts are bared, and the impact of the proposed bills understood, the misguided will retreat from their too hastily occupied position.

But until then let me return to the alleged detrimental impact of the set-asides on wages.

The small construction concerns are not enjoying any preferential treatment as regards compliance with the prevailing wage provisions of the Davis-Bacon Act—49 Stat. 1011. Compliance therewith is required, regardless of size, of all contractors performing Government construction contracts in excess of $2,000. I am confident that there is no method whereby a small construction contractor can legally avoid the provisions of the act. Labor in response to my request has failed to identify a single instance where that has occurred.

(b) They also mistakenly say that set-asides cause unemployment of union labor.

Since the wage charge falls of its own weight, it is asserted that the set-aside program hurts the members of building trade unions who become unemployed.

Let me analyze that validity of this complaint.

First, the matter of whether or not employees are unionized or not has, as the Congress well knows, nothing whatsoever to do with whether a Government contract is awarded by the method of set-aside or otherwise. Unionization is a matter for consideration by the industry and the trade unions, and there are simply no grounds for the assumption that set-asides have an effect on unionization. But, they do have an effect upon employment. In fact, they constitute one of this administration's most effective weapons in its struggle against the continuing national plight of unemployment. Based on past experience, I concluded that if the objectives of the set-aside program were to be achieved, there would be an increased need, and not a lessening one, for construction workers, especially in areas other than metropolitan.

The law very properly requires set-asides in labor distress areas even at higher prices in order to give work where otherwise there would be none.

I do not stand alone in this view on the beneficial effect of the set-aside program on the employment situation. Only recently the Oklahoma Department of Highways and the Oklahoma Highway Commission submitted a joint resolution to the Congress, urging confinement of highway construction bidding to small business as one means of alleviating unemployment in that State.

Any hopes anybody may have that an increase in construction contracts awards to large firms will result in an increased demand for labor are illusionary. Experience shows that large concerns are often able to perform additional contracts with their existing labor force, whereas small concerns are almost always hiring additional labor when awarded a Government contract.

CONCLUSION

In closing, I should like to reiterate emphatically, Mr. Speaker, that opposition to the construction set-aside program stems from only a few large contractors and association officers and directors, not rank and file members, of the various branches of AGC. Letters I have seen bear this out fully.

I exhort the opponents of the program to ask themselves what would happen if set-asides were really to be discontinued and construction contracts awarded on the basis of competitive bidding open to small and large firms alike.

Theoretically the idea sounds great. The fact of the matter, however, is that large companies have the mobility which enables them to enter any State of the Union where contracts are available and bring with them many of their employees, and bid against the local small contractor. This possibility is denied to the little firm by virtue of its very smallness. Thus, deprived by the powerful outsider of its local opportunities and unable to seek work elsewhere, the small contractor is doomed to economic extinction.

This, Mr. Speaker, is the reason why I, the SBA, and 90 percent of the construction industry feel that in the face of the continuing decline in the small business share of Government procurement, the program must be maintained and strengthened as well.

The alternative, I submit, is a stunting of the economic growth of the industry, and absolute concentration thereof in the hands of a few. I urge you to believe me when I say that the 90 percent of the construction industry cannot be preserved unless the actual and potential capacity of small business is encouraged and fostered under the set-aside program. Small business has the technical know-how and resourcefulness but is in no position to compete with big business. It looks to this Congress to help it stay viable and share in the defense and well-being of our country.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. CUNNINGHAM (at the request of Mr. ARENDS) from August 7 through August 14, on account of official business.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

(The following Members (at the request of Mr. KEITH) and to include extraneous matter:)

Mr. JOHANSEN.
Mr. GLENN.
Mr. FINO.

(The following Members (at the request of Mr. HAYS) and to include extraneous matter:)

Mr. MULTER.
Mr. POWELL.
Mr. MORRIS K. UDALL.
Mr. BARING.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2206. An act to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Fryingpan-Arkansas project, Colorado.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1771. An act to improve the usefulness of national bank branches in foreign countries;

S. 2869. An act to amend chapter 31 of title 38, United States Code, to afford additional time during which certain veterans blinded by reason of a service-connected disability may be afforded vocational rehabilitation training;

S. 2978. An act to authorize the Foreign Claims Settlement Commission of the United States to investigate the claims of citizens of the United States who suffered property damage in 1951 and 1952 as the result of the artificial raising of the water level of Lake Ontario;

S. 3109. An act to amend chapter 17 of title 38, United States Code, in order to authorize hospital and medical care for peacetime veterans suffering from noncompensable service-connected disabilities; and

S. 3525. An act to authorize the Administrator of General Services, in connection with the construction and maintenance of a Federal office building, to use the public space under and over 10th Street SW., in the District of Columbia, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on August 6, 1962, present to the President, for his approval, bills of the House of the following titles:

H.R. 3822. An act for the relief of Ahsabet Oyunciyan; and

H.R. 10904. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1963, and for other purposes.

ADJOURNMENT

Mr. HAYS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 28 minutes p.m.) the House adjourned until tomorrow, Wednesday, August 8, 1962, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2377. A communication from the President of the United States, transmitting an amendment to the budget for the fiscal year 1963 involving an increase in the amount of $80 million for the Agency for International Development (H. Doc. No. 503); to the Committee on Appropriations and ordered to be printed.

2378. A letter from the Secretary of Defense, relative to the loan of one destroyer to the Government of Pakistan, pursuant to section 7 of Public Law 87-387; to the Committee on Armed Services.

2379. A letter from the Secretary of the Army, transmitting the annual report of the U.S. Soldiers' Home for the fiscal year 1961, pursuant to an act approved March 3, 1883, as amended (24 U.S.C. 50 and 60); to the Committee on Armed Services.

2380. A letter from the Comptroller General of the United States, transmitting a report on the examination of the pricing of spare engines for fire-crash vehicles under Department of the Air Force fixed-price prime contracts with Continental Motors Corp. (Continental), Muskegon, Mich.; to the Committee on Government Operations.

2381. A letter from the Assistant Secretary of the Interior, transmitting a draft of a proposed bill entitled "A bill to authorize the acquisition of lands for addition to the Adams National Historic Site"; to the Committee on Interior and Insular Affairs.

2382. A letter from the executive secretary, National Music Council, New York, N.Y., transmitting the financial report of the National Music Council for the year ending April 30, 1962, pursuant to Public Law 873, 84th Congress; to the Committee on the Judiciary.

2383. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a report to the Committee on Science and Astronautics of the House of Representatives pursuant to section 3 of the act of July 21, 1961 (75 Stat. 216, 217), and submitted to the Speaker of the House of Representatives pursuant to rule XL of the Rules of the House of Representatives; to the Committee on Science and Astronautics.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PRICE: Committee on Armed Services. H.R. 5423. A bill to amend title 10, United States Code, to authorize the Secretary of the Navy to take possession of the naval oil shale reserves, and for other purposes; with amendment (Rept. No. 2141). Referred to the Committee of the Whole House on the State of the Union.

Mr. PRICE: Committee on Armed Services. S. 2020. An act to amend part IV of subtitle C of title 10, United States Code, to authorize the Secretary of the Navy to develop the South Barrow gasfield, naval petroleum reserve No. 4, for the purpose of making gas available for sale to the native village of Barrow and to other non-Federal communities and installations, and for other purposes; without admendment (Rept. No. 2142). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARING:

H.R. 12789. A bill to direct the Secretary of the Interior to convey to the city of Henderson, Nev., at fair market value, certain public lands in the State of Nevada; to the Committee on Interior and Insular Affairs.

By Mr. BELL:

H.R. 12790. A bill to provide, for purposes of income taxes under the Internal Revenue Codes of 1939 and 1954, that awards received under the Japanese-American Evacuation Claims Act of 1948 shall not be included in gross income; to the Committee on Ways and Means.

By Mr. BREWSTER:

H.R. 12791. A bill to provide that participation by members of the National Guard in the reenactment of the Battle of Antietam shall be held and considered to be full-time training duty under section 503 of title 32, United States Code, and for other purposes; to the Committee on Armed Services.

By Mr. DORN:

H.R. 12792. A bill to prohibit strikes in certain strategic defense facilities; to the Committee on Education and Labor.

By Mr. HOLLAND:

H.R. 12793. A bill to authorize modification of local participation in flood control projects; to the Committee on Public Works.

By Mr. JOELSON:

H.R. 12794. A bill to provide for the sale of the U.S. Animal Quarantine Station, Clifton, N.J., to the city of Clifton to provide for the establishment of a new station and for other purposes; to the Committee on Agriculture.

By Mr. MATHIAS:

H.R. 12795. A bill to provide that participation by members of the National Guard in the reenactment of the Battle of Antietam shall be held and considered to be full-time training duty under section 503 of title 32, United States Code, and for other purposes; to the Committee on Armed Services.

H.R. 12796. A bill to amend the act entitled "An act to provide for a mutual-aid plan for fire protection by and for the District of Columbia and certain adjacent communities in Maryland and Virginia, and for other purposes"; to the Committee on the District of Columbia.

By Mr. MOORE:

H.R. 12797. A bill for the relief of the State Centennial Commission of West Virginia; to the Committee on the Judiciary.

By Mr. MURPHY:

H.R. 12798. A bill to facilitate the entry of alien skilled specialists and certain relatives of U.S. citizens, and for other purposes; to the Committee on the Judiciary.

By Mr. O'HARA of Michigan:

H.R. 12799. A bill to provide Federal assistance for programs in the States for projects which will benefit older persons; to the Committee on Education and Labor.

H.R. 12800. A bill to extend for two additional years the temporary provisions of Public Laws 815 and 874, 81st Congress, to eliminate certain limitations on the applicability of such acts, and for other purposes; to the Committee on Education and Labor.

By Mr. SEELY-BROWN:

H.R. 12801. A bill to amend the Tariff Act of 1930; to the Committee on Ways and Means.

By Mr. SMITH of Iowa:

H.R. 12802. A bill to provide further for cooperation with States in administration and enforcement of certain Federal laws; to the Committee on Agriculture.

By Mr. WHARTON:

H.R. 12803. A bill to amend section 1461 of title 18 of the United States Code with respect to the mailing of obscene matter to minors, and for other purposes; to the Committee on the Judiciary.

H.R. 12804: A bill to protect postal patrons from obnoxious mail matter; to the Committee on Post Office and Civil Service.

By Mr. CRAMER:

H.J. Res. 844. Joint resolution proposing an amendment to the Constitution of the United States permitting nonsectarian religious observances founded upon the recognition of God in public schools or other public places, if participation therein is voluntary; to the Committee on the Judiciary.

By Mr. HARDING:

H.J. Res. 845. Joint resolution designating the dam and reservoir constructed as a part of the Palisades Dam and Reservoir Federal reclamation project, Idaho, as the "Henry C. Dworshak Dam and Reservoir"; to the Committee on Interior and Insular Affairs.

By Mr. ST. GERMAIN:

H.J. Res. 846. Joint resolution requesting and authorizing the President of the United States to officially proclaim the week beginning November 4, 1962, as National Folk Music Week; to the Committee on the Judiciary.

By Mr. THOMPSON of New Jersey:

H.J. Res. 847. Joint resolution authorizing the President of the United States to designate the period from November 26, 1962, through December 2, 1962, as National Cultural Center Week; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HARDY:

H.R. 12805. A bill for the relief of Lt. Claude V. Wells; to the Committee on the Judiciary.

By Mr. KILBURN:

H.R. 12806. A bill for the relief of Bok Hi Lee; to the Committee on the Judiciary.

By Mr. MICHEL:

H.R. 12807. A bill for the relief of Eugene Ahrends; to the Committee on the Judiciary.

By Mr. MURPHY:

H.R. 12808. A bill for the relief of Elvira V. Sommers; to the Committee on the Judiciary.

By Mr. ROOSEVELT:

H.R. 12809. A bill for the relief of Tom You Hong, Wai Kuen Wong (also known as Alice Tom), and Peter Tom; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Labor Dumps Baring for Stand Against Socialized Medicine

EXTENSION OF REMARKS
OF
HON. WALTER S. BARING
OF NEVADA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 7, 1962

Mr. BARING. Mr. Speaker, under leave to extend my remarks, I should like to have inserted in the CONGRESSIONAL RECORD a reprint of a speech I made which was reprinted and circulated by friends who have the same belief as I do regarding medicare under the social security system, which appears to me to be the start of socialized medicine.

This speech was made at the AFL–CIO convention in Las Vegas, Nev., which endorsed my opponent after I had been told in advance that such endorsement would be mine if I would vote for the King-Andersen bill:

NEVADA LABOR BOSSES DUMP CONGRESSMAN BARING FOR HIS COURAGEOUS STAND AGAINST SOCIALIZED MEDICINE PLAN

This will be the eighth time in 16 years that it has been my pleasure to appear before your group and seek labor's support for my candidacy for the Congress of the United States.

Seven times over a period of 14 years your group has overwhelmingly supported my candidacy. Labor has always joined with me and I with them in facing our common foe at election time. The results generally have been quite favorable but we have always had a pretty rough road to travel. The record of that 14 years speaks for itself.

Your national representatives have been high in their acclaim of my stand on matters affecting organized labor. Within the State itself, your leaders and members of the various locals have from time to time contacted me and have expressed their satisfaction with my representation not only of the State of Nevada, but of organized labor itself.

I have journeyed here for the purpose of receiving my eighth consecutive endorsement. I have read and heard of criticism in some quarters as to my standing on some present matters of legislation. Frankly, I was not too concerned. I attributed the apparent misunderstandings to an unfavorable press.

However, shortly after arriving in town I had a visit from two of the leaders of this State organization, and was advised by them that unless I came forward and made an out-and-out commitment to be in favor of the King-Anderson bill, otherwise known as medicare, my continuing support by your organization would be in jeopardy.

Let's see what my stand on this matter is.

The King-Anderson bill was introduced in both the House and the Senate, and in neither body were the proponents of the bill able to get it out of committee. (For your information, I did not serve on the House committee which had the bill under consideration. At the time the King-Anderson bill was introduced, it contained certain language and methods which I did not feel were in the interest of the majority of the people in either the State of Nevada or the United States of America. I therefore announced to the press that I was opposed to the King-Anderson bill in its original form. Let's see what happened.)

The proponents of the bill, who had the strong support of President Kennedy, and after consultation with him themselves decided that the bill in its original form had no chance of passing.

They amended and watered down the King-Anderson bill substantially through legislative maneuver, and put it on as a rider to the welfare bill in the Senate. The Senate defeated the measure by a narrow margin. Those voting against were 21 Democratic Senators, constituting a third of the Democrats in the Senate, and 31 Republican Senators. This bill has never been voted on in the House and will not be presented until the next session of the Congress.

I am as compassionate as anybody living for the fine elderly and needy people in our country who are now in the golden years of their life, and I am very cognizant that we do have quite a problem in this sphere. Something must be worked out to help them, but the manner in which we act is the deciding point.

The King-Anderson bill wants to put medicare under the Social Security Act, which makes the whole program one of compulsory health insurance. This is not in line with the American way of life and while, as I have said, we must have something to help, it must be on a voluntary basis or else the whole program is labeled as socialized medicine.

Having served on the scene for 10 years, I have lived with this situation, for the subject matter is not a new one. It started under President Truman's administration, continued through President Eisenhower's administration, and the same forces are still fighting to pass this compulsory health insurance under this administration.

I want to point out to you that in each successive Congress from and including Truman's administration until now the majority of the legislators in the National Congress have turned compulsory health insurance down because of the fear of socialized medicine.

I want to say that I know the proponents of the King-Anderson bill personally, and that their intention is to have a public law passed and signed so that it is on the books, and then they will remove the age limit of 65 so that the bill will encompass everyone of all ages. This is unconstitutional, for it would become a direct change in our American way of life.

The bill itself, as it stands today, only covers those people who are presently under the social security system. Those who have never had any social security do not get the benefits, and I think a much more appropriate plan would be to perhaps cut down our budget on some unnecessary foreign aid spending and make outright grants to those people who actually are in need of medical care, then it would not be compulsory insurance.

It would answer the problem and, surely in view of the light that we are taking care of foreigners all over the globe, we could take care of our own elderly people.

Now, one of my Democratic opponents has openly stated that he will be a rubberstamp to the administration, and has stated that I talk as a Republican. My Republican opponent has publicly stated that I vote as a New Dealer. This is an unusual situation, and I'm telling you right here and now that both men are wrong.

I talk and vote as an American who believes in the Constitution of the United States, and I have stated publicly that I will conduct my campaign on an Americanism platform in defense of the Constitution.

How can anyone challenge this if he is a real American, unless he himself is a rubberstamp?

Where does loyalty start, to your country or to your party?

My party background is one of Jeffersonian Democracy, believing in States rights. I do not like to see centralized government become so strong that it is only a hop, skip, and a jump from socialism, and we all know what the next step is after socialism.

Thomas Jefferson said: "The best government is the least government." He also said: "I place economy among the first and foremost virtues, and public debt as the greatest of dangers to be feared. To preserve our independence we must not let our rulers load us with perpetual debt. If we run into such debts we must be taxed in our meat and drink, in our necessities and in our comforts, in our labor and our amusements. If we can prevent the Government from wasting the labor of the people, under the pretense of caring for them, they will be happy." I repeat, "under the pretense of caring for them"—for I think this to be a most important thought.

This country has become most lethargic, and most people have gone along over the past two decades thinking that Uncle Sam is a magician and can do this and that at will via the public expense method. Somebody has to pay these bills, and that somebody is you, or you and me.

The national debt is now $308 billion, and this makes our financial system a very lopsided and dangerous state of affairs. Yet, there is a group of very powerful thinkers who are now in high Government places—in fact, some 33 in number—who are left of center and are all members of the ADA, a group which propounds Fabian socialism.

They are mixed into both parties, so I am critical of this group as it exists in both parties. This is not political, it is bipartisan. They have almost discarded American patriotism and to their way of thinking, such great Americans as Patrick Henry, Henry Clay, Thomas Jefferson become nothing but "bums" or, if you please, modern-day John Birchers. And yet, since I was a boy I was taught that patriotism for my country was the highest and greatest thing that one could show.

You have heard this same group label me and other good Americans with some fantastic name such as McCarthyites, Birchers or anything else fantastic, so as to throw the blame and suspicion of what they are actually doing, stating that these ultra-ultra rightists are bad for the country.

Somebody has to challenge them and show how bad this group of leftists is for our country, for they are not Americans at heart but are power hungry and are desirous of creating a one-world welfare state. Instead of trying to keep America sound the way it grew up, on supply and demand, free enterprise, and labor, they have thoroughly brainwashed many unsuspecting citizens into thinking that the Government should take care of them.

Let me remind you what Abraham Lincoln said: "You cannot build character and courage by taking away a man's initiative and independence. You cannot help men permanently by doing for them what they could and should do for themselves." While Lincoln was a Republican, and I have now quoted Jefferson and Lincoln, I want you to know that I stand firm in both men's beliefs. They were good Americans.

Delegates to this convention, I made an open stand to the people I represent in Nevada, which means all the people. I am frankly alarmed at this sudden turn to the left in government, and I want to leave this thought with you today—that a government that is big enough to give you everything you want is a government big enough to take everything you've got.

I am not McCarthy reborn, as was expressed in one of our local morning newspapers. I am not a John Bircher, or any other fantastic name. I am a legislator who studies cause and effect, and I vote what I think will do the best good for the majority of the people.

Above all, let me state to you here today that I am not a rubberstamp, for if we had a rubberstamp Congress you would not need a Congress. You would be under a dictatorship form of government.

Men have disagreed, parties have disagreed, over the last 200 years, and this is a healthy condition if we want to preserve our American way of life.

During the 10 years that I have represented you in the Congress, I can proudly say that I have always represented you with dignity and honesty.

If after 10 years I cannot get your support, with you knowing how I have worked for the working people of America, then I cannot come into your convention and ask your support under the provision that I must vote for one particular piece of legislation, or else.

I repeat, delegates, that I am not a rubberstamp—I am a representative of all the people.

I thank you for allowing me to appear before you today and make my position known to you. Thank you again.

Independence Day of the Ivory Coast

EXTENSION OF REMARKS

OF

HON. ADAM C. POWELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 7, 1962

Mr. POWELL. Mr. Speaker, we take this opportunity to send warm felicitations to His Excellency, the President of the Republic of the Ivory Coast, Felix Houphouet-Boigny; and His Excellency, the Ambassador of the Ivory Coast to the United States, Konan Bédié, on the occasion of the second anniversary of the Ivory Coast's independence.

The Ivory Coast, which first became known to Europeans as a result of exploratory voyages by the Portuguese in the 14th and 15th centuries, was administered by France from the end of the 19th century until 1958. At that time its people voted in favor of the constitution of the Fifth French Republic, thus making the Ivory Coast an autonomous state in the French Community. On August 7, 1960, the Ivory Coast became an independent republic, while remaining in the French Community. Today its 3 million citizens, many descendants of ancient kingdoms, are striving to consolidate their young nation.

We were recently privileged to welcome the President of the Ivory Coast, M. Felix Houphouet-Boigny, who came on a state visit. President Houphouet-Boigny, formerly a physician, has become known to the world for his efforts to achieve freedom for the Ivory Coast and for his faith in cooperation with other nations. After the Second World War he was a founder and leader of the African Democratic Rally—RDA—an interterritorial political party which assumed the lead in the movement for independence of the French-African territories. For many years he represented the Ivory Coast in the French National Assembly. President Kennedy has praised his extraordinary efforts in promoting African unity and cooperation within the Council of the Entente, the Union of African and Malagasy States, and through a conference of 20 African nations held recently at Lagos, Nigeria. We trust that President Houphouet-Boigny's visit to the United States and the conversations between the two Presidents have strengthened the friendly relations between our two countries. President Houphouet-Boigny's visit followed a trip by Attorney General Robert Kennedy to the Ivory Coast, where he represented the United States at the first anniversary of that nation's independence last August.

The Ivory Coast has cooperated closely with France in its economic and social development. Attractive housing is being vastly expanded. The proportion of children receiving elementary education has increased ninefold during the last few years. Until 1958, higher education was available only in the universities of France or nearby Senegal; now a university is being established in Abidjan, the capital city of the Ivory Coast. Public health services are being strengthened both at Abidjan and in the interior administrative subdivisions. Meanwhile, an economic boom is in progress, and President Houphouet-Boigny, who successfully led the struggle for African emancipation, is now embarked on a bold experiment of cooperating with foreign governments and investors. We salute the Ivory Coast on the second anniversary of its independence.

Count Your Freedoms

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 7, 1962

Mr. MULTER. Mr. Speaker, I commend to the attention of our colleagues the following article written by our distinguished Secretary of Commerce, the Honorable Luther H. Hodges.

Secretary Hodges has reminded us of one of the most important freedoms we have under a democratic form of government: the freedom of choice.

The article, which appeared in the July 1, 1962, issue of This Week magazine, follows:

COUNT YOUR FREEDOMS

(By Luther H. Hodges, U.S. Secretary of Commerce)

(NOTE.—One of our most exciting American freedoms is one we seldom discuss: Freedom of choice. In a new kind of Fourth of July message, the Secretary of Commerce talks about its meanings for you.)

WASHINGTON.—When I was a boy in North Carolina, the Fourth of July was the most exciting holiday of the year. The whole town turned out for the races in the morning—sack races, three-legged races, and the wild race to capture a greased pig. Then we ate picnic lunches, bought lemonade at the refreshment stands and settled down for the speeches.

Thundering oratory was much admired in that pre-World War I time. We listened, entranced, to the rolling phrases celebrating the glorious declaration of liberation from tyranny and despotism which took place on July 4, 1776. The inspiring words still echoed in our minds hours later when brilliant fireworks exploded in the night sky.

The years passed and the Fourth of July emphasis gradually shifted from the independence as a Nation, won for us by our forefathers, to the precious individual freedoms that we ourselves must guard constantly against attack and erosion. The four freedoms of Franklin D. Roosevelt—freedom of speech, freedom of worship, freedom from want and freedom from fear—became the focus of our celebration.

This year I'd like to bring up a fifth freedom—a freedom we enjoy every minute of every day of our lives, yet one we rarely mention—freedom of choice.

What does this fifth freedom mean? Simply that in our personal, our business, and our community lives, we Americans have a range of free choices unmatched and almost undreamed of in many other parts of the world. For example:

FREEDOM OF CHOICE: WHERE WE LIVE

Americans are free to live wherever they please. One family moves from the city to a suburb. Another goes from a rented apartment to a house of its own. Still another heads west or north to a different State—in pursuit of a new job, a better school, fresher air, or merely a change of scene. People in many countries today do not have this freedom.

When I visited the Soviet Union in 1959 as one of nine State Governors, a man working in a factory told me, through an interpreter, that he came from a very beautiful, distant part of Russia where there were many vineyards.

"Would you like to work in the vineyards?" I asked.

"Oh yes," his face lit up.

"Then why don't you?" I inquired.

He shook his head. Later someone explained to me that in order to buy a railroad ticket to that distant place, the man would be required to show proof that he had a job there. But to obtain a job, he would have to be there. So the idea was hopeless, because he had no choice as to his location or his job.

Last fall in Berlin I noticed a dozen West Berliners standing on a mound near the East-West dividing line waving their handkerchiefs—some occasionally wiping away tears. I asked a woman to whom she was waving.

"To my daughter and her baby and my elderly mother," she told me.

I looked and saw another group of people 500 feet away in East Berlin—imprisoned behind the 7-foot wall topped by barbed wire and broken glass. The divided members of this family had written to each other making a date to wave at that particular time on that Sunday morning.

By contrast, our freedom to move about and live wherever we please is illustrated by a delightful letter received recently at the Department of Commerce census field office in Kansas City. A young woman, licensed to teach school anywhere in the State of Nebraska, asked the census people a simple and sensible question before accepting a job offer: "What city in Nebraska has the highest proportion of unmarried men between 30 and 40?"

FREEDOM OF CHOICE: WHAT WE BUY

The abundance of goods in our supermarkets and department stores is so overwhelming that we tend not to be aware of it until we travel to a place where scarcity prevails. In many parts of the Communist world there is outright famine today—no food to be had at any price. Even the poorest of our people, choosing an ice cream cone for a child from numerous flavors, has difficulty imagining mass starvation striking a country like a Biblical plague.

In East Germany, where the shops are nearly empty, a woman goes from queue to queue and spends half a day assembling the barest necessities for the next 24 hours. In the Soviet Union, everyone I saw appeared to be healthy and well-fed, but the diet is about 60 percent bread and 10 percent potatoes. Not much choice there. In fact, nearly everything of a luxury nature seemed to be pretty much out of reach of the average person.

But let us not be fat, dumb and happy about our good fortune. The graveyard of history is filled with the bones of people who became too complacent, and were overrun by the lean and hungry have-nots. We must help other nations, some of whose citizens exist on as little as $50 each year, to improve their lot. In so doing we will also help ourselves, because some day they will be able to buy automobiles and television sets from us.

FREEDOM OF CHOICE: HOW WE RUN A BUSINESS

The Americans who make and sell all those automobiles, desks, radios, and bicycles enjoy broad freedoms of choice which we call free enterprise. Of course, our commercial society is complex today and sometimes redtape and collisions of public and private interest tend to confuse us. I find this true in Government work, but the fundamental freedoms are always there and the goals are worth all our impatience and inconvenience.

An industrialist can make up his mind at lunch, "I'll build a front-wheel drive car that goes 150 miles an hour." A storekeeper can abruptly decide, "I'm bored with children's clothes—I'd rather sell hobby kits." A salesman can walk out of his job at an appliance company and look for work in the soft drink field. All three can set about their new projects that very afternoon, without the slightest thought of clearances, permits or authorizations.

The one person who exercises an ultimate veto over them is the consumer. He must freely choose to buy what they offer, or they'll soon have no factory, no store, no job. Essentially, ours is a consumer-controlled economy.

When I traveled in Communist countries, it took effort of will to grasp the idea that all business, trades, and industries are run and owned by the State. A workingman cannot casually change jobs. Neither can a factory operator make shirts instead of skirts, replace machinery or open new branches. These are official, not individual, choices.

FREEDOM OF CHOICE: THE WAY WE ADVERTISE

An important free choice of the American businessman is how he sells his product. He can put a sign in his window and hope the neighbors will see it. Or he can buy space in a publication or time on the air and, with the unique sales tool called advertising, try to sell to millions of people.

Of course this freedom is sometimes abused, but blanket criticism of advertising reflects a profound ignorance of its essential role in our economy. Without advertising to stimulate a constantly expanding demand for goods and services, we wouldn't be the wealthiest nation that has ever existed.

Under our system, profits make possible the investments that create jobs and increase production. To keep this cycle spiraling upward, potential demand must be transformed into actual sales. Advertising does this by informing purchasers of the choices offered them.

A single example will show the service rendered to our whole economy by the right kind of advertising. When the first manmade fabrics came out, they were referred to slightingly as "artificial silk" or "synthetic." The word "synthetic" was equivalent of "fake" and the public was disposed to think of the new materials as worthless.

But carefully thought-out advertising informed buyers of the special merits of each of the new fibers. The goods lived up to the promises made for them, and today the production of manmade fibers has reached an astonishing 2 billion pounds a year.

FREEDOM OF CHOICE: WHERE WE SELL

The American businessman can freely choose to sell locally or to faraway markets. Since the Department of Commerce began its current drive to raise our level of exports from 4 percent of our gross national product (Belgium-Luxembourg exports over 31 percent), many smaller businessmen have been amazed to learn that this choice is, as a practical matter, open to them.

One Midwest manufacturer of work clothes asked us if he really could sell his garments abroad. We put him in touch with agents in the United Kingdom and Germany. The salesman he sent to England wrote enough orders to swamp the factory and saved Germany for a later trip.

The 10 American exhibitors at our London Trade Center's lamps and home-lighting show this March wrote $125,000 in initial orders. The hit of the show was the three-way light bulb and switch, an everyday item for us, but a novelty in Britain. American factories are now rushing three-way units for shipment abroad.

I feel that far too few of our businessmen are taking advantage of their freedom to sell overseas. A recent U.S. trade mission to eight new West African Republics ran into many German and French salesmen, wide awake to the commercial potential of these new markets, but not a single American. Yet a 10-percent increase in our exports would virtually eliminate the deficit in our international accounts and create new jobs and profits.

FREEDOM OF CHOICE: WHAT KIND OF TOWN

Finally, I want to talk about the choices a community can make. As citizens you are free to decide what kind of town yours will be—residential or industrial, fast growing or slow to change, a place where people come to study, retire, get rich or kick up their heels.

And when things go wrong, you can choose remedies. Certain areas today are sorely depressed because resources have been depleted, industries have moved away, or leaders of the community have grown careless and indifferent. When this happens, people can simply bemoan their fate and accept relief, or they can leave and start somewhere else. Or they can act in concert to improve their condition.

I think particularly of a Maryland city with a real can-do spirit. In 1960, Cambridge, on the Eastern Shore, was in a decline after the closing of a major food plant. More than 12 percent of the labor force was idle. Stores were failing. The prospects were indeed bleak when four young businessmen formed an industrial committee and by ringing doorbells collected $15,000, partly in $1 and $5 bills.

With this money, hard work, and enthusiasm, they "sold Cambridge" to a manufacturing company, two boat companies and a publishing house. Later, a new sewage system was needed to serve expanding industry. The new area redevelopment program of the Department of Commerce assisted the city with a $68,000 loan and a $204,000 grant, and 875 more new jobs came into being. The people of Cambridge are taxpayers again instead of tax users—because they chose to do something about their problems. They made their choice.

FREEDOM OF CHOICE: LET'S KEEP IT

I get impatient with people who say we Americans have lost our freedoms, lost our momentum, lost our way. We have not. Sometimes I wish for a little of that rousing Fourth of July oratory of my boyhood so we could feel again the heady excitement and throbbing sense of our destiny.

I think we need to remind ourselves that we are not forced to go where we are sent, do what we are told, or eat what we are given—because 186 years ago, we declared for life, liberty, and the pursuit of happiness.

And as we exercise our freedom of choice in scores of ways, we can, by the unselfishness and the farsightedness of our choices, assure the continuation of the freedoms we cherish and their extension to others.

Ready Reference Guide to Senate Press Aids

EXTENSION OF REMARKS

OF

HON. JOHN SPARKMAN

OF ALABAMA

IN THE SENATE OF THE UNITED STATES

Tuesday, August 7, 1962

Mr. SPARKMAN. Mr. President, the National Editorial Association, publisher of the National Publisher, has compiled for the first time a ready reference guide to Senate press aids. This guide appeared in the July 1962 National Publisher, which is distributed to newspapers nationwide.

I believe that publication of this list in the Congressional Record will be helpful to the many fine reporters who work in the Senate and House press, radio-TV, and periodical galleries, as well as to the many newspaper editors around the country who receive the Congressional Record by mail.

Accordingly, I ask unanimous consent to have printed in the Congressional Record the "Ready Reference Guide to Senate Press Aids."

There being no objection, the guide was ordered to be printed in the Record, as follows:

Ready Reference Guide to Senate Press Aids

(Revised through July 20, 1962)

President of the Senate, Vice President Lyndon B. Johnson; press secretary, George Reedy

State	Senator	Press contact
Alabama	Lister Hill, Democrat	Bob Smith.
	John Sparkman, Democrat	Grover C. Smith.
Alaska	E. L. (Bob) Bartlett, Democrat	Miss Mary Lee Council.
	Ernest Gruening, Democrat	George Sundborg.
Arizona	Carl Hayden, Democrat	Fritz Kessinger.
	Barry M. Goldwater, Republican	Tony S. Smith.
Arkansas	John L. McClellan, Democrat	Ralph Matthews.
	J. W. Fulbright, Democrat	Pat Fleming.
California	Thomas H. Kuchel, Republican	Warren Francis.
	Clair Engle, Democrat	Charles Bosley.
Colorado	Gordon L. Allott, Republican	Jack Ware.
	John A. Carroll, Democrat	Harmon Kallman.
Connecticut	Prescott Bush, Republican	David S. Clarke.
	Thomas J. Dodd, Democrat	James P. Boyd.
Delaware	John J. Williams, Republican	Miss Eleanor R. Lenhart.
	J. Caleb Boggs, Republican	William Hildenbrand.
Florida	Spessard L. Holland, Democrat	Oscar Elder.
	George A. Smathers, Democrat	William McHale.
Georgia	Richard B. Russell, Democrat	Earl Leonard.
	Herman Talmadge, Democrat	William H. Burson.
Hawaii	Hiram L. Fong, Republican	Miss Leila Villada.
	Oren E. Long, Democrat	Paul Southwick.
Idaho	Henry C. Dworshak, Republican	Edward Woozley.
	Frank Church, Democrat	Porter Ward.
Illinois	Paul H. Douglas, Democrat	Howard E. Shuman.
	Everett Dirkson, Republican	Harold E. Rainville.
Indiana	Homer E. Capehart, Republican	Gene Dawson.
	Vance Hartke, Democrat	John Munger.
Iowa	B. B. Hickenlooper, Republican	Dan O'Brien.
	Jack Miller, Republican	Loyal Meek.
Kansas	Frank Carlson, Republican	Miss Betty Rosness.
	James B. Pearson, Republican	John Conard.
Kentucky	John S. Cooper, Republican	Bailey Guard.
	Thruston B. Morton, Republican	Albert B. Brooke, Jr.
Louisiana	Allen J. Ellender, Democrat	C. B. Morrison.
	Russell B. Long, Democrat	William E. Leonard.
Maine	Margaret C. Smith, Republican	Bill Lewis.
	Edmund S. Muskie, Democrat	Donald Nicoll.
Maryland	J. Marshall Butler, Republican	Lee Edwards.
	J. Glenn Beall, Republican	Ben Whitehurst.
Massachusetts	Leverett Saltonstall, Republican	Charles Clapp.
	Benj. A. Smith II, Democrat	Robin L. Pell.
Michigan	Pat McNamara, Democrat	Edwin N. Winge.
	Philip A. Hart, Democrat	William B. Welch.
Minnesota	Hubert Humphrey, Democrat	Winthrop G. Griffith.
	Eugene J. McCarthy, Democrat	Clinton Boo.
Mississippi	James O. Eastland, Democrat	Courtney Pace.
	John Stennis, Democrat	Phil Stroupe.
Missouri	Stuart Symington, Democrat	Fred McGhee.
	Edward V. Long, Democrat	S. William Brown, Jr.
Montana	Mike Mansfield, Democrat	Raymond Dockstadter.
	Lee Metcalf, Democrat	Merrill Englund.
Nebraska	Roman L. Hruska, Republican	Dean Pohlenz.
	Carl T. Curtis, Republican	Lynn Mote.
Nevada	Alan Bible, Democrat	Alan Jarlson.
	Howard W. Cannon, Democrat	Chester B. Sobsey.
New Hampshire	Norris Cotton, Republican	Kenneth Roberts.
	Maurice Murphy, Jr., Republican	Norman E. Bailey.
New Jersey	Clifford P. Case, Republican	Sam Zagoria.
	H. A. Williams, Jr., Democrat	William E. Oriol.
New Mexico	Dennis Chavez, Democrat	Henry R. Smith.
	Clinton P. Anderson, Democrat	Howard Bray.
New York	Jacob K. Javits, Republican	Richard Aurelio.
	Kenneth B. Keating, Republican	Mrs. Vera R. Glaser.
North Carolina	Sam J. Ervin, Jr., Democrat	W. Hall Smith, Jr.
	B. Everett Jordan, Democrat	William B. Whitley.
North Dakota	Milton R. Young, Republican	Bill Wright.
	Quentin N. Burdick, Democrat	William O. Scouton.
Ohio	Frank J. Lausche, Democrat	Ray M. White.
	Stephen M. Young, Democrat	Herbert Jolovitz.
Oklahoma	Robert S. Kerr, Democrat	John Meek.
	A. S. Monroney, Democrat	Mrs. Beth Short.
Oregon	Wayne Morse, Democrat	Miss Phyllis Rock.
	M. B. Neuberger, Democrat	Lloyd Tupling.
Pennsylvania	Joseph S. Clark, Democrat	Bernard E. Norwitch.
	Hugh Scott, Republican	Eugene S. Cowen.
Rhode Island	John O. Pastore, Democrat	C. J. Maisano.
	Claiborne Pell, Democrat	Raymond N. Nelson.
South Carolina	Olin D. Johnston, Democrat	Thomas W. Chadwick.
	Strom Thurmond, Democrat	Harry S. Dent.
South Dakota	Karl E. Mundt, Republican	Walter Conahan.
	Joseph H. Bottum, Jr., Republican	John S. Arnold.
Tennessee	Estes Kefauver, Democrat	Charles Caldwell.
	Albert Gore, Democrat	Jack W. Robinson.
Texas	R. W. Yarborough, Democrat	Louie E. Mathis.
	John G. Tower, Republican	C. Herschel Schooley.
Utah	Wallace F. Bennett, Republican	Edwin C. Bliss.
	Frank E. Moss, Democrat	Grant W. Midgley.
Vermont	George D. Aiken, Republican	Charles Weaver.
	Winston L. Prouty, Republican	Robert Donihi.
Virginia	Harry Flood Byrd, Democrat	J. Heywood Bell.
	A. Willis Robertson, Democrat	William Foster.
Washington	W. G. Magnuson, Democrat	Carl Downing.
	Henry M. Jackson, Democrat	Brian Corcoran.
West Virginia	Jennings Randolph, Democrat	James W. Harris.
	Robert C. Byrd, Democrat	Louis I. Freed.
Wisconsin	Alexander Wiley, Republican	Herbert Kirstein.
	William Proxmire, Democrat	Jerry P. Clark.
Wyoming	Gale W. McGee, Democrat	Richard Cook.
	J. J. Hickey, Democrat	Miss Louise Love.

Unique Jewish Farm Colony

EXTENSION OF REMARKS
OF

HON. MILTON W. GLENN

OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 7, 1962

Mr. GLENN. Mr. Speaker, I wish to bring to the attention of my colleagues a very excellent article by Mr. Gary Shenfeld in the Atlantic City Press about a unique farm colony founded by Jewish refugees in south Jersey 80 years ago. One hundred refugee families from Russia settled a few miles west of Vineland and founded the first colony of Jewish farmers in this country. The area later developed into the three towns of Alliance, Norma, and Brotmanville.

These people persevered over almost indescribable hardships. Originally they lived in a large barracks under the worst of conditions when they arrived at Alliance, which is on the Maurice River in the southeast corner of Salem County, about 5 miles northwest of Vineland. The area was covered with woodland over its thousands of acres. The owners, the Leach brothers, cut off timber, sawed it into lumber and sold the land to the Alliance Land Trust for $15 an acre.

From the lumber the people erected shanties 14 feet square and 14 feet high, lined with one thin board and plastered inside. In the winter the settlers suffered from cold and in the summer they sweltered in the heat. Each shanty sold at $150.

The refugees chose the Alliance area because it was located on the Jersey Central Railroad, about 100 miles from New York and about 40 miles from Philadelphia. In the early days, in addition to farming, the settlers opened a cigar factory which operated only briefly, and also went into the tailoring of cheap summer coats and vests which proved profitable. Then berries and grapes came into bearing.

In the meanwhile, A. Brotman, of New York, took over the Gartman farm and built a large shop, eventually building up Brotmanville. While the farms were being cleared of stumps, the settlers were learning the rudiments of farming with the help of books and the advice of neighbors. Mostly they learned through experience. A major problem was education of the children. To get their children into Vineland High School, the immigrants had to pay the tuition personally. The youngsters usually rode their bicycles to school and when that was impossible a wagon had to be hired.

Originally there were four synagogues, and a Sabbath school was inaugurated. Later there were Friday night gatherings at the hall of the big synagogue where also was conducted a public library. There was a night school for adults.

Brushland was still being cleared as late as 1900. The farmers had no running water or electric lights. The "richer" homes might have a kitchen pump, but the water usually came from an outside well. Homes were heated with a wood range. Bathing was done in a homely washtub. Kolman Krassenstein ran a general store and post office, but the bulk of the shopping was done on the weekly horse-and-buggy trip to Vineland every Saturday.

Herman Eisenberg, raised in Norma and graduated from Rutgers and the University of Pennsylvania Law School, is now a Philadelphia lawyer. He recalls his early education in "the little red schoolhouse of Union Grove which consisted of two rooms housing all eight grades." There were four classes in each of the two rooms.

Jacob D. Spiegel, better known as "Jake," was the organizer of the Norma Athletic Association in 1904. In later years, according to Mr. Eisenberg, Jake was to be the guiding spirit of almost everything that took place in Norma. The NAA included residents of Norma, Alliance, and Brotmanville, with its main activity the baseball team.

Only two of the original settlers are left, William H. Levin, about 88, who lives across from the Alliance Cemetery, and Isaac Helig, about 86, who lives on Garden Road.

Mr. Spiegel said:

> Normally, the Jewish people are industrialists, businessmen, and tradesmen. Here, the only thing they had was a piece of land and a home. They worked in neighboring towns to supplement their incomes; in Vineland, Deerfield, and Sharptown's canneries to support themselves.

Elizabeth Rudnick Levin, daughter of one of the original settlers, married Dr. Samuel F. Levin. She was born in Alliance and graduated from Vineland High School. On the 50th anniversary of the immigrants' coming, Mrs. Levin wrote about the prematurely old women who plodded along, day after day through the hot summer, doing the work of man and beast. During the strawberry season, children trudged along with their mothers going from farm to farm under the blazing sun to pick the perishable berries for an insatiable market.

The only recreation of these women was the Saturday morning service at the synagogues and they made yearly contributions toward beautifying the interiors of the "schule."

Sam Berkowitz, who runs the Berkowitz Feed Mill in Norma, says that in the three little villages poultry and general farming are still the biggest industry although the poultry industry is going sour. There are three poultry dressing plants in the area, a pearl button factory and two feed mills.

Mrs. Herman Spector, a Norma resident, says that conditions have changed in the area but the land remains fertile. Many of the old farms have disappeared, replaced by poultry farms now threatened with extinction. New scientific methods of farming have proved that the sweet potato is not profitable enough for the farmer so the basic crops have changed to more garden vegetables.

The spirit of these settlers was summed up on their 50th anniversary when they wrote:

> Our farms are all paid for; we have a good name and credit in the bank, befitting industrious and thrifty people. We feel prosperous and can keep our heads up; we are employed steadily; we are our own bosses.
>
> We are well and fairly comfortable and happy. Even the crisis which played such havoc in the cities with our brethren who were gambling in real estate and in stocks and bonds didn't hurt us very much.
>
> We lost neither our heads nor our homes. Indeed, we have less temptations, albeit less luxuries. We lead a natural life.

Sermons could be written on that last sentence, "We lead a natural life." If every human being could say that, I am sure most of the world's ills would disappear and we could all enjoy "life, liberty, and the pursuit of happiness."

Needed: A Reappraisal of the Veterans Pension Principle

EXTENSION OF REMARKS
OF

HON. MORRIS K. UDALL

OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 7, 1962

Mr. MORRIS K. UDALL. Mr. Speaker, in recent months the Members of Congress have been the target of an effective, well-organized campaign by veterans of World War I to obtain signatures on a discharge petition which would bring their special pension bill, H.R. 3745, to the House floor. While I have many fine friends who endorse this legislation, I cannot in good conscience sign this discharge petition. Since I know many of my colleagues have wrestled with this same decision, I want to share with them my thoughts contained in a letter addressed to a veterans' barracks in my hometown.

The letter follows:

AUGUST 6, 1962.

Mr. ALFRED B. MILLER,
Public Relations Officer, Veterans of World War I, Tucson, Ariz.

DEAR MR. MILLER: Thank you for your letter of July 28 in response to my letter of July 18 addressed Mr. Paul Russell.

I am sure you appreciate the fact that at any time I am under pressure from conflicting groups on dozens of matters before the Congress. Those on one side are just as vigorous in presenting their views as those on the other. Your fine organization has been doing a good job of making its views known to the Congress, and I must commend your national officers for their effectiveness. Nevertheless, I must say that, as in all other matters, I would be fulfilling less than my public trust if I simply listened to their arguments and ignored what others are saying or failed to make a study of the broad implications involved in H.R. 3745.

A question that concerns me greatly is the premise on which non-service-connected veterans' pensions are based. I understand that veterans of the Civil War and Spanish-American War received pensions. Some of their widows are still living, and they are continuing to receive pensions. Now World War I veterans seek a special pension of their own, and they base their claim on the fact that veterans of previous wars received them. I say this is not sufficient reason and that it is time as a nation we took a second look at the veterans' pension concept. Because we did a thing once doesn't mean that we must or should go on doing it forever.

The principle your organization advocates is this: A minimum of 3 months of military service in one particular war entitles a man to a special tax-free pension when he reaches 65 years of age. Does this make sense? I am not persuaded that it does.

Just to put this request in perspective, consider this fact: When World War I ended, most of its participants left the service and returned to civilian life. But a few remained and made a career of military service. In 1947 some of those who enlisted in 1917 retired after 30 years of active duty and service in two wars. Those who had risen to the rating of master sergeant retired with pensions of $185.63 per month. Now your organization is asking $102.37—or 55 percent of a 30-year pension—for those of their fellow servicemen who left the service 29 years earlier. What kind of sense does this make?

I have refused to sign the discharge petition for these reasons:

1. I don't believe this is the way to enact legislation unless there is clear evidence of bad faith on the part of a committee and its chairman. While some of the members of this committee have signed the discharge petition under great pressure from this veterans' group, a majority have not, and the chairman is firmly opposed to this legislation. I have a high regard for these colleagues of mine, I think they have served the veterans of this country exceedingly well, and I do not believe other Members of Congress have the specialized knowledge of veterans' legislation possessed by members of this committee.

2. I fail to see how one can justify paying veterans of one particular war (and not other wars) a pension merely for having served 90 days or more during that war (the average service in World War I was 12 months). If there were a way to compensate the men who died in that war, the sky would be the limit; but the men who came back from camp or overseas hale and hearty clearly have not earned the right to pensions for which other people must work all their lives.

3. There already is a law providing non-service-connected old-age benefits to veterans (of all wars) who are in need.

4. There already are laws providing benefits to veterans with service-connected disabilities.

5. Veterans of the First World War comprise 15 percent of all U.S. veterans and have received 28 percent ($30 billion) of all expenditures for all veterans. In spite of the GI bill of World War II, veterans of World War I have received nearly twice as much per capita ($7,000 compared to $3,700) as veterans of the Second World War.

6. If the principle of pensions for war service is right, then there can be no logical ground for refusing pensions to veterans of World War II and the Korean war who now or in the future are of retirement age. If this bill passed, American taxpayers would pay out an additional $4.3 billion by 1966 and $11.6 billion by the year 2000. If World War II and Korean war veterans were to receive the same pension (and passage of this bill would certainly make this a likely possibility), the additional cost might ultimately exceed $100 billion, or more than half the total debt this Nation incurred fighting a war on two fronts from 1941 to 1945.

7. The American Legion, Amvets and other veterans' groups oppose this kind of veterans' pension and rightly believe the enormous cost of such a program (an extra $1 billion the first year alone) would incur the wrath of taxpayers and hurt other necessary veterans' legislation.

8. If improvements are needed in benefits for needy veterans or those with service-connected disabilities, this is the wrong way to make them.

In the past few months I have received hundreds of letters and petitions urging me to sign the discharge petition for H.R. 3745, the pension bill. Various arguments are used by sincere people who believe wartime service gives a man a right to a lifetime pension. Perhaps the main argument is that veterans of World War I were badly treated, that they never received anything like the generous educational opportunities received by veterans of World War II. In part, this is true. In the years between the two great wars this country came to recognize more of an obligation to the men who risk their lives in war. As a veteran of World War II, I know that this country was most generous in helping veterans complete their interrupted education and to find places for themselves once again in society. I can understand the regret of World War I veterans that they had not received similar opportunities.

However, these facts should be recalled:

1. The average length of service in World War II was 2½ years, compared to 12 months for World War I.

2. Seventy-seven percent of World War II veterans served overseas, compared with 50 percent of World War I veterans.

3. Educating a man to reenter normal civilian life is a proper function of a nation that has taken years out of that man's life; providing him a lifetime pension when he retires is a very different kind of thing having no direct relationship to his military service.

I am sorry to see you citing my support of foreign aid as a vote against World War veterans. I voted for foreign aid, most of which is military assistance, because I believe this program is a positive way to prevent another war and to protect our country—not to engage in free handouts or meaningless generosity to unappreciative people, which is the usual senseless charge made against this program. My vote for foreign aid was cast along with the votes of the patriotic leaders of both political parties, and I am somewhat displeased to have you suggest that I was placing the interests of our country second to the interests of nameless foreigners.

With regard to the American Legion position I am enclosing a statement that is self-explanatory. I recognize that some Legion chapters and departments support the bill, but the position of the organization nationally is very much in opposition.

The statement is made so often that the chairman of the Veterans' Affairs Committee is single-handedly holding up H.R. 3745 that I decided to look into this claim. I find, in the newspaper of your own organization, a list of Congressmen who reportedly have signed the discharge petition. Seven of them and only seven, are members of the Veterans' Affairs Committee. The ranking Republican member, Congressman William H. Ayres, of Ohio, not only has refused to sign the petition but has been outspoken in opposing the bill. Of the 25 Congressmen on the committee 18 have refused to sign the petition. This is not evidence of one-man dictatorial rule.

In addition, I might comment that I have talked personally and privately with members of this committee, and I can assure you that their unwillingness to bring this bill out stems from their own judgment, and not from dictatorial pressure from the chairman.

H.R. 3745 would not give pensions to every World War I veteran, but it would to most. There are limitations, to be sure. To receive a pension a veteran must have annual income of less than $2,400, if single, or $3,600 if married. However, he can exclude from his income all pensions, annuities, social security payments and the like—the sources of most retirement income. Thus, this bill would provide a pension of $102.37 per month to a married veteran already receiving $5,000 of income, provided only that $1,401 of that income came from social security and other public or private annuity plans (including insurance policies).

I greatly regret that I cannot justify signing this discharge petition. Nothing would please me more than to be able to comply with the wishes of many good friends who have asked me to do so. Unfortunately, a sound case has not been made for this bill. There are no adequate answers yet provided to the questions that arise concerning such legislation. It doesn't make sense to enact pensions for one set of retired war veterans and not another. Extending the pension principle to yet another war, with demands of World War II and Korean war veterans around the corner, makes very little sense. Giving a man a tax-free pension because he served 3 months or more during wartime is a concept that needs far more complete study than this discharge procedure would permit. For these and other reasons I must repeat that I am not ready to throw over the standard committee processes of this Congress in order to pass H.R. 3745.

Sincerely,

Morris K. Udall.

Key Targets of the Communists

EXTENSION OF REMARKS

OF

HON. AUGUST E. JOHANSEN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 7, 1962

Mr. JOHANSEN. Mr. Speaker, no Members of this House regret more deeply than do his colleagues on the Committee on Un-American Activities the decision of Hon. Gordon H. Scherer, of Ohio, to retire from office at the end of his present term.

As an extremely valuable addition to his uniformly useful service on this committee for the past 10 years, Congressman Scherer has authored an informative article on current Communist activities in the United States which was published in the August 1962 issue of the American Legion magazine.

Because of the value of this article to Members of Congress and the American people, I include it in full under permission to extend and revise my remarks.

The article follows:

KEY TARGETS OF THE COMMUNISTS

(By Hon. Gordon H. Scherer, Member of Congress)

A short time ago a professor in one of our midwestern universities was lecturing to his class in political science. After a few sarcastic references to the Committee on Un-American Activities, J. Edgar Hoover, and the Federal Bureau of Investigation, he smirkingly said: "This fellow Hoover talks out of both sides of his mouth. One day he admits that the membership of the Communist Party has reached an alltime low in this country. The next day, when he is before the Appropriations Committee of Congress asking for more money for the FBI, Hoover charges that the threat from internal communism in this country is greater than ever."

The professor then continued to parrot the Communist line. He said: "Since there are so few Communists in this country, why should we become so excited over them?

What possible harm can 10,000 Communists do in a nation of 180 million people?"

This professor was not a Communist although he belonged to some Communist-front organizations. Of course, his students did not know that. But here we have a man who, because of his position of influence—and there are thousands more like him in the United States—is doing more harm to this country than many in that group of 10,000 Communists.

In evaluating the extent of the danger of the threat from within, we must multiply this 10,000 many times because of synthetic Americans like the professor. We must be ever cognizant of the fact that most Communists operate from key and strategic positions where their subversive activities have the maximum effect on the greatest number.

Let me cite just a few of hundreds of examples from hearings of the Committee on Un-American Activities in order to prove the point which the professor either did not understand or did not want to understand.

Edward Yellin, a rather brilliant young man, while in college and most likely under the influence of a man like our professor, became a dedicated, fanatical Communist. Let's see how the Communist Party used him in its colonization program. First, we must understand what colonization is. It is a highly developed, successful technique of the Communist conspiracy. As an example, a well-educated young Communist with one or more university degrees makes application to a basic industry for a menial job in an industrial plant. In his application for employment he misrepresents his educational attainments by downgrading them. His job application shows only 1 year's attendance at high school whereas he has a master's degree. A person operating as a colonizer obtains a job on the assembly line where his Communist connections are unknown. He is then in a position to indoctrinate fellow workers and stir up strife and dissension in the plant, at the direction of the Communist apparatus.

It does not take much imagination to see that one red colonizer might be the cause of a slowdown, a strike, and even espionage and sabotage in a vital defense plant. Again, who can say that a single professor such as I have mentioned did not start a chain reaction like this in many directions over the years?

Getting back to Edward Yellin. When he was called before the Committee on Un-American Activities in Gary, Ind., in 1958, he defied the committee and refused to answer questions about his activities as a Communist colonizer in the Chicago area. He was subsequently convicted in the Federal court for contempt of Congress. (Mr. Yellin's appeal from same will be reargued in the Supreme Court in the new term beginning next October 1.) During the litigation he went back to college as a graduate student at the University of Illinois on a Ford Foundation scholarship. The following year—believe it or not—the National Science Foundation which was set up by the Congress in the interest of national defense gave Yellin a fellowship from taxpayers' money to continue his research.

This however was revoked after the Committee on Un-American Activities investigated the National Science Foundation's policies in granting fellowships.

During this investigation it was disclosed that one of the great universities in this country—some people refer to it as one of the more liberal—received from the Federal Treasury, through the National Science Foundation, over a 3-year period, $235,500 for scientific research projects. These projects were requested by and were under the supervision and direction of a professor who, when before our committee not too long ago, invoked the fifth amendment in refusing to answer questions concerning his membership in the Communist Party.

In another case, one Lee Lorch, a brilliant mathematician—but also an identified, hard-core Communist, who was fired from three universities, subsequently received a grant from the National Science Foundation.

Now the National Science Foundation has been set up by your Government primarily in the interests of national defense—and note I say in the interests of national defense—to advance scientific study and research in this country. Its action in granting a fellowship to Yellin seemed incomprehensible.

Professors in the university who knew about Yellin's conviction and Communist Party activities and who recommended him to the National Science Foundation for the fellowship, failed to disclose his conviction in their recommendations. Their excuse was that they were only interested in his proficiency as a scientist.

This same attitude was expressed by people with whom I discussed the award in the National Science Foundation. They said in substance that they were concerned only about Yellin's ability and suitability as a scientist; that some scientists were a different breed of cats than the rest of us, and that they would not give the Government the benefit of their scientific knowledge and research if we inquired too closely into their backgrounds and political beliefs.

To those who continue to peddle the Communist line that 10,000 Communists in this country are of little or no consequence, may I remind them that at the time Russia was taken over, less than one-seventh of 1 percent of the people in that unhappy country were Communists. Poland had only 4 percent. When Castro seized Cuba and took it behind the Iron Curtain, there were only a handful of Communists pulling the strings. Even today in Czechoslovakia, which has the largest percentage of Communists in any country in the world, we find it with only 11 percent.

It should be obvious to the least informed that, if the Communists had attempted to take Cuba by outward or military aggression, they would have failed miserably because we would have moved in with everything we had. Yet today, Havana is as Communist-dominated and controlled as are Peiping and Moscow. Why? Because a corporal's guard of Communists in key positions were able to enlist the help of thousands of Cubans and many Americans by concealing their identity and their real objective. Cuba was taken by internal subversion. Its people and their possessions were taken intact and put to use by international communism. It is now the base of operations for more takeovers in Central and South America.

There are other instances where a relatively few Communists in strategic positions in government were able to flip a country from the Western into the Communist orbit after just a few murders and assassinations. This is what happened in Iraq.

I'm sure that if one of the leftwing crowd accidentally got hold of this American Legion magazine and read this article in the dark of night where none of his ADA friends would catch him, he would say: "Well, none of these things can happen in these United States."

The leftwing crowd in England said the same thing. We all know that England has just completed a penetrating and extensive investigation of Communist infiltration into its Government agencies (called in England, the civil service). The results rocked the British Isles and shocked them out of their complacency. Even Prime Minister Macmillan who, like many people in this country, had heretofore not been too concerned about the Communist internal threat, did a rightabout-face.

Since the United States is the prime target in the current struggle with international communism, is anyone so naive as to believe that only the British are the targets of internal subversion?

In order to prove the tremendous danger of only a few Communists in Government, I am not going to beat an old bag of bones by dragging out the Hiss, Remington, Judith Coplon, Rosenberg, and Abel cases, etc. Instead, let's take a look at the dire results of one of the most recent penetrations of the Government service by just two security risks.

Not too many months ago Bernon Mitchell and William Martin, two brilliant young mathematicians, from good American homes, educated in our best universities, obtained highly sensitive jobs in the top-secret, hush-hush National Security Agency. They defected to the Soviet Union and revealed to the Kremlin that we had broken the Russians' secret code and that of other satellite nations. Of course, these countries immediately changed their codes. This meant months and perhaps years when the United States would be deprived of valuable intelligence information, since it might take that long to decipher their new codes.

In addition to their traitorous act, Mitchell and Martin went on radio and television in the Soviet Union and bitterly attacked and condemned the United States. Yes, they were only two men, but they did incalculable harm to the security of the United States and furnished volumes of effective, insidious propaganda to the Communists in the cold war.

Because the matter is still under investigation, I cannot name names at this time, but I do know that a disreputable character who for many years was, to say the least, closely associated with Communist causes, occupies a position today where he has high-level influence in agencies of this Government.

I am convinced in my own mind that not all of the failures in our missile launchings are due to oversights by our scientists and technicians. Recently, I listened to witnesses under oath who charged that defects found in a highly complex weapon resulted from sabotage in a plant where Communist activity is under investigation. The actual saboteur has not been found.

J. Edgar Hoover, who is perhaps the outstanding authority in this country on Communist objectives and techniques, said:

"Soviet espionage activities in this country expose the fallacy of so-called peaceful coexistence. In recent years, pseudoappeals for peace by Communists have been more than matched by intensified Communist espionage efforts in the United States. Using blackmail, bribery, and similar techniques, Communist agents, many with diplomatic immunity, are stepping up their efforts to obtain our military, scientific, and industrial secrets for use against us. * * * Foremost in the present battle plans of the Communist Party, U.S.A., are well-calculated efforts to embarrass the American economic system; to infiltrate and gain control in our labor organizations; and to secure footholds in basic American industries, such as transportation, manufacturing, communications, and chemicals. Success of these Red objectives will be destruction for our way of life."

The Defense Department, in requesting legislation to help it combat espionage and possible sabotage in defense plants, told the Committee on Un-American Activities:

"U.S. industry is a prime target of the Communist movement in the United States. It is a primary concern to the Communist movement that it obtain from American industry information concerning the defense structure of the United States, particularly with reference to modern weapons of war. To this extent, the Communist Party has been consistently interested in penetrating defense industries where classified work is being performed and also basic industries which, while not engaged in classified work, may be in support of industries performing modern weapons manufacture.

"The potential for bringing defense production to a halt by sabotage of power facilities is enormous and the repercussions would be, I think, disastrous because, if the power itself is cut off, defense plants cannot produce, and we would thus be denying ourselves the weapons which are so essential to our national defense effort."

Here the Defense Department among other things makes the point that it is possible for one Communist in a key position in an electric powerplant in time of crisis to put out of commission not only defense plants but an entire city.

In connection with the Defense Department's request to give it legislative tools to enable it to deal with security risks in defense plants, the Committee on Un-American Activities conducted extensive hearings. I was told by representatives of the Defense Department that there are 2,000 potential espionage agents and potential saboteurs working in defense plants today.

The committee found that in the Pittsburgh area alone there were five plants which had vital defense contracts and in which the United Electrical, Radio, and Machine Workers of America, known as UE, had bargaining rights for employees. UE was expelled from the CIO because it was Communist dominated and controlled. Numerous officials of this organization were identified as members of the Communist apparatus.

Then again, let us look at Michael Mignon who at one time was an official of the American Communications Association. At the same time he was a functionary of the Community Party. The American Communications Association has also been expelled from the CIO, because it was Communist dominated and controlled. Michael Mignon, who later broke with the Communists, testified that the Communist apparatus wanted Communists working on our communications system so that in time of internal or external conflict with the Soviet Union, tielines and cables could be sabotaged in a matter of minutes.

Today this American Communications Association has bargaining rights for some of the employees of Western Union and Radio Corp. of America and of course this is because under provisions of the Labor Relations Act the companies have no alternative but to employ such people. These are the companies that operate and maintain the tielines coming out of the Pentagon and the nine transatlantic cables to Europe. Persons have been identified as Communists who are members of the American Communications Association, who are employed by Radio Corp. of America and Western Union, and whose job it is to maintain and operate these vital lines of communications.

Recently, the committee developed evidence to show that there are Communists who have radio operators' licenses from the Federal Communications Commission. These operators—whether working on ship or shore installations—are in a position to disrupt our whole Conelrad warning system should this country be attacked.

The Communists want the American people to believe that their party in this country is fading and dying. That is part of their current strategy.

To those who consider themselves loyal Americans yet continue to parrot this line—to those who argue that there are so few Communists left that we should abolish the Committee on Un-American Activities and weaken the Federal Bureau of Investigation—let me continue to present some additional cogent evidence.

The overwhelming majority of the men who serve in the merchant marine are hardworking, dedicated, loyal Americans, but the evidence is clear that a few are not. The question arises: How dangerous to our security are these very few?

When the courts held (due to a deficiency in the law) that the Coast Guard lacked authority to screen security risks off merchant vessels, hundreds who had been denied seamen's papers were again permitted on our ships. When the Committee on Un-American Activities started to correct or plug this loophole in the law the Communists and the leftwing sobsisters cried loudly. They charged the committee with trying to prevent men from earning a living because of their political beliefs.

It developed at the hearings just how dangerous a Communist could be aboard a merchant vessel. It was shown that we are building extremely costly and highly complex mechanisms and weapons to protect this Nation from potential Soviet aggression. Some of these are being shipped to various parts of the world. In a crisis one saboteur, with or without modern electronic devices, could sabotage these weapons on board a ship. In fact, he could sink the ship in the Panama Canal, the St. Lawrence Seaway, or one of our harbors, putting them out of commission for many, many months. There are still those, I repeat, who want to equate danger with numbers.

I can hear some diehards charge that very few of these 10,000 Communists in the United States hold key positions. Let me just give you one example of how effective a so-called "average Joe" Communist can be. Some 20 million pieces of vicious Communist propaganda are coming into this country each year through the U.S. mail.

One of the many techniques used in connection with Communist propaganda is to get nationality groups in this country to take a position on a current political issue involving the Soviet Union.

This nationality group is then flooded with propaganda directed to this issue. It is printed in the language of that group. It is addressed and mailed from Iron Curtain countries directly to individuals in this country.

"Average Joe" Communist is given the job of getting the names and current addresses of individuals belonging to their specific group. When he transmits such a list to his superiors, "average Joe" Communist completes one of his assignments and then eagerly waits for another.

Another key target of the Communists is the field of entertainment. It is a means by which they can reach millions of people with propaganda that subtly and cleverly presents the Communist program. The Communist Party line may be found in a lengthy soliloquy on social injustice. It may be presented in a movie which will be shown around the world, or it may be only a snide crack about patriotism delivered by a "sick" comedian in a popular night club. No detail or opportunity is missed by the Communists to use the play or movie for their purposes.

The script for a scene in a satire called for Stalin and Hitler to dance together, each holding a knife in the back of the other. The director of the play was a Communist. He removed the knife from the Communist leader's hand.

Of course, the Communists over the years also had a practical reason for snaring show people into the Communist apparatus. Show people made unusually good dupes for Communist-front activities within the entertainment field. Their talents were used to bring large sums of money into the coffers of the Communist Party. Many of them with sizable incomes contributed substantially to the Communist treasury. Robert Rossen, a prominent Hollywood director, for a time was a member of the Communist movie set. Eventually he became disenchanted and disillusioned with the Communist offensive. He testified that out of his salary he contributed $40,000 to Communist causes.

Again, we can see that, while only a comparatively few people in the entertainment field served Communist causes, yet the total effect of such service was tremendous.

Let me give you just one more example of the point I have been trying to make in this article before I close.

Two years ago the Committee on Un-American Activities was holding hearings in San Francisco. A substantial number of students, although a handful compared to the student body in the San Francisco Bay area, picketed the hearings. Most of them honestly felt hostile to the committee, largely as the result of some clever brainwashing by some leftwing professors and a few clergymen. The student picketing and demonstrations were turned into riots and mob violence by a handful of hardcore, trained Communist agents. These are the facts, in spite of what some of the "soft-on communism" clique contend. These demonstrations, like the ones against Eisenhower in Tokyo and against Nixon in Caracas were used by the Communist propaganda machine around the world in an effort to show that all students were opposed to the American Government and its activities. They were used to create hatred and ill will toward the United States. These demonstrations were effective propaganda battles in the cold war.

They were instigated and directed by an unbelievably few trained Communists who cleverly used others to do the job. The victory for international communism's propaganda assault throughout the world was tremendous.

We must never forget that big oaks from little acorns grow.

Don't plant or nurture any of those acorns unwittingly. Don't permit yourself to be used by the Communists in any way to advance Communist-inspired projects. To avoid being so used, you should be very careful about the organizations you join, the meetings you attend, the petitions you sign, contributions you make, and the use of your name.

More than one person has been embarrassed to learn, too late, that his name, his prestige, or his money was used to help push a cause that had its origin in top Communist circles. Before you become involved, check carefully the organization that wants your help and the people who are tied up with it. And if you have any doubts whatsoever, stay clear of it.

Many Red-inspired projects look innocent on the surface, some of them with expressed goals that are highly commendable. The party line in some cases will be so skillfully camouflaged that it hardly shows. However, some manifestations will always be apparent to the vigilant, and you have a responsibility to be vigilant about such things.

So that you can exercise intelligent vigilance, learn everything you can about communism, and get your education from qualified sources, not from people who are ill informed or who may be exploiting legitimate fears of communism for ulterior purposes. The more you know about communism, its history, and the way it operates, the easier it will be for you to spot organizations and individuals who do the bidding of the Communist Party.

To avoid giving any sort of help to Communist promotions, a negative approach is necessary. If the 10,000 Reds in this country want to call for things desired by the Kremlin, let it be clear that they speak for themselves. Since most Americans are by now aware that these people are determined to bury us, why should we assist in our own interment?

However, more than a negative approach is necessary if we are to turn the Red tide and win out in this struggle. There is one area in which we have to give due credit to the Communists, and that is their utter dedication to the cause represented by the Red conspiracy. Obviously it is a wrong cause and an evil one, but we cannot deny that Communinsts work at promoting it in a way that, to most of us, is absolutely incredible.

The time has come when Americans are going to have to show some of the same kind of dedication. We have a nation and a way of life that should inspire such dedication.

We must understand that we are engaged in a life-or-death struggle for survival with the international Communist apparatus; that we cannot hope to prevail in this struggle unless all Americans in every field of endeavor are absolutely convinced beyond any doubt that we are not engaged in a popularity contest with a competing economic system; that we are not faced merely with certain annoying adjustments which should be made so that we may coexist with a different system of government; but that we are now in a death grip with an enemy the like of which, for debasement and inhumanity, the world has not seen since the time of the Dark Ages. We can ignore, appease, and negotiate with this enemy only at the cost of our survival.

This is the challenge of our day to all patriots of this Republic. We must accept this challenge. We shall either dedicate ourselves to it or, like the countries already behind the Iron Curtain, face slavery and eventual destruction.

The National Charity Lottery of Panama

EXTENSION OF REMARKS

OF

HON. PAUL A. FINO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 7, 1962

Mr. FINO. Mr. Speaker, in this country, it is all too often true that gambling is a pillar of organized crime. I would like to bring to the attention of the Members of this House the example of Panama in order to show that gambling does not have to serve such evil ends. The national charity lottery of Panama functions, as its name would indicate, to provide funds for the support of hospitals, welfare institutions, and orphanages.

The national charity lottery plays quite an important role in the everyday life of Panama, and although that nation has a population of only 1 million, gross receipts from the national charity lottery were over $34 million in 1961. In that year, the profit to the Government was close to $6 million.

In Panama, the gambling urge is centralized and channeled so as to achieve beneficial ends. Gambling dollars in Panama are not used to shore up racketeers as in the United States. Instead, they are used to promote the public welfare. When we realize the merits of a national lottery, we too will be able to siphon funds from the pockets of gangsters into the pockets of hard-pressed taxpayers.

Mr. Speaker, how much longer must the American taxpayer continue to be the victim of hypocrisy?

HOUSE OF REPRESENTATIVES

WEDNESDAY, AUGUST 8, 1962

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Psalm 85: 8: *I will hear what God the Lord will say unto me.*

Eternal God, in obedience to the promptings of Thy Holy Spirit and the pressures of our own human nature, we are turning to Thee in prayer that we may identify our minds and hearts with Thy gracious plans and purposes.

Inspire us with the wish and the will to listen eagerly to what Thou art waiting to say unto us for we humbly confess that we frequently have such conflicting thoughts and find ourselves wavering between opposite decisions.

Help us to banish all frets and fears and may we seek to repose and rest our distraught and disquieted spirits in a boundless trust in Thy divine wisdom and all-conquering love.

Daily Thou art placing at our command those moral and spiritual resources which will transform tragedy into triumph and sighing into song if we are only willing to make trial of them.

To Thy name we shall ascribe all the praise. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3491. An act to amend the Atomic Energy Act of 1954, as amended, and for other purposes.

PROVIDING FOR THE CONSIDERATION OF H.R. 8874 TO AUTHORIZE CERTAIN BANKS TO INVEST IN CORPORATIONS WHOSE PURPOSE IS TO PROVIDE CLERICAL SERVICES FOR THEM, AND FOR OTHER PURPOSES

Mr. DELANEY, from the Committee on Rules, reported the following privileged resolution (H. Res. 748, Rept. No. 2143), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 8874) to authorize certain banks to invest in corporations whose purpose is to provide clerical services for them, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the substitute amendment recommended by the Committee on Banking and Currency now in the bill and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

PROVIDING FOR THE CONSIDERATION OF S. 1005, A BILL TO AMEND SECTION 10 AND SECTION 3 OF THE FEDERAL RESERVE ACT, AND FOR OTHER PURPOSES

Mr. DELANEY, from the Committee on Rules, reported the following privileged resolution (H. Res. 749, Rept. No. 2144), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 1005) to amend section 10 and section 3 of the Federal Reserve Act, and for other purposes, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

KENYON B. ZAHNER

Mr. FORRESTER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 10501), for the relief of Kenyon B. Zahner.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $36,852 to Kenyon B. Zahner of Atlanta, Georgia, in full settlement of his claims against the United States for reimbursement of the wages lost because he was unlawfully deprived of his employment in the Government of the United States through the application of an unlawful standard as found by the United States District Court for the District of Columbia in a judgment filed November 10, 1959, in Civil Action Numbered 1396–58: *Provided*, That no part of the amount appropriated in this Act in excess of 33⅓ per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 3, strike "33⅓" and insert "25".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

J. EDGAR HOOVER AND THE FBI

Mr. MORRIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. MORRIS. Mr. Speaker, I was both shocked and proud this morning upon reading an article in the local morning newspaper. I was shocked that the leadership of the Western States Democratic Conference, now in progress, in Seattle, Wash., would invite Mr. W. H. Ferry, vice president of the Fund for the Republic, Inc., to speak to the convention. I was proud when I read the Attorney General, Robert Kennedy, spoke out clearly and concisely that he differed with Mr. Ferry and that apparently, Mr. Ferry's thinking does not represent the thinking of this administration.

Mr. Ferry spoke very critically of the Federal Bureau of Investigation and its Director, J. Edgar Hoover. Mr. Hoover has completed over 38 years of honorable service as Director of this outstanding law-enforcing agency. Mr. Ferry was also critical of the activities of the Federal Bureau of Investigation with regard to the internal security of this Nation. Perhaps, Mr. Ferry and a great many other people do not realize the Federal Bureau of Investigation was given the responsibility for preserving the internal security of this Nation by Executive order in 1939. The President of the United States who issued this Executive order was Franklin Delano Roosevelt. This Executive order has been confirmed by every President both Democrat and Republican since that time.

I want to assure the Members of this House and the people of our Nation that the nitwit thinking espoused by Mr. Ferry certainly does not represent my views and I do not believe it represents the views of the western Democrats of our country.

PROBLEMS OF POLICE DEPARTMENT, WASHINGTON, D.C., IN LAW ENFORCEMENT

Mr. RIVERS of South Carolina. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS of South Carolina. Mr. Speaker, the Metropolitan Police of Washington have apprehended that thug, thief, rapist, and murderer who attacked a young lady who was praying in the middle of the day in a church a block from the Capitol of the United States. I venture the prophecy that this frustrated police department that has been discouraged more ways than a country boy can go to town, will find that some court somewhere in the District of Columbia, may turn this murderer, this rapist, this thief, loose.

He has confessed, in the presence of his father, to two rapings after he attacked this lady. They have a jacket and a knife he had in his possession at the time of one of these attacks. Knowing our local court, I wonder whether the evidence will be sufficient to convict this criminal.

Mr. Speaker, this is a sad commentary on our Nation's Capital and the District of Columbia, when the courts continue to frustrate the dedicated efforts of its police department to protect and safeguard the lives and property of its residents. The courts, in their avowed effort to protect individual liberties, have so narrowly construed the law so as to practically invite criminal activities in the District of Columbia. The release of criminals by the courts on the basis of an absurd interpretation of a technicality in the law simply makes a mockery of the best efforts of our law enforcement officers to protect our community. I believe it high time that the Congress take affirmative and positive action to correct this tragic state of affairs.

Mr. Speaker, enclosed is the saga of Harry Sylvester Jones—Negro:

RE HARRY SYLVESTER JONES, JR., NEGRO, 23 YEARS, OF 1400A CARROLLBURG PLACE SW., CHARGED WITH RAPE OF MRS. ———, WHITE, FEMALE, 60 YEARS, OF 1616 18TH STREET NW., ON JULY 25, 1962

Mrs. ———, white, female, 30 years, of 2528 Q Street NW., reports that about 4 p.m., July 16, 1962, while in the laundry room, basement of that address, she was approached by a Negro male who asked her where the janitor was. She replied she did not know and that as she started to leave the area this colored subject put his left hand over her mouth and held a knife in her side and told her not to scream. She expressed fear for her young baby and pleaded with her assailant not to kill her. He walked her back toward the boilerroom under threat of the knife, removed her undergarments, forced her to lie on the floor, and raped her.

Miss Mary Louis Kosterlitzky, white, female, 45 years, of 110 Maryland Avenue NE., reports that about 2 p.m., on July 23, 1962, while she was kneeling at the altar in St. Peter's Church, Second and C Streets SE., she was approached by a Negro male who she at first thought was also coming to the altar to pray. However, this individual grabbed her from behind, placed his hand over her month, and said "don't scream or I'll kill you." During the ensuing struggle she told her assailant she was sickish and told him to take her money and leave her alone. She handed over $7, all the money she had, to her assailant. Her assailant then forced her to a confessional booth at the rear of the church and began choking her, saying he was going to kill her. As she struggled against this man she fell to the floor and felt him begin to strike her on the back. After striking her several times he ran out and she then noticed blood running down her arm. She ran to the front of the church and knocked on some large doors that are normally locked and got help from the sexton who took her into the kitchen of the rectory and notified the police.

Mrs. ———, white, female, 60 years, of 1616 18th Street NW., reports that about 8:30 p.m., July 25, 1962, she went to the basement laundry room of this address to get a blanket out of the dryer. After obtaining the blanket and walking to the elevator to return to her apartment she was followed by a Negro male who was in the laundry room at the time she entered. As she looked up to check the floor level where the elevator was located she was grabbed from behind by this same subject. The complainant told her assailant that her husband was expecting her back in a few minutes. He let her go momentarily but grabbed her by the throat again, dragged her backward into the basement garage, threatening to kill her with a knife he held, forced her down on the concrete floor and raped her. Complainant states that after this assault she got to her feet and was forced into an automobile by her assailant who then cut her skirt down the side with the knife he held, cut the straps to her slip and brassiere and removed them, then forced her onto the floor of the garage where he raped her a second time.

Miss ———, white, female, 54 years, of 510 21st Street NW., reports that about 10 p.m. August 4, 1962, she drove her automobile into the basement garage of her apartment building and as she took the groceries out of the automobile she noticed a Negro male in the opposite end of the garage. As she reached the elevator this subject had approached from behind and as she entered the elevator he did also and stood behind her. After the elevator started this subject grabbed the complainant from behind and told her not to scream or he would kill her. He held her around the throat with one arm and held a knife in the other hand in front of her. As she was being choked and from the force of her assailant's knee in her back she slipped down to the floor of the elevator. As her assailant began to cut the buttons from the front of her dress she pleaded with him to take her money and leave her alone. Her assailant continued to remove her clothing, cutting the straps on her girdle, and raped her on the floor of the elevator.

In addition to the usual police procedures in such reports such as general lookouts, presenting photographs of known offenders to the complainants and searching files and checking modus operandi and descriptions for possible suspects, fingerprints examinations of the area developed latent fingerprints at 510 31st Street NW., and 1616 18th Street NW., which prints matched and were therefore made by the same individual. The latent fingerprints appeared to have been left by two fingers of the individual. Then began a tedious search of fingerprint files which resulted in the identification of these latent fingerprints as belonging to Harry Sylvester Jones, about 7 p.m., August 7, 1962. A search of pertinent files and records developed the most recent address on file for the subject as 1400A Carrollburg Place, SW.

After inquiry determined that subject was not at home and usually stayed out until the early hours of the morning, officers were placed at the premises to await his return.

The subject arrived home about 1:40 a.m., August 8, 1962, at which time he was placed under arrest and a knife and jacket described as having been worn by him in one of the cases was recovered from him at this time. The subject was taken to the police cruiser to be transported to headquarters. At his request Harry Jones, Sr., was permitted to talk to his son during which period he orally admitted the four cases enumerated in this report. He was then transported to headquarters and being mindful of the severe restrictions of the Mallory doctrine, the officer in charge telephoned the designated U.S. attorney at 2:20 a.m., to set in motion the procedure for immediate arraignment of the subject. During the period when the marshal's office was arranging to open court and notify other court personnel as well as the judge, typewritten statements of the subject's confession were being obtained.

During this period also the complainants were awakened and although naturally reluctant, arrangements were made for transporting them to headquarters to view the subject in a lineup and for confronting the defendant. During this period also the defendant was put through the identification bureau for fingerprinting and photographs. It was found that several of the complainants were very reluctant to respond to police headquarters at this hour of the night for the necessary procedures in preparing the case for presentation in court. The defendant was arraigned in municipal court at 6 a.m. and the judge presiding at this hearing continued the hearing until 10 a.m., in order that the defendant might obtain counsel which was not available to him at this hour of the night.

The criminal files of this department reflect a record on the subject dating back to September 1953 when he was committed to the National Training School for Boys on a charge of housebreaking. He subsequently has been arrested for unauthorized use of auto, grand larceny, peeping Tom, attempted housebreaking, and indecent assault.

On September 23, 1955, the subject, then 17 years old, was arrested by officers of the third precinct and charged with three cases of indecent assault. About 10:45 a.m., September 9, 1955, a 39-year-old white female complainant reported that she had been grabbed on the buttocks by a Negro male who muttered an incoherent phrase while she was walking in the 2000 block of I Street NW. About 11 a.m., on the same date, a 62-year-old white female reported that while walking in the 800 block of 21st Street NW., she was grabbed on the buttocks by a Negro male. About 7 p.m., September 22, 1955, a 40-year-old white female reported that while walking in the 2000 block of F Street NW., she was grabbed on the buttocks by a Negro male.

The defendant Jones was arrested when found peeping in the window at a woman in premises 1901 New York Avenue NW. He admitted that since his parole from the National Training School he had grabbed about six women, both white and colored, at various locations in the third precinct. He stated that he had an urge to grab women by the buttocks and that after committing such an assault he would run into the nearest alley and masturbate.

Mr. Speaker, this is what these courts in the District of Columbia have turned loose to prey on the innocent women of Washington, District of Columbia, United States of America.

ALLIANCE FOR PROGRESS

Mr. DEVINE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. DEVINE. Mr. Speaker, they are still at it, apparently. A constituent of mine recently sent me a copy of a syndicated column that appeared in my local newspaper. I do not know whether it is going to replace touch football or not, but this is what it says:

> Taxpayers who found it difficult to get up the required loot for the Government and still buy baby's shoes will be thrilled by an item in the July 16 issue of a Brazilian newspaper called Diario De Noticias, which announces that the Flamengo Soccer Club of Rio de Janiero is about to receive $280,000 from the Alliance for Progress.
>
> The gazette notes that "in a country where soccer is so popular, financial help for one of the largest clubs must be received with applause," and adds that Ambassador Lincoln Gordon is catering to the Brazilian ego by recommending such impressive financial aid to the American authorities.

I might suggest the soccer players in this country and Latin America probably do not constitute those in the underdeveloped areas, the depressed areas, the people that need help, the help this so-called Alliance for Progress is supposed to give. I think the Members of the House should keep this in mind when the foreign aid appropriation bill is presented in the next few weeks.

WASHINGTON POLICE DEPARTMENT

Mr. BECKER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BECKER. Mr. Speaker, my colleague, the gentleman from South Carolina [Mr. RIVERS], told you a few minutes ago that the assailant who stabbed my administrative assistant a couple of weeks ago in St. Peter's Roman Catholic Church just two blocks from the Capitol, was apprehended during the night.

My particular reason for calling this to your attention is to prove to you the great handicap that the police of the District of Columbia are working under. This is a fine police department. They are to be commended by the Congress for the work they are doing without having the necessary tools to do it. In order for them to do this job they had to get the witnesses out of bed at 3:30 this morning, because they were unable to hold this suspect, even though they had evidence. They were not able to hold him for hours until witnesses could get up at a reasonable hour. At 3:30 I was called by the police. I wanted to see first hand, as we should, just how this Mallory decision affects police work. These witnesses, not only Miss Kosterlitzky, but others, at 3:30 this morning had to go down to police headquarters for identification purposes.

I say to you that we should amend these laws and give our police department the proper tools to work with. We should not circumvent the very forces of law and order you and I stand for. Our police department is our first line of defense against crime on the home front just as our Military Establishment is our first line of defense against attack from abroad. This has hit newspapers all over the country. I call your attention to the front page of the Mexican newspapers. They called attention and could not understand how we allow these things to happen in the Capital of the United States. I think we should have legislative action to correct this problem.

CALL OF THE HOUSE

Mr. ANFUSO. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently, a quorum is not present.

Mr. BOGGS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 191]

Abernethy
Albert
Andersen, Minn.
Avery
Bass, N.H.
Blitch
Bolling
Boykin

Winstead
Yates

The SPEAKER. On this rollcall 373 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE LATE HOMER ALBERT

Mr. BOGGS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BOGGS. Mr. Speaker, I take this time to announce with deep regret the passing of Mr. Homer Albert, the brother of our distinguished majority leader, the gentleman from Oklahoma, the Honorable CARL ALBERT. The brother of the gentleman from Oklahoma [Mr. ALBERT] died suddenly in Arkansas early this morning. It was necessary for the distinguished majority leader to leave unexpectedly.

I am sure I express the sentiments of the leadership and all of the Members of this body in extending to the gentleman from Oklahoma, CARL ALBERT, and to Mrs. Kathryn Peacock, his sister, and to his two brothers Earl and Noal our deepest sympathy at their great loss.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. BOGGS. I yield to the distinguished minority leader.

Mr. HALLECK. Mr. Speaker, I want to assure the gentleman that the sentiments he has expressed are shared by all of us on this side. We have the highest regard for the distinguished majority leader. It is a sad thing, indeed, that this tragedy should come his way.

Mr. BOGGS. I thank the gentleman.

Mr. McCORMACK. Mr. Speaker, I wish to take this opportunity to extend my sympathy to our distinguished majority leader, the gentleman from Oklahoma, the Honorable Carl Albert, in the tragic loss of his beloved brother. I know that I speak the mind and heart of all Members of the House in extending to him and all the members of his family our deepest and most heartfelt sympathy.

Mr. STEED. Mr. Speaker, I want to add my own expression of heartfelt sympathy to those which have already been made here today to my colleague and good friend, the gentleman from Oklahoma, Carl Albert, in the passing of his brother, Homer Albert.

Those of us who have known our distinguished majority leader through the years are aware of the close bond which existed between him and his three brothers and his sister. Since the passing of both their parents, the tie which has bound them together has been even closer. Carl is extremely proud of his brothers and sister and has spoken of them with affection on many occasions. His brother, Homer, served in World War II with distinction, displaying the same devotion to duty and principle that we have come to know and appreciate in Carl. These characteristics, deeply instilled in the Albert family, draw them close in attitude and affection, distinguishing them as leaders and as individuals.

Mrs. Steed joins with me in extending our deepest sympathy to Carl and to the Albert family.

Mr. EDMONDSON. Mr. Speaker, I am sure that every Oklahoman, as well as every Member of this body, will join today in extending deep sympathy to our majority leader in the loss of his brother, Homer Albert.

Few ties in life are closer than those which bind brother to brother.

Few losses are more grievous than the untimely death of a beloved younger brother.

This is the blow just suffered by our colleague, which accounts for his absence from the floor and for his sad flight homeward this afternoon.

Homer G. Albert, whose death was reported today at the U.S. Veterans Hospital in Little Rock, Ark., was the second youngest son in a family of four boys and one girl, the children of Ernest Homer and Leona Ann (Scott) Albert.

He was born at Flowery Mound, Okla., on May 13, 1917, and was educated in the McAlester public schools and at Oklahoma State University.

A babe during World War I, Homer was a young man still in his early twenties at the outbreak of World War II.

Like his brother Carl, he saw duty in the U.S. Army. Homer served with bravery and distinction with the 358th Infantry Regiment of the 90th Infantry Division.

On the 10th of June 1944—D-day plus 4—Homer was wounded in action in Normandy, after participating in some of the heaviest fighting which occurred during the invasion of Europe.

For this he received the Purple Heart—and with it a lifetime total disability.

Homer Albert wore the European-African-Middle East Campaign Medal with the prized Bronze Arrowhead for participation in the invasion battles of June 6 to June 9, 1944.

He was also entitled to the Combat Infantryman's Badge and the Bronze Star, but Army records indicate he never applied for these honors.

Funeral arrangements are still incomplete, but have been tentatively scheduled for Friday in McAlester, Okla.

On that date, his neighbors, friends, and family will honor as well as mourn another son of Ernest and Leona Albert who has given most of his life to the brave and unselfish service of his country.

AMENDMENT OF ATOMIC ENERGY ACT OF 1954

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 750, Rept. No. 2145), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 12336) to amend the Atomic Energy Act of 1954, as amended, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controled by the chairman and ranking minority member of the Joint Committee on Atomic Energy, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

MOTOR VEHICLE PURCHASES BY THE FEDERAL GOVERNMENT

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 751, Rept. No. 2146), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1341) to require passenger-carrying motor vehicles purchased for use by the Federal Government to meet certain safety standards. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

AMENDING TRADING WITH THE ENEMY ACT

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 752, Rept. No. 2147), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9045) to amend the Trading With the Enemy Act, as amended. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

AMENDMENT OF ACT AUTHORIZING NATIONAL MEDALS OF SCIENCE

The SPEAKER. The unfinished business is the question on suspending the rules and passing the bill (H.R. 4055) to amend the act of August 25, 1959, to authorize the payment of a monetary award to recipients of the National Medal of Science.

Mr. GROSS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GROSS. Is this the bill which was debated on Monday of this week, and which would, in addition to giving a medal to certain selected individuals, give them $10,000 monetary awards, and thereby create a very bad precedent?

The SPEAKER. This is the bill that was reported by the Committee on Science and Astronautics, the Chair understands unanimously. It was debated on Monday last. Objection was made to the vote on the ground that a quorum was not present. Under the unanimous-consent agreement previously entered into, further consideration of the bill was postponed until today.

Mr. FULTON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. FULTON. Is not this the bill that would pay up to a $10,000 limit to the recipients of the Science Medal?

The SPEAKER. The Chair is a little liberal in allowing parliamentary inquiries which are really debate, but the Chair does not want to extend that any further.

The question is Will the House suspend the rules and pass the bill H.R. 4055?

The question was taken; and on a division (demanded by Mr. GROSS) there were—ayes 100, noes 50.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 193, nays 177, not voting 65, as follows:

So (two-thirds not having voted in favor thereof) the motion was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Martin of Massachusetts and Mr. Hébert for, with Mr. Hoffman of Michigan against.

Mr. Scranton and Mr. Fogarty for, with Mrs. Reece against.

Mr. Kirwan and Mr. Celler for, with Mr. Seely-Brown against.

Mr. Blatnik and Mr. Morrison for, with Mr. Taber against.

Mr. Lesinski and Mr. Madden for, with Mr. Mason against.

Mr. Inouye and Mr. Davis of Tennessee, for, with Mr. Kilburn against.

Mr. Dent and Mr. Diggs for, with Mr. Bass of New Hampshire against.

Mr. Powell and Mr. Santangelo for, with Mr. Merrow against.

Mr. Thompson of Louisiana and Mr. Spence for, with Mr. Scherer against.

Mr. Dingell and Mr. Frazier for, with Mr. McVey against.

Mr. Yates and Mr. Karsten for, with Mr. Harsha against.

Until further notice:

Mr. Loser with Mr. Minshall.

Mr. Colmer with Mr. Avery.

Mr. Winstead with Mr. Shriver.

Mr. Flynt with Mr. Chiperfield.

Mrs. Blitch with Mr. Collier.

Mr. Rogers of Texas with Mr. Curtis of Massachusetts.

Mr. Shipley with Mr. Cunningham.

Mr. Landrum with Mr. Bromwell.

Mr. Kitchin with Mr. Garland.

Mr. Abernethy with Mr. Andersen of Minnesota.

Mr. Young with Mr. Dooley.

Mr. ASHMORE and Mr. GAVIN changed their vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The doors were opened.

AMENDMENT OF FOREIGN SERVICE BUILDINGS ACT, 1926

The SPEAKER. The further unfinished business is the question on the passage of the bill (H.R. 11880) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes.

The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND REMARKS

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that any Member who desires to extend his remarks following the remarks of the gentleman from Indiana [Mr. HALLECK] relative to the passing of the brother of the distinguished majority leader may have such permission.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

COMPENSATION FOR AMERICAN NATIONALS FOR CERTAIN WORLD WAR II LOSSES

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 746 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7283) to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Interstate and Foreign Commerce now in the bill and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from California [Mr. SMITH] and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 746 provides for the consideration of H.R. 7283, a bill to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses. The resolution provides an open rule with 2 hours of general debate, waiving points of order against the bill and committee amendment, making it in order to consider the committee amendment as the original bill, with a separate vote on any amendment to the bill or the committee amendment.

The purpose of H.R. 7283 is to provide, more than 16 years after the close of World War II, for determination of the amount and validity, and for the payment of claims of American nationals who suffered injury or death under circumstances specified in the legislation, or who suffered property losses as a result of military operations during World War II in certain European countries and in areas attacked by Japan.

Payments will be made to claimants under the bill out of the War Claims Fund, which consists of proceeds resulting from the sale of vested property, and not out of appropriations. The balance presently available for transfer to the war claims fund is approximately $100 million.

Mr. Speaker, I urge the adoption of House Resolution 746.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, as stated by the gentleman from California [Mr. SISK], House Resolution 746 will make in order the consideration of H.R. 7283 on a 2-hour open rule with the exception that points of order are waived because a sum of money will be transferred from one fund to another. Without repeating the remarks of the gentleman from California [Mr. SISK] I agree completely with his statements as to the purpose of the bill and what it will do. May I simply enlarge and state there are four classifications for which these damages may be paid.

One is damage to or destruction of property located in certain European countries. The four classifications are:

First. Damage to or destruction of property located in certain European countries and in areas attacked by the Japanese resulting from military operations or special measures against property—claims for losses arising in the Philippines are allowable where the claimant received no compensation by prior legislation.

Second. In relation to damage to, or loss or destruction of, ships or ship cargoes as a result of military action.

Third. Net losses under war-risk insurance or reinsurance policies or contracts covering ships, and

Fourth. Death or disability and property losses suffered by civilian passengers on vessels attacked on the high seas before December 11, 1941.

These people have to be U.S. citizens at the time of the damage or loss. They are allowed 18 months within which to file claim, and it must be processed within 4 years subsequent thereto.

A couple of provisions of the bill leave some questions in my mind. One is section 203 which provides that the assignee or the person to whom one of these claims is transferred—one or more for that matter—can file claim. I cannot help but think that some attorneys, and I am an attorney and I am not objecting to attorneys making fees, but I can see that they might buy up a lot of these claims for a small amount on the dollar and make themselves a considerable amount of money; or in representing these claimants, they can receive up to 10 percent for their representation. I do feel it is high time we started taking care of our own citizens after 16 years that we have been taking care of everybody else in the world on their claims so it is nice to start once and for all to help to take care of our own people.

I would like to make one thing clear for the record here for the purpose of history or intent so far as I am concerned. That is, we had the Philippine bill here a couple of weeks ago, and somebody used the argument at that time as to whether or not when the original legislation was passed, we actually legally or morally bound ourselves to go ahead and pay up to 75 percent. It is my understanding that these claims will be paid out of this war claims fund. It is my understanding that there is no intent here today of anybody in support of this measure, if claims running into many, many millions or maybe even billions of dollars which will be a vast amount more than the $150 million—that there is no intent that we will come back here 8 or 10 years from now after the claims are processed and be asked to pass legislation appropriating millions and millions of dollars out of the Treasury on the thought that we are here today morally or legally or in some other way binding ourselves to pay each and every claim that will be filed on the basis of these categories of losses. In other words only money in the war claims fund is to be applied and used toward paying all claims.

I know of no objection to the rule, I will say to the gentleman from California, but I do have some requests for time on my side.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. BOW. Do I understand that points of order have been waived on this bill because of the transfer of funds from one account to another?

Mr. SMITH of California. That is my understanding as to why we waive points of order; and I will say to the gentleman that a similar bill was passed in the 86th Congress. At that time the rule waived points of order. The Rules Committee adopted the same type of rule today.

Mr. BOW. If the gentleman will yield for a further question, in the matter of administrative costs the bill says these funds are to be paid from the Treasury. I read this language:

> SEC. 217. There are hereby authorized to be appropriated out of any moneys in the Treasury not otherwise appropriated such sums as may be necessary to enable the Commission and the Treasury Department to pay their administrative expenses in carrying out their respective functions under this title.

It seems to me this indicates it will come out of the Treasury rather than being paid out of the fund as it has been in the past.

Mr. SMITH of California. My understanding is that it is going to be paid out of the fund. Is that not right, I ask my colleague from California [Mr. SISK]?

Mr. SISK. If the gentleman will yield, it is my understanding that administrative costs of the fund would come from the fund itself and would not be appropriated from the Treasury.

Mr. BOW. It seems to me that while we have appropriated in the past some $500,000 for the cost of administering these funds it has come from the funds themselves and not from the taxpayers. We are making a mistake here when we authorize this appropriation from the Treasury for the administration of the funds.

Mr. SISK. I have just been informed by counsel for the committee that administrative costs will be paid out of assets of the funds and not from appropriated funds.

Mr. BOW. Section 217 under the heading "Administrative Expenses," says this is authorized to be appropriated from the Treasury.

Mr. SISK. If the gentleman will yield further, I will say that the gentleman's question had much better be directed to the Committee on Interstate and Foreign Commerce. It was my understanding at the time this was discussed before the Committee on Rules that all expenses would be taken from the fund from moneys which are being transferred, and would not be appropriated funds of the Congress or out of the Treasury.

Mr. BOW. I thank the gentleman.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield.

Mr. HARRIS. I think perhaps it might be well at this point to clear this up if we can. I call the gentleman's attention to section 5 on page 33. The gentleman has referred to section 217 on page 32.

In section 5 it is provided:

> There shall be deducted from each such deposit five percent thereof for expenses incurred by the Foreign Claims Settlement

Commission and by the Treasury Department in the administration of title II of the War Claims Act of 1948.

In order for it to be used to pay the expenses it must go through the appropriations process.

Mr. BOW. That is correct, if the gentleman from California will yield. I think that is what we have done in the past with this fund. This has gone to the Subcommittee on Appropriations and they have appropriated administrative costs from the funds.

The point I am now raising is that we have language under which administrative expenses are to be paid out of the Treasury rather than out of the fund. I will go into that more in detail when the bill is before the House.

Mr. SMITH of California. Mr. Speaker, I reserve the balance of my time and yield 5 minutes to the gentleman from Florida [Mr. CRAMER].

Mr. CRAMER. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

NEED FOR ENACTMENT OF H.R. 3248 CLARIFYING THE MALLORY DECISION SHOWN BY RECENT RAPIST CASE IN DISTRICT OF COLUMBIA

Mr. CRAMER. Mr. Speaker, earlier in the day reference was made by the gentleman from New York [Mr. BECKER] and by the gentleman from South Carolina [Mr. RIVERS] with regard to the fact that the rapist and the attempted murderer of the administrative assistant to the gentleman from New York [Mr. BECKER] has been apprehended and has confessed. Because of the Supreme Court Mallory decision and other subsequent decisions in the District of Columbia ruling that the voluntary confession of a rapist becomes involuntary and inadmissible in evidence solely because of a delay in time between arrest and arraignment, which, incidentally, are affecting the law-enforcement processes throughout the country, orderly law-enforcement processes are subverted. Witnesses of necessity because of the Mallory decision had to be gotten out of bed at 3:30 or 4 o'clock in the morning in order to provide substantiating evidence and to confront the suspect, the purpose of which was the attempt to elicit a confession by the attacker and the rapist as a result did confess.

I want to point out to the attention of the Members of the House the fact that the reason why it was necessary to get these witnesses out of bed at 3:30 or 4 o'clock in the morning, and why it was necessary to confront the suspect in the middle of the night in order to get a confession which was voluntary from the attacker and the rapist was because of the Mallory rule or Supreme Court decision made back in 1957 which permitted a confessed rapist in the District of Columbia to go scott free because his confession was ruled inadmissible on the basis that he was held 8 hours between his arrest and his arraignment, and prior to his confession, even though the confession he made was totally voluntary and there was not the slightest evidence of any coercion during the period of time in which the admitted rapist was held by the police department.

This decision has caused not only the District of Columbia law-enforcement officials and the police force but the law-enforcement officials throughout the United States a great deal of obviously grave concern and procedural uncertainty.

In 1958 I happened to have been the ranking Republican member of a special subcommittee on Supreme Court Decisions of the Judiciary looking into that and other Supreme Court decisions in 1957 and 1958 and after lengthy consideration of this decision a bill to clarify the Mallory decision was voted out by the subcommittee, passed by the House, but died in the languishing hours of the session as a result of opposition in the other body. I felt it was a good bill. I felt that the Congress has a responsibility to clarify this decision so that law-enforcement officials throughout the Nation will know what their responsibilities are and would be able to elicit noncoercive confessions from persons believed to be guilty of a crime without being hampered unduly as in this recent Washington, D.C., rape and attempted murder case.

The so-called duckpin killer in the past, under the Mallory ruling, had his conviction set aside. His confession was ruled inadmissible on the same basis. This man had brutally beat a woman to death with a duckpin. Mallory himself was later accused of and found guilty of an equally serious crime. He turned right around and committed another crime. No wonder these problems are increasing here in the District of Columbia.

In the last session of Congress the House voted a bill out, the Senate killed it. In the 86th Congress the House voted a bill nearly unanimously, but the other body killed it.

During this session, apparently because of the unwillingness of the other body to act in the previous two sessions, the Committee on the Judiciary of the House has not acted. But the Subcommittee on the Judiciary on which I serve has reported a bill out and it now languishes before the Judiciary Committee. The bill is H.R. 3248, which I had the privilege of offering.

It is my hope, in view of the circumstances that have now developed, the factual circumstances in this particular case will show the obvious necessity for Congress taking action on my bill H.R. 3248.

Mr. Speaker, what does the bill provide? The bill simply provides that a confession elicited between an arrest and an arraignment shall not be determined involuntary solely because of the period in which the party involved is held prior to his arraignment. It permits the court to determine whether that period is unreasonable and whether that period in itself could be coercive. Therefore, there should not be any question about the denial of anyone's rights, under the Federal Rules of Criminal Procedure or otherwise, involved in this legislation.

Mr. Speaker, it is my hope that the full Judiciary Committee will again consider this bill, that the House will consider it favorably as it did twice before, and that the other body, having again additional evidence of the necessity of something being done in this field will do likewise, so that if a person believed to be guilty of such a heinous crime and confesses to it will not be permitted to go scot free solely because of the passage of the short period of time often reasonable and justified between his arrest and arraignment.

Mr. Speaker, I think this further illustrates the need for further congressional investigation in this field.

Mr. SISK. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE BRANCH APPROPRIATION BILL FOR 1963

Mr. STEED. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 11151, the legislative branch appropriation bill for 1963, with Senate amendments thereto, and consider the same.

The SPEAKER. The Clerk will report the title of the bill and the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, after line 6, insert:

"SENATE"

Page 1, after line 6, insert:

"COMPENSATION OF THE VICE PRESIDENT AND SENATORS, MILEAGE OF THE PRESIDENT OF THE SENATE AND SENATORS, AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT AND LEADERS OF THE SENATE"

Page 1, after line 6, insert:

"COMPENSATION OF THE VICE PRESIDENT AND SENATORS

"For compensation of the Vice President and Senators of the United States, $2,471,140."

Page 1, after line 6, insert:

"MILEAGE OF PRESIDENT OF THE SENATE AND OF SENATORS

"For mileage of the President of the Senate and of Senators, $58,370."

Page 1, after line 6, insert:

"EXPENSE ALLOWANCES OF THE VICE PRESIDENT, AND MAJORITY AND MINORITY LEADERS

"For expense allowance of the Vice President, $10,000; Majority Leader of the Senate, $2,000; and Minority Leader of the Senate, $2,000; in all, $14,000."

Page 1, after line 6, insert:

"SALARIES, OFFICERS AND EMPLOYEES

"For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:".

Page 1, after line 6, insert:

"OFFICE OF THE VICE PRESIDENT

"For clerical assistance to the Vice President, at rates of compensation to be fixed by him in basic multiples of $5 per month, $127,645."

Page 1, after line 6, insert:

"CHAPLAIN

"Chaplain of the Senate, $8,810."

Page 1, after line 6, insert:

"OFFICE OF THE SECRETARY

"For office of the Secretary, $720,460: *Provided*, That effective July 1, 1962, the Secretary may appoint and fix the compensation of a second assistant parliamentarian at not to exceed $5,700 basic per annum."

Page 1, after line 6, insert:

"COMMITTEE EMPLOYEES

"For professional and clerical assistance to standing committees, and the Select Committee on Small Business, $2,551,200."

Page 1, after line 6, insert:

"CONFERENCE COMMITTEES

Page 1, after line 6, insert:

"For clerical assistance to the Conference of the Majority, at rates of compensation to be fixed by the chairman of said committee, $77,325."

Page 1, after line 6, insert:

"For clerical assistance to the Conference of the Minority, at rates of compensation to be fixed by the chairman of said committee, $77,325."

Page 1, after line 6, insert:

"ADMINISTRATIVE AND CLERICAL ASSISTANCE TO SENATORS

"For administrative and clerical assistants and messenger service for Senators, $12,676,275."

Page 1, after line 6, insert:

"OFFICE OF SERGEANT AT ARMS AND DOORKEEPER

"For office of Sergeant at Arms and Doorkeeper, $2,522,780: *Provided*, That effective July 1, 1962, the Sergeant at Arms may employ a chief messenger at $2,460 basic per annum, and a truck driver at $2,700 basic per annum."

Page 1, after line 6, insert:

"OFFICES OF THE SECRETARIES FOR THE MAJORITY AND THE MINORITY

"For the offices of the Secretary for the Majority and the Secretary for the Minority, $126,350."

Page 1, after line 6, insert:

"OFFICES OF THE MAJORITY AND MINORITY WHIPS

"For four clerical assistants, two for the Majority Whip and two for the Minority Whip, at rates of compensation to be fixed in basic multiples of $60 per annum by the respective Whips, $14,170 each; in all, $28,340."

Page 1, after line 6, insert:

"OFFICIAL REPORTERS OF DEBATES

"For office of the Official Reporters of Debates, $214,990."

Page 1, after line 6, insert:

"OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

"For salaries and expenses of the Office of the Legislative Counsel of the Senate, $232,240."

Page 1, after line 6, insert:

"CONTINGENT EXPENSES OF THE SENATE"

Page 1, after line 6, insert:

"LEGISLATIVE REORGANIZATION

"For salaries and expenses, legislative reorganization, $125,940."

Page 1, after line 6, insert:

"SENATE POLICY COMMITTEES

"For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, $163,975 for each such committee; in all, $327,950."

Page 1, after line 6, insert:

"JOINT ECONOMIC COMMITTEE

"For salaries and expenses of the Joint Economic Committee, $250,000."

Page 1, after line 6, insert:

"JOINT COMMITTEE ON ATOMIC ENERGY

"For salaries and expenses of the Joint Committee on Atomic Energy, $294,010."

Page 1, after line 6, insert:

"JOINT COMMITTEE ON PRINTING

"For salaries and expenses of the Joint Committee on Printing, $114,125; for expenses of compiling, preparing, and indexing the Congressional Directory, $1,600; in all, $115,725."

Page 1, after line 6, insert:

"AUTOMOBILES AND MAINTENANCE

"For purchase, exchange, driving, maintenance, and operation of four automobiles, one for the Vice President, one for the President Pro Tempore, one for the Majority Leader, and one for the Minority Leader, $36,000."

Page 1, after line 6, insert:

"FURNITURE

"For service and materials in cleaning and repairing furniture, and for the purchase of furniture, $31,190, and an additional amount for furniture, fiscal year 1962, $8,340: *Provided*, That the furniture purchased is not available from other agencies of the Government."

Page 1, after line 6, insert:

"INQUIRIES AND INVESTIGATIONS

"For expenses of inquiries and investigations ordered by the Senate or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, including $380,000 for the Committee on Appropriations, to be available also for the purposes mentioned in Senate Resolution Numbered 193, agreed to October 14, 1943, $3,797,210."

Page 1, after line 6, insert:

"FOLDING DOCUMENTS

"For the employment of personnel for folding speeches and pamphlets at a gross rate of not exceeding $1.90 per hour per person, $34,295."

Page 1, after line 6, insert:

"MAIL TRANSPORTATION

"For maintaining, exchanging, and equipping motor vehicles for carrying the mails and for official use of the offices of the Secretary and Sergeant at Arms, $16,560."

Page 1, after line 6, insert:

"MISCELLANEOUS ITEMS

"For miscellaneous items, exclusive of labor, $2,390,565, including $85,000 for payment to the Architect of the Capitol in accordance with section 4 of Public Law 87–82, approved July 6, 1961."

Page 1, after line 6, insert:

"POSTAGE STAMPS

"For postage stamps for the offices of the Secretaries for the Majority and Minority, $140; and for airmail and special-delivery stamps for office of the Secretary, $160; office of the Sergeant at Arms, $125; Senators and the President of the Senate, as authorized by law, $55,550; in all, $55,975."

Page 1, after line 6, insert:

"STATIONERY REVOLVING FUND

"For stationery for Senators and the President of the Senate, $181,800; and for stationery for committees and officers of the Senate, $13,200; in all, $195,000, to remain available until expended."

Page 1, after line 6, insert:

"COMMUNICATIONS

"For an amount for communications which may be expended interchangeably for payment, in accordance with such limitations and restrictions as may be prescribed by the Committee on Rules and Administration, of charges on official telegrams and long-distance telephone calls made by or on behalf of Senators or the President of the Senate, such telephone calls to be in addition to those authorized by the provisions of the Legislative Branch Appropriation Act, 1947 (60 Stat. 392; 2 U.S.C. 46c, 46d, 46e), as amended, and the First Deficiency Appropriation Act, 1949 (63 Stat. 77; 2 U.S.C. 46d–1), $15,150."

Page 6, line 3, after "$150,000" insert: ", of which such amount as may be necessary may be transferred to the appropriation under such heading for the fiscal year 1962."

Page 12, after line 12, insert:

"JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES

"For an amount to enable the Joint Committee on Reduction of Nonessential Federal Expenditures to carry out the duties imposed upon it by section 601 of the Revenue Act of 1941 (55 Stat. 726), to remain available during the existence of the committee, $26,790, to be disbursed by the Secretary of the Senate."

Page 15, after line 13, insert:

"RESTORATION OF OLD SENATE CHAMBER AND OLD SUPREME COURT CHAMBER IN THE CAPITOL

"To enable the Architect of the Capitol to prepare working drawings, specifications, and estimates of cost for restoration of the Old Senate Chamber on the principal floor of the Capitol and the Supreme Court Chamber on the ground floor of the Capitol substantially to the condition in which these Chambers existed and were furnished when last occupied in 1859 and 1860, respectively, by the United States Senate and the United States Supreme Court, $37,500."

Page 15, after line 22, insert:

"SENATE OFFICE BUILDINGS

"For maintenance, miscellaneous items and supplies, including furniture, furnishings, and equipment, and for labor and material incident thereof, and repairs thereof; for purchase of waterproof wearing apparel, and for personal and other services; including eight female attendants in charge of ladies' retiring rooms at $1,800 each; for the care and operation of the Senate Office Buildings, including the subway and subway transportation systems connecting the Senate Office Buildings with the Capitol; uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); to be expended under the control and supervision of the Architect of the Capitol; in all, $2,235,000."

Page 18, line 21, strike out all after "clothing;" over to and including "amended;" in line 1, page 19.

Page 19, line 3, strike out "$8,930,000" and insert "$9,906,350".

Page 19, line 6, after "1963" insert ": *Provided further*, That not to exceed $1,100,000 shall be available for reimbursement to the General Services Administration for alterations, including air conditioning, of space to be occupied by the Library of Congress in the Naval Weapons Plant".

Page 21, line 18, strike out "$678,000" and insert "$758,000".

Page 21, line 19, strike out "$630,000" and insert "$710,000".

Page 26, after line 2, insert:

"SEC. 105. No part of any amount appropriated in this Act shall be available to finance, under authority of section 4167(a) of title 39, United States Code, the mailing and delivering of mail matter sent through the mails with a simplified form of address under the franking privilege by any Member or Member-elect of Congress to postal patrons, including those partons on rural or star routes."

Page 26, after line 2, insert:

"SEC. 106. (a) This section shall apply to—

"(1) Each employee of the Senate whose compensation is paid from the appropriation for Salaries, Officers and Employees under the heading 'Office of the Secretary', except the Assistant to the Majority, and the Assistant to the Minority.

"(2) Each employee of the Senate whose compensation is paid from such appropriation under the heading 'Office of Sergeant at Arms and Doorkeeper', except employees designated on the rolls as 'special employees'.

"(3) Each employee of the Senate whose compensation is paid from such appropriation under the heading 'Official Reporters of Debates'.

"(4) Each employee of the Senate whose compensation is paid from such appropriation under the heading 'Offices of the Secretaries for the Majority and the Minority'.

"(5) Each employee of the Senate authorized by Senate resolution to be appointed by the Secretary or Sergeant at Arms, except employees designated on the rolls as 'special employees'.

"(6) Telephone operators, including the chief operator and assistant chief operators, on the United States Capitol telephone exchange.

"(7) Members of the Capitol Police.

"(b) An employee to whom this section applies shall be paid during any period of continuous service as such an employee additional basic compensation (hereinafter referred to as 'longevity compensation') at the rate of $120 per annum if at the time of such payment the annual rate of basic compensation (exclusive of longevity compensation) of the position in which employed is less than $1,800, or $180 per annum if at such time such rate is $1,800 or more, for each five years of service performed as such an employee during such period. No employee shall receive more than four such increases upon the basis of any period of continuous service, and nothing in this section shall be construed to authorize the payment to any employee of total compensation, including longevity compensation, in excess of the maximum amount prescribed by law for Senate employees generally. In computing length of continuous service for the purposes of this section only service performed subsequent to August 31, 1957, shall be credited, and in the case of employees of the Official Reporters of Debates of the Senate there shall be credited any service as such an employee performed during the period beginning on September 1, 1957, and ending on June 30, 1960, whether or not compensated from the appropriation referred to in subsection (a). Continuity of service for the purpose of this subsection shall not be deemed to be broken by separations from service of not more than thirty days or by the performance of service as an employee, other than an employee subject to the provisions of this section, whose compensation is disbursed by the Secretary of the Senate or the Clerk of the House of Representatives, but such separations and service shall not be credited for the purposes of this section. Longevity compensation under this section shall be payable on and after the first day of the first month following completion of the five-year period upon which such compensation is based.

"(c) The Act of February 13, 1945 (Public Law 2, 79th Cong.; 2 U.S.C. 60i), is repealed, and no longevity increase payable under authority of such Act prior to the effective date of this section shall be payable on or after such date.

"(d) Section 105 of the Legislative Branch Appropriation Act, 1959 (Public Law 85–570) is repealed. Any member of the Capitol Police who prior to the effective date of this section completed service entitling him to be paid at a rate specified in such section 105 shall be entitled, so long as he continues to serve without break in service of more than thirty days as a member of the Capitol Police, to continue to be paid at such rate and, in addition, to receive any longevity increases for which he may become qualified under subsection (b) of this section, except that while receiving compensation at a rate specified in such section 105 (1) no such member shall receive more than three longevity increases under subsection (b) based upon any period of continuous service, and (2) in computing length of service for the purpose of such longevity increases, only service performed subsequent to the date on which such member began receiving compensation at a rate prescribed by such section 105 shall be counted.

"(e) This section shall become effective on September 1, 1962."

Mr. STEED (interrupting the reading of the Senate amendments). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and be printed in the Record.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, reserving the right to object, I trust that the gentleman from Oklahoma [Mr. Steed] is going to explain this conference report.

Mr. STEED. If the gentleman will yield, we have no conference report. We are just trying to do the preliminaries in order to get into conference.

Mr. GROSS. This is the legislative appropriation bill wherein the other body adds its items and this procedure is necessary in order to take care of their part of this bill; is that correct?

Mr. STEED. This procedure is necessary in order to go to conference with the Senate on the bill.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma that the Senate amendments be considered as read?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma to consider the Senate amendments?

There was no objection.

Mr. STEED. Mr. Speaker, I ask unanimous consent that the House concur in the amendments of the Senate numbered 1 through 35 inclusive; and an amendment No. 38; that the House disagree to the amendments of the Senate numbered 36, 37, and 39 through 45, inclusive, and that the House agree to the conference asked by the Senate.

Mr. GROSS. Mr. Speaker, reserving the right to object, just what are we agreeing to here?

Mr. STEED. If the gentleman will yield, permit me to put the question this way——

Mr. GROSS. If we agree to that request of the gentleman to agree to the Senate amendments, then these amendments will not again be before the House as a result of the conference which the gentleman requests, and when the conference report comes back to the House, is that correct?

Mr. STEED. That is correct. The amendments to which we are asked to agree here are those that are solely matters affecting the Senate and its operations. It is the same situation as we had last year. Under the rule of comity we always go along with this part of the bill.

Mr. GROSS. That means, then, we are simply rubberstamping what the other body wants by way of appropriations without any knowledge of what it is, is that correct?

Mr. STEED. These are items that are solely items of the Senate and have nothing to do with the House. They are the items that were the same as those in the bill last year. The ones we are asking to disagree on are those involving the House and in which the House does have an interest. However, under the rule of comity we always go along with the Senate on matters which affect solely that body.

Mr. GROSS. That is a wonderful word, the word "comity." But when I find out about some of the purposes for which money is being spent around here, I wonder how far this comity business ought to be stretched. I would sort of like to know or have some idea about what is going on with respect to the other body, and I am sure they are interested in what we do over here by way of spending money. But I do not know exactly how to get at it, if the rule of comity is going to be the overriding rule.

Mr. STEED. The amendments we are asking to agree to here involve no additional emoluments or other benefits other than routine ones which the Senate has had all along. The amendments we want to take to conference are those that I think the gentleman would find that the House has an interest in and in which he would have an interest.

Mr. GROSS. Mr. Speaker, I shall discuss the matter further with the gentleman but do not want now to further take the time of the House.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

The Chair hears none and appoints the following conferees: Messrs. Steed, Kirwan, Cannon, Horan, and Taber.

COMPENSATION FOR CERTAIN WORLD WAR II LOSSES

Mr. HARRIS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7283) to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7283, with Mr. Rooney in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. HARRIS. Mr. Chairman, I yield myself 20 minutes.

Mr. Chairman, the Committee on Interstate and Foreign Commerce reported the bill, H.R. 7283, what is referred to as the war claims bill, and recommends its approval to the House. This legislation has been before the House heretofore. As a matter of fact, we have considered war claims legislation for many years. It is an important bill, very important to a lot of people.

The Subcommittee on Commerce and Finance, headed by the distinguished gentleman from Illinois [Mr. Mack] held hearings again in this Congress on the legislation, and reported the bill with amendments. The Committee on Interstate and Foreign Commerce considered the recommendation of the subcommittee and unanimously reported the bill for the consideration of the House. We bring this legislation to you by a unanimous report of our committee.

Some 17 years have now passed since the end of World War II. Still American nationals who suffered injury or death under the circumstances specified in this legislation or who suffered property damage or loss as the result of military operations, have been waiting for compensation for the losses they have suffered.

The bill, H.R. 7283, which the Committee on Interstate and Foreign Commerce has brought before the House today, is the result of many years of efforts of writing comprehensive legislation in the field of World War II claims of American nationals. It is largely identical to the bill—H.R. 2485—which passed the House in the 86th Congress.

If Congress does not act soon many of the persons who suffered these losses will have died and thus only the heirs will secure benefits from this legislation.

Other nations have long since paid their own citizens for similar losses and it is high time that our own citizens be similarly compensated.

What is responsible for the fact that comprehensive war claims legislation has not been enacted almost 17 years after the close of World War II?

The explanation lies in the circumstances that war claims legislation has been tied in closely with enemy property legislation. The writing of adequate and comprehensive war claims legislation is difficult enough a task but the tie-in of this legislation with the highly controversial problem of return of enemy property has proven an almost insuperable stumbling block to prompt and effective legislative action on the subject of war claims.

Let me attempt to give you a brief and very sketchy outline of the history of this legislation up to the present time.

At the beginning of World War II assets located in the United States belonging to the German Government and German nationals and to the governments of other enemy countries and their nationals were vested in the Alien Property Custodian by virtue of the authority granted to the President under the Trading With the Enemy Act as amended by the First War Powers Act of 1941.

At that time the United States seized an estimated $54 million of Japanese-owned assets and $541 million of German-owned assets.

The Trading With the Enemy Act provides that after the end of the war such property shall be disposed of "as Congress shall direct."

Already during World War II Congress gave consideration to the problem of the ultimate use and disposition of these assets.

In so doing, the Members of the Congress concerned with the problem of ultimate disposal of enemy property were mindful of the history of the World War I alien property program.

I do not want to go into detail of that history. I want to state only that during World War I, as during World War II, the United States placed under the control of the Alien Property Custodian assets of the German Government and of German nationals. These assets were to be retained as security for Germany's obligation to pay war damage claims of the United States and of its nationals.

In 1923 Congress passed the Winslow Act, which authorized the return of vested property up to $10,000 in value to all former owners of such property. It was assumed at the time of the passage of this law that the remaining enemy assets would be sufficient to pay the war claims of American citizens as adjudicated by the Mixed Claims Commission, United States and Germany.

In 1928, Congress enacted further return legislation providing for the return of 80 percent of all vested property still held by the Alien Property Custodian after returns made under the earlier Winslow Act of 1923.

Germany assumed the obligation to make periodic payments over a period of years for the purpose of paying the war claims of American citizens. After making three of these payments, Germany defaulted on her obligation in 1931, and as a result of this default Congress in 1934 stopped further returns to Germany under the Settlement of War Claims Act of 1928.

The result of the alien property program and the war claims program after World War I was that 80 percent of the assets held by the Alien Property Custodian were returned while the remaining 20 percent have never been returned.

On the other hand, Germany defaulted on her obligation to pay the war claims of the United States and of our American nationals.

This World War I experience must be kept clearly in mind if we are to understand the events following World War II with regard to international agreements and legislation dealing with the twin problem of enemy property and war claims.

Already during World War II bills were introduced in the House, which sought to prevent a recurrence of the events which led to the unfortunate experiences with war claims and enemy property following World War I.

The various bills which were referred to our committee culminated in the enactment of the War Claims Act of 1948, which provided that no property or interest of Germany or Japan or any national of either such country shall be returned to former owners thereof or their successors in interest and that the United States shall not pay compensation for any such property or interest therein.

Furthermore, the Congress provided in 1948 that vested enemy property should be liquidated and the proceeds paid into the war claims fund in the Treasury.

Thus, the War Claims Act of 1948 established first of all the principle of "no return." In enacting this legislation the Congress followed the policy incorporated in the Paris Reparation Agreement of 1945 in which the United States and 17 allied nations—other than Russia and Poland—agreed to limit their war claims against Germany largely to the assets located in their respective countries and agreed to dispose of such assets in such a way as to preclude their return to German ownership or control.

This policy decision was reached because the Allies agreed that it was in the best interest of all concerned not to burden the vanquished nations with obligations to pay reparations which would hinder the rehabilitation of these nations in such a way that these nations might become a fertile ground for economic and political unrest.

In the second place this policy decision was also based on the recognition that industrial properties owned by German corporations and individuals had been used by their owners for the purpose of advancing the political and economic aims and objectives of the German Government, and thus had been used to advance the war aims of the German Government.

In establishing the war claims fund and in providing that the proceeds resulting from the liquidation of vested enemy property should be paid into this fund, Congress established a tie-in between enemy property and war claims.

This was done in the War Claims Act of 1948 and in the same act it was provided that certain categories, of war claims of U.S. citizens, and particularly claims of American military and civilian personnel who had suffered great hardships and privations in enemy prisoner-of-war and concentration camps should be paid out of the newly established war claims fund.

This legislation was a result largely of the outstanding efforts made of two members of the Interstate and Foreign Commerce Committee who concerned themselves with this legislation.

One of these members is still with us in the Congress today—our esteemed colleague, the gentleman from Texas, Representative LINDLEY BECKWORTH. The other member, who many of you will remember, was our beloved colleague, Representative Carl Hinshaw, of California. Due to their efforts largely, American citizens who were imprisoned and interned were compensated, insofar as they could be compensated, for the cruel hardships, tortures, and privations suffered by them at the hands of our enemies in prisoner-of-war camps and civilian concentration camps.

Since 1948 numerous amendments have been enacted by the Congress to the War Claims Act of 1948 adding additional categories of claimants but thus far no comprehensive war claims legislation has been enacted designed to provide a measure of compensation for other Americans who suffered injury, death, or property losses.

The bill, H.R. 7283, then today represents the culmination of the effort which began during and shortly after World War II.

The distinguished gentleman from Illinois [Mr. MACK], who is chairman of the Subcommittee on Commerce and Finance of the Committee on Interstate and Foreign Commerce, conducted extensive hearings on this legislation and he will explain the bill in detail.

This gives you, Mr. Chairman, the background of this program.

With the permission of my distinguished friend on the minority side, at this time I would like to recognize the distinguished gentleman from Illinois [Mr. MACK], chairman of the Subcommittee on Commerce and Finance to explain in more detail the provisions of the bill, so that the discussion can all be together in this record.

Mr. BALDWIN. Mr. Chairman, I would like to ask the gentleman a question if he will yield, with reference to taxability of these claims.

Mr. HARRIS. I yield.

Mr. BALDWIN. The reason I do so is that on the Pacific coast a group of claims have recently been paid to people who qualified under the Japanese Evacuation War Claims Act passed in 1948, who were evacuated from the west coast to their great detriment and loss.

They have been paid claims under that act. The Internal Revenue people are now endeavoring to collect income tax on these claims that have been paid, and this has caused great concern on the west coast.

I am one of those who feel that there should not be any tax levied on the payment of such claims, and I would like to ask whether claims paid under the terms of the present bill are going to be subject to taxation by the Treasury Department. There is a provision in the bill dealing with losses; I am not basing my question on that point. My question is whether if a claim is paid under this bill it is going to be subject to income tax by the Internal Revenue Service on the payment of the claim.

Mr. HARRIS. I would say in response to the gentleman that I am not familiar with the specific provisions of the Internal Revenue Code that would apply. I assume that if there were income it would be taxable and that if there were no income it would not be.

Mr. YOUNGER. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. YOUNGER. The matter to which my colleague, the gentleman from California [Mr. BALDWIN], refers is the capital gains tax where the amount awarded was more than the value of the property at the time of the taking. It is a capital gains tax. That only applies to an excess over its previous value. I do not think there is any possible chance of there being capital gains in the cases involved under the bill we are now considering.

Mr. BALDWIN. There is nothing in the bill itself to indicate that there might not be a gain involved. If there were a gain, theoretically it would be subject to taxation.

Mr. HARRIS. Our committee did not have jurisdiction to incorporate any provisions affecting internal revenue.

Mr. BALDWIN. In answer to the gentleman, I would like to refer to section 206 of the bill, on page 26, where you specifically say:

> Any payments made on an award reduced by reason of this subsection shall be exempted from Federal income taxes.

This is where a claimant has already taken a loss on his income tax. Then you deduct that loss and pay the difference and you say that any payment made by reason of this subsection shall not be subject to Federal income taxes.

So your committee has taken jurisdiction in that field, but you have made a statement only on cases where they have taken a loss. I am asking about another proposition. Your committee would have the same right to insert a provision in the bill in reference to that.

Mr. HARRIS. The committee felt it was perfectly within its jurisdiction to do as it did in the bill.

Mr. MACK. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Illinois.

Mr. MACK. May I say to the gentleman this provision was included to make certain this would not be a windfall for certain corporations operating under the excess profits tax during World War II. They deducted most of the loss. We are giving protection in these instances and, therefore, we have included in here any payments made on an award reduced by reason of this subsection shall be extended to the Federal income tax. We are reclaiming the amount that was deducted by a corporation.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. HARRIS. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. MACK].

Mr. MACK. Mr. Chairman, almost 17 years have passed since the end of World War II and we still have not taken care of the claims of American citizens and nationals who have suffered injury or death under circumstances specified in this legislation, or who have suffered property losses as a result of military operations during World War II in certain European countries and in areas attacked by Japan.

The bill which is before the House today will take care of these claims. It is almost identical to the bill which the House passed in the 86th Congress on March 1, 1960—H.R. 2485, 86th Congress. The Senate, however, failed to pass this legislation and so we are back again with this problem.

AUTHORIZED CATEGORIES OF CLAIMS

The four general categories of claims whose determination and payment are authorized by this legislation are as follows—payment of these claims has not been authorized in other legislation or treaties:

First. Damage to or destruction of property located in certain European countries and in areas attacked by the Japanese resulting from military operations or special measures against property—claims for losses arising in the Philippines are allowable where the claimant received no compensation under prior legislation;

Second. Damage to or destruction of ships and ship cargoes as a result of military action;

Third. Net losses of insurers under war risks insurance contracts covering ships; and

Fourth. Death or disability, and property losses, suffered by civilian passengers on vessels attacked on the high seas before December 11, 1941—date on which Germany declared war against the United States.

In addition, this bill provides for payment of up to 40 percent of awards heretofore made on war damage claims against Hungary.

Losses must have been suffered originally by American nationals, and the claims based thereon must have continuously remained American-owned up to the time they are filed.

Where a corporation does not qualify for payment, its American national stockholders may receive payment in proportion to their ownership interest in the corporation. Awards in excess of $10,000 on corporate claims will be reduced by the Federal tax benefits received by the corporation in prior years arising out of the loss on account of which the claim is filed.

Claims for disability or death will be paid in full; all other claims will be paid in full up to $10,000, with pro rata reduction thereafter if the war claims fund is not sufficient to pay all awards.

Payments will be made to claimants under the bill out of the war claims fund—which consists of proceeds resulting from the sale of vested property—and not out of appropriations. The balance presently available for transfer to the war claims fund is approximately $100 million.

PROCEDURE AND ORGANIZATION

The bill provides that claimants will be given 18 months in which to file their claims and the Foreign Claims Settlement Commission would be required to complete the processing of these claims within a 4-year period.

Each award or denial of a claim must be accompanied by a specific statement of the facts and the reasoning of the Foreign Claims Settlement Commission.

EXPLANATION OF COMMITTEE AMENDMENTS

The committee adopted an amendment which, aside from technical and clarifying corrections, provides for, first, recertification of awards heretofore made with respect to claims of citizen or nationals of the United States based on war damage losses in Hungary; second, authorizes the Foreign Claims Settlement Commission to fix attorney fees at less than 10 percent in connection with any claim filed with the Commission; and, third, eliminates from the bill the provision that not more than two members of the Foreign Claims Settlement Commission may be from the same political party.

NEED FOR LEGISLATION

Since the end of World War II American property owners who suffered war damages have been looking for some way of recouping their losses. Some of the owners have been compensated in whole or in part under the domestic laws of other countries. Some have been compensated pursuant to peace treaties, and others by laws enacted by the Congress of the United States.

Moreover, under the War Claims Act of 1948, as amended, compensation has already been made available to, first, members of our Armed Forces detained as prisoners of war; second, American civilians interned by the Japanese in the

Philippines, Midway, Wake, and Guam; third, religious organizations in the Philippines which furnished aid and services to our troops and civilians during the occupation, or which sustained damages to their hospitals, schools, or welfare units; fourth, Americans whose bank accounts were sequestered by Japanese; fifth, Americans who served in allied forces and who were detained as prisoners of war; and, sixth, American merchant seamen captured on the high seas.

By virtue of peace treaties, international agreements, or foreign domestic legislation war damage claims attributable to Italy, those arising within the territorial limits of Japan, and those arising in some European nations have been or are being settled.

H.R. 7283, as amended, would provide a measure of relief to American war damage claimants in areas in Europe and Asia not heretofore covered. Categories of war claims authorized by this legislation would be paid out of proceeds resulting from the sale of German and Japanese assets located in the United States which were taken over—vested—by the alien property custodian. In all, an estimated $54 million of Japanese-owned assets and $541 million of German-owned assets were seized.

It is extremely difficult to measure the cost of the program contemplated by the bill. Of course, in the end the size of the program will be governed by the amounts available for transfer to the war claims fund.

I hope that the House will again pass this legislation and that the Senate will also consider this legislation and pass it so that we may arrive at some satisfactory settlement to the problem which has been pending here for so many years.

Mr. PUCINSKI. Mr. Chairman, will the gentleman yield?

Mr. MACK. I yield to the gentleman from Illinois.

Mr. PUCINSKI. Will the gentleman be good enough to advise this Member of the House what happened with reference to the testimony before the committee concerning damages to people who are now American citizens but at the time of the war were prisoners of war in the various European camps and who suffered great personal and physical damages?

Mr. MACK. The gentleman is referring to those individuals who served with friendly nations or forces during World War II?

Mr. PUCINSKI. That is correct.

Mr. MACK. And who later came to this country, some of whom are now citizens of this country?

Mr. PUCINSKI. That is correct.

Mr. MACK. There was such an amendment proposed by the gentleman from Michigan [Mr. Dingell], which the committee considered but did not approve.

If we had an unlimited amount of money to spend we could take care of those individuals. But the funds are very limited and we should, as a matter of equity and justice, take care of our citizens first.

Mr. PUCINSKI. I thank the gentleman.

Mr. LINDSAY. Mr. Chairman, will the gentleman yield?

Mr. MACK. I yield to the gentleman from New York.

Mr. LINDSAY. Mr. Chairman, I should like to compliment the distinguished gentleman on the work he has done, and all members of the subcommittee, for bringing this bill to the floor. I should like to thank the gentleman for his attention to the detail of this bill. I, myself, was privileged to testify before the gentleman and his subcommittee and urged passage of an amendment which was subsequently accepted as a committee amendment, with respect to Hungarian claims. I think a highly equitable result was reached.

Mr. MACK. I thank the gentleman.

Mr. BENNETT of Michigan. Mr. Chairman, I yield myself such time as I may consume.

Mr. LINDSAY. Mr. Chairman, will the gentleman yield?

Mr. BENNETT of Michigan. I yield to the gentleman from New York.

Mr. LINDSAY. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LINDSAY. Mr. Chairman, I ask in support of this bill, H.R. 7283, to provide compensation for American nationals for certain World War II losses.

This bill is to provide for determination of the amount and validity, and for the payment, of claims of American nationals who suffered injury or death under circumstances specified in the legislation, or who suffered property losses as a result of military operations during World War II in certain European countries and in areas attacked by Japan.

I wish to express my appreciation to the committee and particularly to the distinguished chairman of the subcommittee, the gentleman from Illinois [Mr. Mack], for their diligence in drafting and reporting this bill. And I would like especially to thank the gentleman and the members of the subcommittee for including in this bill an amendment that I pressed for in my testimony before the subcommittee, which would rectify awards theretofore made with respect to claims of citizens or nationals of the United States based on war damage losses in Hungary. If the bill had not included the Lindsey amendment it would have been most inequitable. It would have been an inequity that hardly could have been classified as the result of any design. Because of the hodgepodge of other laws, without this amendment the Hungarian claimants would be severely prejudiced.

Under Public Law 84-285 the Attorney General was directed to vest the American assets located in the United States of the governments of the satellite countries as well as of the corporations of those countries domiciled there. Those assets were used to pay American war damage claimants in those countries as well as the losses sustained through postwar nationalization. During consideration of the 1955 legislation it was anticipated that the Hungarian claims fund would amount to $3.1 million and war damage awards would be slightly under $12 million.

The actual figures later developed showed vested assets at less than $2 million and war damage and nationalization awards in excess of $60 million. The anticipated payment ratio of 25 percent for Hungarian claimants amounted to a mere 1 percent. The payment ratios for Rumania was 35 percent and for Bulgaria 53 percent.

No new Hungarian claims need be adjudicated as a result of the Lindsay amendment. The bill simply provides for a recertification of the Hungarian claims awards previously made. The satisfaction received under the previous Hungarian program will be deducted from payments made under the German claims program.

Mr. Chairman, I also pressed for an amendment which would provide that awards on corporate claims would be reduced by the Federal tax benefits, if any, received by the corporation in prior years arising out of the loss on account of which the claim is filed. I am pleased that the committee included this amendment, although in modified form, as the committee limited it to claims in excess of $10,000. In any event, the amendment is better than nothing, is fair, and will leave a larger amount in the "pot" for the satisfaction of claims of individuals who received no tax benefit as a result of their loss.

I think also, Mr. Chairman, that the bill should be further strengthened by removing the arbitrary cutoff date which provides that claimants must be nationals of the United States at the time of the loss in order to be eligible. I will support the amendment that will be offered by my friend, the gentleman from California [Mr. Cohelan], to remove this limitation.

This is important legislation, Mr. Chairman, and I am pleased to support it. I am especially pleased to have authored the amendment to the bill, which is accepted by the Committee, with respect to Hungarian claims.

Mr. BENNETT of Michigan. Mr. Chairman, I am opposed to the bill H.R. 7283, which has been reported from our Committee on Interstate and Foreign Commerce. I am opposed to this legislation on the same grounds on which I opposed almost identical legislation during the 86th Congress.

Mr. Chairman, I want to stress today as I did then that I have no personal interest in this legislation. To my knowledge no constituent of mine is personally interested in this legislation.

I am opposed to this legislation because in my opinion it violates an important principle which we have every reason to uphold; namely, the principle of protecting private property.

Prior to World War II this Government never endorsed a policy of permitting property of private citizens of foreign countries to be confiscated for public use without paying compensation to such citizens. Unfortunately, at the close of World War II, our Government deviated from this principle and agreed with the German Government that property of German citizens taken by us should be retained here in order to pay American citizens who suffered property losses in Germany during World War II. The German Government further agreed to repay German property owners whose property we have taken over in this country.

Up to now, the German Government has not carried out this obligation. Legislation to carry out this obligation to compensate German citizens is still pending in the German legislature.

Mr. Chairman, I am opposed to this legislation because in my judgment it violates a very simple and I think a very fundamental principle of justice insofar as private property is concerned. Putting this bill in its simplest terms, what it would do is to take property and money that was confiscated by our Government from a handful of German and Japanese citizens after the outbreak of World War II, which is now in the war claims fund, and use the money of those private citizens to pay off the claims of private citizens of the United States who happened to have property in Germany or one of the other enemy countries during World War II.

It is the first time, as far as I can find, that this country ever has sanctioned such a principle and has come to Congress asking Congress to confirm it.

This bill was passed by the House in 1960 but it did not pass the Senate, fortunately from my standpoint. It is probable it will pass the House again, but I hope the other body will do to it what it did before.

I want the record to show, Mr. Chairman, that as far as I am concerned I believed American citizens who lost property as a result of the war machine of Adolf Hitler and the Nazis or the Japanese or any of their allies and our enemies during World War II ought to be compensated, but I believe they ought to be compensated in either one of two ways. Either our Government ought to assume it as an obligation to our citizens as it has assumed so many other obligations that are lesser obligations insofar as their moral justification is concerned in my opinion than these obligations, as an alternative, our Government ought to see to it that through negotiations with Germany and Japan that the German and Japanese Governments as distinguished from a handful of German or Japanese citizens will be paying the just debts of the the German Nation.

I do not think anybody who wants to be fair about this situation will argue that a handful of German citizens who happened to own property in this country at the outbreak of World War II are responsible for everything that the German war machine did or any of its allies. Yet, this bill is based upon that principle, because it is taking the money, the assets and the property confiscated from those few German and Japanese people which is now in the war claims fund and the bill would authorize that money to be used to pay American citizens who lost their money in foreign countries.

I simply say this: The obligation, as far as the property losses of our citizens from enemy action overseas are concerned, is either an obligation of our Government or an obligation of the governments that caused the losses. We ought to see to it that governments and not individual property owners pay these losses in one way or another.

To establish the precedent that this bill establishes would, in my judgment, be one that all of us would regret in the years to come. I think it would establish a precedent that would enable people who are not our friends and who are not our allies today to take similar action against our citizens who happen to have property in those countries. These people will use this legislation as a precedent, and, therefore, as a matter of principle we should not enact the legislation which is sought to be enacted here in the House of Representatives today.

I oppose it on that basis, and that is the only basis on which I oppose it, Mr. Chairman.

This is the second time that the House of Representatives has an opportunity to pass on this legislation. I realize that there is tremendous pressure and justified pressure to secure compensation for American citizens who suffered property losses during World War II. However, as a matter of principle we should under no circumstances jeopardize private property rights. If we ourselves fail to observe the sanctity of private property, we cannot expect other countries to protect American private investments abroad.

Today some $60 billion of private American capital is invested in foreign countries. If we establish the precedent of taking private property for public purposes we cannot expect other countries to protect American investments.

Mr. Chairman, I believe this is unwise legislation and I am only consistent in raising my voice once more in opposition to this legislation. I would favor, as I say, legislation which would pay American claimants for their losses, but I refuse to accept the principle that a few citizens of one country should accept the financial obligations of their Government to pay for the damage that their Government perpetrated in time of war on the citizens of another country.

Mr. BENNETT of Michigan. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. YOUNGER].

Mr. YOUNGER. Mr. Chairman, I rise in support of this bill. I do not subscribe, unfortunately, to the philosophy of the gentleman from Michigan. It was well understood at the end of the Second World War that we would take the funds from the sale of confiscated property and take care of the claims of our citizens and that the Germans and Japanese would take care of the claims of their citizens rather than subscribe to the policy of reparations. This is a bill that has followed the policy in the last 17 years of settlement of the war claims. There is nothing new in the bill except that we are now beginning to satisfy the claims and pay to the citizens of our own country the losses that they sustained on property which they owned in these foreign countries as a result of the war machine action on the part of either the Japanese or the Germans. So that so far as the principle which the gentleman from Michigan mentions, that has been established by the Congress in every act in alien property legislation since World War II. So that I think that particular point can be overlooked. I hope the House will pass this long-needed legislation and that we will be able to have the other body accept this legislation during this session so that we may settle with our own citizens a claim which they legitimately have and which should legitimately be paid out of the funds we now have on hand in the alien property funds.

Mr. Chairman, I yield back the balance of my time.

Mr. BENNETT of Michigan. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Chairman and my colleagues, many of you have discussed this legislation with me during the last several years. I know there has been a feeling among some Members of this body and some Members, may I say, of the other body that private property which has been sequestered during a wartime period should not be taken from those individuals even though they be foreigners and, in effect, transferred to a trust fund for the payment of claims of American nationals. All of you will remember, at the end of World War I we had, with our allies of World War I, rather large reparation demands against Germany. Much of that was paid by Germany until Germany went financially insolvent in the early twenties. When World War II was over in Europe, devastation was rather widespread. Germany was one of the worst sufferers. Our Government felt that in order to get the German nation back on its feet, the best thing we could do would be not to demand reparations but to make a treaty regarding damages and reparations and that is what we did. We entered into a treaty whereby we kept the property which we had confiscated during the wartime and whereby we would pay our own nationals. In turn, West Germany undertook its own obligation of taking care of the residents of West Germany who were claimants for all types of war damage. In 1957 I was in Bonn and I took this up with the West German Government. They were very frank. This is not a political issue in West Germany at the present time. There is no great demand for return of this property. It is not an issue between the two countries which can affect us diplomatically. It is simply in West Germany as of today more or less a dead issue. The West German Government was glad to make the treaty by which they received a substantial benefit in taking care of their own people and not having to pay reparations.

May I say that the West German Government has done an excellent job. I believe that as of the last count the payment in damages to their own nationals was in the neighborhood of $25 billion. Almost $3 billion of this, at the last count, was payable to German nationals who are no longer living in Germany but are residents of Israel.

I give you this background in order that you may understand that the claimants in Germany are not without recourse. Claims are still being settled in West Germany as fast as they are being adjudicated. A very large portion of the national budget in the 10 years immediately after World War II of the West German Government went for the payment of war damages of their own nationals.

I think it is well to get the whole picture and to realize that people who had their property confiscated by this country have some recourse. I am talking to those in this body who still believe that this is private property and ought to be returned to them. The German national does have recourse to his own Federal Government in Bonn. He can make his application, and under the law he is paid. He is not paid in full, but he is paid a reasonable sum in settlement of war damages he sustained in World War II—by his own German Government.

Mr. Chairman, this legislation has been before our committee for a number of years. We have had this matter up and down the hill almost as often as Napoleon's army. I believe the subcommittee has done about as good a job as could be done. It seems that 17 years after the war there ought to come a time when these claims are finally adjudicated and settled.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield.

Mr. COHELAN. Can the gentleman tell me whether some of the claims were by citizens of Israel?

Mr. SPRINGER. I would say that to my best recollection most of them originally were German nationals but are now citizens of Israel. They are paying claimants who live in other countries, but mostly only those who lost property in Germany by reason of the Nazi regime and its atrocities.

Mr. BENNETT of Michigan. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. Bow].

Mr. BOW. Mr. Chairman, I take this time in order to ask questions of members of the committee.

The first question I would like to ask is whether or not in the hearings on this bill any estimate was made as to the cost of administration?

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. BOW. I yield to the gentleman from Ohio.

Mr. HARRIS. I do not believe there was any question in the committee relating to the cost of administration. I do not recall that we asked for any such estimates from the Foreign Claims Settlement Commission.

I would remind the gentleman the bill provides that 5 percent of the amount transferred to the war claims fund out of the vested assets shall be used for the administrative expenses under title II of the War Claims Act.

Mr. BOW. May I point out also, for the first time under the act we have an authority for an appropriation from the Treasury. So we have a situation that if the 5-percent deposits are not sufficient to pay administrative expenses, we would then be called upon to make an appropriation from the Treasury, imposing a tax on the people of all the country, whereas under the bill you are now amending there is the provision:

> There are hereby authorized to be appropriated out of any moneys in the Treasury not otherwise appropriated such sums as may be necessary to enable the Commission and the Treasury Department to pay their administrative expenses in carrying out their respective functions under this title.

Under the law as it now stands all administrative costs must be paid from the fund itself. If the 5 percent is not sufficient, if there was a buildup of this Commission and the number of employees who would get on the payroll, we would find ourselves getting to the position where the 5 percent may not be sufficient.

When we consider this bill under the 5-minute rule I will offer an amendment to section 217 which will provide that moneys may be appropriated from the Treasury but not to exceed the 5 percent deposits in the Treasury. This would bring us back to where we were in connection with existing law where the administration of these funds would be paid out of the fund itself rather than from the general taxpayers of the country.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. BOW. I yield to the gentleman from Iowa.

Mr. GROSS. May I say to the gentleman I certainly support his amendment, because section 217 is wide open.

Mr. BOW. It leaves it wide open for them to go over 5 percent by any amount and there would be another big buildup of an agency. It seems to me we should limit this to payments from the fund for the benefit of these people and these payments should come from that fund.

Mr. BECKWORTH. Mr. Chairman, will the gentleman yield?

Mr. BOW. I yield to the gentleman from Texas.

Mr. BECKWORTH. I want to commend the gentleman for the point he is making. One of the important things in connection with this legislation is to find out ultimately what the cost will be. It has been my experience in the past that rather frequently that is very difficult information to obtain. I do hope as this legislation progresses we can get some round figures that all of us may understand as to the ultimate cost to the American taxpayer this legislation will bring about.

FOREIGN CLAIMS SETTLEMENT COMMISSION OF THE UNITED STATES,
Washington, D.C., August 7, 1962.

Hon. LINDLEY BECKWORTH,
House of Representatives,
Washington, D.C.

DEAR MR. BECKWORTH: Reference is made to your telegram of August 6, 1962, in which you inquire concerning H.R. 7283 and H.R. 3460. The figures in the latter bill were apparently transposed in transmission reading H.R. 3640.

The Trading With the Enemy Act is administered by the Office of Alien Property, Department of Justice. Inasmuch as H.R. 3460 is amendatory to the latter act the information you request is within the specific knowledge of the Department of Justice. Accordingly, the Commission is not in a position to comment thereon.

Under H.R. 7283 there would be entirely no cost to the U.S. Treasury, if enacted. It is understood that there are approximately $100 million derived from the liquidated proceeds of vested enemy assets available for deposit into the war claims fund which H.R. 7283 contemplates utilizing in carrying out its provisions.

Inasmuch as there has never been a registration of claims which would be eligible under H.R. 7283 the 50 largest claimants thereunder are unknown. Estimates made in the course of the hearings on the bill anticipated a claim load of from 35,000 to 75,000 claims. In studies made in 1956 and 1957 on the subject, the Commission did prepare a list of the large potential claimants under similar legislation. A copy of that memorandum is enclosed for your information.

Commission records disclose that similar information was furnished you on May 18, 1960, in relation to H.R. 2485 which was passed by the House of Representatives in the 86th Congress.

The Commission is pleased to be of assistance in this matter.

Sincerely yours,

ANDREW T. MCGUIRE,
General Counsel.

LIST OF POTENTIAL CLAIMANTS

Arden Investing Co., 681 5th Ave., New York, N.Y	$250,000
Chase National Bank, 18 Pine St., New York, N.Y	209,220
Colgate-Palmolive-Peet Co., 105 Hudson St., Jersey City, N.J	919,898
Corn Products Refining Co., 17 Battery Pl., New York, N.Y	780,918
Denver Chemical Manufacturing Co., 163 Varick St., New York, N.Y	100,000
Firestone Tire & Rubber Co., Akron 17, Ohio	154,386

WASHINGTON, D.C.,
August 8, 1962.

Hon. LINDLEY BECKWORTH,
House of Representatives,
Washington, D.C.:

The Treasury has never been asked to report on H.R. 3460 and it is impossible for us to furnish you immediately with the information that you have requested. May I suggest that the responsibility in the area lies with the Department of Justice.

If we can be of further service let us know.

JOSEPH W. BARR,
Assistant to the Secretary.

U.S. DEPARTMENT OF
JUSTICE, OFFICE OF THE
DEPUTY ATTORNEY GENERAL,
Washington, D.C., August 8, 1962.

Hon. LINDLEY BECKWORTH,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN BECKWORTH: Reference is made to your telegram received in the Office of the Attorney General on August 6, with regard to H.R. 7283, a bill to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses and H.R. 3460, a bill to amend section 9(a) of the Trading With the Enemy Act, as amended.

You have requested information as to the total cost to the U.S. Treasury of each bill, the total amount of assets which would be returned under their provisions and a list of 50 of the largest claimants under such bills.

With respect to H.R. 7283, as you know, the Foreign Claims Settlement Commission administers all claims under the War Claims Act and is the agency charged with the responsibility of receiving, processing and adjudicating such claims. Therefore, the information you have requested is not in the possession of the Department of Justice. However, we have been advised informally by the Commission that such information has been forwarded to you in response to your request directed to that agency.

With regard to H.R. 3460, which would permit the sale of vested shares of General Aniline & Film Corp. notwithstanding the pendency of a suit for their recovery under section 9(a) by a Swiss company, it does not appear that the questions raised by you would be applicable to this bill. In this connection House report 2046 on this bill sets forth in detail the background and need for such legislation. A copy of that report is attached for your ready reference.

It is hoped that the foregoing will be of assistance to you.

Sincerely yours,

WILLIAM A. GEOGHEGAN,
Assistant Deputy Attorney General.

DEPARTMENT OF STATE,
Washington, August 8, 1962.

Hon. LINDLEY BECKWORTH,
House of Representatives.

DEAR CONGRESSMAN BECKWORTH: Thank you for your telegram of August 4, 1962, requesting certain information about H.R. 3460 and H.R. 7283 which are pending before the present session of the Congress.

H.R. 3460, which would authorize the sale of certain property by the Alien Property Custodian, is amendatory of the Trading With the Enemy Act. As that act is administered by the Department of Justice the information you desire is known to it and this Department is not in a position to comment thereon.

H.R. 7283 would not appear to involve any cost to the United States as it specifically provides in section 217 that "there shall be deducted from each such deposit 5 per centum thereof for expenses incurred by the Foreign Claims Settlement Commission and by the Treasury Department in the administration of title II of the War Claims Act of 1948."

The Department has no independent information concerning the total amount of funds available for distribution but according to a letter dated July 17, 1962, from the Department of Justice to the House Committee on Interstate and Foreign Commerce, the estimated free balance after final liquidation of the Office of Alien Property is $100 million. A breakdown of the report of the Department of Justice may be found at pages 8 and 9 of Report No. 2035 which was submitted by the House Committee on Interstate and Foreign Commerce on July 25, 1962.

The Department of State does not have information concerning individual claims which would be filed with the Foreign Claims Settlement Commission for determination if H.R. 7283 is enacted and is, therefore, unable to furnish a list of the 50 largest claims. The Department has been informed by the Foreign Claims Settlement Commission, however, that it furnished some information on the matter to you on July 7, 1962.

I regret that I am unable to furnish all of the information you desire but if I can be of any further assistance in connection with this matter, please do not hesitate to let me know.

Sincerely yours,
FREDERICK G. DUTTON,
Assistant Secretary
(For the Secretary of State).

Mr. BOW. I might say that the appropriation for this fiscal year by the subcommittee of which the gentleman who now occupies the chair is the chairman, and I happen to be a member of the committee, was $690,000. We are beginning to deal in big figures. If we provide authority to take this out of the Treasury, I think we may be getting into larger figures. We should retain the theory that these payments shall be made out of the fund and not from the General Treasury of the United States.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. HARRIS. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. Chairman, I do this in order that we may make the RECORD perfectly clear. I do not believe, as a matter of fact, that there is a difference in the views of the committee and the actual action taken by the committee in this regard and what the gentleman from Ohio [Mr. BOW] has said as well as what the gentleman from Texas [Mr. BECKWORTH] has said with reference to the administration of this program.

The committee felt that a transfer of 5 percent from the funds available for the administration would be sufficient to take care of it. Now, we still feel that way. The gentleman from Ohio [Mr. BOW], I think, is technically correct with reference to his statement regarding the possibility of appropriating more funds than the 5 percent. But I remind the gentleman that he appropriates money out of the Treasury of the United States for this purpose—has in the past and will continue to do so in the future. That is the only way it can be paid.

Mr. BOW. But I would point this out to the gentleman.

Mr. HARRIS. Permit me to finish. The gentleman quoted the law correctly when the gentleman stated "to be appropriated out of any money in the Treasury." That is true. But the funds have got to be transferred by the Attorney General first before they can be appropriated. I think, as I say, technically there is no difference between what the gentleman offers here and between what the bill provides, and if we can clarify it and make it more certain, as far as I am personally concerned, I would have no objection to it at all.

Mr. BENNETT of Michigan. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I shall not consume much time. I have no objection to the amendment suggested by the gentleman from Ohio [Mr. BOW]. But the gentleman's proposed amendment brings up a significant point to which I alluded earlier in the debate. Eventually, even if Congress adheres to the principle enunciated in this bill of making private individuals responsible for the claims of their government, the fund is going to be exhausted. Then when it is exhausted we still have pending before our committee—I do not have the exact number of bills—claims of one kind or another. There are hundreds of thousands of claimants of one description and another who are making eyes at this fund and who claim they are entitled to some of this money.

Mr. Chairman, our committee over the years has considered some of these bills, but most of them have not been considered. Eventually, of course, the thing that the gentleman from Ohio mentioned regarding the Appropriations Committee's concern here may occur. The thing that worries him is not the principle of whether we make a private individual pay for the claims of his government. The gentleman from Ohio [Mr. BOW] is not worried about that. The gentleman from Ohio, is worried about how much is coming out of the U.S. Treasury. That is a good thing about which to be worried. I can tell the gentleman that this fund is going to be exhausted if this kind of legislation is passed. One of these days bills are going to come up here to the extent if they are approved, they are going to have to be paid out of the U.S. Treasury.

If we want to be perfectly honest and perfectly decent insofar as the sanctity of private property is concerned, we would do the straightforward thing that needs to be done; namely, tell the German Government we need *x* millions of dollars to pay off American citizens whose property they damaged during World War II, and we want that matter settled. That would end the argument. If we do not do that, what are we going to do about Dictator Castro in Cuba who is confiscating American property and who has confiscated American property for the last several years? If we follow the principle enunciated in this bill, then we can send the FBI out to look for some Cuban citizens who happen to have some property in this country and then pass a law to expropriate the property of those private citizens of Cuba to pay for the property of the U.S. citizens that Castro has expropriated under his regime. That is the principle and philosophy enunciated in this bill. That is the reason I am against it, Mr. Chairman.

Mr. HARRIS. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. COHELAN].

Mr. COHELAN. Mr. Chairman, I rise in support of this long overdue measure to provide relief to American nationals for certain losses suffered during World War II. I would like to compliment the distinguished chairman of the full Committee on Interstate and Foreign Commerce [Mr. HARRIS] and the distinguished chairman of the subcommittee [Mr. MACK] for their efforts in bringing this bill before the House at this time.

Mr. Chairman, more than 16 years have elapsed since the end of World War II—16 years in which legitimate claims for substantial wartime losses have gone unfilled. This delay, with all due respect for the procedures of international law, is too long to ask any American to wait for fair treatment from his Government. It is a delay which with every day increases the degree of individual injustice and compounds both the administrative and the legal problems involved.

Mr. Chairman, at the appropriate time I intend to offer an amendment which I believe will correct a serious defect in this bill—a defect which would exclude thousands of American citizens from receiving just and due compensation. I believe that the amendment which I will offer should be adopted and that this legislation we are considering today should be passed without further delay.

Mr. Chairman, may I say that I had an example in point which I would like to take this opportunity to share with the House, a specific illustration that comes right out of my own district. Mr. Edward Gans from Berkeley, Calif., arrived in this country from Germany in January 1938, and took out the first papers for citizenship in February of that year. Under normal conditions Mr. Gans would have received his citizenship papers in 5 years time or 1943. Due to the wartime conditions, however, Mr. Gans did not receive citizenship papers until November 1944. Mr. Gans' property in Germany was destroyed by a bomber attack in January 1944 and consequently, he would not be eligible to file a claim under the present provisions of this bill.

Mr. Chairman, my amendment would correct this gross inequity by permitting all American citizens and all those who had taken out their first citizenship papers prior to the date of their loss to participate in the benefits of a war claims program. This is a moderate, reasonable and wholly justifiable amendment. It would reject an arbitrary division of our fellow citizens as discriminatory and indefensible, and it would provide appropriate relief to many who are deserving but who would otherwise be neglected.

Mr. Chairman, I urge that this amendment be adopted and that the bill as amended be passed.

Mr. YOUNGER. Mr. Chairman, I yield 3 minutes to the gentleman from New Jersey [Mr. GLENN].

Mr. GLENN. Mr. Chairman, I rise in support of this bill. As a member of the subcommittee, let me say we have sat through many, many days of hearings during this last session of Congress. Some of the cases which have been brought to our attention have been pitiful. Some of the claimants have passed on.

There was one thing which was paramount to the committee in its consideration of this matter, and that is that it is time to bring this matter to an end. Therefore, while the legislation we are reporting out may not be perfect, we do feel it is the best we could come up with. In view of the situation that has carried over for the past 16 years, we think we should now bring it to a conclusion. We thought this in the last session of Congress, when we passed a similar bill, but, unfortunately, it died in the Senate.

This bill provides that all claims by nationals under this bill must be made within 18 months, and the Foreign Claims Settlement Commission would be required to complete the processing of these claims within a 4-year period. We hope that will then be the end of it.

Mr. YOUNGER. Mr. Chairman, we have no further requests for time.

Mr. HARRIS. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. RYAN].

Mr. RYAN of New York. Mr. Chairman, I rise in support of H.R. 7283.

This bill would amend the War Claims Act of 1948 to authorize settlement of several classes of meritorious World War II claims which were not covered by the original law or its subsequent amendments. These are claims which had their origin on the high seas or in the European or Pacific theaters of war. Four general types of claims are covered:

First. Physical loss or destruction of, or damage to, property in the described areas, occuring as the result of military operations, or special measures against property.

Second. Damage to or destruction of ships and ship cargoes as a result of military action.

Third. Net losses of insurers under war-risk insurance contracts covering ships.

Fourth. Death or disability, and property losses suffered by civilian passengers on ships torpedoed between September 1, 1939, and December 11, 1941.

The purpose of H.R. 7283 is corrective. It aims to rectify a condition which has existed for 17 years. American citizens who suffered injury, death, or property losses in certain areas during World War II have not yet been compensated, despite the fact—and this is rank injustice—that we have the funds, and have had the funds, to satisfy their claims. Not only are the funds available, but we have already established the Foreign Claims Settlement Commission to pay out the funds. All that is lacking is the necessary legislation. Mr. Chairman, I commend the distinguished chairman of the committee [Mr. HARRIS] and the distinguished chairman of the subcommittee [Mr. MACK] for bringing this legislation to the floor.

The United States has on hand a sizable amount of liquidated assets, approximately $100 million. I do not think there are convincting arguments in favor of returning these assets to countries which were our enemies at the time of liquidation, regardless of whether or not the present governments of those countries are our enemies today. In agreements between the United States and the Allies, Germany and Japan relinquished all rights to these assets.

In January 1946, the United States and 17 Allies entered into the Paris Reparation Agreement under which the signatories agreed to hold or dispose of German external assets in such a way as to preclude returning them to German ownership or control. Subsequently, in 1948 Congress amended the Trading With the Enemy Act to provide:

> No property or interest therein of Germany, Japan, or any national of either such country * * * shall be returned to former owners thereof or their successors in interest and the United States shall not pay compensation for any such property or interest therein.

In the Treaty of Peace Between the Allied Powers and Japan, signed at San Francisco on September 8, 1951, Japan agreed that:

> * * * each of the Allied Powers shall have the right to seize, retain, liquidate, or otherwise dispose of all property, rights, and interests * * * now blocked, vested, or in the possesion or under the control of enemy property authorities of Allied Powers.

And that:

> Except as otherwise provided in the present treaty the Allied Powers waive all reparations claims of the Allied Powers * * * and their nationals.

And, in the Bonn Convention of 1952 and the Paris Agreement of 1954 between Germany, France, England, and the United States, Germany similarly agreed that it and its nationals would assert no claim to external assets seized by the three powers and would compensate the former German owners for their losses. The three powers in turn agreed to assert no claims for reparations against German current production.

In addition, the losses under consideration were suffered by American citizens at the hands of our enemies during World War II, and tradition and justice both demand that they be compensated. There is no more appropriate way of using the funds. Those entitled to repayment have been denied compensation for too long a time, and there is certainly no cause, reason, or explanation for further delay. American war damage claimants who have been waiting 17 years for legislation are owed a debt by this Government. The time to inaugurate the program is now by the passage of the bill before us today. In transmitting a similar bill for this purpose the Eisenhower administration strongly emphasized:

> In our judgment the settlement of the claims, which would be authorized under the bill, should not be delayed any longer. With the passing of time the difficulties of establishing titles, successions, and valuations keep on mounting to increase administrative costs attending claims processing.

Mr. Chairman, while I support the purpose of this bill, I feel that there is a serious defect in this legislation, a defect which I have sought to correct by introducing H.R. 9464.

H.R. 7283 authorizes payment of a war claim only if the claimant, and all predecessors in interest, were on the date of the loss nationals of the United States. An exception is made for persons who lost U.S. citizenship by marriage and later reacquired it. Thus, the claims of persons who were nationals of another country at the time of the loss but later came to the United States and became citizens of this country will not be recognized. Nor will claims of persons, who were residents of the United States but not yet citizens at the time of loss be recognized.

Such discrimination against these newer citizens is wholly unwarranted. It is a violation of the spirit, if not the letter, of the Constitution. The Supreme Court of the United States has repeatedly said that naturalized citizens are not second-class citizens. With the single exception of eligibility for the Presidency, they are entitled to equal treatment with natural-born citizens.

Moreover, these new citizens have a strong equitable claims to equality of treatment in the payment of war claims. As productive members of our society, they pay taxes to support our Government and its defense effort. In acquiring U.S. citizenship, they renounced their former allegiances. As a consequence, they cannot look to any other government for redress. If the United States, to which they have sworn allegiance and undertaken the same obligations of citizenship as those resting upon naturals born citizens, does not include in the provision made for other citizens, they will be left without a remedy.

The chief argument advanced in favor of excluding them is based on a principle of international law requiring continuous ownership from the date of loss to the time of filing with respect to claims one government asserts against another on behalf of its nationals. That argument is inapplicable to the situation to which this bill is addressed. The claims with which it deals are not ordinary international claims. They are war claims for destruction and damages resulting from military operations. They are not claims for which our Government will negotiate with any foreign government to obtain redress from that government. Therefore, the determination as to what claims shall be paid is strictly a matter of domestic policy. That policy should be governed by the constitutional principle that all citizens, whether naturalized or natural-born, should be treated alike.

Accordingly, I intend to offer an amendment to H.R. 7283 which will allow claims to be filed by all American citizens, no matter when or how they obtained their citizenship, unless they were members of the armed forces of the enemies of the United States during World War II.

Mr. FARBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. RYAN of New York. I yield to the gentleman.

Mr. FARBSTEIN. I will say to the gentleman, I am in complete accord with the position he has taken. However, I would like to make inquiry, if it is within the knowledge of the gentleman, to what degree this amendment would eat into the fund or to what degree any such amendment, if adopted, would reduce the proportionate amount that would be paid to these American nationals whose claims existed prior to the date in question. Does the gentleman have any idea as to that?

Mr. RYAN of New York. I cannot answer the gentleman's question with certainty. I attempted to ascertain from the proper agencies how many claims this would involve, and the estimates are speculative.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. RYAN of New York. I yield to the gentleman.

Mr. BAILEY. Would your amendment be broad enough to include the valid claims now pending before the Commission and on which no action has been taken; or would it be just broad enough to allow new claims to be filed.

Mr. RYAN of New York. It would encompass any claims permissible under the pending bill. My amendment does not broaden the category of claims. All it does is to extend the eligibility of the claimants.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. HARRIS. Mr. Chairman, I yield 5 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, I listened to the statements of the various members of the committee who have discussed this legislation. Repeatedly, I hear the expression that this is to be the final legislative action having to do with the War Claims Commission. If that is true, Mr. Chairman, I would be remiss in my duty if I failed to call the attention of the committee handling this legislation to a rather unusual situation that occurred at the close of World War II. It has to do with the husband of a constitutent of mine from Sutton, W. Va., who was serving as a member of the Air Force and who was a pilot in one of our fighter planes.

On the morning of the cessation of hostilities which ended the war between the United States and Japan, he was aboard a carrier in Tokyo Bay. They received orders to bomb a certain Japanese objective. His squadron left for that purpose, but before reaching the point where they were to begin their bombing operations, they received notice that we had arranged an armistice with Japan. However, the Japanese Government failed to notify the leader of a Japanese air squadron that such an armistice had been agreed to. On their way back to their carrier in the harbor, the American planes which were flying out of their regular squadron formation, the pilots and crew enjoying the thought that the war was over, were attacked by a Japanese squadron. Four planes were shot down and 16 airmen drowned, including the husband of my constituent. The situation was such at the time that the widow had to go back to teaching to support their two young boys. She had been a schoolteacher prior to her marriage. The effect of the tragedy was such that the wife became ill, and only after considerable time was she able to go back to teaching. Throughout the intervening years she educated those two youngsters. I think she has a valid claim against the Japanese Government for their failure to notify their squadron commanders that there had been a cessation of hostilities. The negligence of the Japanese Government caused the death of this young American flier and I think there is compensation due from the Japanese Government. However, I am at a loss to know just where to start to amend this bill. This is a rather intricate bill and I am at a loss to know how to amend it to make it broad enough to cover such a deserving case as this.

Might I say, Mr. Chairman, this claim has been filed with the War Claims Commission, and they advise me that that act is not broad enough to cover this type of claim. Surely we are not going to close this out and leave out a deserving case of this kind. It seems to me we are committed to make it broad enough to cover such a claim.

Thank you very much for the opportunity to place this matter before you.

Mr. CURTIN. Mr. Chairman, I take this time to add my voice to that of my colleagues who are speaking today in support of H.R. 7283.

The subcommittee of the House Committee on Interstate and Foreign Commerce, of which I am privileged to be a member, spent much time in hearings and executive sessions on this legislation, and the bill which is before us today is the result of very careful work.

The bill, of course, is to distribute approximately $100 million presently in the war claims fund, and additional assets of $150 million, or a total of approximately $250 million, to nationals of the United States who suffered damages as a result of World War II.

The claims are in four categories and are for repayment, to some extent, for losses suffered by American nationals, and whose status has not changed since the time of the original loss. The act provides, after death claims and other claims up to $10,000 are paid in full, that all other claims are to be prorated until the fund is exhausted. The act further provides for a statutory period of 18 months to file such claims, and no further claims can be filed after this period under this act. This definitely will prevent applicants from filing war claims ad infinitum. Each claim must be accompanied by a certificate from the War Claims Commission.

From this very brief résumé of H.R. 7283, it can be seen that it is a very fair and equitable approach to what has been an extremely vexing problem. Obviously, it is for the distribution of money to American nationals who suffered losses as a result of a situation over which they had no control. The bill will not cost the United States Treasury any money, and consequently, it answers this problem frequently raised by the membership of the House.

Some may ask why so many years have elapsed before such legislation was brought before us. Of course, there have been a number of bills on this general problem which have been presented to the Congress over the years, many of which have been enacted into law. Obviously a considerable period of time had to elapse before the enactment of this final bill, to enable all persons, estates of deceased persons, and firms to have the same thoroughly checked and certified. Now this has been done, and the opportunity is before us to do justice to these persons, who through all these years have had such claims. I, therefore, urge the passage of H.R. 7283.

Mr. PHILBIN. Mr. Chairman, I am very thankful to the leadership for bringing this bill to the floor because there are many worthy people interested in it who have waited for a long time and are still waiting for a just and equitable settlement of their war claims.

I compliment the able and distinguished gentleman from Arkansas [Mr. HARRIS], chairman of the Committee on Interstate and Foreign Commerce, and the able and distinguished gentleman from Illinois [Mr. MACK] and the other members of the committee upon the excellent committee report and the admirable way in which the bill has been handled and debated.

I am not desirous of setting forth extensive views on this bill at this time as I believe the House fully understands from the splendid presentation made here what the basic problems are, and I am anxious to expedite action in every way possible.

There is little, if any, real controversy about the principle of the bill. While there are some disagreements, I believe that the bill in its present form, with perhaps some brief clarifying language, represents about the best legislative result that can be achieved in the interest of the people concerned and this Government.

The questions involved are complex and extremely difficult. It has, therefore, been only after the untiring efforts and careful penetrating work and a painstaking consideration that the committee has been able to formulate standards for the prosecution and settlement of these claims that will work substantial justice.

It is unfortunate that in this process the claims of many worthy people cannot be considered at this time. It may well be that at a later date, it will be possible to take legislative action that will permit the consideration of their claims.

In any event, I believe that we will enact this measure in the House, which will permit substantial recovery for loss, damage, and destruction of property belonging to nationals of the United States and provide for maximum fairness and equity for those who have sustained serious losses, damage, and destruction.

While the remedy is somewhat late, the prospects for completed action in this measure seem to be promising, and I hope and urge that when the House passes the bill today, it may be promptly considered by the other body and cleared for final enactment by the Congress.

I have some very dear friends who are personally interested in this legislation, and they have been waiting for years to secure redress of their just claims, and I have been striving over a period of time now to try to assist them with a solution to their problems. For that reason, I am especially privileged today to support this measure and feel confident that it will be enacted by the House, and I certainly propose to continue my efforts to help secure favorable action by the other body at the earliest possible time.

Mr. STRATTON. Mr. Chairman, I rise in support of H.R. 7283. Passage of this legislation is a big step toward our goal of making just compensation to all Americans who suffered damage at the hands of our enemies during World War II.

I am seriously concerned, however, with our failure to adopt the amendments proposed by the gentleman from California [Mr. COHELAN] and the gentleman from New York [Mr. RYAN]. We are still overlooking the very valid claims of other Americans who fought by our side during World War II and who suffered damages or injuries, but who were not then citizens of this country.

In fact, Mr. Chairman, I have long been fighting for a bill, H.R. 3178, which would not only provide the added coverage included in the amendments offered by my colleagues, Mr. RYAN and Mr. COHELAN, but which would also extend the provisions of the War Claims Act to any individual who is a citizen or national of the United States on the date of enactment, or to any individual who was lawfully admitted to the United States for permanent residence during or after World War II and who is a lawful resident on the date of enactment.

I believe this extension should be made as a matter of justice. I am hopeful that the other body, when considering this legislation, will adopt amendments along these lines so that full justice can be achieved on this subject.

Mr. HARRIS. Mr. Chairman, we have no further requests for time. I suggest that the Clerk read.

The CHAIRMAN. Pursuant to the rule the Clerk will now read the substitute committee amendment printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the War Claims Act of 1948, as amended, is further amended by inserting after section 1 thereof the following:

"TITLE I"

SEC. 2. The word "Act" wherever it appears in title I except in section 13(a) in reference to the War Claims Act of 1948, as amended, is amended to read "title".

SEC. 3. The War Claims Act of 1948, as amended, is further amended by adding at the end thereof the following:

"TITLE II

"Definitions

"SEC. 201. As used in this title the term or terms—

"(a) 'Albania', 'Austria', 'Czechoslovakia', 'the Free Territory of Danzig', 'Estonia', 'Germany', 'Greece', 'Latvia', 'Lithuania', 'Poland', and 'Yugoslavia', when used in their respective geographical senses, mean the territorial limits of each such country or free territory, as the case may be, in continental Europe as such limits existed on December 1, 1937.

"(b) 'Commission' means the Foreign Claims Settlement Commission of the United States established pursuant to Reorganization Plan Numbered 1 of 1954 (68 Stat. 1279).

"(c) 'National of the United States' means (1) a natural person who is a citizen of the United States, (2) a natural person who, though not a citizen of the United States, owes permanent allegiance to the United States, and (3) a corporation, partnership, unincorporated body, or other entity, organized under the laws of the United States, or of any State or the District of Columbia and in which more than 50 per centum of the outstanding capital stock or other proprietary or similar interest is owned, directly or indirectly, by persons referred to in clauses (1) and (2) of this subsection. It does not include aliens.

"(d) 'Property' means real property and such items of tangible personalty as can be identified and evaluated.

"Claims authorized

"SEC. 202. The Commission is directed to receive and to determine according to the provisions of this title the validity and amount of claims of nationals of the United States for—

"(a) loss or destruction of, or physical damage to, property located in Albania, Austria, Czechoslovakia, the Free Territory of Danzig, Estonia, Germany, Greece, Latvia, Lithuania, Poland, or Yugoslavia, or in territory which was part of Hungary or Rumania on December 1, 1937 but which was not included in such countries on September 15, 1947, which loss, destruction, or physical damage occurred during the period beginning September 1, 1939, and ending May 8, 1945, or which occurred in the period beginning July 1, 1937, and ending September 2, 1945, to property in territory occupied or attacked by the Imperial Japanese military forces (including territory to which Japan has renounced all right, title, and claim under article 2 of the Treaty of Peace Between the Allied Powers and Japan) except the island of Guam: *Provided*, That claims for loss, destruction, or damage occurring in the Commonwealth of the Philippines shall not be allowed except on behalf of nationals of the United States who have received no payment, and certify under oath or affirmation that they have received no payment, on account of the same loss, destruction, or damage under the Philippine Rehabilitation Act of 1946, whether or not claim was filed thereunder: *Provided further*, That such loss, destruction, or damage must have occurred, as a direct consequence of (1) military operations of war or (2) special measures directed against property in such countries or territories during the respective periods specified, because of the enemy or alleged enemy character of the owner, which property was owned, directly or indirectly, by a national of the United States at the time of such loss, damage or destruction;

"(b) damage to, or loss or destruction of, ships or ship cargoes directly or indirectly owned by a national of the United States at the time such damage, loss, or destruction occurred, which was a direct consequence of military action by Germany or Japan during the period beginning September 1, 1939, and ending September 2, 1945; no award shall be made under this subsection in favor of any insurer or reinsurer as assignee or otherwise as successor in interest to the right of the insured;

"(c) net losses under war-risk insurance or reinsurance policies or contracts, incurred in the settlement of claims for insured losses of ships directly or indirectly owned by a national of the United States at the time of the loss, damage, or destruction of such ships and at the time of the settlement of such claims, which insured losses were a direct consequence of military action by Germany or Japan during the period beginning September 1, 1939, and ending September 2, 1945; such net losses shall be determined by deducting from the aggregate of all payments made in the settlement of such insured losses the aggregate of the net amounts received by any such insurance companies on all policies or contracts of war-risk insurance or reinsurance on ships under which the insured was a national of the United States, after deducting expenses; and

"(d) loss or damage on account of—

"(1) the death of any person who, being then a civilian national of the United States and a passenger on any vessel engaged in commerce on the high seas, died or was killed as a result of military action by Germany or Japan which occurred during the period beginning September 1, 1939, and ending December 11, 1941; awards under this paragraph shall be made only to or for the benefit of the following persons in the order of priority named:

"(A) widow or husband if there is no child or children of the deceased;

"(B) widow or husband and child or children of the deceased, one-half to the widow or husband and the other half to the child or children of the deceased in equal shares;

"(C) child or children of the deceased (in equal shares) if there is no widow or husband; and

"(D) parents of the deceased (in equal shares) if there is no widow, husband, or child;

"(2) injury or permanent disability sustained by any person, who being then a civilian national of the United States and a passenger on any vessel engaged in commerce on the high seas, was injured or permanently disabled as a result of military action by Germany or Japan which occurred during the period beginning September 1, 1939, and ending December 11, 1941; awards under this paragraph shall be payable solely to the person so injured or disabled.

"(3) the loss or destruction, as a result of such action, of property on such vessel, as determined by the Commission to be reasonable, useful, necessary, or proper under the circumstances, which property was owned by any civilian national of the United States who was then a passenger on such vessel; and in the case of the death of any person suffering such loss, awards under this paragraph shall be made only to or for the benefit of the persons designated in paragraph (1) of this subsection and in the order of priority named therein.

"Transfers and assignments

"SEC. 203. The transfer or assignment for value of any property forming the subject matter of a claim under subsection (a) or (b) of section 202 subsequent to its damage, loss, or destruction shall not operate to extinguish any claim of the transferor otherwise compensable under either of such subsections. If a claim which could otherwise be allowed under subsection (a) or (b) of section 202 has been assigned for value prior to the enactment of this title, the assignee shall be the party entitled to claim thereunder.

"Nationality of claimants

"Sec. 204. No claim shall be allowed under subsection (a), (b), or (c) of section 202 of this title unless the property upon which it is based was owned by a national or nationals of the United States on the date of loss, damage, or destruction and unless the claim was owned by a national or nationals of the United States continuously thereafter until the date of filing with the Commission pursuant to this title. Where any person who lost United States citizenship solely by reason of marriage to a citizen or subject of a foreign country reacquired such citizenship before the date of enactment of this title, then if such individual, but for such marriage would have been a national of the United States at all times on and after the date of such loss, damage, or destruction until the filing of the claim, such individual shall be treated for all purposes of this title as having been a national of the United States at all such times.

"Claims of stockholders

"Sec. 205. (a) A claim under section 202 of this title based upon an ownership interest in any corporation, association, or other entity which is a national of the United States shall be denied.

"(b) A claim under section 202 of this title, based upon a direct ownership interest in a corporation, association, or other entity which suffered a loss within the meaning of said section, shall be allowed, subject to other provisions of this title, if such corporation, association, or other entity on the date of the loss was not a national of the United States, without regard to the per centum of ownership vested in the claimant in any such claim.

"(c) A claim under section 202 of this title, based upon an indirect ownership interest in a corporation, association, or other entity which suffered a loss within the meaning of said section, shall be allowed, subject to other provisions of this title, only if at least 25 per centum of the entire ownership interest thereof at the time of such loss was vested in nationals of the United States.

"(d) Any award on a claim under subsection (b) or (c) of this section shall be calculated on the basis of the total loss suffered by such corporation, association, or other entity, and shall bear the same proportion to such loss as the ownership interest of the claimant bears to the entire ownership interest thereof.

"Deductions in making awards

"Sec. 206. (a) In determining the amount of any award there shall be deducted all amounts the claimant has received on account of the same loss or losses with respect to which an award is made under this title.

"(b) Each claim in excess of $10,000 filed under this title by a corporation shall include a statement under oath disclosing the aggregate amount of Federal tax benefits derived by such corporation in any prior taxable year or years resulting from any deduction or deductions claimed for the loss or losses with respect to which such claim is filed. In determining the amount of any award where the allowable loss exceeds $10,000 there shall be deducted an amount equal to the aggregate amount of Federal tax benefits so derived by the claimant. For the purposes of this subsection, such Federal tax benefits shall be the aggregate of the amounts by which the claimant's taxes for such year or years under chapters 1, 2A, 2B, 2D, and 2E of the Internal Revenue Code of 1939, or subtitle A of the Internal Revenue Code of 1954 were decreased with respect to such loss or losses. Any payments made on an award reduced by reason of this subsection shall be exempt from Federal income taxes.

"Consolidated awards

"Sec. 207. With respect to any claim which, at the time of the award, is vested in persons other than the person by whom the loss was sustained, the Commission may issue a consolidated award in favor of all claimants then entitled thereto, which award shall indicate the respective interests of such claimant therein; and all such claimants shall participate, in proportion to their indicated interests, in the payments authorized by this title in all respects as if the award had been in favor of a single person.

"Certain awards prohibited

"Sec. 208. No award shall be made under this title to or for the benefit of (1) any person who has been convicted of a violation of any provision of chapter 115, title 18 of the United States Code, or of any other crime involving disloyalty to the United States, or (2) any claimant whose claim under this title is within the scope of title III of the International Claims Settlement Act of 1949, as amended (69 Stat. 570), except any claimant whose award under section 303 (1) of title III of the International Claims Settlement Act of 1949, as amended, is recertified pursuant to subsection (b) of section 209 of this title.

"Certification of awards

"Sec. 209. (a) The Commission shall certify to the Secretary of the Treasury, in terms of United States currency, for payment out of the War Claims Fund each award made pursuant to section 202.

"(b) The Commission shall recertify to the Secretary of the Treasury, in terms of United States currency, for payment out of the War Claims Fund, awards heretofore made with respect to claims against the Government of Hungary under section 303(1) of title III of the International Claims Settlement Act of 1949, as amended. Nothing contained in this subsection shall be construed as authorizing the filing of new claims against Hungary.

"Claim filing period

"Sec. 210. Within sixty days after the enactment of this title or of legislation making appropriations to the Commission for payment of administrative expenses incurred in carrying out its functions under this title, whichever date is later, the Commission shall give public notice by publication in the Federal Register of the time when, and the limit of time within which claims may be filed, which limit shall not be more than eighteen months after such publication.

"Claims settlement period

"Sec. 211. The Commission shall complete its affairs in connection with the settlement of claims pursuant to this title not later than four years following the enactment of legislation making appropriations to the Commission for payment of administrative expenses incurred in carrying out its functions under this title.

"Notification to claimants

"Sec. 212. Each award or denial of a claim by the Commission, whether rendered before or after a hearing, shall include a specific statement of the facts and of the reasoning of the Commission in support of its conclusion.

"Payment of awards; priorities; limitations

"Sec. 213. (a) The Secretary of the Treasury shall pay out of the War Claims Fund on account of awards certified by the Commission pursuant to this title as follows and in the following order of priority:

"(1) Payment in full of awards made pursuant to section 202(d) (1) and (2).

"(2) Thereafter, payments from time to time on account of the other awards made pursuant to section 202 in an amount which shall be the same for each award or in the amount of the award, whichever is less. The total payment made pursuant to this paragraph on account of any award shall not exceed $10,000.

"(3) Thereafter, payments from time to time on account of the unpaid balance of each remaining award made pursuant to section 202 or recertified pursuant to subsection (b) of section 209 which shall bear to such unpaid balance the same proportion as the total amount in the War Claims Fund and available for distribution at the time such payments are made bears to the aggregate unpaid balances of all such awards. No payment made pursuant to this paragraph on account of any award shall exceed the unpaid balance of such award. Payments heretofore made under section 310 of title III of the International Claims Settlement Act of 1949, as amended, on awards made against the Government of Hungary under section 303(1) of title III of the International Claims Settlement Act of 1949, as amended, and recertified under subsection (b) of section 209, shall be considered as payments under this paragraph and no payment shall be made on any recertified award until the percentage of distribution on awards made under section 202 exceeds the corresponding percentage of distribution on such recertified award: *Provided,* That no payment made on awards recertified under subsection (b) of section 209 shall exceed 40 per centum of the amount of the award recertified.

"(b) Such payments, and applications for such payments, shall be made in accordance with such regulations as the Secretary of the Treasury shall prescribe.

"(c) For the purpose of making any such payments, other than under section 213(a) (1), an 'award' shall be deemed to mean the aggregate of all awards certified for payment in favor of the same claimant.

"(d) If any person to whom any payment is to be made pursuant to this title is deceased or is under a legal disability, payment shall be made to his legal representative, except that if any payment to be made is not over $1,000 and there is no qualified executor or administrator, payment may be made to the person or persons found by the Comptroller General to be entitled thereto, without the necessity of compliance with the requirements of law with respect to the administration of estates.

"(e) Payment on account of any award pursuant to this title shall not, unless such payment is for the full amount of the award, extinguish any rights against any foreign government for the unpaid balance of the award.

"(f) Payments made under this section on account of any award for loss, damage, or destruction occurring in the Commonwealth of the Philippines shall not exceed the amount paid on account of awards in the same amount under the Philippine Rehabilitation Act of 1946.

"Fees of attorneys and agents

"Sec. 214. No remuneration on account of services rendered on behalf of any claimant in connection with any claim filed with the Commission under this title shall exceed 10 per centum (or such lesser per centum as may be fixed by the Commission with respect to any class of claims) of the total amount paid pursuant to any award certified under the provisions of this title on account of such claim. Any agreement to the contrary shall be unlawful and void. Whoever, in the United States or elsewhere, demands or receives, on account of services so rendered, any remuneration in excess of the maximum permitted by this section shall be guilty of a misdemeanor and, upon conviction thereof, shall be fined not more than $5,000 or imprisoned not more than twelve months, or both.

"Application of other laws

"Sec. 215. To the extent they are not inconsistent with the provisions of this title, the following provisions of title I of this Act and title I of the International Claims Settlement Act of 1949, as amended, shall apply to this title: The first sentence of subsection (b) of section 2, all of subsection (c) of section 2 and section 11 of title I of this Act, and subsections (c), (d), (e), and (f) of section 7 of the International Claims Settlement Act of 1949, as amended.

"Transfer of records

"Sec. 216. The Secretary of State is authorized and directed to transfer or otherwise make available to the Commission such records and documents relating to claims authorized by this title as may be required by the Commission in carrying out its functions under this title.

"Administrative expenses

"Sec. 217. There are hereby authorized to be appropriated out of any moneys in the Treasury not otherwise appropriated such sums as may be necessary to enable the Commission and the Treasury Department to pay their administrative expenses in carrying out their respective functions under this title."

Sec. 4. (a) Section 2 of the War Claims Act of 1948, as amended, is amended by adding at the end thereof the following:

"(d) The term of office of members of the Foreign Claims Settlement Commission holding office on the date of enactment of this subsection shall expire at the end of the one-year period which begins on such date, but during such one-year period each such member shall continue to hold office at the pleasure of the President. The President shall thereafter appoint, by and with the advice and consent of the Senate, three members of the Commission. The term of office of each member of the Commission shall be three years, except that of the members first appointed after the end of the one-year period which begins on the date of enactment of this subsection, one shall be appointed for a term of three years, one for a term of two years, and one for a term of one year."

(b) Nothing in this section shall be construed to preclude the reappointment as a member of the Foreign Claims Settlement Commission of any person holding office as a member of such Commission on the date of enactment of this Act.

Sec. 5. Section 39 of the Trading With the Enemy Act is amended by adding at the end thereof the following new subsection:

"(d) The Attorney General is authorized and directed to cover into the Treasury from time to time for deposit in the War Claims Fund such sums from property vested in him or transferred to him under this Act as he shall determine in his discretion not to be required to fulfill obligations imposed under this Act or any other provision of law, and not to be the subject matter of any judicial action or proceeding. There shall be deducted from each such deposit 5 per centum thereof for expenses incurred by the Foreign Claims Settlement Commission and by the Treasury Department in the administration of title II of the War Claims Act of 1948. Such deductions shall be made before any payment is made pursuant to such title. All amounts so deducted shall be covered into the Treasury to the credit of miscellaneous receipts."

Sec. 6. If any provision of this Act, or the application thereof to any person or circumstances, shall be held invalid, the remainder of this Act, or the application of such provisions to other persons or circumstances, shall not be affected.

Mr. HARRIS (interrupting the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with, and that it be open to amendment at any place.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. SCHENCK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Schenck: On page 18, line 13, strike out "or the District of Columbia" and insert in lieu thereof the following: ", the Commonwealth of Puerto Rico, the District of Columbia, or any possession of the United States".

Mr. SCHENCK. Mr. Chairman, I have discussed this amendment with the chairman of the committee, and I understood the chairman of the committee was agreeable to the amendment.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. SCHENCK. I yield.

Mr. HARRIS. Mr. Chairman, I had occasion to observe the amendment offered by the gentleman from Ohio and the privilege of discussing it with him. I understand this is the amendment suggested by the Resident Commissioner from Puerto Rico. It seems to me to be in line with the general purposes of the bill and although I am not authorized to speak on behalf of the full committee, we have discussed it among ourselves, and as far as we are concerned we have no objection to the amendment.

Mr. SCHENCK. Mr. Chairman, I ask unanimous consent that the gentleman from Puerto Rico [Mr. Fernós-Isern] may extend his remarks at this point in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FERNÓS-ISERN. Mr. Chairman, in studying H.R. 7283, as reported, I became aware that the present language of the bill would not authorize valid claims by a corporation, partnership, unincorporated body or other entity organized under the laws of the Commonwealth of Puerto Rico, or for that matter, organized under the laws of the Virgin Islands, of Guam or of Samoa. The reason is that the bill requires that corporations, partnerships, unincorporated bodies or other entities making claims under the provisions of the bill, be organized under the laws of the United States or of a State or the District of Columbia in addition to filling certain other requirements. Such business entities in Puerto Rico are not organized under the laws of the United States, or of any State, or the District of Columbia, and would therefore be excluded.

My assistant called this to the attention of Mr. Andrew McGuire, of the Foreign Settlement Claims Commission, who agreed that Puerto Rico, as well as the other offshore areas of the United States had apparently been omitted inadvertently and that if a claim by such entities arose within one of the offshore areas, the Foreign Settlement Claims Commission, under the present language of the bill, would feel it necessary to memorize Congress at that time to include them.

I do not know whether any valid claim will be presented by an individual or a corporation or partnership, or other business entity from Puerto Rico or from one of the possessions of the United States, but I feel that the Congress would want to make provision for all valid claims of such entities under the flag, provided all of the other qualifications were met. Consequently, I should like to propose that H.R. 7283 as reported be amended as follows:

On page 18, line 13, strike out "or the District of Columbia" and insert in lieu thereof the following: ", the Commonwealth of Puerto Rico, the District of Columbia, or any possession of the United States".

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The amendment was agreed to.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, on page 3 of the bill there is reference to the Philippine Rehabilitation Act of 1946, and I believe there are references to this same act in other portions of the bill. My question to the chairman of the committee is this: I understand that the legislation last week by the House involving another $73 million windfall to the Philippines is not yet law. I am wondering, however, what provision, since the bill takes into account the Philippine Rehabilitation Act of 1946, is to be made for this latest addition to war claims payments to the Philippines?

Mr. MACK. Mr. Chairman, I might say to the gentleman from Iowa that any claim under this act would not be payable to citizens who have been reimbursed for losses by reason of the other act; also, this bill would cover those individuals, those American citizens, who own property in the Philippines, but because of the fact they did not rebuild their property following World War II they were not entitled to benefits under the Philippine Rehabilitation Act. They are covered under this bill.

Mr. GROSS. I understand that, but the reference in the bill is, at least to some extent, in the nature of an exclusion, to the Philippine Rehabilitation Act of 1946. Now comes the other $73 million payment of a few days ago. Is there any necessity for taking cognizance of this latest payout to the Philippines at this time or should some provision be written in the bill by the other body or in conference?

Mr. MACK. I do not believe any other provision is necessary. Under the provisions of this bill there will be no duplication of claims.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Arkansas.

Mr. HARRIS. The gentleman from Illinois is correct, there would be no duplication. As I understand the bill that was passed last week was to take care of or pay claims which have already been proven and there is no fund available to take care of them. This is to take care of such claims that have not been approved, and consequently they are two separate categories altogether.

Mr. GROSS. I thank the gentleman for his explanation. I would like to ask the gentleman another question. How much is in the war claims fund as of today?

Mr. HARRIS. Approximately $100 million.

Mr. GROSS. How much would you anticipate there will be in the fund on the basis of the property being disposed of?

Mr. HARRIS. We have had various estimates, but the best estimate that we think we could give the gentleman is probably around $250 million.

Mr. GROSS. A total of $250 million or $300 million? Which is it?

Mr. HARRIS. Two hundred and fifty million dollars.

Mr. GROSS. Two hundred and fifty million dollars?

Mr. HARRIS. That is the best estimate we have. There is a bill following this one to provide for the sale of General Analine. It would depend on what we could get in the sale of that property.

Mr. GROSS. Would that be in addition to the $250 million?

Mr. HARRIS. No; that is part of the $250 million.

Mr. GROSS. That is included in the $250 million?

Mr. HARRIS. Yes.

Mr. GROSS. Someone has talked today in terms of $500 million as the total payout under this bill. Is it $500 million or $600 million and where is it proposed to get the difference between $500 million in payouts and the estimated $250 million as previously stated?

Mr. HARRIS. That was the original estimate. When we seized these funds during the war it was thought, as I indicated earlier today, there would be something over $500 million from German assets and something above $50 million from Japanese assets. That was the original estimate of the funds seized during the early part of the war.

Mr. GROSS. Is it the intention of anyone on the committee or anyone interested in this matter to eventually go to the Federal Treasury to pay any difference between the claims that will be submitted and the amount in the fund?

The **CHAIRMAN.** The time of the gentleman from Iowa has expired.

(By unanimous consent, at the request of Mr. GROSS, he was allowed to proceed for 2 additional minutes.)

Mr. HARRIS. Let me say to the gentleman that has been a question before the Congress and our committee for years. I refer to the discussion with the gentleman from Texas [Mr. BECKWORTH earlier today, and I refer to our distinguished colleague, the late Carl Hinshaw, back in 1940 that was an issue. Throughout the years, up until now, and including this moment, our committee has been overwhelmingly opposed to giving any authorization that would require payment out of the Treasury of the United States. In other words, the position of the committee has been that no claims can be paid except out of this fund.

Mr. GROSS. We foreswore any reparations from Germany?

Mr. HARRIS. Yes.

Mr. GROSS. I guess we were the only nation that foreswore war reparations so far as Germany is concerned?

Mr. HARRIS. I do not believe that is true.

Mr. GROSS. What other country did?

Mr. HARRIS. I think the other Allies at that time.

Mr. GROSS. Did the British collect reparations from the Germans?

Mr. HARRIS. They were a part of the agreement, yes.

Mr. GROSS. Did they collect reparations?

Mr. MACK. No.

Mr. GROSS. Did the French collect any reparations?

Mr. MACK. They did not.

Mr. GROSS. They did not?

Mr. MACK. They joined with us in foregoing reparations.

Mr. GROSS. The Russians collected reparations, did they not?

Mr. MACK. That I am unable to answer.

Mr. HARRIS. If the gentleman will yield further, I might say that the information we have is they did of a kind, and that is property which they took themselves.

Mr. GROSS. So, it is the feeling of the committee, and has been, that it will not recommend going to the U.S. Treasury to make up any differential?

Mr. HARRIS. The committee has consistently refused to adopt that principle.

Mr. GROSS. I hope the committee will continue to hold to that line of thinking.

Mr. HARRIS. I would like to say to the gentleman from Iowa that I shall do so.

Mr. MACK. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Illinois.

Mr. MACK. This is not a new proposal. This has been with us for several years. Our committee has made an excellent record with regard to this matter. The last administration proposed that $10 million be deposited into the War Claims Fund for the payment of Japanese claims. We, I think unanimously or almost unanimously, opposed that. We have been opposed to direct appropriations for this purpose all the time during which I have served as chairman of this particular subcommittee.

Mr. BOW. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. BOW: On page 32, line 6, after the word "necessary", insert "(but not to exceed the total covered into the Treasury to the credit of miscellaneous receipts under section 39 subsection (d) of the Trading with the Enemy Act)".

Mr. BOW. Mr. Chairman, this is the matter about which I spoke earlier in the general debate. Under the Trading With the Enemy Act and under the Alien Property Provision there was in the law a provision that "there is hereby authorized to be appropriated out of any money of the war claims fund such sums as may be necessary to enable the Commission to carry out its functions under this act."

Mr. Chairman, actually, with that language the Committee on Appropriations has always appropriated the administrative funds from the fund in the Treasury belonging to the Alien Property Division. Under the bill as it is now before us, under section 217 on page 32, there is a provision which would authorize appropriations to be made from the funds of the Treasury. The bill, however, on page 33, under section 5, has a provision requiring the Attorney General to deposit into miscellaneous receipts up to 5 percent of the deposits made from these funds. That 5 percent is supposed to take care of these expenses, as we have done in the past, and we have been so assured by the committee that this 5 percent is to come out of the fund to pay the administrative costs.

Mr. Chairman, my amendment simply makes it very clear that these costs will come from the fund and not from the Treasury. There would be no question about it. This does not involve a dispute with the bill. It is simply in my opinion clarifying the fact that it is the intent of Congress that the fund itself will pay the administrative expenses. These are not small expenses. The appropriations we made this year for the operations of this fund out of the fund amounted to $690,000.

Mr. Chairman, I believe it is proper when we have funds for a particular group of people and money to be paid out of that, that it should come from the fund rather than from the general Treasury. I would urge the Committee to adopt this amendment which is in line with the language of the former act, and there is nothing new to it.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. BOW. I would be delighted to yield to the gentleman from Arkansas.

Mr. HARRIS. I would like to say to the gentleman first that if the gentleman will yield to the gentleman from Illinois [Mr. MACK], for his statement as soon as I have made a brief statement, and after I explain this—I think we can work this out and can no doubt accept the gentleman's amendment.

The Foreign Claims Settlement Commission sent this bill up as an administration proposal. Therefore, they are familiar with this item and acquainted with the provisions of this bill. It was, therefore, intended that not more than 5 percent be allocated for administrative purposes. That was the reason this provision was written into the bill and appears on page 33, of the reported bill.

Now, I think what the gentleman has offered here is merely a clarifying amendment, perhaps, for a tightening up, we might say, if we want to use that term, in order to be sure that the administrative expenses will be held within the 5 percent that is transferred by the Attorney General. That being true, so far as I am concerned, as chairman of the committee, with the explanation which the gentleman from Illinois [Mr. MACK] will give you very briefly, I would be willing to accept the amendment.

Mr. BOW. Mr. Chairman, I thank the gentleman and I yield to the gentleman from Illinois [Mr. Mack].

Mr. MACK. Mr. Chairman, I agree with the statement made by my distinguished chairman. I think that the administrative cost would not exceed the 5 percent of the claims. However, I would like to clarify a statement the gentleman made. The gentleman said that this was a new idea we brought up this year. It is not.

Mr. BOW. It is new to the Alien Property Act.

Mr. MACK. No. This was included in the International Claims Settlement Act of 1949. The title III of this act, which deals with claims against Bulgaria, Hungary, Rumania, and other countries, there is a provision in section 302 which reads:

> The Secretary shall deduct from each claims fund 5 per centum thereof as reimbursement to the Government of the United States for the expenses incurred by the Commission and by the Treasury Department in the administration of this title.

And in section 315 of this title we find the following language:

> There are hereby authorized to be appropriated such sums as may be necessary to enable the Commission and the Treasury Department to pay their administrative expenses incurred in carrying out their functions of this title.

This is almost identical language we find in this bill.

My point is that this is the law today and I am of the opinion that the 5 percent referred to in the International Claims Settlement Act of 1949 was sufficient to pay the administrative expenses. I think also that the 5 percent referred to in this bill will be sufficient to pay these administrative expenses.

Mr. BOW. I think since we have the conflict between the other law to which I have referred which takes the appropriation from the fund itself, it is well to have this amendment to clarify it and keep it within the 5 percent.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. Bow].

The amendment was agreed to.

Mr. COHELAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. Cohelan: Page 18, line 10, strike out "and (3)" and insert in lieu thereof the following:
>
> "(3) for the purposes of section 204 only, a natural person who has filed a declaration of intention to become a citizen of the United States and before the date of enactment of this title became such a citizen, and (4)".
>
> Page 18, line 17, insert immediately after "aliens" the following: ", except as provided in clause (3) of this subsection".

Mr. COHELAN. Mr. Chairman, as I have already pointed out, I strongly endorse this bill. I believe, however, that it should be amended to correct one fundamental weakness—a weakness which would limit claims to those who were nationals of the United States on the date their property was lost or damaged.

Mr. Chairman, there are American citizens today who lost their homes, their property, and their savings in World War II who would not be covered by this bill. There are Americans who fought for the future of their country in that war who would be excluded.

We have never countenanced or accepted a distinction between American citizens based on their date of naturalization. We have never accepted the fact that there are first- and second-class Americans. But this is exactly what the present language in section 204 of this bill would do. It would prevent thousands of men and women who are American citizens today from recovering losses which to them were tangible, significant, and heartbreaking. It would prevent them from participating even though they were living in this country at the time of their loss and had applied for citizenship.

Mr. Chairman, my amendment would correct this gross inequity by permitting all Americans who filed for citizenship and became citizens before enactment of a war claims program to participate in its benefits. It would reject an arbitrary division of our fellow citizens as discriminatory and indefensible, and it would provide appropriate relief to many who are deserving but who would otherwise be neglected.

Mr. Chairman, I urge that this amendment be adopted and that the bill as amended be passed.

Mr. LINDSAY. Mr. Chairman, will the gentleman yield?

Mr. COHELAN. I yield to the gentleman from New York.

Mr. LINDSAY. I want to compliment the gentleman on his amendment. I am for the amendment. I have had a number of constituents come to me on the very inequity about which the gentleman is speaking. I think it is only equitable that this arbitrary cutoff be adjusted. I hope the gentleman's amendment is adopted.

Mr. COHELAN. I thank the gentleman.

Mr. FARBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. COHELAN. I yield to the gentleman from New York.

Mr. FARBSTEIN. I want to join the gentleman in support of his amendment because I think it is merely a matter of common justice that those individuals who are in this country, who are refugees, and who are deprived of their property unjustly, should not at this time be again deprived of that which is their due.

Mr. COHELAN. I thank the gentleman from New York.

Mr. Chairman, I urge the adoption of this amendment.

Mr. WHITENER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I am very much interested in the presentation of our friend from California. At this time may I ask the chairman of the Committee on Interstate and Foreign Commerce something about the provisions of subsection (c) of section 201, particularly subsubsection (2), where a national of the United States is defined in part as "a natural person who, though not a citizen of the United States, owes permanent allegiance to the United States."

Then we go to section 204 and we find language along the same line, where it states:

> Any person who lost U.S. citizenship solely by reason of marriage to a citizen or subject of a foreign country.

Can the gentleman tell us who would fall under this rather broad language, "who, though not a citizen of the United States, owes permanent allegiance to the United States."

Mr. MACK. That would be a very limited category. It would cover any area where people were not citizens at the time but were residing in the territory of the United States.

Mr. WHITENER. The gentleman means that even though they had not applied for citizenship but were merely domiciled in this country that would meet the standard of owing permanent allegiance to the United States?

Mr. MACK. They would not have to be domiciled in this country. As a matter of fact, they probably would have been residing in some other country. The citizens of Guam were nationals until the Guam Organic Act passed. This language is to cover that category of persons.

Mr. WHITENER. Is it to cover any other than this group of individuals mentioned in section 204 and the persons in the situation of the Guam residents?

Mr. MACK. It is not.

Mr. WHITENER. I thank the gentleman.

Mr. YOUNGER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, if you want to kill the effect of this bill, all that is necessary is to accept or to adopt this amendment. Let me give you an example of what happened in a case where we passed a similar bill, I think it was 2 years ago, known as the Czech claims bill. At that time the Alien Property Custodian and the State Department recommended and said that there would be somewhere near about $13 million in claims. The Treasury had at that time $9 million which we secured by the sale of a steel plant which was owned and paid for by the Czech Government. Those claims were to be paid out of that fund from the sale of the steel plant.

Later on, it was discovered by the State Department that the bill was not clearly defined as to whether a claimant should be a citizen at the time of the loss or later on. It was finally determined that a person who became a citizen after the loss was to be included. As a result, claims were filed to the extent of about $123 million, and we discovered that all of the Czechs who escaped from the country when Hitler first moved in, before we were ever at war or before the Second World War had begun and who came to this country and had subsequent to that time acquired citizenship, under the State Department interpretation they were entitled to be included. Now those people were not citizens of the United States at the time of loss. They left their country because of Hitler and they had no intention of ever receiving any award. In one case, the person received property back when the Czech Government was turned back for a short time when Mr. Beneš was in charge. He got the property back and then sold part of his property. In fact, one piece of property was sold to our own Government for some $4 million as an embassy. The balance of the claims filed by this particular claimant amounted to some $15 million. If you are going to open this up to everybody who has acquired citizenship since that time, in my opinion, you are going to have claims that will far exceed anything that we now have money for or we may have money for.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. YOUNGER. I yield to the chairman.

Mr. HARRIS. I want to join the gentleman in expressing strong opposition to this amendment. I have the greatest sympathy for people who were victims of war and suffered from war. If we have any human kindness in our hearts at all, we must have sympathy for them. But, we speak of equity. Let us see where the equity lies. What does Mr. English who testified before our committee say? Mr. English was the assistant legal adviser for international claims in the Department of State. He is testifying to the facts. His testimony before our committee is as follows:

> If there are not sufficient funds in this fund to pay people who have valid international claims—

And I spoke about the international agreement earlier today—

> then we submit to permit individuals who were not nationals at the time their claims arose to share in the fund which is inadequate to pay the claims of individuals who were nationals when their claim arose is, in effect, to take away funds from a latter group of claimants who have valid claims and give it to people who do not have valid international claims.

Mr. Chairman, it is just that simple. Now, if we are going to give in to the claims of so many people over the years——

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent (at the request of Mr. HARRIS) Mr. YOUNGER was given permission to proceed for 2 additional minutes.)

Mr. HARRIS. I submit to you that it is a matter of equity and justice to our own people as much sympathy as we have, as much kindness as we have in our hearts for people who would like to get into this fund, and as I said earlier, that has been the trouble during the 16 years, so many people want a cut in the funds—to adopt these amendments the limitation—if the gentleman will permit a further trespass on his time—the limitation that we are placing on individual claims or people who are entitled to perhaps a certain amount we are saying here that the funds cannot take care of them and you have got to be limited to a certain amount. It just is not right, in my judgment, to go back and take in somebody else who was not a part of it at that time and say we are going to cut you in on it. If you want to open up the Treasury, as the gentleman from Ohio and the gentleman from Iowa said earlier, if you want to open up the Treasury you may do so if you adopt this amendment.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. YOUNGER. I yield.

Mr. COHELAN. I am aware of what our distinguished chairman has pointed out; we want to limit this sort of thing, but the fact of the matter is that many more of the same class of claims are eligible and are going to make valid claims against this fund. All my amendment proposes to do is to try to include a small group, a relatively small group who would otherwise be qualified. Obviously if we are going to compound the problem in respect to the size of the fund——

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. COHELAN. Mr. Chairman, I ask unanimous consent that the gentleman from California [Mr. YOUNGER] may proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. COHELAN. The point I am making is that I obviously tried to limit this amendment and keep it confined to a small group who have a just and equitable claim. There are many cases of legitimate claims similar to the one I described on the floor in general debate.

But there is still another question that disturbs me in connection with this matter. I tried to find out how many people would be eligible—if my amendment were adopted—how many people would be involved. Although unfortunately I have not been able to get any information from the committee I think this can be reasonably estimated. The rough estimate I come up with is something in the neighborhood of 2,200 claimants. It could be much less. As to the size of their claims I have no way of knowing. While it seems to me that this class of claimant should be included, in any case, we should base our action on fairly accurate data.

Mr. YOUNGER. Mr. Chairman, my answer to my colleague from California is that this is the same proposition we had in the Czech claims bill. They estimated there would be $13 million of claims filed but it turned out that over $113 million of claims were filed. If this amendment is adopted the gentleman will find the same thing will happen in this situation.

We had this matter under discussion in the committee and it was unanimously turned down by the committee with the exception of the man who proposed the amendment. This problem has received full consideration by the committee. We have settled it, and "no" is our opinion.

Mr. COHELAN. May I suggest that in this case it is just a relatively small group?

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. MACK. Mr. Chairman, I rise in opposition to the amendment.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. MACK. I yield to my distinguished chairman.

Mr. HARRIS. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MACK. I would like to speak briefly in opposition to the amendment offered by my good friend, the gentleman from California. I know the amendment was offered in good faith. I know of the particular cases which he has referred to and which he would like to have included in this bill.

Mr. Chairman, this is not a new problem. It has been with us now for about 5 years. My friend has suggested that we take care of 2,000 claimants that he has. If those 2,000 claimants have claims only up to $10,000, that is a total of $20 million. If you include this additional category and spend the money for this purpose, you will have that much less money left in the fund to pay our own citizens.

I believe that we ought to deal with our own citizens first. Then if there are any other categories to deal with, we can have special legislation at a later date to take care of them.

I am opposed to this amendment for another reason. It violates international law. International law in principle has continuously recognized nationality at the time of the loss. Our agencies and the Congress itself have recognized nationality at the time of the loss.

Title 4 of the International Claims Settlement Act, which was passed in 1958, so recognized this. I maintain that we would be doing a great injustice to the American claimants if we, at this time, include all of these other categories.

I should like to refer to one other problem that would arise under the gentleman's amendment. As I understand it, and I am sure I understand it correctly, a person residing in England who had been reimbursed by England for a loss in Germany could have come over here during the 1950's, become a citizen of this country, and file a claim for the identical loss under this proposal. I am opposed to that provision as well.

Mr. Chairman, if we include this amendment, we will be defeating the entire purpose of the bill. I say we have waited too long. We have waited 17 years to reimburse our citizens for losses during World War II, and I believe we ought to proceed with this problem. If we have additional problems at a later date, I am sure the Committee on Interstate and Foreign Commerce will deal with them at the proper time.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. MACK. I yield to the gentleman from Arkansas.

Mr. HARRIS. Mr. Chairman, at this time I want to compliment the distinguished gentleman from Illinois for the tremendous job he has done on this very difficult subject. Not only in this Congress has he given a lot of attention to it but in preceding Congresses he has conducted thorough hearings with other members of the committee. He has gone into the equity of these claims and contentions, and they are innumerable. It deals with the question of the return of property, as the gentleman has stated, which is becoming more of a complicated problem. The gentleman has done an excellent job and I want to thank him and commend him for it.

Mr. MACK. I thank the gentleman. May I say that every year that we have had this bill before us we have some problem that is a stumbling block to keep us from proceeding to pay our American claimants. We should pass this bill. It has been prepared by our subcommittee and full committee to take care of our American claimants who were citizens at the time of the loss.

I maintain that we ought to pass this bill. It has been approved by our subcommittee and our full committee to take care of our American claimants who were citizens at the time of the loss. I am sure that the distinguished chairman of the Committee on Interstate and Foreign Commerce would give careful study to any other suggestions.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. MACK. I yield to the gentleman from California.

Mr. COHELAN. I, too, would like to take this opportunity to compliment the distinguished chairman of the subcommittee. I am sure the gentleman knows my admiration for him. However, I feel in connection with my amendment and the subject about which we are talking; that is, Americans and classes of claimant Americans, it is pretty hard to make these distinctions. As the gentleman so well knows, there are many naturalized claimants who will qualify and be compensated under this bill.

The CHAIRMAN. Under the unanimous-consent agreement the gentleman from New York [Mr. Farbstein] is recognized for 2½ minutes.

Mr. FARBSTEIN. Mr. Chairman, I do not think I will take the full 2½ minutes. There is just one point I want to make. In the definition of American citizens sometimes you are restricted. However, it should be remembered that people with their first papers were drafted into the Army and fought on behalf of the United States, and perhaps gave up their lives. These people are going to be deprived of the right, or their families or their heirs are going to be deprived of the right, to recover under any claims that may have existed without this amendment.

Mr. Chairman, I would like to see the bill pass. Here is a grave injustice that is going to be perpetrated upon those who sustained losses and some who may have lost their lives. They will be deprived of the right to any compensation because of confiscation, under the bill as presented here.

For that reason it appears to me that the amendment should prevail.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Iowa [Mr. Gross] is recognized for 2½ minutes.

Mr. GROSS. Mr. Chairman, in the previous colloquy with the gentleman from Illinois [Mr. Mack] and the gentleman from Arkansas [Mr. Harris], I got the impression that there will be a $150 million deficiency as between the known assets and the payouts—$250 million of known assets and an estimated $500 million of payouts.

Am I correct or incorrect in that impression?

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from Arkansas.

Mr. HARRIS. I would say to the gentleman that the gentleman would be incorrect. If I left such an impression it was all my fault. We talked about the estimate that we had in the fund during the war and following the war, which was in the neighborhood of some $600 million. Now, by action of the Congress, we have paid out of that fund several hundred millions of dollars for claims, such as prisoner of war claims, and so forth. I intended to convey to the gentleman from Iowa [Mr. Gross] that we have in liquid assets here an estimated $100 million, and it is estimated that an additional $150 million will be available for the fund, or an estimated total of $250 million. We cannot pay any more claims than what we have out of this fund to pay with.

Mr. GROSS. But the gentleman is estimating, is he not, a payout of around $500 million?

Mr. HARRIS. No, sir.

Mr. GROSS. No?

Mr. HARRIS. No; an additional payout of $150 million, approximately, is what it turns out to be.

Mr. GROSS. I am glad to have that explanation, because I could not understand from what source the money to pay would be available to make up a deficiency of $150 million.

Mr. HARRIS. That is right. It gets back to the other question which the gentleman raised. If it is, it will have to be paid out of the Treasury, and a lot of people say we ought to do it. But I have never come to that viewpoint myself.

Mr. GROSS. I am opposed to the pending amendment for the reason I think it would impose additional burdens that might cause another one of these $73 million Philippine payout bills to be enacted by the House. To this I would be very much opposed. I would hope that the gentleman from Arkansas would be very much opposed to it.

Mr. HARRIS. I am very much opposed to it.

Mr. GROSS. Mr. Chairman, I have a great deal of confidence in the members of the House Committee on Interstate and Foreign Commerce, but as with all other Members of the House they are elected every 2 years. I appreciate the assurances that have been given by the present members of the committee that payment of these war claims will not eventually become an obligation of the U.S. Treasury and the taxpayers who were once called upon to finance the most expensive war in history. I know, too, that no act of this Congress is completely binding upon a subsequent Congress.

Moreover, I would point out that there is no bill of particulars with respect to the claims that will be made. It seems to me that this is the time to put before Congress a list of the claims that are held to be valid as well as a clear statement of the funds available and only then confront Congress with a bill of this nature.

This is legislating altogether too much in the dark. It is because of this and the feeling that I have that in the not distant future there will be a demand on the U.S. Treasury for money to pay unsatisfied claims that will cause me to vote against this bill. I want to make it clear that I would vote for a bill which set forth clearly the valid claims, the payouts, and the amount of funds available, as well as a strict prohibition against any recourse to general funds of the Treasury.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from California [Mr. Cohelan].

The amendment was rejected.

Mr. RYAN of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Ryan of New York: On page 23, strike out line 14 and all that follows down through line 5 on page 24, and insert in lieu thereof the following:

"Sec. 204. No claim shall be allowed under subsection (a), (b), or (c) of section 202 of this title unless the claim is owned by a person (other than a former member of the armed forces of the enemy of the United States during World War II) who is a national or nationals of the United States on the date of enactment of this title."

Mr. RYAN of New York. Mr. Chairman, this amendment is designed to cure substantially the same defect which the previous amendment, offered by the gentleman from California [Mr. Cohelan], was designed to cure. It would provide, as I outlined during the general debate, that claims could be and should be recognized from those who are citizens at the date of the enactment except—and I think this is an important exception—it would not recognize the claim of any person who was a member of the armed forces of the enemy during World War II.

Under H.R. 7283 as presently drafted, those persons who suffered losses at the hands of Nazi Germany and Japan but were not citizens at the time of the loss cannot make any claim. The effect of this would be a declaration by the Congress that the U.S. Government has a greater obligation to those citizens who achieved citizenship earlier than their fellow citizens. This concept is alien to our basic philosophy, tradition, and American jurisprudence. With the single exception of eligibility for the Presidency, all citizens, no matter when they achieved citizenship, are entitled to equal treatment. The present bill in reality creates two classes of citizenship which, I am sure we all agree, is inconsistent with our democratic ideals.

To justify this distinction among citizens, it is said that an international law doctrine applies which holds that claimants must have been citizens at the time they lost their property. If this doctrine is applied, many naturalized Americans with otherwise valid claims for damages would be excluded from compensation. Such a procedure would be doubly unjust because this is not an international matter. No foreign power is being sued or appealed to, and none is any longer involved. The assets are vested in our Government and have been for 16 years. The disposition of the assets is a matter of U.S. domestic policy, not an international question. If this doctrine is applied, the result will be domestic legislation which actually discriminates against certain citizens merely because of the date of their naturalization. This distinction is antithetical to established legislative policy with regard to domestic matters. Besides, if such a distinction were recognized, claimants naturalized after World War II would be deprived of any remedy. Foreign powers cannot be expected to repay American citizens for losses because of their former nationalities. It is absurd to contemplate a claim of this sort against countries which are now under Communist control.

It is unjust to create two classes of citizens, and it violates our fundamental insistence upon the equality of all citizens before the law. Under my amendment compensation must be extended to all valid war claims by anyone who is an American citizen at the time when the bill is enacted, except that my amendment specifically excludes as a claimant any person who was a member of the armed forces of the enemy during World War II.

Mr. Chairman, I cannot stress the need for this legislation too strongly. But I also believe that compensation should be made in accordance with constitutional principle and legislative tradition, so that equality of citizenship in this country is maintained.

Mr. HARRIS. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close in 5 minutes, one-half of that time to be used by the gentleman from Illinois [Mr. Pucinski], and one-half by myself.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. Pucinski].

Mr. PUCINSKI. Mr. Chairman, I rise to congratulate my colleague from Illinois, Congressman Mack, for the splendid job he did in presenting this legislation to us today. I think the debate this afternoon has demonstrated what a thoroughly complicated subject this is. I think Congressman Harris, chairman of the full committee, Congressman Mack, chairman of the subcommittee, and the entire committee certainly have given us a bill that is worthy of our support because it will help to pay these many Americans who have been waiting too many long years for their compensation.

I could not help, however, express a desire that the other body may include an amendment to this bill which would provide some form of reparations to allied soldiers who fought on our side throughout World War II and are now American citizens. These people fought gallantly in the cause of freedom; they saved the lives of countless American soldiers; they provided a stubborn resistance to our enemies. After the war, these great heroes could not return to their native countries overrun by the Communists. Such an amendment was presented to the House committee. The committee, in its wisdom, decided to reject this amendment, for reasons known best to the committee. I disagree with the committee in this decision, even though I shall support this bill. I believe the debate today demonstrates what strange paradoxes occurred after World War II. The bill before us would pay reparations only to those people who were American citizens at the time the losses occurred. It would deny payment for losses to those who were our allies, suffered losses, were not citizens at the time they suffered the losses but are American citizens today. I am afraid such a concept creates a double standard of citizenship in America. It would appear to me that the citizenship status of these people at the time they suffered their losses—as long as they were fighting for our cause—is not important if they are American citizens now.

We have very strict immigration laws, and properly so. But I am under the impression that once a person becomes a citizen of the United States, whether by natural birth or by naturalization, he is a full-status American. I keep hearing references in this debate to "our citizens." But are not those Americans who have became citizens through naturalization also "our citizens"? They are all Americans, sworn to preserve and uphold the Constitution. This Nation was built by immigrants who came here from all over the world in search of freedom and dignity, going all the way back to the Mayflower or the Jamestown Colony. I will be happy to yield to anyone who wants to answer this, because I am under the impression we are all Americans once we become accepted by this country as citizens.

Mr. YOUNGER. If the gentleman will yield, we are talking about citizens at the time of the loss. Were the individuals about whom the gentleman is speaking able to vote at the time the loss was taken?

Mr. PUCINSKI. What is the difference? They are American citizens now. This country has accepted them as fully qualified citizens. Certainly they vote now, as do any other citizens. To accept the committee's theory, the only way these people could now recover compensation for any losses they may have suffered while they were helping us fight a common enemy, is for these people to renounce their American citizenship, go back to their native country and seek redress through that country. But what about these people who have subsequently become naturalized American citizens because they could not return to their homeland after the war because their native lands were overrun by the Communists? Are we saying these people must submit to Communist rule to seek redress? I am sure this is not what we intend. Yet, under this law in its present form, we say that even though they are Americans now, they cannot benefit from the legislation because they were not citizens then. It just does not seem fair to me to impose this type of a double standard on American citizens.

There is no American tax money involved here. These are all frozen assets. I think all American citizens who have suffered losses should be permitted to share in the compensation.

The CHAIRMAN. The Chair recognizes the gentleman from Arkansas [Mr. Harris].

Mr. HARRIS. Mr. Chairman, I hope the committee will disapprove this amendment. The committee did not accept the amendment offered by the gentleman from California. This one broadens it much more than that one would have. Obviously our distinguished colleague from Illinois [Mr. Pucinski], who has just spoken to you, has missed the point completely as to what we are doing here with this legislation. We are talking about our own people. He is talking about any and everybody that might come to this country since then, regardless of any international agreement and what country he might have owed allegiance at the time. He would accept them, if they could not get relief over there. Maybe such a person got it over there, and then he comes here and obtains it again. How ridiculous can we get? As I said before, I have sympathy for people in need and who have lost their property, but how far can we go as citizens of the United States in trying to spread this out all over the world and take in everybody? I think the amendment ought to be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr Ryan].

The amendment was rejected.

Mr. RYAN of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Ryan of New York: On page 23, line 20, immediately after the period, insert the following new sentence: "Notwithstanding the preceding sentence, the claim of an individual under subsection (a) of section 202 may be allowed if such individual had been lawfully admitted to the United States for permanent residence and was a resident of the United States at the time the loss, damage, or destruction of the property on which the claim is based occurred, if the claim was owned by such individual continuously thereafter until the date of filing with the Commission pursuant to this title, and if such individual is a citizen of the United States on such date of filing."

Mr. RYAN of New York. Mr. Chairman, during the debate on the last two amendments we discussed two amendments which, as the distinguished chairman of the committee and the distinguished chairman of the subcommittee pointed out, were broad in scope. Now I am offering an amendment which is more limited in application and, yet, will right a basic injustice. This amendment would permit a person to file a claim, if he was, in fact, admitted as a permanent resident at the time of the loss. In other words, it would cover those individuals who fled from the Nazi tyranny and who came to our shores in 1938 and 1939, for example, and who began the process of becoming citizens—which is a long process, and during that time they lost property in Nazi Germany. They are not covered in the bill we have before us. Perhaps the distinguished chairman of the subcommittee would be willing to accept this amendment. It is limited in its application and is not as broad as the previous amendments. Yet, it does cover this particular category of American citizens who were permanent residents at the time of the loss and who will not be compensated under this bill. I urge that all members of the committee support this amendment in order to provide a measure of justice for those who suffered at the hands of Nazi and Japanese enemies.

Mr. Chairman, I urge the adoption of this amendment.

Mr. MACK. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to state again, I have a great deal of sympathy for the amendments that have been proposed this afternoon by my colleague, the gentleman from New York, and my colleague, the gentleman from California. I find myself in the position of opposing these amendments because I feel our primary obligation is to take care of the claims of those individuals who were citizens at the time of the loss. I must concede that this amendment does narrow the field, but I feel we must stand with our international law and with the previous declarations made by this Congress and we must require that they be citizens at the time of the loss. Therefore, I oppose this amendment and hope it will be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. Ryan].

The amendment was rejected.

Mr. O'HARA of Illinois. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have asked for this time that I might become enlightened. I might say that for many years, when I have been in doubt, I have gone for counsel to the gentleman from Illinois [Mr. Mack], whom I regard as one of the ablest Members of this body. He comes from the district once represented by Abraham Lincoln, in fact, was sworn in as the Congressman from that district just 100 years after the swearing in of the Great Emancipator.

Section 202 refers to the claims that are authorized by this bill. It authorizes claims for damage to property caused by the imperial Japanese military forces, in all places seized or occupied by them—except the island of Guam. I wonder if the gentleman, my good friend from Illinois, could tell me why little Guam is left out?

Mr. MACK. If the gentleman will yield, I will say that Guam was covered by the Guam Relief Act which was passed by this Congress.

Mr. O'HARA of Illinois. I thought that there must be something of that nature. But I wanted to be enlightened. The gentleman has enlightened me and I shall return to my seat a wiser man. I thank the gentleman for putting in the Record the explanation that Guam already is covered. I know the members of this committee have a very warm feeling toward Guam, to which Speaker Won Pat and his colleagues in the legislature of Guam have contributed greatly on the occasion of their visits with us.

The CHAIRMAN. The question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

Mr. HARRIS. Mr. Chairman, I ask unanimous consent that the gentleman from California [Mr. Hagen] may extend his remarks at this point in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAGEN of California. Mr. Chairman, I wish to state that it is my intention to vote "present" on H.R. 7283.

It is my understanding that this bill will permit the reimbursement of U.S. nationals for property losses and other damages suffered by them by reason of Japanese activity against Shanghai and other areas of the Far East during World War II.

I have a brother-in-law who suffered such damages in Shanghai and who, I trust, will recover for such damage under this legislation. It is for this reason that I will vote "present." Were it not for this close personal relationship with one of the beneficiaries thereof, I would vote for the bill.

The CHAIRMAN. Under the rule the Committee rises.

Accordingly the Committee rose, and the Speaker having resumed the chair, Mr. Rooney, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7283) to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses, pursuant to House Resolution 746, he reported the same back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken and the Speaker announced that the ayes appeared to have it.

Mr. BENNETT of Michigan. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 355, nays 15, answered "present" 1, not voting 64, as follows:

So the bill was passed.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Scranton.
Mr. Morrison with Mr. Martin of Massachusetts.
Mr. Rogers of Texas with Mr. Kilburn.
Mr. Thompson of Louisiana with Mr. Collier.
Mr. Inouye with Mr. Garland.
Mr. Dent with Mr. Seely-Brown.
Mr. Dingell with Mr. Cunningham.
Mr. Frazier with Mr. Arends.
Mr. Powell with Mr. McVey.
Mr. Colmer with Mr. Avery.
Mr. Winstead with Mr. Dooley.
Mr. Abernethy with Mr. Harsha.
Mr. Kitchin with Mr. Mason.
Mr. Loser with Mr. Andersen of Minnesota.
Mr. Shipley with Mrs. Reece.
Mr. Santangelo with Mr. Bromwell.
Mr. Bailey with Mr. Merrow.
Mr. Anfuso with Mr. Curtis of Massachusetts.
Mr. Alexander with Mr. Taber.
Mr. Lesinski with Mr. Bass of New Hampshire.
Mrs. Riley with Mr. Hoffman of Michigan.
Mr. Madden with Mr. Chiperfield.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks during general debate.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. BECKWORTH] may revise and extend his remarks and to include therein certain communications on the bill just passed.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

TEACHING ABOUT COMMUNISM

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, in our Nation's life-and-death struggle against the formidable menace of international Soviet communism, it has become increasingly essential for all Americans to thoroughly understand the true nature of this insidious enemy. I always have believed that in order to combat communism intelligently, one must first make a detailed study of Marxist-Leninist ideology and other Soviet dogma. Every citizen should learn communism's basic doctrines, its strategy and tactics, its line on current national and international affairs, the names of major Communist fronts, and the identities of leading Communists and fellow travelers.

While American adults should be fully cognizant of the dangers we face from godless communism, there has also been growing realization of the fact that children of school age, too, must receive instruction concerning this ever-increasing threat to the sovereignty and very existence of the United States.

Educators taking part in a recent meeting under the auspices of the U.S. Office of Education agreed that schools must teach an understanding of the nature of communism.

In a recent survey of courses on communism in U.S. schools, the New York Times reported:

> Instruction about communism, as part of the public school curriculum, is gaining in popularity and professional respectability. But the effectiveness of the teaching is hampered by confusion over objectives and ignorance of facts.

Mr. Speaker, I would like to bring to the attention of my colleagues a great stride that has recently been taken in the area of educating our youth to the gravest danger confronting their—and this Nation's—future. Under the sponsorship of two fine organizations, the American Legion and the National Education Association, a 28-page publication entitled "Teaching About Communism—Guidelines for Junior and Senior High School Teachers," was released last month. This pamphlet fills a vital need for appropriate instructional literature by providing guidelines and other assistance which will enable teachers to select materials and to make presentations which will be effective, honest, and realistic. Though not designed for use as a teaching unit per se, this pamphlet will aid teachers in developing authentic source material for the study of communism in the classroom and thus help eliminate the confusion over objectives and ignorance of facts referred to by the Times which now hamper progress in this field.

The American Legion and the National Education Association are to be commended for their foresight and patriotism in publishing such a scholarly manual. Both organizations have long histories of cooperative effort in planning for the betterment and improvement of American public education.

The manual accurately points out:

> American youth must examine the framework of its freedom, look around the world it has inherited, become acquainted with conflicting ideologies and then make knowledgeable comparisons. It is the teachers' responsibility to challenge them to do so.

Forearmed with the knowledge they will receive through these comparative study courses, young students will develop into maturity as responsible and alert citizens.

Americans cannot possibly comprehend what we stand to lose, should we ever yield to international Soviet communism, unless we first fully appreciate what we now have. Therefore, it is important for all citizens, especially our youth, to study the historical values of our country and understand the reasons why the United States is such a great nation. The manual rightfully declares:

> Our loyalties must be rooted in knowledge and understanding, not in ignorance and prejudice. Thoughtful American citizens realize that our institutions will not suffer by comparison with those of any Communist country or of any country under the domination of communism. The more American citizens know about communistic doctrine and purposes, as well as the advantages offered by our own democratic Government, the deeper will be the loyalties to our Government and to its traditions and ideals.

The timely publication by the American Legion and the National Education Association of this manual as an invaluable guide for educators, will give our children in secondary schools the opportunity to acquire sufficient facts regarding communism to enable them, the upcoming leaders of this country, to face the Soviet threat with intelligence, courage and determination.

EDUCATIONAL AND CULTURAL EXCHANGE PROGRAM

Mr. LIPSCOMB. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LIPSCOMB. Mr. Speaker, I am sure that many Americans will be shocked to learn that they have helped foot the bill for a recent 3-month tour around the United States by a high-ranking, hard-core Polish Communist who during the tour visited defense plants and other industrial plants, and participated in numerous other discussions and activities in key areas and cities across the Nation.

This trip was carried out under the auspices of the State Department foreign leader program which in turn is part of the mutual educational and cultural exchange program administered by the State Department.

The purpose, according to Department of State, for bringing leaders from Eastern European Communist countries is to allow "influential people to see that the United States does not threaten the best interests of the Eastern European peoples and that the American system is capable of resisting Communist aggression."

The way this tour was scheduled and the loose manner it was planned and carried out certainly is not in keeping with the best interest of the United States and its citizens. This episode again points to the need for close attention by Congress and all citizens to every facet of the costly educational and cultural exchange program, including its basic concepts and the purposes for which it is set up. It indicates the need for a complete reevaluation of the administration of and policies followed in carrying out this huge program of systematized cultural and educational activities, so dear to the hearts of idealistic planners who apparently believe in it as the panacea for most difficulties in the world.

The Polish Communist who took the trip was Mr. Stanislaw Kuzinski. He was originally awarded a travel grant for 60 days. Even before he left Poland, however, the trip was extended to 100 days at the insistence of the American Embassy in Warsaw. Kuzinski had been selected to come here by the U.S. Embassy in Poland, with the concurrence of the Department of State.

According to the State Department, it approved the trip "on the basis of the importance, in terms of the United States-Polish relations, of having a Pole of his current and potential power and influence sufficiently acquainted with the United States to interpret it accurately in his own country."

Who is this Stanislaw Kuzinski whom the State Department professes to believe can and will carry the truth back to his country?

Mr. Kuzinski is a member of the Polish United Workers' Party—PZPR—which is the official Communist Party in Poland. He is Deputy Chairman of the Economic Department of the Central Committee and a member of the Economic Council of Ministers of the Polish United Workers' Party. He is also a member of the Polish Parliament and chairman of its Foreign Trade Committee. Kuzinski was born in 1921 in Poland, was graduated from the Central School of Planning and Statistics, and served as an instructor at the Institute for Training of Scientific Personnel.

Perhaps the State Department can explain how it expects a Polish representative of such "current and potential power and influence," to use the Department's own words, to carry the true facts back to the Communist Polish government and to be frank, honest, and outspoken about America without losing his power and influence in Poland. I would like to know. It is all too well known that for a person such as this to be eligible to come over here representing a Communist government he must be a firm and unyielding servant of the international Communist conspiracy.

All-out efforts seem to have been made to accommodate Mr. Kuzinski's every whim. When he received the invitation in fiscal year 1961 to visit the United States, he indicated he would like to travel in the spring of 1962. This was granted and he arrived here March 12, 1962. Normally a foreign leader grant is awarded for a period of no longer than 60 days, but he requested 120 days and on the strong recommendation of the American Embassy in Warsaw, the State Department agreed to an extension of his grant to 100 days. Why this request for an extension was made, who in the Embassy felt so strongly, and on what valid basis the taxpayer should be put to this expense are questions the State Department has yet to give answers to.

As for the main purpose of his trip, Mr. Kuzinski stated that he wished to familiarize himself in detail with the organization of production and distribution in industry. He planned to do this, he said, by extensive discussion with academic leaders in the field of industrial organization and observing the actual industrial process and consulting with industrial leaders.

An extensive itinerary was arranged by the Governmental Affairs Institute. This is a private organization which holds a sizable contract with the Department of State. The Department of State, Office of Cultural Exchange, the Soviet and Eastern European Exchanges Staff, and the Office of Eastern European Affairs were supposed to have been consulted.

A highly significant fact is that the brochure produced by the Governmental Affairs Institute outlining background information on Mr. Kuzinski, the objectives of his visit, and his itinerary, did not mention his membership in the Communist Party. I think it is of vital importance that all those who come in contact with visitors under the program have all the facts about them, such as in this case the information that Mr. Kuzinski is a high-ranking Communist in Poland.

In a recent article entitled "Why Reds Make Friends With Businessmen," FBI Director Hoover discussed the Communist campaign to develop friendly contacts with American businessmen for the purpose of, as Mr. Hoover stated, "begging, borrowing, or stealing the industrial secrets of America." I wonder if those in charge of this program do not realize many of such visitors may be trained in espionage? What evidence did we have concerning this man's background in this regard?

Mr. Kuzinski was accompanied by an escort-interpreter who is employed by the Department of State periodically as interpreter of Polish. Mr. Kuzinski speaks French, German, and some English.

He spent the first month of his tour in Washington, D.C., Boston, and New York City. During his visits to New York he stayed at the permanent Polish Mission to the United Nations. Contrary to the usual procedures in connection with foreign leaders' visits, Mr. Kuzinski showed a strong preference for staying with official Polish representatives here and he was allowed to use such facilities on various occasions.

The schedule for the rest of his trip was not disclosed by the Governmental Affairs Institute until almost the end of that month. Mr. Kuzinski, it is said, preferred to delay final arrangements for the rest of his itinerary until after his program in these cities was completed. He said he wished to devote considerable time preparing for his discussions with scholars and company officials.

After the first month he visited Pittsburgh, Detroit, Chicago, and Seattle, Wash. Tentative plans had been made for him to go directly from Boston to Pittsburgh. Mr. Kuzinski however later decided that he would stop off again in New York and go to Pittsburgh several days later than originally planned. Although the Pittsburgh sponsor knew that the dates for his stay in Pittsburgh were still tentative the sponsor made program arrangements for Kuzinski that later had to be canceled.

After 1 day at the Seattle World's Fair, plus a day of general sightseeing in Seattle, Mr. Kuzinski chose to fly to San Francisco on a Sunday evening rather than take a train on a Monday evening as had been scheduled.

While there, without informing the escort or the sponsor of his plans Mr. Kuzinski apparently spent most of a day in San Francisco with officers of the Longshoremen's Union, possibly including Mr. Harry Bridges. Mr. Kuzinski had told the escort the night before that he planned to spend the day resting. When the escort made the first of several calls to his room, at 10 a.m., Kuzinski had already left the hotel. He refused to say how he spent the day. But the escort, based on remarks Mr. Kuzinski made during the days that followed, expressed the thought that perhaps he was with Longshoremen's Union officials.

How many other times Kuzinski took off on his own is hard to say. It appears a good bet that he did on a number of occasions. A 3-month tour arranged as this one was certainly allowed plenty of occasion for Kuzinski to make other such forays to contact various persons and organizations.

The Department states it is its policy to encourage sponsors throughout the country to offer our foreign visitors opportunities to be received informally in American homes and to encourage the visitors to accept these invitations. Mr. Kuzinski was often offered such hospitality but usually refused it. During his stay in San Francisco, he reluctantly accepted an invitation, arranged by the Department's Reception Center, to dinner at a private home.

Mr. Kuzinski was occasionally invited to luncheon or dinner by those with whom he had professional appointments. For example, he was a luncheon guest of the Westinghouse Electric Co. in Pittsburgh and the General Motors Co. in Detroit, and was the dinner guest in Seattle of an officer of the Pacific Northwest Trade Association.

From the reports, it appears Kuzinski was argumentative, uncooperative, and ungrateful. On at least one occasion he engaged in heated discussions with persons on whom he was calling. One who spent an entire day with him reported that there was almost continuous discussion of controversial matters. One can pretty well imagine what kind of propaganda he was trying to spread. It certainly could have made a significant difference also if those he spoke with knew he was speaking as a Communist, rather than just as Polish leader-specialist grantee under this program.

A 2-day program at the Tennessee Valley Authority had originally been scheduled at the suggestion of the Polish Embassy in Washington but this was canceled at the last minute. When Kuzinski discovered that in order to visit TVA he would have to leave Denver at 7:45 a.m. on June 3, making two changes with stopovers of 50 and 60 minutes each before arriving in Knoxville at 5:22 p.m., he decided this was too strenuous and nixed this part of the tour. These arrangements, therefore, were canceled and Mr. Kuzinski flew directly to Washington, his next scheduled stop. Because of his stature and position, he had an opportunity to make frequent contacts with the Polish Embassy in Washington.

On June 9 he left Washington, D.C., for New York City where the Department of State understood he wanted to stay for some days prior to his departure for Europe on or about June 19. He very likely again stayed at the permanent Polish Mission to the United Nations.

It is claimed Mr. Kuzinski's industrial visits were cleared with the Department of Defense and Commerce and other interested agencies before they were scheduled. The factories visited were Emerson Television & Radio Corp., Jersey City, N.J.; Westinghouse Radio and Television Division, Metuchen, N.J.; International Division, Koppers Co., Inc., Pittsburgh, Pa.; East Pittsburgh Works, Westinghouse Corp., Pittsburgh, Pa.; General Motors Technical Center, Detroit, Mich.; Cadillac Division, General Motors Corp., Detroit, Mich.; John Deere Co., Moline, Ill.; Crown Zellerbach Corp., San Francisco, Calif.; and Joseph Love Co., children's apparel, New York, N.Y.

The Department of State claims that defense work was being done at only one of these plants, at the Westinghouse Corp.'s Radio and Television Division, in Metuchen, N.J., and that Mr. Kuzinski was not allowed to visit this area of the plant. However, at least two other plants he visited have performed defense contracts. Evidently the State Department felt no special security precautions were needed at those plants.

The Department of State told the State, Justice, Commerce, and Judiciary Appropriation Subcommittee that the average cost for grantees under the foreign leader program amounts to $1,920. Mr. Kuzinski's tour, including interpreter services ran around $10,000. And this does not include many administrative costs.

Mr. Speaker, Poland is an integral member of the Soviet bloc. It is bound to the U.S.S.R. through formal instrumentalities such as the Warsaw Pact, through heavy economic and political dependence, and through its exposed geographical position. Even more important is the fact that Soviet troops are still present in Poland. The Polish position on international issues is rarely distinguishable from the Soviet-bloc position.

Under the program an estimated 148 leaders and specialists from the Communist countries of Eastern Europe were to be brought to the United States. Plans are to increase this number to 202 for fiscal 1963. How many grants have been given to leaders such as Kuzinski? Limited information is made available about such activities and the people generally have little knowledge about these visitors.

The Department of State has grandiose plans for the mutual educational and cultural exchange program. The appropriations bill for fiscal 1963 passed recently by the House proposes an appropriation of $40 million for the program. In addition to this, the Department plans to utilize an additional $8,043,798 which is available from the unexpended balances of prior years appropriations.

I believe a complete reevaluation and overhaul of the program, the way it is administered, and the policies adopted is necessary. It is high time the Department of State and those in charge of these programs take a more realistic approach.

If we do not have the opportunity or cannot figure out a way to make grants for exchange of leaders and specialists, and also teachers, professors, scholars, and students who are of a type that could be instilled with a desire to break away from the yoke of communism, we simply should not waste our time and resources, which could be utilized to better advantage in winning the cold war.

It seems illogical to bring visitors to our country who may well be, for example, commercial or other intelligence espionage specialists, just because such persons are the only ones the Communist government will permit to be exposed to our way of life. Such activities certainly cannot do us any good, but to the contrary could represent significant harm to the welfare and security and, ironically, all at the expense of the American taxpayer.

THE LATE WHITING WILLAUER

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. McCormack] may extend his remarks at this point in the Record.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I am saddened to have to report to the House the death of Whiting Willauer, a Massachusetts man from Nantucket. He was a right hand of Gen. Claire Chennault of the famous Flying Tigers in the war in China against Japan and the war in China against the Chinese Communists. He was the first foreign economic administrator in China and the Philippines after the war. Because of his knowledge of international communism he had acquired during the Chinese struggle, he was especially picked to become Ambassador to Honduras in Central America by Gen. Bedel Smith who had noticed his ability in Asia. When the same Communist forces that were later to be successful in the triumph of Castro in Cuba were making an early attempt to establish themselves at our backyard in Guatemala and Honduras, he was one of the chief architects of the defeat of that early communistic attempt and one of the first to warn of the real nature of Castro in his disguise as another agrarian reformer like the Chinese Communists before him. It is a source of great regret that Willauer's warnings and Willauer's talents were not used in time in meeting the threat of Castro. He was a gallant, gifted, and farseeing public servant and we shall miss him greatly in his fight, fought for all of the causes of freedom which he so briefly and effectively served.

COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the Committee on the District of Columbia may have until midnight Saturday to file certain reports.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

MRS. EDITH BENHAM HELM

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Virginia [Mr. Harrison] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. HARRISON of Virginia. Mr. Speaker, I know many longtime Members of this House share my sadness at the passing of one of the truly great ladies of the Capital scene, Mrs. Edith Benham Helm, White House social secretary during the administrations of Presidents Wilson, Franklin D. Roosevelt, and Truman.

For a total of 25 years, she served in close and responsible association with Presidential families. Her character, capacity, refinement and wit contributed significantly to the success of countless functions in the social program which is a traditional appanage of national leadership and diplomacy.

Mrs. Helm was a native of New York City who maintained homes for many years in Clarke County, Va., and in Washington. Prior to her first association with the White House in the Wilson administration, she was social secretary to several members of the foreign diplomatic corps.

Through the years, Mrs. Helm demonstrated a high degree of diplomatic skill in dealing with the press. Her blend of dignity and charm retained the respect and friendship of reporters whose questions about Presidential family matters she often found trivial or, in her well-mannered view, impertinent.

Mrs. Wilson, Mrs. Roosevelt, and Mrs. Truman paid high tribute to her service in handling the multitude of details in White House protocol. She retired in 1953, and, when persuaded to write her memoirs the next year, set down her recollections, characteristically, in good humor and all propriety.

MRS. EDITH BENHAM HELM

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. Roosevelt] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, I wish to share with my colleague from Virginia [Mr. Harrison] the deep regret and sadness which we feel with the loss of Mrs. Edith Benham Helm. Mrs. Helm was the kind of person who fulfilled her public responsibilities so efficiently and with so little fanfare that many people did not realize her contribution to the success and smoothness of so many White House and Presidential affairs.

I speak for not only the members of my family, but particularly for my mother when I say she was also a warm and close personal friend whose capacity and seemingly infinite knowledge, sense of humor, and innate kindness were unfailing characteristics. We all felt, and always will, a very deep affection for Mrs. Helm.

It would be possible to go on at length in reciting the many instances of her official and of her private contributions to the welfare of the White House families, Presidents and their ladies, that she served so well. She also was able to combine these personal contributions with the never-failing remembrance that she also served her country. Those who have read her memoirs know this already. The many who have not will enjoy an experience giving an insight into history and the fact that history is made by warm human beings.

Mrs. Helm will be missed by all who had the privilege of knowing her. To her family she has left a heritage of the highest degree and an inspiration to men and women everywhere.

WALL OF PRIVACY AROUND THE FEDERAL AVIATION AGENCY

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. Gonzalez] may extend his remarks at this point in the Record.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. GONZALEZ. Mr. Speaker, I have recounted on several other occasions the difficulty I have encountered in securing meaningful information from the Federal Aviation Agency. I have cited some of those instances to illustrate the wall of privacy this Agency has constructed around itself, and particularly the office of the Administrator, Mr. Najeeb Halaby. I credit Mr. Halaby with being the engineer who has converted this public Agency into a private instrument of Government which he has marked as "off limits" to Members of the Congress.

One cannot help but be a bit curious about what is taking place in a public agency that removes itself from the scrutiny of Congress. I confess that I am possessed with that curiosity.

Recently I wrote to Mr. Halaby and asked politely for a listing of the locations of over 100 safety installations for which he had requested funds from this House. It seemed to me that it was entirely proper that a Congressman who is being asked to vote on an appropriation bill should want to know where certain projects are to be built when he is being asked to approve money for those projects.

Mr. Halaby did not think so. He wrote me back and said that the information was "privileged" and that he could not give me the locations of the proposed projects. Now, it seemed to me that this was an odd way in which to conduct the people's business, especially on the part of a civilian agency such as FAA.

I mentioned my puzzlement to a senior colleague in this House who acknowledged that it is not infrequent that Members sometimes experience difficulty in securing the precise information they require from Federal agencies. I was told by my colleague that the House of Representatives had accordingly established its own means of expediting the getting of useful information from the agencies. I was told that the Special Subcommittee on Government Information could readily secure the listing I sought from Mr. Halaby. I, therefore, placed my request with this committee, whose staff confirmed that there would be no real problem in securing the list I requested.

Mr. Speaker, this was some days ago and despite assurances from the committee that the information would be forthcoming last week, it is not yet here. I can only conclude that Mr. Halaby is as skillful in frustrating the purposes of the Special Subcommittee on Government Information as he is in concealing the activities of FAA from this "freshman" Congressman.

This response, or lack of response, appears to be a modus operandi. It appears from another recent exchange I have had with the Agency. I went through all the proper channels of contacting the congressional liaison officer to request a copy of the report of the system design team which was recently published by the Federal Aviation Agency for inter-Government study and use. This, too, appeared to me to be an entirely proper request inasmuch as I have been schooled in the belief that Members of the Congress are a part of the Government and that, therefore, any study of this important Agency could be a legitimate concern of a Congressman. To make my story short: The Agency refused to let me see a copy of this report. Now, Mr. Speaker, since coming to Washington I have been very pleased with the ready response of almost every Federal agency or officer to whom I have made a request for facts on a given situation. Everyone from the Defense Department to the doorkeeper, and I do not low rate the Honorable Fishbait Miller in composing this example, have been exceedingly helpful in giving me whatever data I requested. The single exception has been the Federal Aviation Agency. For reasons best known to Mr. Halaby, this Agency is less than forthright. It has a sound barrier built around it. I think it is time that we break the sound barrier if for no other reason than to determine the motives of Mr. Halaby in having created it.

CONGRESS SHOULD UPDATE THE TARIFF ACT CLASSIFICATION OF RUBBER FOOTWEAR IMPORTS

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Indiana [Mr. Brademas] may extend his remarks at this point in the Record.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BRADEMAS. Mr. Speaker, I am today introducing a bill designed to correct an inconsistency in the classification of rubber footwear imports in the Tariff Act of 1930. The inconsistency which my bill seeks to correct is one which thwarts the intention of Congress at the expense of the American rubber footwear industry.

It is, moreover, an inconsistency which is recognized by the U.S. Tariff Commission. Let me explain by citing the comment of the Commission contained in its Second Supplemental Report, Tariff Classification Study, of June 29, 1962:

> The distinctions made under existing law with respect to the valuation of this footwear are technical in nature and result in an anomaly. Footwear of natural rubber or synthetic rubber, or combinations thereof, are not commercially distinguishable and should receive like treatment for value purposes. In view of the significant trade involved, and the fact that the Commission's present study is primarily a classification revision and consolidation, any correction of this valuation anomaly is a matter for legislative consideration.

Mr. Speaker, in view of the anomaly to which the Tariff Commission refers, the definition of rubber footwear in the Tariff Act of 1930 should be revised by Congress in order to include the new footwear composed of synthetic rubbers and plastics, both of which are now being increasingly utilized in the production of rubber shoes.

It seems to me clear that Congress originally intended that the classification of rubber footwear should be based upon the type of footwear and not upon the material of which the footwear is composed.

DUTY HIGHER ON NATURAL RUBBER

Under paragraph 1537(b) of the Tariff Act of 1930, imported footwear of natural rubber is dutiable on the basis of the wholesale selling price of American-made footwear of the same type. Imported footwear composed of synthetic and plastic materials, on the other hand, as distinguished from natural rubber, even though of the same type of shoe, is dutiable only on the basis of the wholesale price of the imported shoe, not the wholesale price of the American-made shoe of the same type.

For example, the duty required to be paid on a synthetic rubber import is 12.5 percent of its wholesale value. But the duty which must be paid on a natural rubber import is 12.5 percent of the wholesale price of an American-made shoe of the same type.

Let me be still more specific and use an illustration to make my point. A Japanese natural rubber tennis shoe import with a wholesale market value of 40 cents in the United States is dutiable not on the basis of the 40 cents but rather on the basis of the wholesale price of the same type of American-made tennis shoe which, let us say, has a value of $2. The duty on this imported natural rubber shoe would thus be 25 cents and would therefore have the effect of raising the price of the shoe by more than half.

But the duty on a similar type of 40-cent Japanese tennis shoe composed of synthetic rubber would be 12.5 percent of only 40 cents, not 12.5 percent of $2. In the case of the synthetic rubber shoe, therefore, the duty would be only one-fifth of the duty incurred on the natural rubber shoe.

HISTORY OF INCONSISTENCY

How did this inconsistency in the classification of rubber footwear arise? In 1933 when rubber footwear imports were by Presidential proclamation first made dutiable on the basis of the wholesale price of the American-made shoe, natural or crude rubber was the principal material in a rubber shoe.

At the time of this proclamation, of course, synthetic materials were little used for the manufacture of waterproof footwear. Natural rubber was the only significant component of such production. Synthetic rubber was still in the test tube stage and elastomeric synthetic plastics were still being developed.

With the more recent development of these new materials, it is easy to understand why the Presidential proclamation only included india rubber, which has been interpreted by the Bureau of Customs to mean only natural or crude rubber.

Mr. Speaker, I think it is time that the Tariff Act on this matter of the classification of rubber footwear be brought up to date with technological change. It is time that the clear intention of Congress on the proper classification of such footwear be recognized.

INTRODUCES BILL TO UPDATE TARIFF ACT

I agree with the U.S. Tariff Commission that this is a matter for legislative consideration and for this reason, I am today introducing a bill which would simply update paragraph 1537(b) of the Tariff Act of 1930 by stating that natural rubber, synthetic rubber, plastics, or any combination of two or more of these materials, shall be deemed to be footwear wholly or in chief value of india rubber.

Today, Mr. Speaker, the protection given the American rubber footwear industry through the 1933 Presidential proclamation is being nullified for a large and important segment of the industry because of the inconsistency I have described. Passage of this legislation is, I believe, of great importance if the American rubber footwear industry is to enjoy the equitable treatment which it deserves and which the law intended.

THE ADOPTIVE PROGRAM FOR AGRICULTURE PROPOSED BY THE COMMITTEE FOR ECONOMIC DEVELOPMENT

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Wisconsin [Mr. JOHNSON] may extend his remarks at this point in the body of the RECORD and include tables.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. JOHNSON of Wisconsin. Mr. Speaker, the House Agriculture Committee is currently holding hearings on the adaptive program for agriculture proposed by the Committee for Economic Development—CED. As a member of the Agriculture Committee and its Subcommittee on Family Farms, I have listened with a great deal of interest to the testimony presented on this staggering and callous proposal to drive 2 million farm families off the land and into the cities during the next 5 years—a proposal which has frightening implications when viewed in the light of our treasured democratic principle of freedom as well as the hard, cold economic fact that our industrial areas are already facing serious unemployment problems.

The statements on the CED proposals given by James Patton, president of the National Farmers Union, Leonard Kenfield, president of the Montana Farmers Union, and Lewis Johnson, president of the Arkansas Farmers Union, sum up in an excellent and concise fashion the reasons why this proposal is neither a practical solution to the problems of American agriculture nor a solution which is in keeping with our American traditions of freedom and fair play. I would like to have these statements printed in the RECORD at this point:

STATEMENT OF JAMES G. PATTON, PRESIDENT OF NATIONAL FARMERS UNION, PRESENTED TO THE HOUSE COMMITTEE ON AGRICULTURE, AUGUST 8, 1962

Mr. Chairman and members of the committee, in all the years I have served as president of National Farmers Union—since 1940—there has never been a time that presented the great danger to our farm programs as that of the present day.

I am surprised and shocked by the report of the Committee for Economic Development. I commend this committee for holding hearings to analyze the CED report on agriculture and its effect on our family farm structure.

The family farm subcommittee is to be commended for their interest and concern and I commend you, Mr. Chairman, for your good judgment in appointing such a subcommittee and naming such distinguished Members of the Congress and friends of agriculture as CLARK THOMPSON the first chairman and PAT JENNINGS the present chairman.

In case there has been doubt about who is on the bandwagon of the cult of so-called freedom for farmers we now have the answer.

The Committee for Economic Development is composed of 200 industrialists and businessmen. Among the members of the Research and Policy Committee who signed the report there is not one representative of family agriculture. The only member who can lay claim to being a farmer is the president of the King Ranch Corp., one of the largest corporate structures in agriculture in the world.

This industrial group recommends a "massive" population shift of farmers into cities, a move that would uproot a third of our farmers. In order to do this they recommend Federal aid programs in low-income States to educate farmers, Government loans for moving, elimination of price supports, a soil bank program and a subsidy program to take 20 million acres of western land out of production.

The CED report embraces these proposals in the name of "freedom for farmers," but they call for "police state" measures unequaled in the history of the development of farm programs.

Their proposals call for the deliberate forcing of farm prices and income so low that farmers will have to leave their farms. They would then keep price and income so low that farmers will not be able to come back. The effect is to force consolidation of farms, making them part and parcel of vertically integrated units so that if farmers do come back they would be hired hands instead of owner-managers as they are now.

The report presumes that by reason of these large farm units, farm income may be better for farmers who remain—if you could call them farmers—but in case a bad guess is made the report states "the willingness of labor to remain in agriculture after a period of maximum opportunity to move out, with the incomes they can earn at these lower prices, will be objective evidence that these incomes are satisfactory."

By the "maximum opportunity to move out," we take it that "opportunity" means starvation income levels.

I don't object per se to industrialists telling farmers what to do but never in my lifetime have I ever seen this crowd come out with a constructive idea relating to agriculture. Moreover, Mr. Chairman, I'm about ready to suggest that their big industrialists go back and run their own profitable businesses and to leave farm policy and programs to farmers and their representatives in the Congress.

I think the industrialists could use a few suggestions for their own businesses. In the name of "efficiency" they want farmers to produce at a lower price but they neglect the fact that efficiency is one of the prime reasons for low farm prices and incomes. The productivity of the American farmworker increased in the 1950's by 6½ percent a year as compared to the nonagriculture worker's 2-percent increase in efficiency. I would also like to suggest that the CED give some thought and study on how to increase output in the industrial sector of the economy in an effort to match that of the American farmer. While 3.7 million farmers compete with each other in the production of our great abundance of food at the lowest real prices to consumers in the history of the Nation, the industrial sector sets up their own supply management system so that they produce just what the market will take and administer prices in the process.

We farmers realize that we can't do this for ourselves and that is the reason we support Government programs. Parenthetically, Mr. Chairman, the CED and other business people should realize that they operate under the license of government in the exercise of their supply management programs.

Over the years farmers have attempted to balance production with demand by voting in referendums to accept production cuts in return for price supports which resulted in income being higher than the free market price multiplied by an unlimited number of acres.

The CED wants the opposite of this. They want chaos on the free market. If they had their way cotton would be 22 cents per pound, rice $3 per hundredweight, wheat $1.35 per bushel, and corn $1 with other feed grains priced at the feed value equivalent ratio. These levels are substantially below any fair and reasonable returns. The result would quite obviously be to drive out of farming many of the so-called commercial farmers who have modern equipment and adequate facilities for efficient production. These constitute the backbone of the up-to-date efficient family farm structure for which the U.S. agriculture is envied throughout the world. It would have an equally disastrous effect on the economy as a whole by establishing in this country the final essential ingredient for a corporate socialism. The family farm structure, with its hundreds of thousands of independently managed units, has been the strongest bulwark against such a development. If the recommendations of the report should, by some remote chance, be adopted, this traditional democratic structure would end for all time.

The CED plan, although using more direct words, differs very little from the disastrous programs advocated by former Agriculture Secretary Ezra Taft Benson and his processor friends. The major planks in both programs are low farm prices, unlimited production, and "kick the little fellow off the farm." These policies have failed completely.

All of us have lived through 8 years of this. We are now suffering the disastrous results of such thinking. It is my sincere contention that this is the so-called farm problem today. Had there never been a Mr. Benson or the ideas that he represented, we would not have suffered from the illogical dilemma of abundance. We would not be paying $1 billion annually in storage bills. Farmers would still be farming instead of competing for the limited number of jobs in the cities.

(See apps. A, B, E, F.)

I think it is significant to our study that the increase in unemployment during the 1950's is almost identical in number to the farmers who were forced off their farms during those years. The CED report acknowledges that high employment would be helpful in reaching their goal of moving 2 million farmers into towns and cities. But they obviously are only giving lip service to what I consider of great importance to the agricultural economy—a full employment economy—because they say further that "there has been significant movement of people from agriculture even in recent years—and even in such circumstances measures to facilitate the out movement will have corrective results."

During the years 1959, 1960, and 1961, unemployment compensation benefits paid to unemployed workers by the States amounted to $2.3 billion, $2.7 billion and $3.4 billion, respectively. In addition, the 0.4 percent Federal unemployment tax for 1962 and 1963 produced $984 million in revenue of which $800 million has been expended to assist the unemployed whose benefits were exhausted. (See app. D.)

Mr. Chairman, these costs would be increased tremendously under the CED plan. Considering the failure of businesses along Main Street in rural America and the unemployment that would result, plus the 2 million farmers who would be potential recipients of unemployment compensation, cost of unemployment compensation would soar. Already the annual cost is far in excess of the $2.4 billion spent on the price support operations of the USDA in 1962. Keep in mind also that when we had effective farm programs we were running the entire Department of Agriculture for less than the cost of price-support operations today. This is not to criticize the efforts we have made to take care of the unemployed, but simply to point out that a transfer of the farmers into cities does not, as CED implies, result in any less costly program for agriculture. This makes me wonder if the industrialists are just looking for an even greater surplus labor market.

We do not object to the training for new jobs of rural people who really want to leave agriculture—although we don't see why that work should be charged to the farm budget—but all of this emphasis is negative, not positive.

What is really needed is much more credit at reasonable interest rates to enable young people to enter the modern highly capitalized business of farming and to enable perfectly capable farmers to expand their less-than-economic operations into units which would return a fair standard of living. This is the positive approach, both in terms of agriculture and in terms of industry.

The possibilities of increasing net farm income by taking much larger areas out of production are dubious. Idling acres is a temporary solution at best. And I remind you that the Eisenhower-Benson administration poured more money into its soil bank than any previous administration had ever thought of spending on all of agriculture, with the results being a negligible improvement in farm income and even greater accumulations of surpluses.

Eight years of lowering price supports in the false expectation that farmers would or could reduce production accordingly has resulted in several years of expenditures which set new records every year. It is totally unreasonable to expect that the farm program costs can be arbitrarily tailored to a budget balancer's figure under these abnormal conditions.

It appears that the CED proposals are pointed to the 2 million farms that produce but 13 percent of the farm products marketed. In the connection I raise this question: What effect would there be on the so-called farm problem if we did away with these 2 million farms? Many are operated by farmers who live in rural areas and work off the farm. They live in rural areas because they choose to do so and, consequently, the chances are that any outmigration of these rural farm families would further aggravate the problem of overproduction because these farms would become part of larger operations. What we need is more action along the lines of the rural areas development and areas redevelopment administration, together with ample credit, to put more resources, both farm and nonfarm, into these marginal farm areas.

It is especially disturbing to note that missing from the CED report is any affirmative policy for encouraging and protecting the efficient commercial family farms which make up for most part membership in Farmers Union. As I have already stated the price policies would make it impossible for these farm families to survive and would completely destroy opportunity for young people to enter the business of farming.

In closing, Mr. Chairman, I want to raise the question with this distinguished committee and pose it especially for the family farm subcommittee, that is: how we can encourage and protect the family farm structure that still is the heart of our agriculture from encroachment by the factory-in-the-field agriculture? These large farms, many of which are operated by chainstores,[1] receive the benefit of Government programs on all their production. They are seeking to expand their allotments by acquiring other farms and they are aggravating the problem of carryover in the process. But the biggest problem of all is the control many of them now have over the production, processing and marketing chain. If we don't devise some effective way to deal with these developments it will become more and more difficult for the independent family farm operator to compete.

The entire CED report brings to mind a definition of our farm economic dilemma enunciated by John Kenneth Galbraith several years ago in Madison, Wis.:

"The problem of agriculture is not one of transition or readjustment. These phrases were also used in the 1920's and the 1930's when the farmer was in trouble. The farm problem is the result of the fundamental and continuing weakness in agricultural bargaining power. Agriculture's weakness is that of the great unorganized industry in a world of highly organized corporate industry and a highly organized labor force. It is the problem of the one major industry which does not have any effective control over the prices at which it sells its products or the supply it offers."

Mr. Chairman, I am happy to have with me today two of my associates in Farmers Union, Mr. Leonard Kenfield, president of Montana Farmers Union, and Mr. Lewis J. Johnson, president of Arkansas Farmers Union. I would like to request that they be afforded the opportunity to make a brief statement after which we will be glad to respond to your questions.

Appendix A

Value of commodities under loan and in inventory of the Commodity Credit Corporation, 1952–61

[In millions of dollars]

Year	CCC investment, July 1		
	Pledged for loans	In inventory [1]	Total
1952	$364	[1] $1,073	$1,437
1953	1,138	2,158	3,296
1954	2,337	3,430	5,767
1955	2,098	4,572	6,670
1956	2,285	5,384	7,669
1957	1,967	4,738	6,705
1958	1,575	4,703	6,277
1959	2,448	5,259	7,077
1960	1,302	6,021	7,323
1961	1,475	5,563	7,039

[1] Inventory revalued 1953-61 to correspond to fiscal year 1962 basis as published in "Report of Financial Condition and Operation" of the Commodity Credit Corporation. 1952 inventory figure is on old basis.

APPENDIX B

Realized net income from farming, farm purchasing power, and parity ratio, 1952–61

[Dollars in billions]

Year	Realized net income from farming		Parity ratio 1910-14=100 (percent)
	Actual	Purchasing power in 1957-59 dollars	
1952	$14.4	$15.2	100
1953	13.9	14.8	92
1954	12.2	13.0	89
1955	11.5	12.2	84
1956	12.0	12.5	83
1957	11.0	11.1	82
1958	12.6	12.6	85
1959	11.3	11.2	80
1960	11.7	11.6	80
1961	12.8	12.6	80

APPENDIX C

EXAMPLES OF THE EXTENT OF VERTICAL INTEGRATION AND CORPORATE CONTROL OF AGRICULTURE—COLORADO

Any long-range plan for agriculture must make provision to halt the now rapid entry of nonfarm corporate interests into farm production, where such corporations are, through favorable tax advantages coupled with the advantages of concentrated economic power in buying, able to control both producer and consumer prices and gradually destroy competitive enterprise in farming and farm marketing.

Studies conducted by Rocky Mountain Farmers Union in Colorado reveal—

Peaches, pears, apples: In 1950 there were several hundred small buyers on these markets and 40 large buyers. In 1962 there are fewer than 10 large buyers buying for groups and chains, and a dwindling number of small buyers.

Poultry; egg production: In 1950 all eggs were family farm produced or brought into the State from other family farms outside. Today the family farm producers are being pushed out by:

(1) The entry of the giant Gates Rubber Co. of Denver into the egg business with a plant to produce 80,000 eggs a day. This operation theoretically will replace 50 to 100 family farm egg producers.

(2) The entry of the Pepper Packing Co. integrated with the Mountain States Mixed Feed Co. into egg production 3 years ago with a plant designed to handle 250,000 hens laying an estimated 210,000 eggs a day. Eight such units will replace every family farm egg producer in the State as eight will supply the entire egg production.

(3) The entry of Armour & Co. into egg production through conversion of former packing plant facilities into caged layer facilities—estimated 30,000 eggs daily.

Cattle feeding and ranching: Research in Colorado reveals that in 1961 one-half of all the fat cattle slaughtered in the Denver livestock slaughtering area were fed by eight large corporate feeders. Denver slaughters 800,000 head. The eight corporations fed-out more than 400,000 head.

Estimated cattle feed by largest corporations 1960, Colorado: Monfort-Capitol Packing Co., 75,000 to 100,000 head; National Tea Co., 75,000 head; Farr Farms Corp., 35,000 head; and American Stores, 40,000 head.

In addition to the above, Food Fair, Armour, Swift, Frier & Stillman, meat packers all feed cattle.

In the last 12 months, Winn-Dixie stores have purchased a cattle ranch near Cowdry in Colorado (North Park) with a capacity of 125,000 prime cattle annually.

Another corporate feeder Wisebart at Brush, has recently "put together" 10 former family size ranches in Baca County as one ranch unit to integrate with their 40,000 feeding operation near Brush.

Corporate wheat farms—Colorado (three examples only):

(1) Baufman farms; incorporated as Baufman & Baufman, Clyde Baufman, Ella Baufman, Baufman Estate, John Baufman Estate, J. W. Baufman Estate, Baufman Farms Co., J. W. Baufman Farms Co., J. W. Baufman Estate, Baufman Farms, R. V. Baufman, R. C. Baufman, Ralph Baufman and William Baufman.

These holdings include 16,143 acres in Adams County, Colo; 3,610 acres in Arapahoe County; 25,154 acres in Baca County; 70,486 acres in Cheyenne County; 62,200 acres in Kiowa County; 50,603 acres in Kit Carson County; 49,052 acres in Lincoln County; and, 6,338 acres in Prowers County.

A total 283,586 acres of farmlands in eastern Colorado. Their holdings in Kansas are also extensive. (In Cheyenne and Kiowa Counties, Baufman acreage equals 8 percent of all farmland in production in the county.)

(2) Garvey farms—Garvey, a second large corporate farm operator in Colorado, now owns 60,000 acres in Kiowa County; 4,707 acres in Cheyenne County, and 3,361 acres in Lincoln County. A combination of Baufman and Garvey interests in Kiowa County account for ownership of 15 percent of all the farmland in this county.

(3) Farr farms—The Farr farms comprise a combination of 9 of the best irrigated farms in Weld County with a 35,000-head cattle-feeding operation, seedhouse, fertilizer interests, feed business, bean brokerage business, and financing. Harry Farr serves as board member on one Greeley bank while his son serves as head of the competing bank. One also serves as a board member on the First National Bank of Denver, the other as a board member of the Denver U.S. National Bank.

APPENDIX D

UNEMPLOYMENT COMPENSATION BENEFIT EXPENDITURES

The Temporary Extended Unemployment Compensation Act of 1961 expired on March 31, 1962. The purpose of this bill was to extend unemployment compensation to persons who had exhausted their benefits under State and Federal unemployment laws, and to provide reimbursement to certain States in meeting their cost of long-term unemployment compensation. The program cost approximately $800 million. An increase in the Federal unemployment tax of 0.4 percent for taxable years 1962 and 1963 was enacted to pay for the program and produced $984 million in revenue.

During the years 1959, 1960, and 1961, total unemployment compensation benefits paid under State laws were $2,279,017,000, $2,726,767,000, and $3,422 million. For the first 6 months of 1962, the figure was $1.5 billion.

Unemployment insurance under State laws, Jan. 1, 1962

States	Average weekly benefit paid for total unemployment, 1961	Maximum weekly benefits [1]	Average weekly wages in covered employment, 1960	Basic maximum weekly benefit as a percentage of average weekly wages		Duration of benefits by weeks [2]	Percentage of claimants who exhausted benefits, 1961	Average employer tax rate, 1961	
				1941	1939			Percentage of taxable payrolls [3] (1939=2.72 percent)	Percentage of total payrolls (1939=2.66 percent)

APPENDIX D—Continued

Unemployment insurance under State laws, Jan. 1, 1962—Continued

States	Average weekly benefit paid for total unemployment, 1961	Maximum weekly benefits [1]	Average weekly wages in covered employment, 1960	Basic maximum weekly benefit as a percentage of average weekly wages [4]		Duration of benefits by weeks [2]	Percentage of claimants who exhausted benefits, 1961	Average employer tax rate, 1961	
				1941	1939			Percentage of taxable payrolls [3] (1939=2.72 percent)	Percentage of total payrolls (1939=2.66 percent)
Tennessee	$24	$32	$76	42	78	22	39	1.7	1.1
Texas	24	28	85	33	65	8-26	42	.9	.6
Utah	34	[5] 43	86	50	70	10-36	26	1.5	.9
Vermont	29	[5] 40	79	51	66	[4] 26	24	1.6	1.0
Virginia	25	32	76	42	74	8-20	40	1.2	.8
Washington	32	42	98	43	57	15-30	23	2.7	1.8
West Virginia	23	32	92	35	59	26	32	2.7	1.6
Wisconsin	40	[5] 50	95	53	55	12-34	37	1.5	.9
Wyoming	41	[6] 49-55	88	56	78	12-26	29	1.4	.9

[1] Where 2 figures are shown, the smaller does not include dependents' allowances.

[2] Where 2 figures are shown, the lower represents the shortest possible duration. In most States this is the entitlement of a claimant with minimum weekly benefits and minimum qualifying wages. But in 10 States a higher than minimum weekly benefit amount may result in shorter duration where the distribution of earnings are concentrated in the high quarter.

[3] Taxable wages have remained at the first $3,000 of employees' earnings since 1939, except in Delaware, Hawaii, Massachusetts, Nevada, Rhode Island, West Virginia ($3,600), California ($3,800), Alaska ($7,200), and Oregon ($3,600 or $3,800, depending on level of reserve).

[4] Benefits are extended when unemployment in State reaches specified levels—in California, Connecticut, Idaho, Illinois, and Vermont, by 50 percent, and in North Carolina, by 8 weeks.

[5] Maximum weekly benefit is determined as specified percent of average weekly covered wages: Kansas (50 percent), South Carolina (50 percent), Utah (50 percent), Vermont (50 percent), Idaho (52½ percent), and Wyoming (55 percent); semiannually in Wisconsin (52½ percent), and Colorado (50 percent) of average weekly wage in selected industries). The base years used for setting the maximum are not necessarily the calendar 1960 used in this table.

[6] Augmented amount includes $6 per dependent up to individual's average weekly wage.

[7] $40 and up.

APPENDIX E

Farm population loss 1952–61, (In terms of 1960 farm definition)

[In millions]

Year	Farm population	Net loss from previous year

1962	6,667.2

STATEMENT BY LEONARD KENFIELD, PRESIDENT, MONTANA FARMERS UNION, ON THE COMMITTEE FOR ECONOMIC DEVELOPMENT'S FARM REPORT PRESENTED TO THE HOUSE AGRICULTURE COMMITTEE, AUGUST 8, 1962

Mr. Chairman, I am pleased to have an opportunity to make some comments about the Committee for Economic Development report before this distinguished committee.

First of all, I think the persons who wrote this report should be reminded that in the 20th century we speak of human beings as "people" and not as "resources"; nor should they be considered as pawns to be moved about by the millions at the will of big business or Government.

The type of planning which says 2 million people are to be moved out of agriculture into other industries is something that may go on in totalitarian countries but should not in America. Such planning is comparable to what Hitler did to the Jews in Germany.

And another thing—before representatives of the monopolistic business community attempt to tell farmers, farm leaders and agriculturists in general how farming and farm programs should be run, I should like to recommend a few proposals for the business community.

1. Before American agriculture would be placed entirely on the free market, I strongly suggest we take big business back to the free market. This would involve eliminating tariffs designed to keep the American public from benefiting from foreign imports. It would also involve eliminating a great variety of other Government aids and subsidies. It would assume full production at capacity as long as the public would consume industrial products. It would eliminate from the Federal budget all funds that go to stabilize business and commerce. In short, the free market for big business would remove all restrictive measures that control production and artificially support prices.

2. Require business to equal the increased efficiency that has been achieved by American farmers during the last 40 years before trying to tell farmers how to achieve more efficiency.

3. Require all Government defense contracts to be let on a competitive bid basis.

4. Insist that business demonstrate it can maintain full employment of the labor force now living in urban areas before suggesting the moving of additional people looking for jobs into those areas. Contained in the Committee for Economic Development report is the statement: "We believe, of course, that high and growing employment can be maintained in the nonfarm economy." We believe that too, but we have never seen it done, except in time of war.

Now as to answering the main part of the report, first, let me say that it differs very little from the Benson program for putting the economic squeeze on farmers in order to drive them off the land so that giant corporations can take over there as they have in most other industries. It differs from Mr. Benson's ideas in that it would let the farmer down with a bigger jolt and less cushion. The end result would be the same. The Benson price toboggan-slide was not as steep.

If we assume that the Committee for Economic Development objective is to create economic chaos in this country and add to the numbers of unemployed and eliminate the middle class, then the whole plan makes tragic meaning. If, on the other hand, we want to assume that the big business economists have the welfare of this Nation at heart and would really like to promote some constructive programs, let me point out a few of the fallacies in their approach:

1. Removing people from agriculture does not get at the real problem. The increased efficiency of farming tools and methods permits one farmer to do the work that four farmers did 40 years ago. Efficient production is one of the most outstanding developments in modern agriculture. So effective is modern agricultural technology that every time a farmer is removed his place is taken by a machine or by a hired man operating a machine.

2. Uprooting 2 million farmers from rural areas will result in the removal of an additional number of people who have been rendering service to these farmers, so that the total number of unemployed to be thrown on the labor market in urban areas will be considerably in excess of the 2 million condemned farmers. In this connection it is futile and heartless to even contemplate throwing additional unemployed on the urban labor markets until the present 4 to 5 million unemployed are given an opportunity to earn a modern-day American standard of living.

3. The idea of retraining the people for other pursuits is excellent if there is any prospect for employment opportunities in these other pursuits. Until that is demonstrated, however, all the training in the world cannot help solve the problem. May I be so bold as to suggest retraining for some Committee for Economic Development gentlemen.

4. The report points out the fewer numbers of farm youth graduating from high school, entering college and graduating from college. This is a matter of simple arithmetic. Farmers simply cannot afford to send their young people to school.

5. Criticism is made of the vocational educational training of rural youth for farming and home economics. Would the Committee for Economic Development theorists have us discontinue preparing our farm youth for doing their best in agriculture? Are we to turn our backs on technology in agriculture?

Committee for Economic Development says "vocational education in farming areas should be mainly for industrial, not agricultural skills." Does this mean more subsidy for industry at the expense of agriculture and the rural communities?

6. There is indication that too many people have already moved out of rural areas and that actually a vacuum has been created. Rural America has lost too many vigorous, intelligent youth, able leadership, and skilled workers. Rural America needs more teachers, more doctors, and more community leaders.

7. Some high-sounding language is used in the report on the subject of prices to disguise the fact that the authors are recommending a brutal slashing of farm prices as means of driving more people out of agriculture. Here is some of the language: "and related products now supported should be allowed to reflect the estimated longrun 'adjustment price' of these products." Again: "Gradual price reductions in recent years have not affected the resources used in farming fast enough and have not allowed total production to flow into use." This is a polite way of expressing a downgrading of the farmer and of preparing the way for his liquidation.

8. The thing the Committee for Economic Development planners ignore is that even the most efficient farmer has a limit at which he can produce profitably, and when that limit has been passed by millions of farmers it can result only in wholesale bankruptcies. A reading of the history of the great depression reminds us of the terrible tragedy that comes from prolonged farming below the cost of production.

9. We would like to point out, the Department of Agriculture in cooperation with farm and ranch operators is engaged in a continuous effort to adjust land to its best use—not enough, of course.

10. Another point on which we disagree with the Committee for Economic Development is in the recommendation to reduce current price supports, already too low, to vague adjustment levels under the condition that "(1) loans should not be large enough to result in carryover of stocks in the hands of the Government from one year to the next."

Unless there were very strict straitjacket control of farm production accompanied by mandatory recruitment for the soil bank the Government carryover of stocks would surely continue to pile up because farmers, traditionally, when prices decline try to make up lost income per unit of production by increasing volume of production.

Some important points which the report failed to deal with are the following:

1 Farmers should have ample opportunity to benefit from the progress in technology. That they have been able to make 10 blades of grass grow where only 1 grew before should not invite penalty, but should bring adequate reward. Laboring people and management people have benefited from technology by shorter hours and higher pay. Farmers, too, are entitled to shorter hours and more pay—not liquidation.

2. Reduction of the price of farm commodities at the farm gate will not reduce price of food on the consumer's table.

3. Reduction of farming to a relatively few very large agricultural combines will invite more Government subsidies rather than less, if bigness in agriculture follows the pattern similar to bigness in business.

4. The Committee for Economic Development program of moving 2 million farmers out of agriculture would dangerously deflate the rural economy and have a chain reaction blighting rural towns and many agriculturally oriented cities. The big business scheme for rural America offers no replacement of the loss of billions of dollars in farmer purchasing power. Thus, the big business Committee for Economic Development would ruin not only the farmers but many small businessmen.

5. In brief, while the Committee for Economic Development report does not express it, the blueprint that emerges is an economic structure that on one hand would increase the supply of cheap labor for industry by driving 2 million operators off the farms and on the other hand seeks to provide cheaper food by knocking out Government farm programs.

The Committee for Economic Development report is unfair:

1. The report refers to "the waste * * * in huge stocks of commodities for which there is no use." As long as there are hungry people in the world this statement is simply not true. It is the distribution system that is wasteful and ineffective, not the producing end of agriculture. If the distribution system were to operate as efficiently as the productive section of agriculture, there would likely be no piling up of excessive carryovers.

2. Hammering away on the waste theme, Committee for Economic Development declares, "Waste is present and is the root of the problem." If we want to talk about waste, let's talk about the unused capacity of our industrial plants, for example, with 50 percent of the steel plants standing idle. Or perhaps we should talk about oil wells in Texas that are allowed to pump only 2 days in the month. Or maybe we ought to mention light bulbs and other electrical appliances with built-in obsolescence. Or we could talk about the $9 billion worth of so-called nonfarm strategic materials the Nation has stockpiled.

3. The Committee for Economic Development report labels Government efforts to maintain fair income for farmers as promoting inefficiency. It seems strange that representatives of big business who have plenty of inefficiency to worry about in their own establishments, despite very productive and highly skilled workers, should worry about American farmers whose efficiency in food production has set a mark of high achievement that is a marvel to all the world.

Yet the authors are bold enough to say our farm and ranch families are not as efficient as they ought to be. On page 16 we are told, "It would have been more efficient to have used still less farm labor."

Does this mean that farmers should have used more fertilizer? Do the big business farm experts know how much fertilizer soil and plants can use effectively? What do those who tend the flocks on the pastures of Wall Street know about the dirt farmer's problems in getting enough credit to buy the fertilizer needed? Many farmers will tell you they know how to farm much better than they can afford to.

Anyway, Committee for Economic Development logic is hard to follow.

4. When all the exalted language of the Committee for Economic Development report is translated, it means that what this business group wants to do is uproot more people from their homes (by artificial economic pressures if necessary, such as withholding credit) in order to create a vast force of mobile ("migrant") workers that can be shunted back and forth from one industry to another to create surplus labor—now here, now there—to break the backs of labor unions and bid down wage rates. This is particularly revealed in a statement on page 19: "Although the exodus from agriculture in the past decade or longer has been large by almost any standards, it has not been large enough * * *. The excessively high level of urban unemployment in the 4 years 1958 to 1961 tended to keep the movement of labor out of agriculture less than it should have been."

5. The persistent reference to people as "resources" has a metallic and unfriendly ring to anyone with any feeling for human beings.

6. Page 21 states, "The agricultural resources that had met wartime demands could produce much more than could be sold at the existing prices." Here again is a left-handed way of saying farmers did a tremendous job in meeting and even in exceeding wartime demands.

7. Is this an economic report or a partisan report? The text on page 21 says, "Federal expenditures * * * rose from about $1 billion in 1948 to over $5 billion in 1961." Why did it not say that the Federal expenditures rose from about $1 billion in 1952, which is what the chart shows?

8. One of the slick phrases (page 22), "most prices were declining as productivity rose," would be meaningful if the report simply came out and said "surplus production beat down prices."

9. Page 24, item 8 states: "Underdeveloped countries have received more assistance from the United States in the form of agricultural commodities than they would have otherwise received * * * they might have received other assistance more valuable to them." We might ask here: What could be more valuable to a hungry man than food?

In conclusion, it must be said farmers, through their Government, are endeavoring to develop a sensible farm program. They are greatly hampered in their efforts by the pontifications of big business spokesmen. Without fancy phraseology here is what farmers, with the help of the USDA, and we hope with more help from Congress, are attempting to do:

1. Adjust acreage and production to meet demand to reduce Government costs of farm programs and increase family farmer income while maintaining adequate supplies of wholesome food for the Nation.

2. Assure farmers and ranchers on the land a chance to continue in agriculture by providing adequate credit to meet their needs.

3. Assist a natural and normal turnover in the farming profession by providing through credit and other means, opportunities for young farmers to step in to replace those elder farmers retiring.

4. Put unneeded crop acres to productive uses, such as forestry, grasslands, and recreation.

5. Assist rural people in starting new industries that will employ people where they are instead of dislocating vast populations.

6. Preserve rural communities and rural institutions as a basic framework of democracy.

Farmers Union rejects the strange notion that everything small is inefficient and everything big is efficient. We believe that people are most important.

Thank you kindly for your attention.

Statement of Lewis J. Johnson, President of the Arkansas Farmers Union, Before House Agriculture Committee Regarding the Report, "An Adaptive Program for Agriculture," as Prepared by the Committee for Economic Development, August 8, 1962

Mr. Chairman and members of the committee: For the record, I am Lewis J. Johnson, president, Arkansas Farmers Union. I would like to express my appreciation to you and the other members of this committee for the fine work you are now doing and have done in the past on behalf of the family farmers of our country.

We have read a report submitted by the Committee for Economic Development. We want to make it clear that the Arkansas Farmers Union does not agree with this report, except in very few instances. Therefore, we will only mention a few of the many items which we disagree with.

It seems to us that their philosophy of doing away with one-third of our farmers in order that it might advance the incomes of the remaining two-thirds is not in keeping with the family farm tradition of our country. To use Arkansas as an example, the 1959 census showed that we had some 95,007 farms in operation. To remove one-third of them and try to put them in the labor market would be disastrous. Basically, it would be striking a blow against the very roots of our democracy.

The unemployment figures for Arkansas in 1961 averaged 7 percent of the labor force. For the first half of 1962, it still is 7 percent. It is to be assumed that there would be no room in the labor market for these unfortunate families that were forced to leave their farms.

The committee's recommendation in regard to the soil bank has already been tried and found wanting.

The removal of all Government regulations and price supports on farm commodities would destroy our national economy. The committee [Committee for Economic Development] mentioned getting the farmer back to the free market. It is our thinking that it would mean "free" for everyone but the farmer.

Mr. Chairman, we have heard it argued before this committee many times before today that cheaper prices would help us to get more of the foreign market. We have found in the past that this committee has never accepted this philosophy and we feel sure that you will not accept this type of thinking in the Committee for Economic Development report today.

The Committee for Economic Development report shows Arkansas uses 76.9 percent of their vocational agriculture funds for agricultural training. These are not the facts in the case. Attached to this report is a breakdown of the total expenditures which shows that only 40.9 percent is spent for agricultural training. These figures were taken from the records of the Arkansas State Department of Education for 1961 and 1962.

We believe that vocational education plays a tremendous part in our rural life; not only in agriculture but in the human resources as well, in working with our young men and women through Future Farmers of America and Future Homemakers of America. We doubt seriously if a dollar-and-cent valuation can be placed upon this program. We in Farmers Union would like to see vocational education strengthened rather than weakened. Additionally, we think additional emphasis should be placed on adult vocational training.

We have just completed construction of one adult vocational training school in Arkansas and have appropriations made for a second one. We find that education is never finished and in our modern-day way of life, it is necessary that we continue to train our adults as well as the young people of this country. Arkansas has launched upon this additional training program.

Mr. Chairman, Arkansas is still an agricultural State. There is a lot to be done in agriculture in our State, yet. We see the trend of more farm people working as tenant farmers than ever before. Large farm operators tell us that the most efficient farmer is the family farmer who grows some 100 acres of cotton or rice and 200 to 300 acres of soybeans. They are able to operate the majority of their farm with family labor. This has not only proven to be an efficient way of farming, but we believe it is the basic foundation of our American democracy—helping to keep our family farmers on their farms.

It seems to us that the whole scheme of the Committee for Economic Development report is to do away with the small operator and that everything had to be on a large scale. We do not believe this and this is not new, because you and the rest of this committee have heard it all before. In our opinion, this report does not offer anything to the family farmers of our country. It would seem to us that there was someone in the group who was projecting the ideas and philosophy of those who have always farmed and the farmer. We believe in staying by the farm programs that have been tried and proved, such as the cotton, tobacco, and rice programs—where the farmers, themselves, have had an opportunity to vote on the type farm program they wanted and needed.

We should always remember that the farmers feed us, not only America but a large part of the rest of the world.

Mr. Chairman, the Committee for Economic Development report has positively stated that a third of our farm families must go. Now for the information of your committee, I have here a breakdown on the cotton farms and acreage and rice farms and acreage for Arkansas. I would like to have this made a part of the record.

This report poses some questions that we need to ask the Committee for Economic Development.

What part of this cotton group and rice group do they intend to do away with? How and where do they propose to compensate for the crime which they are about to commit on this group of people? We call it a crime because to us that is exactly what it is. These people are being driven from the land that they inherited from their grandfathers and fathers—a land that has sustained them through the years with food. The roots of their family life run deep in the community, their spiritual life is founded here. This is the land that is the final resting place of their departed loved ones. However, the Committee for Economic Development reports that they must go. This report from the Committee for Economic Development is a black day in American history, that such a coldblooded proposition is proposed against our farm families.

In closing let me say we are thankful for this agricultural committee, because we know this Committee for Economic Development report will wind up in its proper place—in the wastebasket.

APPENDIX A

Upland cotton: Number of farms and final planted acreage, Arkansas, 1961

	Effective allotment (acres) [1]									
	Total	0.1 to 4.9	5 to 10	10.1 to 14.9	15 to 29.9	30 to 49.9	50 to 99.9	100 to 199.9	200 to 499.9	500 and over
Number of farms	37,941.0	4,973.0	8,739.0	5,468.0	8,319.0	3,890.0	2,893	1,514.0	919	231.0
Total acres planted	1,384,316.3	12,624.5	57,319.1	62,658.4	188,656.2	152,249.9	200,426	216,521.1	269,340	224,520.7

[1] Effective allotments refer to those established for all farms after any adjustments in farm allotments resulting from the release and reapportionment program. These were the final allotments for compliance purposes.

Rice: Number of farms and acreage allotted, Arkansas, 1960

	Acres														
	Under 6	6 to 10.9	11 to 15.9	16 to 20.9	21 to 25.9	26 to 50.9	51 to 75.9	76 to 100.9	101 to 150.9	151 to 200.9	201 to 300.9	301 to 400.9	401 to 500.9	501 to 1,000.9	1,001 and over
Number of farms [1]	437	411	352	269	183	917	719	593	563	284	230	62	43	33	8
Acres [2]	1,366	3,672	4,659	4,896	4,212	35,495	45,237	51,623	60,232	48,937	56,312	21,306	19,229	21,772	10,988

[1] Total number of farms 5,134.

[2] Total number of acres 398,936.

APPENDIX B

Funds expended for program of vocational education, Arkansas, 1961–62

	Total	Local	State	Federal	Percent service expenditure bears to total expenditure
Agriculture	$1,508,446.98	$833,746.88	$281,307.34	$393,392.76	40.9
Home economics	1,540,690.47	969,890.53	416,472.74	154,327.20	41.7
Distributive	98,948.46	42,065.30	31,937.73	24,945.43	2.7
Trade and industrial	309,520.95	126,398.38	97,769.77	85,352.80	8.4
Practical nurse training	130,459.12	32,286.64	28,172.48	70,000.00	3.5
Title III (technical)	103,593.81	955.90	51,000.00	51,637.91	2.8
Total	3,691,659.79	2,005,343.63	906,660.06	779,656.10	

NOTE.—The 1961 General Assembly of the State of Arkansas appropriated $275,000 to build a 2d vocational-technical school in the State. This school will be constructed during 1962–63, and it is anticipated that the 1963 general assembly will appropriate funds for equipping the school.

APPENDIX C

Enrollment in vocational education classes, Arkansas, 1961–62

	High school	Adult	Total
Agriculture	18,256	9,512	27,768
Distributive education	571	1,539	2,110
Home economics	27,948	22,718	50,666
Trade and industrial	1,365	8,072	9,437
Practical nurse training	0	1,415	1,415
Title III (technical)	9	783	792
Total	48,149	44,039	92,188
Number, Arkansas chapters, Future Farmers of America			260
Number, Arkansas members, Future Farmers of America			13,513
Number, Arkansas chapters, Future Homemakers of America			323
Number, Arkansas members, Future Homemakers of America			18,951

Number of vocational teachers, Arkansas, 1961–62

	White	Negro	Total
Agriculture	269	60	329
Home economics	315	87	402
Distributive education	26	0	26
Trade and industrial education	53	17	70
Practical nurse training	23	0	23
Title III (technical)	33	0	33
Total	719	164	883

APPENDIX D

Cost of sites and buildings	$536,426.00
Cost of equipment	244,286.00
State and local funds (fees, etc)	194,322.49
Federal funds, title III	42,856.52
Expenditures, 1961–62	237,179.01

Enrollment

	Year ended June 30—		
	1960	1961	1962
Regular	394	478	452
Extension	378	522	940
Total	772	1,000	1,392

REGULAR (PREPARATORY)

Air conditioning and refrigeration.
Auto body repair and painting.
Mechanical technology.
Drafting technology.
Electronics.
Machine technology.
Radio and TV repair.
Welding technology.
Practical nursing.
Woodworking.

EXTENSION

Automotive.
Rapid reading.
Transportation and traffic management.
Mathematics-electronics.
Supervisory and foreman training.
Air cooled engines.
Nurses extension.
Business management.
Blueprint reading.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION PROGRAM—TEUC

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Arkansas [Mr. MILLS] may extend his remarks at this point and include extraneous materials.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. MILLS. Mr. Speaker, there follows for the information of the Members of the House, the latest information available on the operation of the temporary extended unemployment program—TEUC—which terminated March 31 last.

It will be noted that this information, which was compiled by the Department of Labor, gives not only the total number of workers involved, the total payments and cost, and the total tax collections but also a State-by-State breakdown of the tax collections and benefit payments.

Department of Labor summary of information—Temporary extended unemployment compensation program (TEUC), August 8, 1962

TEUC PAID TO WORKERS WHO EXHAUSTED REGULAR BENEFITS AFTER JUNE 30, 1960, AND BEFORE APR. 1, 1962, FOR WEEKS OF UNEMPLOYMENT BETWEEN APR. 9, 1961, AND JUNE 30, 1962

	Million
Total number of workers who received TEUC (includes Federal claimants, but does not include claimants who received only reimbursed benefits) (workers [1])	2.99
Total amount of TEUC paid out (that would not have been paid out in absence of TEUC program)	[1] $767
Total cost to United States, including reimbursements and TEUC to Federal claimants	[1] $812
Total TEUC chargeable to Federal tax (includes reimbursement but excludes TEUC paid to Federal claimants)	[1] $780
TEUC tax collections	[1] $952

[1] Estimated.

Estimated TEUC collections and benefits by State

[In thousands]

State	Estimated TEUC collections [1]	Estimated TEUC benefits [2]
Total	$952,000	$780,000
Alabama	11,630	9,360
Alaska	1,110	1,180
Arizona	5,880	2,300
Arkansas	5,200	3,140
California	95,300	98,710
Colorado	8,310	2,920
Connecticut	18,030	16,200
Delaware	3,100	2,010
District of Columbia	5,230	1,620
Florida	20,800	11,100
Georgia	16,220	12,040
Hawaii	3,300	2,010
Idaho	2,430	1,560
Illinois	65,990	50,590
Indiana	26,910	18,770
Iowa	10,420	3,790
Kansas	8,090	3,920
Kentucky	10,120	10,800
Louisiana	12,410	11,330

Rhode Island	5,250	4,390
South Carolina	8,980	5,040
South Dakota	1,660	396
Tennessee	14,510	12,990
Texas	$40,740	$16,070
Utah	3,990	1,740
Vermont	1,680	1,180
Virginia	14,710	5,010
Washington	14,540	11,490
West Virginia	7,800	6,360
Wisconsin	20,780	13,670
Wyoming	1,520	1,034

[1] State breakdown based on estimated distribution of wages taxable under Federal Unemployment Tax Act for calendar year 1960.

[2] Excludes benefits to workers under Federal unemployment insurance programs.

FEDERAL GRANTS TO PRIVATE INSTITUTIONS

The SPEAKER. Under the previous order of the House the gentleman from Minnesota [Mr. QUIE] is recognized for 1 hour.

Mr. QUIE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. QUIE. Mr. Speaker, today I would like to present a few observations on H.R. 8900—the College Academic Facilities Act—a bill which this House, in its wisdom, passed last January 30. A week after we passed it the Senate completely replaced our language, cut out our grants title, and added a scholarship provision similar to previous scholarship provisions which this House and the House Committee on Education and Labor have found objectionable and excluded. The House paid me the honor of appointing me to the conference committee which was agreed to on May 9.

After three meetings of the conference committee, the House and Senate conferees have still not resolved their differences. A great deal of new testimony has been presented, and a number of new constitutional objections have been raised by the Senate conferees. There has also been a great deal of uninformed and misrepresented publicity connected with this bill. I would like, if the House will spare me the time, to review this bill in the light of the new testimony which I have collected and that which has been presented to the conferees. It is my hope in doing so to refocus our attention on the real needs which this bill was intended to provide for, and the real problems which are now blocking it in conference.

The need for college academic facilities was amply documented in hearings before the Special Subcommittee on Education of which I am a member. College enrollments, which now stand at 3,610,000, will increase by 30 percent in the next 5 years, and by 1970 they will total an estimated 6,006,000—an increase of 66 percent. These estimates are accurate. The children are already in our elementary and secondary schools, and if they are not to be denied a college education, the capacity of the Nation's institutions of higher learning will have to be doubled within the next decade. To provide the needed additional academic facilities will cost $12.9 billion by 1970. The Nation's colleges and universities will fall short of this need by about $1.5 billion in 1965 and $2.5 billion in 1970. H.R. 8900 is designed to meet this need by supplying the $1.5 billion needed in the next 5 years in the form of loans and grants. It would be a huge supplement to the Federal loan program assisting the construction of dormitories and other income producing buildings. This has been in operation since 1950 and is available to public and private institutions alike.

But why are both grants and loans provided in our House bill? This is one of the major points in the controversy between the House and Senate bills. The Senate tacitly recognizes the indisputable fact that public institutions alone could not begin to cope with the huge expansion in enrollments which is taking place. Private institutions will of necessity bear much of the burden of providing for the need. Yet at the same time the Senate believes that grants for academic facilities should not be given to private institutions. Believing this, and also realizing that aid should be given to both public and private institutions if the need is to be met, the Senate bill provides $300 million yearly limited to loans for both public and private institutions.

But will $1.5 billion in loans suffice as a means of financing the $1.5 billion need for academic facilities? Unfortunately such is not the case. Testimony showed that in 45 of the 50 States statutory or State constitutional prohibitions prevented public institutions of higher learning from taking Federal loans. In other words, the public colleges and universities in 95 percent of the States cannot finance their much needed academic facilities through Federal loans no matter how much money is made available in Federal loans. Besides, in most States loans are already available to public institutions at as low a rate of interest as would be available from the Federal Government. Loans, then, are certainly not the answer to financing the need for academic facilities in public institutions of higher learning.

There is another reason why loans for academic facilities would not provide the needed construction for the clearly increasing enrollments in our colleges and universities, while loans for dormitories and other income-producing buildings have proved quite effective. This stems from the fact that academic facilities produce no income. If an institution secured a large Federal loan, whether it is one of the few public institutions which could qualify, or a private institution, the only source of revenue it would have for repaying the loan would be increased tuition or reduced professors' salaries, neither one of which in my estimation is desirable. In the last decade, great advances have been made in improving the salaries of our college and university professors. This should be continued rather than retarded. Secondly, tuition at some private institutions has already reached prohibitive levels, averaging about $1,600. If grants were provided as in the House version of H.R. 8900, they would serve as an incentive, either for encouraging State legislatures and school boards to assist public institutions, or to encourage private sources to further endow private colleges. Having borrowed to their limits, and finding an increase in tuition charges undesirable, many institutions have reached an impasse in finding ways to finance new facilities. Yet we are depending heavily on these institutions to absorb the growing number of enrollments in the years ahead, and the Federal Government will continue to make increasing demands for the professional personnel produced by these institutions. Therefore, I believe that 60 percent of the authorization for academic facilities construction should be provided in the form of grants if the purpose of this bill is to be effectively carried out.

Considering the fact that for the most part neither public nor private institutions of higher education can utilize Federal loans, the Senate's plan to provide for academic facilities through loans only appears, in actuality, to be a denial of the needed aid which nevertheless gives the appearance of providing for it. In contrast, the House version of this bill faces squarely up to the fact that Federal grants and loans, rather than simply loans, are necessary to effectively finance the $1.5 billion need for academic facilities in the next 5 years. After hearing the overwhelming testimony to this effect, when the bill was considered in the Special Subcommittee of the House Education and Labor Committee, I proposed, as the educators recommended, that 70 percent of the $1.5 billion be given in the form of grants and 30 percent be given in the form of loans. This is the reason why our House bill now contains provisions for both grants and loans.

So far, I have discussed the need for academic facilities, the possible ways of providing for it, and how far the House and Senate bills go in actually providing for it. I would now like to turn to the particular objections which have been leveled at the House version of the bill, and especially at the grants provision which the Senate deleted.

The primary objection which the Senate and its conferees have put forth is that Federal grants of taxpayers' money should not be given to private institutions of higher education. Why they hold this position is not entirely clear. Some seem to feel that it would be a radical departure from our past national policy if we were to give outright grants of public money to private institutions of higher learning. Others believe that because many private colleges and universities claim a particular church affiliation they are ineligible to receive Federal funds. These opponents hold that it is unconstitutional to grant taxpayers' money for the support of any institution which claims a religious disposition—denominational or nondenominational—and they point to Justice Douglas' concurring decision in the school prayer case as the validation for this view—which Justice Douglas probably would hold. Still others are against Federal grants for academic facilities because they feel that grants should be given only for the support of specific projects or curriculum which is directly related to defense, and they have arbitrarily decided that only science, mathematics, and modern foreign language fit into this category. Some of this type of opponents hold that all past Federal aid to higher education has been given either for specific projects and purposes or for strengthening subjects directly related to defense. I have looked very thoroughly into the factual basis of each of these positions and have found that a great many misconceptions prevail concerning both the way Federal aid has been given in the past and is given at present. I think my colleagues will find this material of great interest and importance in dealing with all higher education legislation.

First and perhaps most important, is the fact that never in the history of Federal aid to higher education have private and public institutions been treated separately or even distinguished between. I repeat, never in the history of Federal aid to higher education have private and public institutions been treated separately or even distinguished between. Yale, Brown, MIT, and Cornell, all private institutions at the time, were made land-grant colleges under the Morrill Act of 1862, and in the many programs during and since World War II, the Navy's V–5 and V–12 programs, the GI bills, the National Science Foundation's regular and cooperative fellowships and institutional grants, Atomic Energy Commission grants, title IV grants under the National Defense Education Act, and the new National Aeronautics and Space Administration grants to mention but a few, never have private institutions been discriminated against.

Hundreds of millions of dollars in grants for the construction and equipment of educational facilities and for payments to institutions educating students on Federal fellowships have been made and are being made to private institutions every year. An idea of just how extensive Federal grants to private colleges and universities really are can be gained from looking at the percentage of Federal grants allocated to private institutions under the following nine Government programs. I take this following information from a memorandum prepared by Dr. John F. Morse for the conferees.

The first program, like H.R. 8900, provides for facilities; in this case it provides grants for the construction of health research facilities. This program, authorized under Public Law 84–835, title VII, is described by the National Institutes of Health as designed "to provide Federal assistance in the construction and/or equipping of facilities for research and related purposes—including research training." During the past 6 years, $180 million has been given in 872 grants to 336 institutions in 48 States. Of these institutions 46 percent are non-Federal public institutions, and 54 percent are private nonprofit institutions.

A second program involves the transfer of Federal surplus real property. During the past 3 years real property with a value of $51 million has been transferred to nonprofit institutions. There are no current breakdowns of these figures except for fiscal year 1961. In that year when real property transfers amounted to $28,773,000, $10,048,000 was transferred to institutions of higher education; 11 percent went to private institutions and 89 percent went to public institutions.

A third program is the National Science Foundation's institutional grants. This program is described by the National Science Foundation as being "aimed specifically at providing participating colleges and universities with funds that could be used flexibly for strengthening and balancing all the scientific activities. The funds granted under this program foster local initiative in the development of plans and programs for self-improvement in scientific activities and strengthening the independence of institutions of higher learning." The grants go to "institutions granting M.S. and Ph. D. degrees in science and to undergraduate science degree-granting institutions, which prepare students for graduate study." During fiscal year 1961 $1.5 million was used in grants of which 45 percent went to private institutions and 55 percent went to public institutions. The level of the program has been raised to $5 million for the current fiscal year and it is anticipated that it will be at $10 million in fiscal 1963.

A fourth program, the National Institutes of Health general research support grants, is a new program instituted this year, designed according to Dr. Shannon "to provide institutions with a steady source of funds uncommitted to any particular research or training project, to be used by them for the general strengthening and adjustment of their health research and research training programs in the manner which they judge to be most effective." The program is supported this year at a level of $20 million. Fifty-nine percent of the grants have gone to private institutions and 41 percent to public institutions.

A fifth program is the Atomic Energy Commission's grants, designed according to Dr. Seaborg "to cover purchase of laboratory equipment and fabrication of neutron sources to initiate or expand curricula in the life and physical sciences and engineering related to nuclear energy." In the past 6 years $22.8 million have beeen granted to 505 educational institutions. During the current fiscal year $2,452,000 in grants have been made. Of these 50.1 percent have gone to private institutions and 49.9 percent to public institutions.

A sixth program is that of the National Science Foundation which provides for specialized facilities and graduate research laboratories. Grants under this program must be matched by at least 50 percent from non-Federal sources. In explaining the purpose and need of this program, Dr. Waterman has said that research laboratories are "of paramount importance in serving the needs of graduate and postdoctoral students working on thesis and independent research problems. As undergraduate student population increases, the number of students entering upon graduate training should reflect a proportionate growth. This growth is in danger of being seriously impeded by the shortage of graduate research facilities. The financial resources at most institutions of higher learning are being strained to the utmost to meet the constant rising cost of operating their education programs, particularly in the undergraduate level." During fiscal year 1961 this program operated at a level of $13 million. Of this total 53 percent went in grants to private institutions and 47 percent to public institutions.

A seventh program is one of those set up by the National Defense Education Act—the national defense fellowships. During the past 4 years, 550 fellowships have been awarded in a variety of disciplines including 25 percent to the humanities, 8 percent in education, 26 percent to social sciences, 14 percent in biological sciences, 17 percent to physical sciences, and 10 percent to engineering. Sixty-four percent of all fellowships have been awarded to public institutions and 36 percent to private institutions. In terms of dollars, with a maximum grant of $2,500 to the institution for each fellow, figures are available for the first 3 years of the program. Payments made directly to institutions, not including payments to students for their support, totaled $18,061,000. Of this amount 65 percent went to public institutions and 35 percent to private institutions.

The National Aeronautics and Space Administration fellowships, announced this year, but not yet awarded, No. 100, with an initial cost figure of $2 million anticipated for fiscal 1963. Each of 10 institutions has been awarded 10 fellowships. Of these, seven are public institutions and three are private institutions. The same general provisions as in National Defense Education Act fellowship payments to institutions have been announced for the program except that there is no $2,500 ceiling on the grant that may accompany each fellow.

An eighth program is the research career award program. This program is a revision of a program which was announced in fiscal year 1961 as the career research professorship program. Its purpose, according to Dr. Shannon, "is to enlarge significantly the opportunity for full-time research careers. This program for the Federal selection and career support of individuals who are appointed to academic or career research positions in universities, medical schools, or research institutions is a unique venture on the part of the Federal Government in the furtherance of research. These awards are intended to finance positions for able scientists who plan to pursue careers in independent research and teaching." Research career awards are made in 5-year increments "with the firm intention to continue Federal support for the full career of the individual." This year, with more awards to be made before the end of the fiscal year, 551 awards totaling $7.7 million have been made in institutions of higher education. Of these 57 percent have gone to private institutions and 43 percent to public institutions.

A final example is the National Institutes of Health training grants. The objective of this program "is to aid training institutions to increase the quality and quantity of persons interested in research and academic careers in the biomedical sciences and related fields. Grantee institutions are not restricted to any set plan or pattern in developing training programs, but are free to propose programs of any nature which best reflect training needs as seen by the institutions." In fiscal year 1961, $107.6 million were granted through this program. Of this total $92 million went to institutions of higher education; 45 percent of the grants were to public institutions and 55 percent to private institutions.

These nine examples of the large extent to which Federal grants are already given to private institutions are but a few of the 40-odd programs under which Federal aid is given to private institutions just as it is given to public institutions. This evidence, I hope, is enough to convince anyone that giving Federal grants to private institutions of higher education is nothing new, and certainly not a radical departure from the previous national policy. To the contrary, giving grants to both public and private institutions has been the national policy for a century. Those who claim that giving grants to private institutions is now in some way illegal should realize that to institute a new policy under which grants are given to public institutions only would mean that 100 years of constructive legislation in the field of higher education would have to be discarded and a new start made. The laws under which colleges and universities receive some $1.5 to $2 billion of Federal income annually would have to be completely rewritten and changed—a change which I think would not be for the better.

Why do I not think the change would be for the better? Simply because I believe it as necessary and desirable for private institutions to provide the needed professional manpower in the national interest as it is for public institutions to do so. Privately administered institutions of higher learning would certainly seem to be as capable as public institutions if one is to judge them by their performance. Private institutions, in fact, seem to offer some of the best professional teaching staff, libraries, laboratories, and facilities in almost every field of education—science and engineering at MIT, Stanford, and Rensselaer; English, history, philosophy, and the social sciences at Harvard, the University of Chicago, Yale, Columbia, and Princeton, to name but a few. A person would be hard put, I think, to argue that these valuable and well-developed facilities should not be encouraged to increase enrollments the same as public institutions. I have heard it estimated that 75 to 80 percent of the increase in enrollments in institutions of higher learning will come about in public institutions, but it is impossible for them to cope with all of the increased enrollments, and it hardly seems in the national interest to change our national policy of the last 100 years and encourage expansion only in public institutions.

The three Republican Senate members of the conference committee have joined the House in supporting the House position of grants and loans for academic facilities for both private and public institutions. This was indicated by a compromise proposal which was to be submitted on June 22, 1962. In a press release which I would like to quote we said the following:

> The compromise proposal would (1) provide grants and loans for the construction of academic facilities to both public and private institutions of higher education; (2) provide similar grants to qualified junior colleges and technical institutes, both public and private.

We are convinced that this realistic approach will give substantial assistance to all colleges and universities, both public and private, and will enable the other conferees to resolve their differences with respect to these two important issues.

There is sound historical precedent for this proposal. The Federal Government is now and has been for many years making available substantial grants running into hundreds of millions of dollars to all nonprofit institutions of higher education without regard to whether they are public or private. To draw a distinction now between the public and private college would reverse established practice and cast such a shadow on present aid programs as to require their complete overhauling. Our program follows a nondiscriminatory policy of long standing and avoids the ineffectiveness of a program limited exclusively to loans. Such a program would deprive most of the public and many of the private institutions of assistance.

It is the testimony of these institutions that a majority of States have statutory or State constitutional restrictions which make it difficult or impossible for public institutions to borrow funds for nonrevenue producing facilities. Moreover, many of the private institutions indicate they cannot borrow any more without raising tuition fees so high that the door would be slammed in the faces of young men and women who really want a college education.

Consistent with our view that tradition ought not to be abandoned, our program provides direct assistance to all nonprofit junior colleges without regard to whether they are public or private. We have also clarified the concept of junior college to emphasize that it includes 2-year technical institutes at the college level.

Aid of this kind will help the Nation meet a tremendous demand for semiprofessional technicians. The shortage of such technicians is becoming increasingly acute in engineering and space technology.

This vital need can only be met by providing both grants and loans to both public and private institutions.

This view is shared by six national organizations in higher education: the American Council on Education, the American Association of Junior Colleges, the Association of American Colleges, the Association of State Colleges and Universities, the Association of State Universities and Land-Grant Colleges, and the State Universities Association. These organizations stated—

> With striking unity, organizations in higher education have recommended to congressional committees that both grants and loans be provided for construction of academic facilities. This is provided in the House bill. Without grants, most public institutions, owing to statutory or constitutional restrictions on borrowing, will be unable to benefit from the new Federal programs.

With such striking unanimity of opinion on this subject from all sources I find it hard to believe that the Senate could write a bill completely disregarding it.

For the benefit of both those opponents who believe that giving Federal grants to private, church-related institutions is unconstitutional, and those opponents who believe that all past Federal grants were given for specific or defense-related purposes I would like to present a closer look at two of the Federal programs I mentioned a minute ago; first of all the National Science Foundation's institutional grants program. These are "grants for use at the discretion of colleges and universities to help meet their needs in science." They "are intended by the foundation to provide general and flexible support to develop and maintain sound, well-balanced programs of research, education or related activities in the sciences. The use of the funds is undesignated in the belief that the staffs of institutions of higher education are best able to determine their needs in the sciences and to know the best means to answer them." Unlike the grants which would be provided by H.R. 8900, these Federal grants are given to both private and public institutions "undesignated." A grantee institution could teach a particular religion in classrooms constructed mainly to strengthen the school's science program, and be entirely within the meaning of the law. The House version of H.R. 8900 has a section which states that this law would not include facilities which (a) are or will be used for "sectarian instruction" or for "religious worship"; (b) are or will be used primarily in connection with a school or department of divinity; or (c) are intended primarily for physical education or events for which admission is charged to the public.

The maximum grant for an indiviual institution under this program which was enacted in 1960 is $50,000. The allocation of some of these "undesignated" Federal grants to private, church-related institutions for the coming year should be of particular interest to the Senate and its conferees. In the States of the Democratic Senate conferees a few examples in this one program are: In Oregon, Linfield Research Institute, Baptist-affiliated, receives an undesignated institutional grant of $6,160; the University of Portland, which is Roman Catholic, receives $3,100; and Willamette University, which is Methodist, receives $5,100.

In Pennsylvania, Duquesne University, which is Roman Catholic, receives $6,253; Lafayette College, which is Presbyterian, receives $5,178; Muhlenberg College, which is Lutheran, receives $3,200; Thiel College, also Lutheran, receives $4,700; and Villanova, which is Roman Catholic, receives $5,705.

In Texas, Austin College, Presbyterian, receives $3,800; Baylor University, Baptist, receives $5,515; Lubbock Christian College, a Christian Church college, receives $5,010; St. Mary's University of San Antonio, Roman Catholic, receives $5,250; Southern Methodist University, Methodist, receives $6,980; and Texas Christian University, Christian Church, receives $5,010.

In Michigan, Albion College, a Methodist college, receives $5,150.

In the States of the Republican Senate conferees:

In New York, the following Roman Catholic colleges receive undesignated Federal grants in the following amounts: Canisius College, $1,700; Fordham University, $6,184; Le Moyne College, $1,800; Manhattan College, $6,340; College of New Rochelle, $400; St. Bonaventure University, $4,500; St. John's University, $5,350. The largest grant to a church-affiliated institution in New York, $19,308, went to Yeshiva University, a Jewish university.

I should reiterate here, however, that the Senate Republican members of the conference committee favor grants to both public and private institutions.

At this point, I would like to read a table which I have prepared which shows the allocation of all of these undesignated Federal institutional grants for the coming year.

Undesignated National Science Foundation institutional grants

State	Name of institution	Amount of grant	Type of institution
Alabama	University of Alabama	$6,255	State controlled.
	Auburn University	5,710	Do.
Alaska	University of Alaska	24,492	Do.
Arizona	University of Arizona	38,141	Do.
	Arizona State University	8,120	Do.
Arkansas	University of Arkansas	8,389	Do.
California	Alameda County State College Foundation.	$5,005	Do.
	University of California:		
	Berkeley	50,000	Do.
	Los Angeles	50,000	Do.
	Davis	23,080	Do.

Undesignated National Science Foundation institutional grants—Continued

State	Name of institution	Amount of grant	Type of institution
California—Con.	University of California—Con.		
	San Diego	$50,000	Do.
	Riverside	14,335	Do.
	San Francisco	11,033	Do.
	Santa Barbara	7,893	Do.
	California Institute of Technology	46,267	Private.
	San Francisco State College	6,460	State controlled.
	Harvey Mudd College	5,300	Private.
	Loma Linda University	5,044	Seventh-day Adventist.
	Long Beach State College Foundation.	6,880	State controlled.
	Los Angeles State College of Applied Arts & Sciences.	6,645	Do.
	Mills College	5,190	Private.
	Occidental College	5,085	Do.
	Orange County State College Foundation.	5,120	State controlled.

This table shows some interesting results. Of the institutions receiving these Federal grants, 89 are private; 53 are private, church related; and 104 are public. This means that of all institutions receiving Federal grants under this program, 42 percent are public and 58 percent are private. Only 22 percent of these institutions are church related, and only 7 percent are Roman Catholic. Institutions with religious affiliations other than Roman Catholic received more than twice the number of Federal grants that Roman Catholic institutions received.

At present the Senate opposes grants to private institutions. Yet they voted for the appropriations which provide these undesignated grants to private and church-related institutions. Why have they changed their minds? No decision by the Supreme Court has said that these grants are unconstitutional, and there are many laws on the books, as demonstrated by the examples I have presented, which make the giving of such grants the law of the land. In view of these actual facts about Federal grants to private institutions, I can only say that a few of the Senate conferees take a pretty weak position when they base their objections to this bill solely on their own opinion of how Justice Douglas' concurring opinion might be extended—and Justice Douglas' is not even the majority opinion. I am urging that they take a look at the record of Congress, at what Congress has decided to make our law and our national policy in this field, and leave the work of the Supreme Court to the Supreme Court.

In connection with the church-state constitutional question which some seem to think is involved here, I would like to read a memorandum which the Health, Education, and Welfare Department, in consultation with the Justice Department, prepared for Senator WAYNE MORSE. In it Senator MORSE is strongly advised that the constitutional question, as it pertains to institutions of higher education, is far less likely to encounter constitutional difficulty than aid to primary and secondary schools:

> This memorandum has discussed first amendment principles, relevant judicial decisions, and criteria for determining the constitutionality of specific legislative proposals all in the context of elementary and secondary education. Since proposals are currently being advanced in the field of higher education, it is appropriate to give consideration to the significantly different context in which any constitutional problem concerning these proposals might arise.
>
> The constitutional principles involved are obviously the same whether the subject is elementary and secondary school education or higher education, but the factual circumstances surrounding the application of the principles are dramatically different. The reasons are largely historical.
>
> There are thus important differences between school and college, not only in terms of history and tradition but also in terms of the compulsory nature of attendance. There are differences, too, from the standpoint of the national interest involved. At the college and graduate levels the public institutions alone could not begin to cope with the number of young men and women already in pursuit of higher education, and expansion of these institutions or the creation of new ones sufficient to meet the expected increase of enrollment is out of the question. The effort which it is agreed must now be made in the field of higher education would, if confined to public institutions, force an evermore intensive selection of students and evermore concentrated effort to guide them into fields of study deemed important to the national defense and welfare. It would likely induce these institutions to overemphasize particular fields of study to the detriment of a balanced curriculum. Such warping of our educational policies is not to be contemplated lightly, and, to the extent that Congress finds it appropriate to encourage expansion of our university and college facilities, Congress must be free to build upon what we have, the private as well as the public institutions.
>
> All these considerations indicate that aid to higher education is less likely to encounter constitutional difficulty than aid to primary and secondary schools. The same considerations apply even more forcefully to graduate and specialized education.
>
> Loans for construction of facilities may be less constitutionally vulnerable than grants for the same purposes. But this distinction is not here the only one or perhaps even the

crucial one. More important are the distinctive factors present in American higher education: the fact that the connection between religion and education is less apparent and that religious indoctrination is less pervasive in a sectarian college curriculum; the fact that free public education is not available to all qualified college students; the desirability of maintaining the widest possible choice of colleges in terms of the student's educational needs in a situation no longer limited by the necessity of attending schools located close to home; the extent to which particular skills can be imparted only by a relatively few institutions; the disastrous national consequences in terms of improving educational standards which could result from exclusion of, or discrimination against, certain private institutions on grounds of religious connection; and the fact that, unlike schools, the collegiate enrollment does not have the power of State compulsion supporting it.

The second program I would like to deal with in some detail is the National Institute of Health's grants for the construction of health research facilities. Since December 31, 1961, 68 private institutions have received $61,075,624 in Federal grants for building health research facilities. Ten of those private institutions are Roman Catholic, 5 Lutheran, one Jewish, one Baptist, and one Methodist. This is noteworthy, not only for the large amount of grants going to such institutions in the past 6 months, but also because it shows that only 18 out of 68 of the private institutions, 26 percent, are church-affiliated. I believe this also holds true in the other Federal grant programs. This would seem to disprove again the popular misbelief that most of the private institutions seeking aid and grants of the kind proposed by H.R. 8900 are Catholic institutions, or even church-related institutions. Under this National Institute of Health program providing grants for research facilities, less than 15 percent of those private institutions receiving grants were Roman Catholic.

The question certainly does not boil down to whether or not Federal grants should be given to Roman Catholic institutions. They are already given extensive grants as demonstrated above. Notre Dame alone received the following Federal grants for 1 year: from the Department of Defense, $543,100; from the Atomic Energy Commission, $714,300; from the National Institute of Health program, $213,800; from the Department of Health, Education, and Welfare, $68,500; from the National Science Foundation, $662,200; and from the Peace Corps, $3,300: a total of $2,205,200.

I hope all the preceding information will help to clarify the true relation of the Federal Government and its grant programs to private and church-related institutions of higher learning, both in the past and at present. I also hope that the realization of this information will clear the way for a realistic consideration of the House's grant provision—a provision which, if left out, would make this bill ineffectual.

Now there is another provision of the Senate bill which, while not formally at issue in conference, may nevertheless come back to the House for a vote. This is the scholarship provision—title II of the Senate bill. It provides $900 million for 212,500 scholarships of up to $1,000 for up to 4 years.

One reason I strenuously opposed and objected to this provision is because of the hidden grant provision it contains. A $350 "cost of education" allowance would accompany every Federal scholarship given, whether of $100 or $1,000. Federal scholars would be free to attend the college or university of their choice, so that what the $350 payment following them amounts to is an outright grant to both the public and the private institutions they choose to attend. The $350 is above and beyond tuition and fees, and is equivalent to a gift to any institution that will take the Federal scholar. It is estimated that the total of such payments would be about $75 million. Needless to say, this payment would make the Federal scholar far more attractive to any institution than an equally talented student who holds a private scholarship or whose parents can afford to pay the tuition. The $350 accompanying Federal payment is in every way equivalent to the case of the parent who offers a $350 gift or bribe, as you will, to a college if it will accept his son. This is not, I believe, the way the Federal Government should conduct itself in its dealings with institutions of higher education.

I also find it impossible to understand why the Senate holds that this type of grant to private institutions for use as they please is constitutional, while at the same time it holds that the grants provided by the House to meet a specific proven need are unconstitutional. Personally, I believe that if grants are to be made available to both public and private institutions, we should not be deceptive and hide them as the Senate has done. The need can be better provided for if it is provided for directly—for it certainly cannot be assumed that Federal scholars will go to those institutions which need academic facilities in proportion to the facilities needed.

In conclusion, I would like to impress upon my colleagues the importance of the decision Congress is making with regard to Federal grants to private institutions of higher education. To date the national policy has been to provide Federal grants impartially to both public and private institutions according to their needs. No Supreme Court decision has held that such grants are unconstitutional. Yet the Senate has proposed to change this national policy and make all our legislation in accordance with the principle that it is unconstitutional to give Federal grants to private institutions, even though their own bill would provide hidden grants of $75 million yearly, some of which would go to private institutions. I cannot see that this change of national policy is at all warranted. Indeed, in view of the invaluable contribution which our private institutions of higher education have made and are continuing to make, I do not see how we can afford to abandon our support of them. I hope that we will not abandon them, and that instead we will meet the vital need to provide facilities for the increasing enrollments of our institutions of higher education with honest and open legislation in line with our national policy. The House version of H.R. 8900 is just that kind of legislation.

This legislation has traveled a long road. It was originally proposed as H.R. 5266 and hearings were held on March 15, 16, and 17 of 1961. The bill was greatly revised as a result of the hearings and a clean bill H.R. 7215 was reported by the Committee on Education and Labor on May 26, 1961. The bill resided in the Rules Committee until July 18, 1961 at which time it was tabled. The Education and Labor Committee then took up H.R. 8900, which included only the aid for academic facilities title of H.R. 7215, and reported it on August 29, 1961. H.R. 8900 was not sent to the floor by the Rules Committee until January 30, 1962. It passed the House by a vote of 319 to 79. It then went to the Senate where, as I have explained, the grants provision which the House found so necessary was formally erased and the administration aid to higher education bill was substituted. This bill included the scholarship title plus grants amounting to $350 to go to any institution for each Federal scholar. These were the provisions which the House Committee on Education and Labor had found objectionable and excluded in May of 1961. The Senate passed this amended bill on February 6, 1962, and requested a conference. If the House had agreed to a conference at this time and the conferees had agreed with the Senate's amended bill, H.R. 8900 would have been returned to the floor with all the inequities and objectionable features which the House Committee had so painstakingly ironed out of the bill. This would have denied the House the right to work its will on a student assistance program and would have left the House with a choice only between legislation which its committee would not accept and no legislation at all. To prevent this turn of events I objected, and the bill was sent to the Rules Committee. In the Rules Committee the conferees agreed that the scholarship provision would not be considered in conference, and that any student assistance compromise would be sent back to the House for a separate vote. The House agreed to a conference on May 9, but the leaders then did not call a meeting of the conference for more than a month, and have held only three meetings, the first on June 19, the second on June 22, and the last on July 18. In view of the facts I have presented here today I think it is fairly obvious that the constitutional objections and the objection to grants to private institutions are largely contrived. The House and Senate vote hundreds of millions of dollars in Federal grants to both public and private institutions every year. I hope that the information I have presented here today will make it very clear to the House that there is no real constitutional issue in this legislation and that neither the House nor the Senate bill would change our national policy of providing aid for higher education to all institutions. Both bills provide some grants for all institutions. If the Democratic Senate conferees would only face up to these facts, I believe the House and Senate could easily resolve their differences of opinion on this bill, which almost everyone in higher education considers to be of the highest priority of all legislation affecting education before the Congress. I think it is of the utmost importance that we do so.

Mr. GOODELL. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from New York.

Mr. GOODELL. Mr. Speaker, first I would like to commend the gentleman from Minnesota for his statement and for the great contribution which he has made on this issue of aid to higher education. I have the privilege of serving on the conference committee with the gentleman from Minnesota. I have read his remarks and I have listened to them here today and I agree completely with the statement he has made. Also I would like to emphasize, and I believe the gentleman from Minnesota will agree with me, that the problem of higher education and its needs is completely bipartisan.

Mr. QUIE. That is correct, as has been the case throughout our committee hearings. If this had not been the case, the House Committee on Education and Labor would not have accepted the amendment that I offered which provided loans and grants for academic facilities, and the amendment the gentleman from New York offered which provided for a different type of academic facilities. Also, talking about a bipartisan approach, the chairman late last year appointed an advisory committee on higher education on which both the gentleman from New York and I served, and in which we came up with recommendations which are truly bipartisan and which, if adhered to, would be a great push forward for higher education in this country.

Mr. GOODELL. I know it is a fact that since this bill was first considered in the subcommittee the gentleman from Minnesota [Mr. QUIE] and the gentleman from New York, have both worked very hard to develop a bipartisan strategy, whereby an effective and constructive bill could pass both Houses of the Congress. I know that the gentleman from Minnesota has presented a number of proposals as compromises with a view to trying to get some legislation this year. This has been particularly true since the bill originally passed the House in January of this year; but unfortunately, as the gentleman has indicated, the bill seems to be bogged down in conference.

Mr. Speaker, I want to pay tribute to the House conferees, both Democratic and Republican, who have approved this legislation from a bipartisan point of view. I disagree with some of the strategy decisions made by the leadership in our subcommittee, as I think the gentleman from Minnesota has, and we have expressed ourselves very strongly in this regard.

Nevertheless, I think we have had a generally bipartisan approach to the matter.

I want to emphasize what the gentleman has pointed out, that the Republican conferees on the Senate side have agreed completely with both the Democrats and Republicans on the House side with reference to this issue of aid to both public and private institutions. As a matter of fact, the Senate Republican conferees joined with us in presenting an alternative, urging it upon the conferees in June.

Unfortunately, this issue may come to a question of placing responsibility for failure. I hope it does not reach that stage. If it does, I think it will be very clear from the facts the gentleman has enunciated here where the responsibility lies for our failure to get aid to higher education this year, in view of the bipartisan nature of the legislation and the bipartisan support it has had.

In brief, the Democratic conferees in the other body have held out against aid to any private schools. I believe they have held out unanimously. They are the only conferees who are taking that position. Does the gentleman agree to that?

Mr. QUIE. Yes, I agree. That is the reason why today I have brought before the House all of the facts of the situation, so the Members may appraise it themselves to see that this is really an unreasonable position. Over the last hundred years we have had a national policy that whenever there is aid given to higher education it has been given indiscriminately, and the Republicans are in favor of this position. There is no good reason for the Senate conferees to take a different position.

Mr. GOODELL. I commend the gentleman for his action in sending this bill to the Committee on Rules before sending it to conference. This was a courageous action, because I know the gentleman favors student assistance and favors the grant and loan program for academic facilities. In fact, what the gentleman was trying to do when he sent this to the Rules Committee was to get this House off a collision course which we were following at that time and which would have led to disaster and failure as far as aid to education is concerned.

Mr. QUIE. That is correct. If I had not stood up and objected there would have been objection from people who would have no desire to see the aid to higher education bill become law this year. I wanted it because I think this bill is of highest priority. I began supporting aid to students back in 1958 with the National Defense Education Act. We refused to be a rubber stamp here in the House and accept just what the administration sent up. We developed a student assistance program that we considered superior and that many people in higher education have agreed with.

We wanted an opportunity for the House to work its will on a student assistance program to meet the needs of the country. Unless we took this action and sent it to the Rules Committee we would have been prohibited from doing this.

Mr. GOODELL. The question of student assistance, whether it should be in scholarships or some other form, has not been an issue in conference.

Mr. QUIE. No, it has not been at all.

Mr. GOODELL. It is entirely focused on the question of whether there should be grants and loans to private as well as public institutions.

Mr. QUIE. That is correct.

Mr. GOODELL. As a practical matter, historically this country in giving aid has never distinguished between public and private institutions at the higher educational level, in any aid program which has been enacted in this Congress.

Mr. QUIE. It is interesting that in some newspaper articles it is said we are just trying to give aid to Catholic colleges. I might point out right here that Catholic-affiliated colleges receive less than half the number of grants which church-related colleges of other religious denominations receive under the programs of Federal grants which I have just outlined.

The private colleges that are not church related far outnumber the church-related private colleges, and the amount of aid that goes to public institutions far surpasses the amount that goes to all private institutions, and in the future it is expected that probably 75 to 80 percent of the increased enrollment will come about in public institutions.

Mr. GOODELL. I would also refer to the fact here to emphasize the bipartisan nature of this problem, that the gentlewoman from Oregon [Mrs. GREEN] has made statements to the Congress in recent weeks emphasizing this very point that the gentleman from Minnesota has just made, that the aid to the private schools is not a question of aid to Catholic schools at all, and that this is a misstatement of the issue.

As a practical matter, most of the private institutions are not affiliated with any religious denomination, and there are more Protestant and Jewish institutions than there are Catholic institutions involved. It certainly is unfair and unjust to try to characterize this as just an issue of aid for Catholic schools or of aid just for private or public schools.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. I, too, as a member of the Committee on Education and Labor, would like to commend the gentleman for his discussion of the situation which is, indeed, regrettable, if not inexcusable, because we have had many months in which to agree on matters which essentially should not only not be controversial, but which have already received substantial bipartisan support, as the gentleman has pointed out. I would like to say just for the sake of the RECORD that the original recommendations for providing additional assistance to our institutions of higher education came first, if I am correct in my recollection, from President Eisenhower, and a number of us, as long as 3 years ago, introduced legislation that would carry out his recommendations. So it is quite obvious that Congress has been somewhat slow in responding to a generally recognized need in an area where, as has been said, there has been little disagreement between the parties. So that that does not afford us an excuse for the lack of action. I would like to ask the gentleman if he happened to notice the newspaper accounts yesterday which indicated that the Democratic leadership in the Congress had sat down with the President and had developed a list of so-called must legislation to be enacted before the end of this session. I read the list with interest and with considerable regret because it was conspicuous that the college aid program was not on that must list.

Mr. QUIE. That is correct.

Mr. FRELINGHUYSEN. It appears to me that something seems to have happened to have provoked what I would still consider an unjustifiable feeling of pessimism. If the Democratic leadership has already written off college aid legislation, when there is relatively little controversy about the advisability of legislative action in this area, and if the chairman of the full House Committee on Education and Labor can hold a press conference to say, in effect, if I am correct, that college aid legislation is dead for this session, it would seem to me that, perhaps, there was more to it than meets the eye. I recognize that those of you who are conferees have had a substantial job, but I can only join in urging that prompt attention still be given to this problem so that a compromise may be worked out and that both Houses may see fit to enact legislation which, I am sure, President Kennedy would only be too anxious to sign even though he no longer, at the moment, considers it to be must legislation.

Mr. QUIE. I thank the gentleman. I was astounded that this was not considered as one of the must pieces of legislation. In one newspaper account which I read, it was just an added paragraph at the end put in by the reporter that, evidently, this piece of legislation is now bogged down in conference and that there does not seem to be any way that it can be brought out. That is why I have given this talk to show the House what really is at stake, because the differences are not that great. There is no reason why we cannot get together. We have indicated a willingness on the part of the House to compromise our differences within the facts that we have laid out, and if both sides will face up to this responsibly, there is no reason why we cannot provide this legislation this year.

Mr. GOODELL. Will the gentleman agree, if this legislation is dead, it is dead because the leadership has surrendered without a battle? They would surrender without a willingness to face an admittedly difficult issue, one that has bipartisan support.

Mr. QUIE. It seems to me there is plenty of time to do that before the Congress adjourns. It has also been stated, I understand by the leadership yesterday, that Congress does not plan to adjourn before September 15; so we have ample opportunity to meet day after day in conference and finally iron out our differences. You and I have already worked out some proposals which could meet the objections of both sides. What we need here is to get together and work out those differences.

Mr. GOODELL. I may say at that point that some proposals that have been worked out are based upon a bipartisan citizenship group to which the gentleman referred earlier, under the chairmanship of Mr. Pratt, in which recommendations were made in a unanimous report for aid to higher education. We are working around that report as a possible compromise.

We hope the Democratic and Republican conferees on the House side will agree, and the Republican conferees on the Senate side agree with the House position.

I think this is such critically important legislation with all the things we have done not only in this session but the two past sessions, that if we now neglect aid to higher education we will, as a consequence, be subject to very severe and to perfectly justifiable criticism. It will be, since there is a religious tendency in some of those controversies, along the lines of the Book of Common Prayer:

> We have left undone those things which we ought to have done, and have done those things which we ought not to have done; there is no good in us.

I think that very aptly describes the situation of this Congress with reference to this important issue. We must not fail to act at this time.

Mr. QUIE. I thank the gentleman for his comment.

The gentleman and I last fall had an opportunity to take this up with educators in a unique way in the hearings held by the Advisory Committee on Higher Education chaired by the gentleman from Indiana [Mr. BRADEMAS]. Instead of sitting down and interrogating each person in turn with questions and answers, we brought them in in groups of six or eight for a roundtable discussion.

I assure the House that the action we developed was of the utmost importance not only for the colleges but for the future of this country and the need of this country. It was brought to the attention of many, I think, that unless this country progresses through professional people not only in science, mathematics, and modern foreign languages, but also in the other disciplines, we cannot continue to be the greatest Nation in the world.

This is of such importance that we must act now, because it will take a long time to wait until another session can develop legislation to the point where it would become effective. The need is right here and now. The challenge is before us. It is necessary that we take this step for the progress of this Nation.

Mr. GOODELL. I agree with the gentleman. Knowing the thorough examination that has been made of the problems involved in aid to higher education, the bipartisan approach that has been taken on this legislation in our subcommittee and the full committee, it is hard to believe that aid to higher education is dead. I have no doubt in view of the press reports and statements that have apparently been leaked by the leadership, that it is dying, but I think the gentleman will agree with me that it would not take a great deal of courage and action to resuscitate it; and, especially, I believe that is the position that caused the gentleman to take the floor today, in an effort to resuscitate it.

Mr. QUIE. I thank the gentleman. That is exactly my purpose.

Mr. GRIFFIN. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield.

Mr. GRIFFIN. I rise in order to commend the gentleman for taking the floor to discuss this subject I am very much interested in the question. I also want to commend both the gentleman in the well and the gentleman from New York [Mr. GOODELL], who are serving so diligently and ably on the conference committee. I know they have been doing everything in their power to try to bring out a bill. I was very sorry to read in the press remarks attributed to the chairman of the Committee on Education and Labor that he does not think any legislation is going to appear during this session. I do not see any reason why that should be the result.

Both the gentleman in the well and the gentleman from New York are to be complimented. I urge them to continue their efforts.

Mr. QUIE. I thank the gentleman.

The **SPEAKER** pro tempore (Mr. BURKE of Massachusetts). Under previous order of the House, the gentleman from New York [Mr. HALPERN] is recognized for 5 minutes.

Mr. HALPERN. Mr. Speaker, as this session of Congress heads toward the homestretch, I wish to call to the attention of my colleagues a bill which I have sponsored, H.R. 7013, which would in substance protect the public from credit deception.

This bill is the same as the one sponsored in the other body by the distinguished Senator from Illinois, the Honorable PAUL H. DOUGLAS, who has provided such outstanding leadership in this vital consumer problem.

The legislation is popularly known as the truth in lending bill. It would require installment dealers, banks, and other lenders to disclose in advance the true annual interest rates and total finance charges for loans and time purchase. I fervently appeal to you, my colleagues, to support this legislation and to urge committee action on it before the session of Congress adjourns.

Mr. Speaker, to briefly summarize the bill, it would make it mandatory that a clear, written statement of total interest, fees, service costs, discounts, and other charges be stipulated to the borrower and installment buyer before the transaction is consummated.

Too often the average person is unaware of the full amount of interest charges and other costs he must pay when he borrows. The borrower, whether it be for a home, a car, a television set or any appliance or acquisition of property, ought to have the opportunity of knowing how much his total cost is going to be. And this should be mandatory in writing, and as simple as possible.

A true interest and credit carrying charge disclosure law will protect the public against the credit deceptions that have brought misery to so many families. Installment purchasing abuses are one of the biggest consumer problems of our times. And, with some $52 billion in consumer credit, exclusive of mortgages, outstanding in this country, it is obvious this represents a tremendous portion of our economy and it is essential to inform the borrower of his commitment.

Mr. Speaker, the proposed law would go a long way toward correcting abuses by requiring credit grantors to tell the truth about the cost of credit. It would make lenders and dealers tell you both the true annual interest rates and the total finance charges, including fees, service costs and discounts and other charges when you borrow or buy on time. The bill would require that any lender would have to furnish each borrower prior to the completion of the transaction a clear statement in writing setting forth the total amount of each charge to be borne by the borrower and the percentage that such amount bears to the outstanding principal obligations or unpaid balance expressed in terms of simple annual interest.

No longer then could the credit grantor merely say that the loan costs you "only 3 percent a month" or "you pay only 7 percent" or "you can buy this car for just $60 a month." If the consumer buys a car on time the monthly payments would have to be broken down to show what part is for the auto, what part is for service fees, what part represents interest charges each month, and what the true rate of interest is, and so forth. This certainly seems reasonable enough.

If lenders and dealers are required to tell the simple truth the public will know how much interest and charges it pays and can compare these rates with those charged by others. In other words, when the consumer goes into a transaction, he will do so with his eyes wide open. It is important to note that the proposed law does not tell any creditor that he cannot levy the charges in question. All it does is simply require that the consumer be simply informed how much he is paying for and what for.

Mr. Speaker, enough time has gone by for every aspect of this legislation to have been considered. Ample opportunity has been given to all sides for a full study and evaluation of the legislation. I trust my colleagues will urge the committee to report the bill to the House in order that all Members may have the opportunity to vote on it.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Albert (at the request of Mr. McCormack) for an indefinite period on account of a death in the family.

Mr. Inouye (at the request of Mr. Boggs) for Tuesday, Wednesday, and Thursday of this week on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. Lipscomb (at the request of Mr. Keith) for 30 minutes on Thursday, August 9, 1962.

Mr. Halpern (at the request of Mr. Keith) for 5 minutes today.

Mr. Clem Miller for 45 minutes on Monday, August 13, 1962.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Congressional Record, or to revise and extend remarks was granted to:

Mr. Lane in two instances and to include extraneous matter.

Mr. Pelly in two instances and to include extraneous matter.

Mr. Montoya.

Mr. Anfuso.

(The following Members (at the request of Mr. Keith) and to include extraneous matter:)

Mr. Curtis of Missouri.

Mr. Hoeven.

Mr. Dooley.

Mr. Fino.

Mr. O'Konski.

Mr. Fulton.

(The following Members (at the request of Mr. Boggs) and to include extraneous matter:)

Mr. Kowalski.

Mr. Flood.

Mr. Dent.

Mr. Boland.

Mr. Morris.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 296. An act for the relief of Hanna Ghosn.

S. 1174. An act for the relief of Dr. Kwan Ho Lee;

S. 1882. An act for the relief of Assunta Bianchi;

S. 2455. An act for the relief of Mrs. Elizabeth Lovic;

S. 2572. An act for the relief of Merritt-Chapman and Scott Corp.;

S. 2614. An act for the relief of Mr. and Mrs. Alfredo Hua-Sing Ang;

S. 2675. An act for the relief of Yiannoula Vasiliou Tsambiras;

S. 2769. An act for the relief of Renato Granduc and Grazia Granduc;

S. 2807. An act for the relief of Mrs. Juliane C. Rockenfeller; and

S. 2844. An act for the relief of Alice Amar Froemming.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on August 7, 1962, present to the President, for his approval, a bill of the House of the following title:

H.R. 2206. An act to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Frying-pan-Arkansas project, Colorado.

ADJOURNMENT

Mr. NEDZI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 56 minutes p.m.) the House adjourned until tomorrow, Thursday, August 9, 1962, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2384. A letter from the Secretary of the Army, transmitting a letter from the Chief Engineers, Department of the Army, dated June 22, 1962, submitting a report, together with accompanying papers and illustrations on a review of the reports on the Gulf Intracoastal Waterway Channel to Palacios, Tex., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted September 13, 1944 (H. Doc. No. 504); to the Committee on Public Works and ordered to be printed with two illustrations.

2385. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 7, 1962, submitting a report, together with accompanying papers and illustrations on an interim hurricane survey of Port Arthur and vicinity, Texas, authorized by Public Law 71, 84th Congress, approved June 15, 1955 (H. Doc. No. 505); to the Committee on Public Works and ordered to be printed with two illustrations.

2386. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 19, 1962, submitting a report, together with accompanying papers and illustrations on an interim report on the Clear Fork of the Brazos River, Abilene area, Tex., requested by a resolution of the Committee on Public Works, House of Representatives, adopted July 29, 1953 (H. Doc. No. 506); to the Committee on Public Works and ordered to be printed with two illustrations.

2387. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated May 28, 1962, submitting a report, together with accompanying papers and illustrations, on a survey of the Salt River, Mo., authorized by the Flood Control Act approved June 22, 1936 (H. Doc. No. 507); to the Committee on Public Works and ordered to be printed with 10 illustrations.

2388. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated July 16, 1962, submitting a report, together with accompanying papers and illustrations on a review of the report on Cape Fear River Basin, N.C., requested by a resolution of the Committee on Flood Control, House of Representatives, adopted May 2, 1946 (H. Doc. No. 508); to the Committee on Public Works and ordered to be printed with five illustrations.

2389. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated July 6, 1962, submitting a report, together with accompanying papers and an illustration, on the Great Lakes harbors study—interim report on the Rouge River, Mich., requested by resolutions of the Committees on Public Works, U.S. Senate and House of Representatives, adopted May 18, 1956, March 16, 1954, and June 27, 1956 (H. Doc. No. 509); to the Committee on Public Works and ordered to be printed with one illustration.

2390. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 20, 1962, submitting a report, together with accompanying papers and illustrations on a review of the reports on Little Neck Bay, N.Y., requested by resolutions of the Committees on Public Works, U.S. Senate and House of Representatives, adopted November 14, 1957, and July 16, 1958 (H. Doc. No. 510); to the Committee on Public Works and ordered to be printed with two illustrations.

2391. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated March 22, 1962, submitting a report, together with accompanying papers and illustrations on an interim hurricane survey of Wrightsville Beach, N.C., authorized by Public Law 71, 84th Congress, approved June 15, 1955 (H. Doc. No. 511); to the Committee on Public Works and ordered to be printed with five illustrations.

2392. A letter from the Secretary of the Army, transmitting a letter from the Acting Chief of Engineers, Department of the Army, dated March 22, 1962, submitting a report, together with accompanying papers and an illustration on an interim report on the Pinal Creek and tributaries, Arizona, authorized by the Flood Control Act approved June 28, 1938 (H. Doc. No. 512); to the Committee on Public Works and ordered to be printed with one illustration.

2393. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated May 4, 1962, submitting a report, together with accompanying papers and illustrations, on a review of the reports on, and a survey of the harbors on the Mississippi River between the mouth of the Missouri River and Minneapolis, Minn., requested by resolutions of the Committee on Public Works, U.S. Senate, adopted March 4, 1947, and August 26, 1955, and by a resolution of the Committee on Public Works, House of Representatives, adopted April 22, 1947. It is also in review of reports on surveys authorized by the River and Harbor Acts approved March 2, 1945, and July 24, 1946, and the Flood Control Act approved July 24, 1946 (H. Doc. No. 513); to the Committee on Public Works and ordered to be printed with six illustrations.

2394. A letter from the treasurer, National Shrine to the Jewish War Dead, Washington, D.C., transmitting a copy of the financial report of the Jewish War Veterans, U.S.A., National Memorial, Inc., for the period April 1, 1961, to March 31, 1962, pursuant to Public Law 85–903; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DELANEY: Committee on Rules. House Resolution 748. Resolution for consideration of H.R. 8874, a bill to authorize certain banks to invest in corporations whose purpose is to provide clerical services for them, and for other purposes; without amendment (Rept. No. 2143). Referred to the House Calendar.

Mr. DELANEY: Committee on Rules. House Resolution 749. Resolution for consideration of S. 1005, an act to amend section 10 and section 3 of the Federal Reserve Act, and for other purposes; without amendment (Rept. No. 2144). Referred to the House Calendar.

Mr. THORNBERRY: Committee on Rules. House Resolution 750. Resolution for consideration of H.R. 12336, a bill to amend the Atomic Energy Act of 1954, as amended, and for other purposes; without amendment (Rept. No. 2145). Referred to the House Calendar.

Mr. THORNBERRY: Committee on Rules. House Resolution 751. Resolution for consideration of H.R. 1341, a bill to require passenger-carrying motor vehicles purchased for use by the Federal Government to meet certain safety standards; without amendment (Rept. No. 2146). Referred to the House Calendar.

Mr. THORNBERRY: Committee on Rules. House Resolution 752. Resolution for consideration of H.R. 9045, a bill to amend the Trading With the Enemy Act, as amended; without amendment (Rept. No. 2147). Referred to the House Calendar.

Mr. BURLESON: Committee on House Administration. House Joint Resolution 712. Joint resolution to authorize and direct the Franklin Delano Roosevelt Memorial Commission to raise funds for the construction of a memorial; with amendment (Rept. No. 2148). Referred to the Committee of the Whole House on the State of the Union.

Mr. RUTHERFORD: Committee on Armed Services. H.R. 11887. A bill to provide for the conveyance of all right, title, and interest of the United States reserved or retained in certain lands heretofore conveyed to the city of El Paso, Tex.; with amendment (Rept. No. 2149). Referred to the Committee of the Whole House on the State of the Union.

Mr. PRICE: Committee on Armed Services. H.R. 12081. A bill to authorize the Secretary of the Army to convey certain land and easement interests at Hunter-Liggett Military Reservation for construction of the San Antonio Dam and Reservoir project in exchange for other property; without amendment (Rept. No. 2150). Referred to the Committee of the Whole House on the State of the Union.

Mr. GEORGE P. MILLER: Committee on Science and Astronautics. Report on Project Anna Geodetic Satellite System; without amendment (Rept. 2151). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Twenty-second report pertaining to Tennessee Valley Authority urgent purchases; without amendment (Rept. No. 2152). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. H.R. 9957. A bill to amend section 7 of the Administrative Expenses Act of 1946, as amended (72 Stat. 1274; 5 U.S.C. 73b–3), relating to travel expenses of civilian officers and employees assigned to duty posts outside the continental United States; without amendment (Rept. No. 2153). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. H.R. 11594. A bill to extend for 2 years the period for which payments in lieu of taxes may be made with respect to certain real property transferred by the Reconstruction Finance Corporation and its subsidiaries to other Government departments; without amendment (Rept. No. 2154). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 12712. A bill to assist the States to provide additional facilities for research at the State agricultural experiment stations; without amendment (Rept. No. 2155). Referred to the Committee of the Whole House on the State of the Union.

Mr. EDMONDSON: Committee on Interior and Insular Affairs. S. 981. An act to extend certain authority of the Secretary of the Interior exercised through the Geological Survey of the Department of the Interior, to areas outside the national domain; with amendment (Rept. No. 2156). Referred to the Committee of the Whole House on the State of the Union.

Mr. VINSON: Committee on Armed Services. House Concurrent Resolution 509. Concurrent resolution providing the express approval of the Congress, pursuant to section 3(e) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b(e)), for the disposition of certain materials from the national stockpile; without amendment (Rept. No. 2157). Referred to the Committee of the Whole House on the State of the Union.

Mr. BATES: Committee on Armed Services. H.R. 12416. A bill to authorize the sale, without regard to the 6-month waiting period prescribed, of chestnut extract proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act; with amendment (Rept. No. 2158). Referred to the Committee of the Whole House on the State of the Union.

H.R. 12843. A bill for the relief of Pasquale Evangelista; to the Committee on the Judiciary.

By Mr. SIBAL:

H.R. 12844. A bill for the relief of Jacob I. Bellow; to the Committee on the Judiciary.

SENATE

WEDNESDAY, AUGUST 8, 1962

The Senate met at 11 o'clock a.m., and was called to order by Hon. LEE METCALF, a Senator from the State of Montana.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O merciful God, whose law is truth, and whose statutes stand forever: We beseech Thee to grant unto us, who in the morning seek Thy face, fervently to desire, wisely to trace, and obediently to fulfill all that is pleasing unto Thee.

In these days so freighted with destiny, grant that those who here speak to the Nation and for the Republic may be so true to their high calling as servants of the common good that radiant joy may transfigure the drudgery of duty, and that on this new day appointed tasks may be met with purity of purpose, without moral compromise or craven fear.

In the dear Redeemer's name we ask it. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 8, 1962.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. LEE METCALF, a Senator from the State of Montana, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. METCALF thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, August 7, 1962, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 1849. An act for the relief of Stephen S. Chang;

S. 2208. An act for the relief of Su-Fen Chen;

S. 2835. An act for the relief of Sieu-Yoeh Tsai Yang; and

S. 3039. An act for the relief of Bartola Maria S. La Madrid.

The message also announced that the House had passed the bill (S. 2736) for the relief of Arie Abramovich, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 1410. An act for the relief of Norman R. Tharp;

H.R. 1427. An act for the relief of Ann Super, formerly Anka Grahovac;

H.R. 1450. An act for the relief of Maria Odelia Campos;

H.R. 1463. An act for the relief of Judy Josephine Alcantara;

H.R. 1678. An act for the relief of Jacques Tawil;

H.R. 2125. An act for the relief of Soon Tai Lim;

H.R. 2659. An act for the relief of Mrs. Jane R. Moore;

H.R. 2952. An act to direct the Secretary of the Interior to convey certain public lands in the State of California to the city of Needles;

H.R. 3125. An act for the relief of Joao de Freitas Ferreira de Vasconcelos;

H.R. 3619. An act for the relief of Gennaro Prudente;

H.R. 3719. An act for the relief of Pagona Pascopoulos;

H.R. 4478. An act for the relief of Aldo Francesco Carbone;

H.R. 4628. An act for the relief of Fotios Sakelaropoulos Kaplan;

H.R. 5317. An act for the relief of Mrs. Sun Yee (also known as Mrs. Tom Goodyou) and her children, Male Har Yee, Shee Bell Yee, and Male Jean Yee;

H.R. 5331. An act for the relief of Fotini Constantinos Voggas;

H.R. 6653. An act for the relief of Maurizio Placidi;

H.R. 12708. An act to increase the jurisdiction of the municipal court for the District of Columbia in civil actions, to change the names of the court, and for other purposes; placed on the calendar.

LIMITATION OF DEBATE DURING MORNING HOUR

On request of Mr. MANSFIELD, and by unanimous consent, speeches during the morning hour were ordered limited to 3 minutes.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Government Operations be permitted to meet during the session of the Senate today.

Mr. KUCHEL. Mr. President, reserving the right to object, may I ask the majority leader if that request has been cleared with the Republican side?

Mr. MANSFIELD. Oh, yes.

Mr. KUCHEL. I have no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MAGNUSON, from the Committee on Commerce, with an amendment:

S. 3517. A bill to authorize the Secretary of Commerce to establish and carry out a program to promote the flow of domestically produced lumber in commerce (Rept. No. 1860).

By Mr. McGEE, from the Committee on Commerce, without amendment:

S. 2358. A bill to improve the administration of transfers of certain real property for wildlife or other purposes by repealing the act of May 19, 1948, and incorporating the essential provisions thereof in the Federal Property and Administrative Services Act of 1949, as amended (Rept. No. 1865).

By Mr. HAYDEN, from the Committee on Rules and Administration, without amendment:

H.J. Res. 439. Joint resolution authorizing the State of Arizona to place in the Statuary Hall collection at the U.S. Capitol the statue of Eusebio Francisco Kino (Rept. No. 1861).

By Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, without amendment:

H. Con. Res. 500. Concurrent resolution authorizing the printing of additional copies of parts 2, 3, 6, and 7 of the hearings held before the Committee on Education and Labor on the impact of imports and exports (Rept. No. 1863);

H. Con. Res. 503. Concurrent resolution to authorize the printing as a House document the report of the Joint Committee on Arrangements To Commemorate the One Hundredth Anniversary of the First Inaugural of Abraham Lincoln (Rept. No. 1864);

S. Res. 365. Resolution to pay certain funeral expenses of the late Senator Henry C. Dworshak, of Idaho; and

S. Res. 367. Resolution authorizing the printing as a Senate document of a study entitled "Trial Program of Public Land Range Appraisal" (Rept. No. 1862).

COMMITTEE SERVICE—REPORT OF A COMMITTEE

Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, reported an original resolution (S. Res. 372) electing a member on the part of the Senate to the Joint Committee on the Library, which was placed on the calendar, as follows:

Resolved, That Mr. BOTTUM be, and is hereby, elected a member on the part of the Senate of the Joint Committee on the Library, vice Mr. PEARSON.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

James P. Alger, of Utah, to be U.S. attorney for the district of Guam.

By Mr. SCOTT, from the Committee on the Judiciary:

James R. Berry, of Pennsylvania, to be U.S. marshal for the western district of Pennsylvania.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JACKSON:

S. 3619. A bill for the relief of Frederick Ho Wolf; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 3620. A bill for the relief of CPO Boniface H. Diekman; to the Committee on Armed Services.

By Mr. KEFAUVER:

S. 3621. A bill to amend the Federal Food, Drug, and Cosmetic Act to assure the safety, efficacy, and reliability of nonprescription drugs by providing greater factory inspection; to the Committee on Labor and Public Welfare.

By Mr. WILLIAMS of New Jersey:

S. 3622. A bill for the relief of Mendel List, Rachel List, Fischal List, and Efraim List; to the Committee on the Judiciary.

By Mr. CARROLL:

S. 3623. A bill to amend title 10, United States Code, to authorize the Secretary of the Navy to take possession of the naval oil shale reserves, and for other purposes; to the Committee on Armed Services.

(See the remarks of Mr. CARROLL when he introduced the above bill, which appear under a separate heading.)

RESOLUTIONS

COMMITTEE SERVICE

Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, reported an original resolution (S. Res. 372) electing a member on the part of the Senate to the Joint Committee on the Library, which was placed on the calendar.

(See the above resolution printed in full when reported by Mr. JORDAN of North Carolina, which appears under the heading "Reports of Committees.")

COMMITTEE SERVICE

Mr. DIRKSEN submitted a resolution (S. Res. 373) making changes in the minority membership of the standing committees of the Senate, which was considered and agreed to.

(See the above resolution printed in full when submitted by Mr. DIRKSEN, which appears under a separate heading.)

STRENGTH OF THE MILITARY AND AIR FORCE ACADEMIES—AMENDMENTS

Mr. LONG of Louisiana submitted amendments, intended to be proposed by him, to the bill (H.R. 7913) to amend title 10, United States Code, to bring the number of cadets at the U.S. Military Academy and the U.S. Air Force Academy up to full strength, which were ordered to lie on the table and to be printed.

AMENDMENT TO HIGHWAY AUTHORIZATION MEASURE; MONONGAHELA NATIONAL FOREST ROAD PROPOSED

Mr. RANDOLPH. Mr. President, for myself and my colleague the Senator from West Virginia [Mr. BYRD], I have sent to the desk to be printed and appropriately referred an amendment intended to be proposed to the bill H.R. 12135, to authorize appropriations for the fiscal years 1964 and 1965 for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes; namely, on page 3, beginning with line 9, strike out all through line 11 and insert in lieu thereof the following:

(8) For public lands highways, $7,000,000 for the fiscal year ending June 30, 1964, of which $4,000,000 is for a highway between U.S. numbered Highways 19 and 50 through the Monongahela National Forest in West Virginia, and $7,000,000 for the fiscal year ending June 30, 1965, of which $4,000,000 is for such a highway between U.S. numbered Highways 19 and 50 through the Monongahela National Forest in West Virginia.

Mr. President, H.R. 12135, having been passed by the other body, was referred to our Committee on Public Works on July 19, 1962. Hearings presently are being held by our Subcommittee on Roads, under the chairmanship of the Senator from Michigan [Mr. MCNAMARA]. The purpose of this amendment would be to have authorized the implementation of a recommendation of the Forest Service of the U.S. Department of Agriculture contained in its preliminary reconnaissance report on a highland scenic highway in West Virginia through the Monongahela National Forest.

Mr. President, I request unanimous consent to have printed in the RECORD in connection with these remarks extracts from the introduction and general description of the proposed route from the Forest Service preliminary reconnaissance report on the proposed scenic highway through the Monongahela National Forest in our State.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and referred to the Committee on Public Works; and, without objection, the extracts will be printed in the RECORD.

The extracts are as follows:

INTRODUCTION

For many years, periodic proposals have been made by responsible individuals and organizations for construction of a scenic skyline drive through the heart of the Monongahela National Forest. Those who have advocated this construction feel that it would be a great tourist attraction as it would traverse some of the most spectacular mountains of the East and would open up vast new areas for recreation—camping, picnicking, photography, sightseeing, hunting, and fishing.

The Monongahela terrain consists of a series of long mountain ridges and valleys running from northeast to southwest. Principal highways serving the forest were originally built to handle light, slow-moving traffic. Although improvements in width, alinement, and grade have provided safer standards and accommodation for greater volumes of traffic so that these roads are now important links in the forest transportation system, none of them meets the qualifications of a scenic route with nationwide attraction.

Under the multiple-use program on the Monongahela, this scenic road would serve to tap extensive hardwood forests and would provide access for intensive development of water, wildlife, timber, and other renewable natural resources.

Estimates of acreages to which access for timber harvest and management would be improved, were based on the conditions that no activities that would impair esthetic values would be conducted within visual distance of the road; that a protective buffer zone would be maintained along the entire length of the route and that necessary operator-built spur roads could connect with the main highway only at those points where complete safety and a minimum of interference would be assured.

GENERAL DESCRIPTION OF ROUTE

The proposed "highland scenic highway" would extend for 160 miles through the Monongahela National Forest along the crests of the highest mountains in West

Virginia. Its southern terminus would be on State Route 39, one mile east of Richwood. Its northern terminus on U.S. 50, between Mount Storm and Gormania. Access to its southern end would be 32 miles from Inter-State Route 64 (present U.S. 60) via State Route 20 or 26 miles from U.S. 19 (proposed L.S.H.) via State Route 39.

In its 160-mile course the highway would climb from an elevation of 2,200 feet at Richwood through mature hardwood forests, previously inaccessible except by foot travel, past Summit Lake and potential impoundment sites to the top of 4,000-foot Kennison Mountain before dropping down to the unique Cranberry Glades. From this point, potential spur roads would carry the traveler to many nearby points of interest, including the newly developed 165-acre Sherwood Lake with its companion camp and picnic areas.

From Cranberry Glades, the road climbs again to follow the top of Black Mountain for 6 miles at an elevation of 4,500 feet. After dropping down to Williams River (good fishing) it climbs again to the top of Gauley Mountain with its vast area of coal strip mines, then down again to U.S. 219 at Slaty Fork.

Leaving U.S. 219 on top of Cheat Mountain, for 33 miles the road follows the meanders of the mountaintop, at elevations of 3,500 to 4,500 feet, past the headwaters of the Tygart Valley River and the Shavers Fork of the Cheat River. Short side trips over present or proposed roads would lead to such major attractions as the Greenbank Radio Astronomy Observatory, Seneca State Forest, and Stuart Reservation Area and Memorial Drive.

After dropping down to Shavers Fork of Cheat River at Bemis, the route follows the river to Glady before crossing Middle Mountain to drop again to the Laurel Fork of Cheat River (good fishing in both streams). Climbing again, the route reaches 3,500 feet at the famous Sinks of Gandy and 4,000 feet at Spruce Knob Lake and the top of Allegheny Mountain.

From Spruce Knob Lake the location follows the top of Allegheny Mountain for 50 miles (crossing U.S. 33, 8 miles from Seneca Rocks, passing the headwaters of the South Branch of the Potomac River with its famous Smoke Hole country; and passing within easy driving distance of Blackwater Falls) to its junction with U.S. 50.

The proposed highway extends through some of the best hunting territory on the Monongahela, much of it presently inaccessible. Because the road follows the ridge tops, fishing will rarely be found closely adjacent to the road. However, some of the finest trout fishing in West Virginia will be found within 5 miles of the highway via already existing access roads. In addition, 35 potential impoundment sites have been suggested on national forest land that lies within 2 miles of the proposed route.

Almost limitless possibilities exist along the proposed location for the development of forest recreation facilities of all kinds as well as for providing better access and expanded use of those already in existence. In addition, many areas of historical interest dealing with the Indian era and subsequent pioneering and early logging could be shown.

This highway would provide improved access and transportation to and from at least 270,000 acres of present and potential timber-producing land. It would create opportunity for increased timber management and improvement activities and increase the value and usefulness of present stands in supplying nearby forest products mills and markets.

The proposed highland route is readily susceptible to stage or "section" construction. Each completed section would be a valuable and usable link to the present road system.

Rights to the minerals underlying present national forest lands were reserved by the previous owners along several sections of the route. Especially important are the sections from Richwood to the Cranberry Glades, on Black and Gauley Mountains and in the headwaters of Shavers Fork. Where those minerals are susceptible to stripping or other forms of open pit operations the desirability of preserving esthetic, recreation and water quality values along the route may dictate the need for acquiring the mineral rights or adopting some form of zoning.

HOSPITAL MODERNIZATION ACT OF 1962—ADDITIONAL COSPONSOR OF BILL

Mr. CLARK. Mr. President, at its next printing, I ask unanimous consent that the name of the Senator from Colorado [Mr. Carroll] be added as a cosponsor of the bill (S. 3407) to provide for Federal assistance on a combination grant and loan basis in order to improve patient care in public and other nonprofit hospitals and nursing homes through the modernization or replacement of those institutions which are structurally or functionally obsolete, and for other purposes, introduced by me, for myself and other Senators on June 13, 1962.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF ANTIDUMPING ACT OF 1921—ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of August 3, 1962, the name of Mr. Scott was added as an additional cosponsor of the bill (S. 3606) to amend the Antidumping Act of 1921, introduced by Mr. Humphrey on August 3, 1962.

TRADE EXPANSION ACT OF 1962—ADDITIONAL COSPONSORS OF AMENDMENT

Under authority of the order of the Senate of August 3, 1962, the names of Mr. Yarborough and Mr. Morse were added as additional cosponsors of the amendment submitted by Mr. Bartlett (for himself and Mr. Magnuson) on August 3, 1962, to the bill (H.R. 11970) to promote the general welfare, foreign policy, and security of the United States through international trade agreements and through adjustment assistance to domestic industry, agriculture, and labor, and for other purposes.

NOTICE OF HEARING ON NOMINATION OF JOHN DE LAITTRE TO BE A MEMBER OF THE FEDERAL HOME LOAN BANK BOARD

Mr. ROBERTSON. Mr. President, as chairman of the Committee on Banking and Currency, I wish to give notice that a public hearing has been scheduled for Thursday, August 9, at 10 a.m., in room 5302 New Senate Office Building, on the nomination of John de Laittre, of Minnesota, to be a member of the Federal Home Loan Bank Board.

All persons who wish to appear and testify on this nomination are requested to notify Mr. Matthew Hale, chief of staff, Senate Committee on Banking and Currency, room 5300, New Senate Office Building, telephone Capitol 4-3121, extension 3921.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the Record, as follows:

By Mr. HRUSKA:

Article entitled "The Lesson of the Preamble," written by Senator Mundt and published in Highway Highlights magazine for June–July 1962.

TRIBUTE TO SENATOR McNAMARA

Mr. WILLIAMS of New Jersey. Mr. President, recently our distinguished colleague, the Senator from Michigan, Pat McNamara, chairman of the Senate's Special Committee on Aging, was presented with a citation from the National Retired Teachers Association and the American Association of Retired Persons.

The remarks made by Dr. Ethel Percy Andrus, president of the association, in presenting the citation, so typify the esteem in which the senior Senator from Michigan is held by all who know him that I ask unanimous consent that they be set forth at this point in the Record.

There being no objection, the remarks were ordered to be printed in the Record, as follows:

Remarks Made by Dr. Ethel Percy Andrus, Area 3 Conference of the National Retired Teachers Association and the American Association of Retired Persons, Manger-Hamilton Hotel, June 25, 1962, Washington, D.C.

Presenting a citation to Senator Pat McNamara in the form of a certificate of service for his contribution to the enrichment of retirement living, Dr. Andrus said:

"Senator Pat McNamara, a distinguished member of the board of education of the city of Detroit, dedicated exponent of labor, benefactor of the ill, the aged, as well as the youth of our Nation;

"U.S. Senator and official representative of the U.S. Senate for the International Labor Conference Convention at present in Geneva, Switzerland;

"The demands of service in your field as constructive statesman are all absorbing, yet you have always found time and energy to give to social reform and progress. You have brought to the solution of the problems of our time your concern and your tireless devotion.

"The accomplishments of your life are many; they have won for you our admiration and our affection.

"We delight, therefore, to honor you."

Mr. RANDOLPH. Mr. President, will my colleague yield?

Mr. WILLIAMS of New Jersey. I am pleased to yield.

Mr. RANDOLPH. It is a privilege to join with the Senator from New Jersey in commendation of the Senator from Michigan [Mr. McNamara]. I am fully conversant, as a member of the Committee on Aging, of the leadership of the capable Senator who chairs our group. These organizations act properly in citing our colleague for his humanitarism and service.

WISCONSIN'S LAW ENFORCEMENT OFFICERS ASSOCIATION

Mr. WILEY. Mr. President, the Wisconsin law enforcement officers—about a year ago—created an association, chartered by the State of Wisconsin.

The objective of the association is to promote more effective, efficient, and just enforcement of laws.

As a nation—dedicated to preserving maximum freedom of liberty for citizens—the quality of law enforcement determines, to a large degree, not only (a) effectiveness in combatting crime; but also (b) protecting the rights of individuals and preserving a climate of freedom.

As a nation, however, I believe we need to develop a greater respect for laws and law enforcement. Commensurate with our progress in this direction, I believe we can then reasonably expect, first, progress in reducing the ever-climbing rate of crime; second, greater citizen cooperation in crime prevention, detection, and punishment; and, third, a more nonviolent, serene climate in which to live in our respective communities.

Recently, the Wisconsin Law Enforcement Journal published an article relating to the splendid objectives of the Wisconsin Law Enforcement Officers Association.

I ask unanimous consent to have this article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FACTS ABOUT THE WISCONSIN LAW ENFORCEMENT OFFICERS ASSOCIATION

The Wisconsin Law Enforcement Officers Association is a nonpolitical, nonsectarian, nonprofit corporation chartered by the State of Wisconsin and having these principal objectives:

(a) To encourage the highest degree of skill and efficiency in police work and the highest standards of conduct by police officers.

(b) To strive for public recognition of police work as a serious profession and to encourage police officers to make a career of their profession.

(c) To help attract into police ranks the highest type of men by supporting a program for statewide civil service, adequate pay, fair tenure of office, ample retirement, and death benefits.

(d) To gather and disseminate useful and educational information pertaining to scientific crime detection, traffic control, gathering and preparing evidence, the laws of arrest, crime prevention, and similar police problems.

(e) To actively combat juvenile delinquency.

(f) To encourage wholehearted cooperation between all Federal, State, county, and local law enforcement officers and agencies; between those agencies and the general public, and between the various police associations and organizations in the State of Wisconsin.

Any full-time city police, chief of police, sheriff, highway patrolman, or agent of any Federal, State, county, municipal, or other local law enforcement agency or closely associated agency upon approval by the executive committee, police department, or investigating unit within the State of Wisconsin is eligible for active membership.

The Wisconsin Law Enforcement Officers Association is managed by its board of directors, which represents all ranks of the police profession—from patrolmen to commanding officers—and all sections of the State. Board meetings are held annually and at other times when needed. Between board meetings the association affairs are managed by its executive committee.

The Wisconsin Law Enforcement Officers Association owns and publishes an official magazine—the Wisconsin Law Enforcement Journal—which is circulated among its officers, directors, and members. It also is sent to highway patrolmen, city policemen, county policemen, wardens, sheriffs, and their deputies, Federal agents, judges, mayors, legislators, and other public officials throughout the State.

The Wisconsin Law Enforcement Officers Association is the only statewide police organization in Wisconsin in which all active law enforcement officers qualify for membership. It is the only association in which officers from all branches of the law enforcement profession are afforded equal voting rights, equal benefits, and equal representation.

The association was created by law enforcement officers. It does not duplicate the efforts or activities of any other law enforcement organization, but supplements the activities of those associations which comprise specific groups.

"WHY REDS TRY TO MAKE FRIENDS WITH BUSINESSMEN"

Mr. WILEY. Mr. President, dedicated to world conquest, communism continues its aggressiveness in all fronts—domestic and global.

The distinguished Director of the Federal Bureau of Investigation published a thought-provoking article entitled: "Why Reds Make Friends with Businessmen." Reflecting constructively upon Red techniques to clandestinely invade U.S. economy and steal our secrets of progress, I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY REDS MAKE FRIENDS WITH BUSINESSMEN

(By J. Edgar Hoover, Director, Federal Bureau of Investigation, U.S. Department of Justice)

Communist agents may try to get your secrets or sway your opinion. At this moment the Russians are doing everything they can to make friendly contacts with American businessmen—to meet them personally, to cultivate their friendship, to establish cordial relations.

Why? Because the Communists have changed their view that the businessman is a monopolist or exploiter? No.

Because the Russians want to become like American businessmen? No.

It is because the Russians want to obtain—by begging, borrowing, or stealing—the industrial secrets of American business.

For this reason American industrial firms are today a priority target of Russian and satellite espionage, especially businessmen handling scientific and technical information. Perhaps you have been contacted as part of this campaign.

Not long ago a business firm ran a routine newspaper advertisement saying that it would send upon request a free booklet about the American aircraft industry. Shortly afterward an official of the Soviet Embassy requested a copy. The firm's Washington representative mailed it to him.

Approximately 3 months later, the local representative received an invitation to a social function at the Russian Embassy. He accepted. While he was there, the Soviet official who had originally requested the booklet sought him out. The Russian was most affable and during a brief conversation alluded to the information about the aircraft industry. He commented that the data was most interesting and wondered whether the businessman had more.

PERSONAL CONTACTS IMPORTANT

The request for a free booklet is a technique often utilized to make an initial contact. Sometimes the Russians write a letter on their own initiative requesting pamphlets, books, maps, and other material from business firms. They may visit a company personally. They want to obtain literature but also—and this is most important—they want to make personal contacts with you, a businessman.

Attending conventions, especially those of a scientific and technical nature, is a favorite way of making contacts. Soviet officials systematically cover conventions throughout the country. Here they gather material of every possible description—anything they can lay their hands on. It is amazing to see the voracious Soviet appetite—everything from telephone directories to radar devices, from aerial photographs to scientific textbooks. If the convention provides carry-home folders for the convenience of visitors, the Russians stuff them with material. Often they make trips to their automobiles, dumping out their collections. On the west coast two Soviet officials lugged an estimated 250 pounds of material from a scientific convention.

Individual exhibition booths receive special attention from the Communists. Here they gather literature, sign their names for free samples or brochures and make personal contacts. As a rule they make no secret of their identity—registering for the convention and wearing name tags. They love to exchange business cards. The businessman's card gives them a name for a possible future contact.

At one technical exhibition, a Soviet official took motion pictures, including some of jet aircraft, guided missiles and an atomic cannon. The Soviets especially exploit social affairs connection with conventions, such as banquets, receptions, luncheons, cocktail hours. They mingle, shake hands and introduce themselves. These functions provide excellent opportunities to size up the businessman.

The Soviets capitalize on the friendliness and gregariousness of Americans. Soviet officials are socially polished, well educated and speak good English. Some years ago it was easy to spot a Soviet official in a crowd—from his clothes and behavior. This is no longer true. They dress in American style and are thoroughly acquainted with our customs and etiquette. Above all, they are socially aggressive. They don't hesitate to stop a stranger and introduce themselves. Within a few minutes they have a conversation going.

REDS EXPLOIT FREEDOMS

These Soviet activities are entirely legal. Under our form of government the Russians have every right to visit conventions, talk to Americans, use our mail. They buy patents by the thousands, subscribe to technical, scientific, and other journals, belong to scientific societies, travel widely, make speeches. In typical Communist fashion they are exploiting our freedoms to the hilt—freedoms which they would immediatedy deny us if they seized control of this country.

A casual contact achieved at a convention, through the mail, or by a chance acquaintance, however, is not enough. The next step is to develop it. How is that done?

Of course, many of the initial contacts remain just that. However, if the Soviets feel they can benefit, they will follow through. This may not come for several months. One day the businessman gets a telephone call:

"This is ———. Remember you met me at such and such a convention or affair."

Or the caller may say, "I'm ———, a friend of ———," referring to another Russian who had met the American.

The second contact may come in a matter of hours or days. The businessman may receive an invitation to a Soviet social function. He may receive presents (as at Christmas)—a bottle of vodka, a tin of caviar, or some kind of trinket. The official often delivers these in person. Why in person? The gift is merely a technique to establish or renew a personal contact. Bringing it provides the opportunity for a person-to-person meeting and almost invariably creates a grateful feeling in the recipient.

Then there is the invitation to lunch. The Soviets have expense accounts and do not hesitate to pay the bill. Also they are happy to accept invitations to visit American homes. There is no better way of creating a feeling of familiarity and trustworthiness.

BLACKMAIL MAY RESULT

The Soviets capitalize on the curiosity of Americans. One individual happened to be seated at a banquet table with a Russian official. Since this was the first Russian he had ever met, he asked a great number of questions—a natural reaction. By the time the dinner was over, mutual social invitations had been extended.

If the Soviets learn that a businessman has a hobby such as fishing, playing golf or traveling, they happen to have similar hobbies. Remember these people are well educated and well traveled and can talk with authority and persuasiveness in many fields. If an American was born or lived in Russia or an Iron Curtain country, the Soviets quickly try to turn these facts to their advantage.

Who is this businessman? What's his background? To what information does he have access? Can he guide the Russians to other individuals in the scientific field? Does he have friends in the military services or the Government? These are the questions the Russians are trying to answer. The businessman, of course, doesn't realize how closely he's being scrutinized by this affable, smiling, trusting Soviet. To the American, this is merely a social or business contact (the Russian may actually place some business orders) and, as good etiquette, he's trying to be as friendly as possible.

That's why the Russians ask the businessman many questions—some directly, some obliquely. Is the businessman in the Naval Reserve? Where has he previously worked? Does he ever enter classified areas in plants having defense contracts? Has he ever been in trouble? (The Russians want to know personal details of the American's life. Among other things they are alert for a possible weakness which can be exploited. Blackmail is not above their practices.)

In one conversation with a Russian, a business executive happened to mention the name of an employee in an aircraft plant. Immediately the Soviet wanted to know how to spell the name. He might be a new contact.

In the back of the Soviet mind—in all these contacts—is the possibility that highly secret, classified material can be obtained. Public source intelligence is important. Tons of American documents, patents, maps, magazines, publications go to Moscow each year. But a basic concern of the Russian intelligence system is to steal America's classified military, technical, scientific, and industrial secrets.

That's the purpose of the Russian spy apparatus. That's why these men have been so carefully trained. That's why the FBI's experience indicates that an extremely high percentage of Soviet officials in the United States have espionage assignments.

WHEN ESPIONAGE BEGINS

Take, for example, a businessman who, after the initial contact, was invited to social functions and luncheon appointments. Almost a year had elapsed since the Russians originally obtained his name. Then the Soviet, at the luncheon table, went into more detail. He was preparing, he said, a report on economic conditions in the electronics industry—and would be in a position to pay money for information. He wanted the data quickly.

Obviously the Russian felt he had played along with this businessman far enough so that he could ask for detailed information. Note that the request is still innocuous, nothing yet dealing with classified data.

In another instance, at a meeting with a businessman, the Soviet was more specific. He indicated that he was no longer interested in public material and specifically requested information about certain aircraft models, production rates and performance evaluations. The Russian was now entering the realm of espionage, violating the laws of the United States.

The Soviet interest also encompasses the businessman not engaged in scientific and technical fields. For example, in an eastern city a Soviet official frequented a certain bookstore. He soon made friends with the proprietor and later invited the businessman and his wife to dinner. But this was not to be money just wasted for entertainment. The Russial had an inquiry. Could he use the businessman's store as a place to receive mail? In espionage language this was a mail drop, and an important part of the spy apparatus.

Besides Soviet espionage, the businessman is also the target of the Communist Party, U.S.A. The party denounces the businessman as an enemy, yet it does everything it can to influence his opinion. The party, for example, urges businessmen to take a favorable view of the Soviet Union, to trade with Communist nations, to realize that communism is the wave of the future. This is part of the party's propaganda campaign.

Also you may have received in the mail unsolicited copies of party pamphlets, literature, and newspapers. Sometimes you may receive—again unsolicited—letters from organizations you never heard of—but, if you took the time to investigate, you would learn they are Communist fronts. They are sending you propaganda and urging, this never fails, a financial contribution. The party likes nothing better than to have a businessman, not realizing the identity of the organization, contribute to a front, sign one of its petitions, or publicly support a Communist-sponsored campaign.

Where does the party obtain your name? Perhaps from the newspaper, mailing lists, telephone directory. This is part of its unending effort of pressing forward its position, hoping to benefit its cause.

The party is also interested in infiltrating and controlling labor unions. This has been a major Communist policy since Lenin. Labor unions have done a magnificent job in ridding themselves of Communist influence, but party pressure continues. If possible, the party would like to infiltrate business firms and has been known to operate businesses as covers. Members of the party who are businessmen—and there are some—lend their facilities to Communist use, if the party desires. Financial angels in business ranks are highly esteemed by party leaders.

Businessmen, of course, are not the only targets of Russian espionage and the Communist Party, U.S.A.—so are Government employees, labor officials, scientists, skilled technicians, farmers. Businessmen do represent a priority target—and because you rate such an important target you, as a businessman, can do much to help the FBI defeat this Communist effort to weaken our Nation.

What can you do?

1. Know more about communism, its strategy and tactics and how the Communists are working to destroy our democratic principles. If you are an employer, encourage your employees to take the time to learn about the evil of this way of life. The distribution of reading material within your company is most desirable.

2. Be familiar with basic Communist newspapers, magazines, and periodicals. If they arrive in your plant, you and your staff will be able to recognize them. Perhaps you can help your employees identify them.

3. Know how Communist fronts operate. Take the time to be informed about how fronts are formed, how they propagandise, issue literature, and collect money.

4. Realize that business enterprises and labor unions are prime targets. The Communists detest both business and labor unions. They regard both as part of the hated bourgeois society. Many people feel that because they are anti-Communists the Communists are not interested in them. This is wrong. The Communists are constantly trying to influence the thinking of non-Communists.

5. Businessmen who are employers should be extremely conscious of plant security, realizing that the Communists (especially Russian espionage agents) try to find weak points—both in personnel and physical facilities. Effective plant security is a vital and continuing responsibility.

6. Report to the FBI any information pertaining to espionage, sabotage, and subversive activities. The FBI is the Government agency charged with protecting the internal security of the Nation.

You, as a businessman, stand today in a key position to help the FBI and protect our Nation from the Russian espionage agent and the Communist. Perhaps you may feel the information you possess is inconsequential. Resolve your doubts by reporting it immediately to the FBI. Many times a small piece of information, when placed with data already in our possession, may solve an important case.

We can defeat the Communists by working together as a team. That is our challenge.

NATIONAL HIGH SCHOOL ORCHESTRA

Mr. HART. Mr. President, on Monday President Kennedy was host to the National High School Orchestra of the National Music Camp at Interlochen, Mich.

I read, without surprise, that it was a flawless performance. We in Michigan have learned to expect flawless performances from these youngsters.

Each year, their director, Dr. Joseph Maddy, manages to draw from the Nation a collection of talent just a little greater than the previous year's.

It seems unlikely that he will be able to surpass yesterday's performance but I refuse to go on record as saying so. There is nothing Dr. Maddy will tackle with more enthusiasm than an impossible achievement. In fact, sometimes we in Michigan suspect that is the only kind he will bother with.

We in Washington are not known to be ungenerous with superlatives when we discuss constituents. But when I call this orchestra "magnificent," I am merely repeating the opinion of expert musicians who are far more sparing with praise than any politician.

Mr. President, I am hopeful that the Department of State and the U.S. Information Agency will be able to arrange for this orchestra to join other American orchestras that have toured the world as part of our cultural exchange program.

Europeans are not unused to great music. But I am sure they will be impressed by great music played by musicians so young.

The members of this 103-piece orchestra come from across the Nation. No group could better represent the cultural achievements of our 50 States.

They have captivated everyone they have played for. I propose an oversea tour not to do these youngsters a service, but to do our Nation a service.

The ACTING PRESIDENT pro tempore. Morning business is in order. Is there any further morning business? If not, morning business is closed.

PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. MANSFIELD. Mr. President, what is the pending business?

The ACTING PRESIDENT pro tempore. Under the unanimous-consent agreement previously entered into, the pending business, the Pacific Northwest power preference bill, automatically comes before the Senate at this time, under the debate limitations agreed to.

Mr. MANSFIELD. Mr. President, I yield 20 minutes on the bill to the Senator from Delaware [Mr. WILLIAMS].

The ACTING PRESIDENT pro tempore. The Senator from Delaware is recognized for 20 minutes.

PROPOSED EXTENSION OF 1961 KENNEDY-FREEMAN FEED GRAINS PROGRAM

Mr. WILLIAMS of Delaware. Mr. President, there is now pending on the Senate Calendar a bill providing for an extension of the 1961 Kennedy-Freeman feed grains program. Under this program, the Government pays farmers as high as $50 per acre to retire grain-producing acreage from production.

At the time of its enactment in 1961, it was claimed that this program was designed to help the small family farm; but the results have been quite the contrary. Its benefits have largely accrued to the corporate type of farming operation. Only the very large farmers could really cash in.

This program definitely does not benefit the small farmer. A small family-type farmer cannot so readily curtail his operation. He must still keep a tractor, combine, planters, and other types of equipment in operating condition. His equipment and labor costs are not lessened if he puts a part of his acreage under lease to the Government under the feed grains program. His expenses are the minimum fixed liabilities, and they continue even though he lets a part of his farm lie idle.

On the other hand, the corporate-type owner and a large operator can take their acreage out of production, put some of their tractors, combines, and other equipment in the barn, dismiss their employees, and spend the winter in Florida on the cash benefits which they collect from the Federal Treasury for the land being retired from production.

On July 18 of last year, I called attention to the fact that in 1961 the Department of Agriculture had contracted to pay the American farmers around $680 million to retire 20 million acres of corn-producing land from production; but based upon their own figures, while they paid $680 million to retire this 20 million acreage from corn production, the 1961 corn acreage actually received a reduction of only 15,379,000 acres. Thus they paid approximately $150 million to retire 4.5 million phantom acres of cropland.

As evidence of the complete failure of the Kennedy-Freeman farm program, last week the Department of Agriculture released its annual report showing an increase of 20 million bushels of corn placed under loan over the preceding year.

Upon my request, the Department of Agriculture has compiled a list of the payments under the 1961 feed grains program in excess of $10,000. This report shows that eight "farmers" received in excess of $50,000 apiece, with the Farmers Investment Co., Tucson, Ariz., receiving the largest payment—$94,092.30.

Nine "farmers" were paid between $40,000 and $50,000. In this group are the Northern Trust Co., Chicago, Ill., and the Louisiana State Penitentiary, with payments of $41,253.68 and $45,414, respectively. Under the Kennedy-Freeman farm program, as recommended in 1962 to the Congress, these payments not only would have continued, but it would have been mandatory that the farmers participate, even under the threat of fines and the penitentiary for noncompliance. This raises a most interesting question: Just how would Secretary Freeman put a penitentiary in the penitentiary for noncompliance?

Fourteen farmers received between $30,000 and $40,000. Billie Sol Estes was in this group, with a $22,875.24 payment.

I shall place in the RECORD a complete list of the payments, under the 1961 Kennedy-Freeman feed grains program, in excess of $10,000 each. However, as I incorporate this report in the RECORD it should be pointed out that while we may be critical of this law as recommended by the Kennedy administration, these payments were authorized by the Congress. Yes, these payments were legal; and the only way Congress can stop this wasteful program is to defeat the proposed extension of the law, which legislation is now pending on the Senate Calendar.

Our criticism of these extravagant payments should be directed against the administration and the Congress which approved the program, rather than against the parties receiving the payments.

In fact, as has already been pointed out, should President Kennedy and Secretary Freeman get their farm program, as recommended to the Congress, enacted into law, not only would these payments continue, but in most instances their acceptance would be mandatory. The Kennedy administration recommends a program which will force these corporations, banks, individuals, penitentiaries, and so forth, to participate in the farm program, and thereby establish their eligibility for the payments. The Kennedy-Freeman farm program, as recommended to the Congress in 1962, actually provided penalties should the farmers refuse to curtail their operations and accept these gratuities.

Unquestionably the Kennedy-Freeman farm program will bankrupt the Treasury unless it bankrupts the farmers first; and to prove that point, I shall cite just a few examples of how the taxpayers' dollars were poured out to corporations whom the Kennedy-Freeman group classified as eligible farmers under the 1961 feed grains program. Some of these payments were itemized in a report which I made to the Senate on June 8.

For example, that report showed several major corporations qualified as "farmers" under the 1961 feed grains program, and thereby they collected substantial payments. They were:

California Packing Corp.:	
Woodland, Calif	$7,298.28
Crystal City, Tex	7,881.95
Total	15,180.23
Reynolds Metals Co., Henderson, Ky	12,984.32
American Crystal Sugar Co., Rocky Ford, Colo	10,791.54
Ford Motor Co., Belleville, Mich	5,394.88

Two large banks likewise qualified as "farmers" eligible for payments under the 1961 feed grains program. These were:

Milliken Trust Co., Decatur, Ill	$6,434.62
Northern Trust Co., Chicago, Ill	41,253.68

Two colleges also established eligibility as "farmers," and thereby were eligible for payments under the Kennedy-Freeman program.

University of Illinois, Urbana, Ill	$6,598.43
St. Benedict's College, Atchison, Kans	11,575.69

Two penitentiaries qualified as "farmers" under the 1961 Kennedy-Freeman farm program, and were thereby eligible for payments.

Glades State Prison Farm, Belle Glade, Fla	$6,818.40
Louisiana State Penitentiary, Angola, La	45,414.00

Two airports are listed as eligible "farmers" under this program, and received payments as follows:

Waterloo Municipal Airport, Waterloo, Iowa	$5,846.75
Kearney Municipal Airport, Kearney, Nebr	6,707.70

Even the city of St. Louis, Mo., was classified as a "farmer" under the 1961 Kennedy-Freeman feed grains program, and collected $12,203.91; and a motel—Sand & Sage Motel, Inc.—in Dimmitt, Tex., was listed as a "farmer," and collected $9,409.04.

The Delta & Pine Land Co., of Scott, Miss., qualified as a "farmer," and collected $11,409.68. This operation is not even owned by Americans; it is owned by the Fine Spinners & Doubles, Ltd., of Manchester, England. Just how a British corporation in Manchester, England, owning land in America, could qualify as an American farmer eligible for subsidy payments is something only the imagination of a New Frontiersman could comprehend.

The wonder boy from Texas was on this gravy train: Billie Sol Estes qualified as a farmer, and collected $22,875.24 from the Department of Agriculture, under the 1961 Kennedy-Freeman feed grains program. This payment to Mr. Estes appears in the report in the name of Agriculture Inc., Post Office Box 155, Girvin, Tex., but the record shows that this was one of Mr. Estes' operations.

As further evidence that this feed grains program is designed to help the large operator, rather than the small farmer, I call attention to this interesting point: The Farmers Investment Co., of Tucson, Ariz., with its $94,092.30 payment, received more money under the 1961 feed grains program than did all of the 68,000 farmers in the five States of Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island combined. Billie Sol Estes' payment of $22,875.24, under the 1961 feed grains program, represented more than was received by all of the 35,000 farmers in the three States of Maine, New Hampshire, and Rhode Island.

The Louisiana State Penitentiary received more money under the 1961 Kennedy-Freeman feed-grains program than was received by all of the 38,000 farmers in the four States of Maine, New Hampshire, Rhode Island, and Nevada.

The city of St. Louis under the New Frontier definition qualified as a bona fide farmer and collected under the 1961 feed-grains program more money than was paid to all of the 17,000 farmers in the State of Massachusetts.

The Ford Motor Co., the California Packing Co., and the Reynolds Metals Co., all listed on the New York Stock Exchange, were qualified as farmers under the 1961 Kennedy-Freeman feed-grains program and collected more than was paid to all of the 52,000 farmers in the four States of Maine, New Hampshire, Massachusetts, and Rhode Island.

Within the next few days the Senate will be voting upon the question of extending this same feed-grains program another year, and if it is extended these same type payments will continue. Let there be no misunderstanding on that point. The only way to stop this wasteful practice is to defeat the bill.

This is not a program for the real farmers. This is just another "New Frontier boondoggle" designed to let a lot of large corporations and landowners qualify as "family farmers" for the purpose of getting a free ticket on the Kennedy-Freeman gravy train.

It is time that Congress and the Kennedy administration recognize the folly of this program, and the proposal which will be before the Senate in the next couple of weeks providing for its further extension should be overwhelmingly defeated.

At this point I ask unanimous consent to have printed in the RECORD a complete list of payments in excess of $10,000 made under the 1961 feed-grains program.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Value of payment-in-kind feed grain certificates issued to producers under 1961 feed grain program

Name	Address	Value of payment-in-kind certificates	Name	Address	Value of payment-in-kind certificates
OVER $50,000					
Farmers Investment Co	288 South Stone, Tucson, Ariz	$94,092.30	RLDS Church Farms	Independence, Mo	$65,183.58

PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. JACKSON. Madam President, I suggest the absence of a quorum, and I ask unanimous consent that the time taken for the quorum call be divided equally between the two sides.

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JACKSON. Madam President, I ask unanimous consent that further proceedings under the quorum call may be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KUCHEL. Madam President, so that there may be no misunderstanding, I am sure it is agreeable with my good friend the acting majority leader [Mr. JACKSON] that the time used for the call of the roll be charged equally from the time allocated to argument on the bill.

The PRESIDING OFFICER. That is the understanding.

Mr. JACKSON. Madam President, I yield such time as the distinguished minority whip desires to use in connection with the pending amendments.

Mr. KUCHEL. I thank the Senator.

Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KUCHEL. What is the pending question?

The PRESIDING OFFICER. The pending question is on agreeing to the amendments of the Senator from Arizona, as modified.

Mr. KUCHEL. Madam President, I have spoken on this floor previously with respect to the amendments of the Senator from Arizona, for it is my intention to move that the last of the amendments proposed by the Senator from Arizona, which appears on page 5 of the Goldwater amendments, denominated as section 9, be considered separately from the others. I should like to have a separation of Senator Goldwater's amendments, so that pending before the Senate will be the amendments of the Senator from Arizona except that designated as section 9. This amendment, that is, section 9, should be debated separately.

The PRESIDING OFFICER. The Senator has a right to have a division made.

Mr. KUCHEL. I ask, then, that the proposed amendment relating to section 9 be eliminated from the other amendments proposed by the Senator from Arizona.

The PRESIDING OFFICER. It is so ordered.

Mr. KUCHEL. Madam President, I make the further parliamentary inquiry: The pending question is on agreeing to the amendments of the Senator from Arizona, as modified, except that amendment relating to section 9, on page 5?

The PRESIDING OFFICER. The question is on agreeing to the first part of the amendments of the Senator from Arizona, as modified, which does not include the amendment to add a new section 9 to the bill.

Mr. KUCHEL. I thank the Presiding Officer.

Madam President, the pending proposal is of unique importance to the people of the great Northwest, served today by the Bonneville Power Administration, and to the people of California, a State which I have the honor, with my colleague from California [Mr. Engle], to represent in the U.S. Senate.

The problem is not a new one. Over the past several years the Senate Committee on Interior and Insular Affairs has considered it, as has, indeed, the Department of the Interior. The problem also has been considered by the State governments of Oregon, Washington, and California, and by the Governors of those three great Western States. The Governor of California, a Democrat, Edmund G. Brown; the Governor of Oregon, a Republican, Mark Hatfield; and the Governor of Washington, a Democrat, Albert Rosellini, all have requested that some action be taken by which the industries and other consumers of the Pacific Northwest may be protected, and by which surplus energy now wasting may be utilized by the people of the State from which I come.

THIRTY MILLION DOLLARS' WORTH OF SURPLUS POWER

The testimony is that today, in this farflung Northwest, with its tremendous opportunities for growth and for development, there is capacity to generate $30 million worth of electric energy surplus to its present needs.

The people and industries of California need additional power. They desire an opportunity to purchase that surplus power now produced by the great hydroelectric generating plants of the Bonneville Power Administration, much of which now is going to waste.

During the hearings before the Senate Committee on Interior and Insular Affairs there was received a statement from Samuel B. Nelson, general manager and chief engineer, Department of Water and Power, City of Los Angeles. I refer to page 100 of the hearings on S. 3153.

The city of Los Angeles is one of the great metropolitan areas of the entire Nation. The people of Los Angeles have determined to market power for the use of the people residing in that city. Mr. Nelson is a distinguished engineer working for the people of the city of Los Angeles as general manager and chief engineer of the department of water and power. I wish to read what he said:

> The Department of Water and Power of the City of Los Angeles favors the construction by the Federal Government of an extra-high-voltage, high-capacity transmission line or lines from the Pacific Northwest to the Pacific Southwest, to constitute an intertie between the power resources of the two regions. This will enable the maximum utilization of the power resources of each region, for the benefit of the Nation as a whole.
>
> I am not undertaking at present to comment on the details of S. 3153, but to state our general position on the proposed intertie.
>
> In general, we favor the type of financing for this line which was provided in the Boulder Canyon Project Act with reference to the construction of Hoover Dam, that is to say, contracts with power purchasers, made in advance of construction, which would assure the liquidation of the Government's investment, with interest, over a reasonable period of years. The Department of Water and Power of the City of Los Angeles is prepared to contract for power and transmission capacity on reasonable terms and in substantial quantities to make such an enterprise a success, as it did, in cooperation with others, in the case of Hoover Dam. It is reasonable to expect that Pasadena, Glendale, and Burbank would do likewise, as in the case of Hoover power.

I add parenthetically that the communities to which he adverted likewise are engaged in the distribution of electricity to their residents.

Continuing with the statement:

> We have no objection to the Government's offering similar contracts to the privately owned utilities that might make use of it; the line or lines would be sized accordingly.
>
> In this particular instance, because of the unique factors involved, we endorse legislative and contractual safeguards which would limit the interchange to the amounts of exportable power for which there is no market in the region of origin during the period of export. In certain seasons excess power would flow south, in other seasons north; the largest seasonal excesses are in the north at present.
>
> We favor Federal construction of the proposed intertie, in view of the magnitude of the undertaking and the desirability of equitable treatment to a considerable number of potential users, but the self-liquidating character of the investment should be assured in advance of construction. We will cooperate to that end.

Thus the largest city in western America has "put it on the line" and has said it is prepared now to contract with the Government of the United States to buy such interruptible surplus power from the Bonneville authority as the Bonneville authority would be permitted to sell under the proposed legislation.

Why does this great city want to do so? It wants to do it because of the interest of the people who live in the city of Los Angeles. It wants to do it because the people of Los Angeles have determined, as is their right under the constitution of California, to serve themselves with respect to electric power.

DECISION BY PEOPLE OF CALIFORNIA

I come from a State which has both great private utilities and great public utilities. I come from a State in which the people in various communities have made their own decision, as is their right, as to transmission and sale of electric energy. Thus, on the floor of the Senate I take the position that in this difficult and knotty problem we have before us, the interest of the people would be served by the passage of the proposed legislation and by the rejection of the amendment which has been offered.

The city of Los Angeles has suggested, as I read in its statement, that by reason "of the unique factors involved," it endorses the legislative and contractual safeguards which appear in the bill.

In the interest of time, I refer to the report of the Senate Committee on Interior and Insular Affairs, pages 3, 4, and 5, which discusses the plans for interconnection and the need for the proposed legislation. I ask unanimous consent that the portion of the report to which I have referred be printed at this point in my remarks.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

Excerpt From Report

PLANS FOR INTERCONNECTION

> Whether an extra-high-voltage line will be constructed is no longer a matter of speculation. Pacific Power & Light Co. and Pacific Gas & Electric Co. earlier this year indicated they intend to construct 110 miles of line in northern California and southern Oregon as a further interconnection of their two systems.
>
> The December 15, 1961, report of the task force appointed by the Secretary of the Interior makes clear that an extra-high-voltage interconnection between the Pacific Northwest and the Pacific Southwest will be constructed. The economic benefits to be derived are so great that the question is not if such an interconnection will be built—only when and by whom. The task force made no recommendation as to what entity or entities should construct the interconnection.
>
> The benefits found by the task force include the following:
>
> First: Power could be sent back and forth between the two regions to help each meet its peak loads, the Pacific Southwest in the summer and the Pacific Northwest in the winter. This diversity of loads would permit each region to save $90 million, or a total of $180 million, in steamplants which would otherwise be required if each region had to carry its own peak without help from the other. If two lines are built, the saving in steamplant investment was estimated at $350 million.
>
> Second. For a number of years, the Pacific Northwest could sell surplus secondary energy to displace steam-generated energy in the Pacific Southwest. Revenues were estimated at between $9 million and $15 million per year. The amount of energy sold would gradually decrease as the demand for secondary energy increases in the Pacific Northwest.
>
> Third. By moving a relatively small amount of offpeak Pacific Southwest steampower to the Pacific Northwest, an interconnection would firm up 200,000 kilowatts of Pacific Northwest secondary power with one line and 400,000 kilowatts with two lines. This new firm power in the Pacific Northwest was estimated to be worth at least $3.5 million or $7 million a year, depending on whether one or two lines are built.
>
> Fourth. The interconnection would permit the Pacific Southwest to make use of the surplus hydroelectric peaking capacity of the Pacific Northwest dams and thereby postpone the construction of thermal peaking capacity plants in the Pacific Southwest. The amount of peaking capacity which could be marketed in the Pacific Southwest would vary over the life of the transmission lines and would be directly dependent on whether one or two lines are constructed. The maximum amount was estimated at over 1,100,000 kilowatts which could be sold for about $13 million per year.
>
> In addition to these four uses, the interconnecting lines would make possible other benefits, such as savings in reserves in each region, savings in fuel, more efficient use of the steamplants in each region, the construction of larger and more efficient steamplants, national defense, daily diversity in the loads of the two regions as distinguished from the seasonal diversity already referred to, and diversity of streamflows in the two regions as distinguished from daily and sea-

sonal diversity of loads. Each of these uses could be accomplished under the terms of S. 3153.

NEED FOR LEGISLATION

Presently, there is no geographical limitation on the marketing area of the Bonneville Power Administration. The only limit is that of economic transmission distance. If a preference agency in the Pacific Southwest, or elsewhere in the West, has access to the Columbia River power system over an extra-high-voltage interconnection between the two regions, under existing law it can demand power that is needed in the Pacific Northwest to carry the loads of nonpreferred utilities and direct industrial customers in that region. This is true not only of secondary power, but firm power as well. This fact, coupled with economic and physical factors unique to the Pacific Northwest, is the basic reason why S. 3153 is necessary.

When the Bonneville Project Act was enacted in 1937, the distance which power could be transmitted economically was 200 or 300 miles. Today, power can be transmitted from the Pacific Northwest to the Mexican border or to the Mississippi River. The technological limitations on economic transmission distance that existed when the Bonneville Project Act became law have been greatly extended and no longer afford the regional protection that they once did. S. 3153 will maintain the marketing area of the Columbia River system at approximately the same point that physical limitations did when the Bonneville Dam was authorized.

There are a number of reasons for establishing the Pacific Northwest as the primary marketing area for the Columbia River power system. The Pacific Northwest is a tremendous area by itself, approximately 259,000 square miles. It is nearly three times the size of the Tennessee Valley, where the Congress limited the marketing area of another Federal power-marketing agency. The Pacific Northwest would constitute one of the largest, if not the largest marketing area for any utility in the United States.

While the Federal powerplants account for about 60 percent of the power supply of the Pacific Northwest, more than 150 non-Federal generating plants serve the area also. The Federal and non-Federal plants are tied together, primarily by the Federal transmission system, and are being operated as one integrated unit to obtain the maximum power supply for the region. Each utility supports the others in such a way that the overall benefit to the region is greater than the sum of the individual parts contributed by each utility. If some of the energy resources are removed from the area at a time when they are needed in the coordinated operation, the Pacific Northwest as a whole will suffer a loss greater than the individual part removed.

This operation of Federal and non-Federal plants in the Pacific Northwest as a single integrated unit is expressly recognized in the proposed treaty with Canada signed at Washington on January 17, 1961, and is a part of the yardstick for determining the portion of the downstream power benefits to which Canada will be entitled.

The Administrator of the Bonneville Power Administration testified that the United States has invested over $500 million in transmission facilities for that system. These facilities were designed and constructed to meet loads in the Pacific Northwest in the most efficient and economical manner possible. If the operation of the Columbia River power system should be changed to meeting the loads of only preference agencies in the western half of the United States, much of the existing transmission system and the huge investment therein would be unnecessary and useless.

The Columbia River power system sells as firm power only the power that could be generated with the water available in the lowest water year of record. In most years, the system generates tremendous quantities of additional power because water conditions are better than those of the historically low year. This power is sold as secondary or dump power because deliveries cannot be guaranteed. At the present time, there is no market in the Pacific Northwest for much of this power, and the water is being wasted into the ocean. This year approximately $32 million worth of power, most of it secondary, will be unsold and spilled. The Pacific Southwest provides a ready market for this power where it can be used to displace steam-generated power. The Pacific Southwest will benefit from the use of the less expensive secondary hydropower, the Pacific Northwest will benefit from the revenues derived from this new market, and the Nation will have an additional gain in the saving of exhaustible fuel resources which otherwise would be burned in the Pacific Southwest steamplants. But once the interconnecting lines are constructed and available, the preference customers in the Pacific Southwest could demand that the secondary power continue to flow to them even though it might be needed in the Pacific Northwest. They also could demand that firm power needed by nonpreference utilities and by the electroprocess industries in the Pacific Northwest be delivered to them. This bill is necessary to permit the sale of the dump power to the benefit of everyone without endangering the power supply of people in the Pacific Northwest who depend upon the Federal Columbia River system for an economic supply of power.

Industrial customers of Bonneville Power Administration have invested more than $350 million in their plants. The cost today would be double that amount. They have purchased annually from 31 to 62 percent of the energy sold by the Federal system. They employ 15,000 Pacific Northwest citizens directly and another 30,000 indirectly. The Pacific Northwest has no low-cost alternative to its hydroelectric power. If Federal power generated in the Pacific Northwest is diverted to other regions, many of these industries would be seriously affected.

Virtually all its generation is hydroelectric generation and over 60 percent of the hydro generating facilities are federally owned. No other area in the United States is so heavily dependent on hydroelectric power and, with the exception of the Tennessee Valley, on federally owned generating facilities. Other factors unique to that region include the substantial cost differential between Columbia River hydro power and hydro or steam power in neighboring regions, and the previously mentioned dependence of electroprocess industries, with hundreds of millions of capital investment and employment for tens of thousands of Pacific Northwest citizens, upon a continued low-cost Federal power supply.

Mr. KUCHEL. To sum up, the bill S. 3153 would permit the sale of surplus electric energy to the people of California. But at the same time it would preserve to the people of the great Northwest now served by Bonneville their right to recapture that surplus energy when—and it is an irresistible fact—the people of the great Northwest require the full capacity of that great Federal repayable project. I cannot quarrel with that position. I cannot quarrel with the wisdom of the Congress of the United States which planned the construction of repayable projects, not merely for today or tomorrow, but for the future which we pray will come to the people of the United States.

COLORADO RIVER VITAL TO SOUTHERN CALIFORNIA

I come now to the pending amendment. A while ago I asked that a section of the amendment offered by my friend the Senator from Arizona [Mr. GOLDWATER] be deleted from the rest of the amendment so that the section might be considered separately by the Senate. I have received from another great public agency, the Metropolitan Water District of Southern California, a letter signed by its chairman. The metropolitan water district takes water from the Colorado River under the Colorado River compact and spreads it as best it can over all of southern California. Without the great reclamation multiple-purpose project which is Hoover Dam, there would be no basis upon which the life and economy we now know in southern California could be maintained.

The people of my State are grateful for Federal reclamation law, and particularly in the present instance for the wisdom and courage of the Congress of the United States in finally overcoming selfish opposition and enacting into law the authorization for the great Hoover Dam. But the metropolitan water district has fear that the Senate and the House of Representatives might now enact legislation which would hamstring southern California, and attempt to take away our rights to both water and power from Hoover Dam or other reclamation projects which, in the future, might be built on the Colorado River.

Madam President, I ask unanimous consent that a telegram I have received from Joseph Jensen, chairman of the board of directors of the Metropolitan Water District of Southern California, expressing these fears, be printed in the RECORD at this point in my remarks.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

LOS ANGELES, CALIF., *July 26, 1962.*

Senator THOMAS H. KUCHEL,
Senate Office Building,
Washington, D.C.:

Respectfully wish to inform you board of directors of Metropolitan Water District of Southern California went on record yesterday in opposition to S. 3153 and H.R. 11264 and 11265, the Pacific Northwest regional power preference bills. Board is deeply concerned that such legislation would establish precedent which could result in eventual loss of hydroelectric power to district from Colorado River facilities such as Hoover Dam and from other facilities to be built on the Colorado River and in other areas. This power urgently needed to pump water over Tehachapis from northern and central California to M.W.D. areas in southern California. Hoover energy alone helps pump 1 billion gallons a day of supplemental water for 8 million people within district's boundaries on southern California coastal plain. Strongly urge you exert every effort to prevent passage of this proposed legislation.

JOSEPH JENSEN,
Chairman, Board of Directors, the Metropolitan Water District of Southern California.

Mr. KUCHEL. Madam President, I can understand the apprehension, because a part of the amendment offered by my friend from Arizona would indeed, hamstring the development of southern California. That part of the amendment which is not now before the Senate by reason of my request for a division reads as follows:

> SEC. 9. In the case of Federal hydroelectric power projects now or hereinafter situated at points on streams which form the boundary of the State of Arizona with an adjoining State, the State of Arizona shall be alloted one-half of the energy and capacity of such Federal power projects and such capacity and energy shall be subject to the provisions of this Act.

Do Senators realize what that means? It mentions Federal hydroelectric projects now or hereafter situated at points on streams which form the boundary between Arizona and an adjoining State, and refers to projects past, present, and future. It provides that the State of Arizona shall be alloted one-half of the energy and capacity of such Federal power projects.

That is a cruel amendment.

Mr. HICKEY. Madam President, will the Senator yield at that point?

Mr. KUCHEL. I yield.

Mr. HICKEY. Does the Senator from California conclude that by virtue of that particular provision, 50 percent of the hydroelectric power produced at a dam such as the Flaming Gorge, which is being constructed in the State of Utah, but borders on the State of Arizona, would be allocated to Arizona by virtue of the amendment?

Mr. KUCHEL. I do. I do not think there is any doubt but that the Senator has set forth the specific manner in which the section of the amendment which I read would operate with respect to the generating capacity of Flaming Gorge.

Mr. HICKEY. Therefore, despite the criterion which was suggested by former Secretary of the Interior, Mr. Seaton, and later adopted by the present Secretary, Mr. Udall, the amendment, if written into law, would allocate to the State of Arizona 50 percent of that power which is just below the Wyoming border, but in the State of Utah, which borders on the State of California, and thereby deny the State of Wyoming a portion of the power.

CONTRACTS REQUIRED BEFORE CONSTRUCTION

Mr. KUCHEL. Yes; indeed it would. Indeed, it would do more than that. This is not the time for me to review the long history of the fight for construction of the Hoover Dam, except to say that a requirement was laid down in the law, the Boulder Canyon Project Act, that firm contracts for the purchase of electricity from that dam had to be entered into before a single shovelful of earth could be turned. Who entered into them? It was the people of the city of Los Angeles, and a great private utility, the Southern California Edison Co.

I ask unanimous consent that a memorandum prepared by the able chief counsel of the Senate Committee on Interior and Insular Affairs, including section 4(b) of the Boulder Canyon Project Act, may be incorporated in the RECORD at this point in my remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON INTERIOR
AND INSULAR AFFAIRS,
August 8, 1962.

To: Senator KUCHEL.
From: Stewart French, chief counsel.
Subject: Hoover Dam power contracts.

Section 4(b) of the Boulder Canyon Project Act (Public Law 642, 70th Congress; found in 43 U.S.C. 617c(b)) provides:

"(b) Before any money is appropriated for the construction of said dam or power plant, or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues by contract, in accordance with the provisions of this Act, adequate in his judgment to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within fifty years from the date of the completion of said works, of all amounts advanced to the fund under subdivision (b) of section 2 for such works, together with interest thereon made reimbursable under this Act."

As is pointed out in "The Hoover Dam Documents," official publication of the Department of the Interior under Secretary Ray Lyman Wilbur, the only possible way of fulfilling this requirement for contracts, in advance, sufficient to pay for the entire cost of the project in 50 years, was for the Secretary to contract with suppliers of the populous Southern California market, which is outside the Colorado River Basin, geographically. Mr. Herbert Hoover, then Secretary of Commerce, stated this fact categorically.

The contracts in effect under the legislation, the kilowatt hours, and the net amount paid, for the contract year ending May 31, 1962, are as follows:

Name of contracting party	Kilowatt-hours	Net amount paid	Percentage of firm energy
City of Burbank	18, 190, 723	$37, 131	0. 5773
Glendale	58, 214, 725	118, 819	1. 8475
Pasadena	49, 933, 897	101, 915	1. 5847
Los Angeles	531, 062, 555	1, 776, 653	17. 5554
Metropolitan Water District	1, 111, 164, 408	2, 124, 773	35. 2517
California Electric Power	27, 812, 347	162, 800	. 8813
Southern California Edison	200, 115, 743	911, 460	7. 0503
State of Nevada	555, 392, 109	1, 533, 992	17. 6259
State of Arizona	555, 392, 100	1, 499, 191	17. 6259

The term of these contracts is until May 31, 1987. Under section 5(b) of the Boulder Canyon Project Act, there is a vested right of renewal. This subsection provides:

"(b) The holder of any contract for electrical energy not in default thereunder shall be entitled to a renewal thereof upon such terms and conditions as may be authorized or required under the then existing laws and regulations, unless the property of such holder dependent for its usefulness on a continuation of the contract be purchased or acquired and such holder be compensated for damages to its property, used and useful in the transmission and distribution of such electrical energy and not taken, resulting from the termination of the supply."

The total Federal investment in Hoover Dam and facilities, including interest during construction, is reported by the Department of the Interior to total $174,682,000 as of the close of fiscal 1961. This figure includes the $25 million allocated to flood control, and some $3 million in "nonproject" costs. All of this cost is being repaid from the power revenues, the greater part of which comes from the citizens of California.

STEWART FRENCH,
Chief Counsel.

Mr. KUCHEL. The contracts required by the Boulder Canyon Project Act were entered into. They were firm contracts. They were entered into and will continue to run, according to their terms, until 1987. In those contracts there is a fixed right of renewal.

The amendment of the Senator from Arizona would purport to shear away those contracts and abrogate them. It would provide that now and hereafter the State of Arizona shall have the right to half of the electricity generated at Hoover Dam, although the dam could have been built only as a result of these contracts with the agencies of the people of California. The dam is on the Colorado River on the boundary between the States of Nevada and Arizona. It is now on California's boundary.

AMENDMENT CONSTITUTIONALLY INVALID

The amendment is completely unconstitutional. It is, indeed, an affront not only to the people of California, but also to the U.S. Government. I trust that it will be defeated when it is brought before the Senate for action.

The remainder of the amendment makes a mockery of what we, with painstaking endeavors, seek to accomplish. The whole history of reclamation in the deserts of western America has been one of helping western America, area by area, to bring water and power to the lands of the West, so that life might be sustained and so that that part of our country might be given the means by which to grow and prosper.

Yesterday the Senator from Washington [Mr. JACKSON] made a very good speech in the Senate. He told how, when reclamation projects are authorized by Congress, the moneys utilized in the construction of those projects is returned to the Federal Treasury by the beneficiaries of those projects. The water users and the power users pay back to the Government of the United States, with interest, what the Federal Government has invested. They do indeed constitute the finest investment which the people of the United States through their representatives in Congress can make.

COSTS OF PROJECTS REPAID

Congress on many occasions has voted for flood control projects, which our good friend from New Mexico [Mr. CHAVEZ] has brought to the floor from his excellent committee, the Committee on Public Works. I believe in Federal flood control. I shall continue to vote in favor of authorizations and appropriations to eliminate the hazards of floods on the eastern seaboard, in the South, in the Midwest, and across America. I shall do so knowing that not one penny of the money authorized and expended for flood control ever comes back to the Federal Treasury in the form of direct repayment. The indirect, ultimate benefits of flood control are incalculable, but they do not make the direct repayments that power and reclamation projects make.

It ill becomes Senators to stand on the floor and criticize multipurpose reclamation projects in America.

I say most sincerely that the amendment now pending, offered by the Senator from Arizona [Mr. GOLDWATER], would destroy the interest of the people which we try to serve.

Madam President, that is all I have to say at this time. I thank my able friend from Washington for yielding to me.

Mr. JACKSON. Madam President, first I wish to commend the distinguished minority whip for the excellent way in which he has presented the arguments in connection with the pending measure and his very clear explanation of the economic monstrosity involved in the pending amendments and the other amendments.

S. 3153 is a carefully drafted bill recommended by the administration and supported by the entire utility industry, public and private, in the Pacific Northwest.

The purpose of the bill is to permit the Bonneville Power Administration, which last year had to spill $30 million worth of dump power, to sell that power outside the region on a recallable basis. The Solicitor of the Department of the Interior has ruled that this cannot be done without a change in the present law.

S. 3153 would not affect any existing contracts and it applies only to sales of Columbia River power to be used outside the Northwest marketing area—and presently there are no such contracts.

This bill does not set up State-by-State power preferences. It establishes a sensible regional marketing area for Bonneville Power Administration which can include all or parts of seven States.

If we were to fractionalize the Columbia River power system on a State-by-State basis, we would create, as I have said, an economic monstrosity.

Yet opponents of this bill, my colleague from South Dakota [Mr. MUNDT], has offered amendments to the bill—seeking to kill it—which if adopted would fractionalize the Missouri River on a State-by-State basis. And my colleague from Arizona [Mr. GOLDWATER] proposes to fractionalize the power development of the Colorado River Basin, State by State.

Let us see what is really involved in the Goldwater and Mundt amendments.

Each State would become a separate marketing area. It would have first call on the power from any Federal plant in that State. States in which there are no Federal plants would receive no Federal power whatever, except for surplus dump power when available.

Do the Senators from Iowa, for instance, who have expressed support for the Goldwater amendment, realize that they have joined in a proposal to deprive Iowa of power in the Missouri Basin? Iowa has been allocated nearly 140,000 kilowatts of Missouri Basin power, with additional allocations yet to be made for dams still under construction. Principally this is for REA cooperatives. I cannot believe they are aware that the amendments now before the Senate would deprive Iowa of every kilowatt of that power. I am sure the citizens of Iowa would have a great deal to say to the Congress if they were aware of a proposal to take their share of the Missouri Basin power away from them.

Let us turn to Colorado for a moment. The Senator from Colorado [Mr. ALLOTT] has joined in the Goldwater amendment. Under this amendment Colorado would lose all claim to any firm power from Glen Canyon Dam. That dam and its powerhouse are located in Arizona. Under this amendment Arizona would have that power reserved for its use to the exclusion of Colorado. The same will be true of power from the Marble Canyon and Bridge Canyon Dams which are located in Arizona. Is Colorado ready to renounce all claims to firm power from those projects?

What about North Dakota? It is true that North Dakota would have first call on power from Garrison Dam. But is it ready to surrender all claims for firm power from the other dams in the Missouri Basin—the Canyon Ferry, Fort Peck, and Yellowtail Dams in Montana; the Oahe—Oh-ah-ee—Big Bend, Fort Randall, Angostura, and Gavins Point Dams in South Dakota?

Mr. HICKEY. Madam President, will the Senator from Washington yield?

Mr. JACKSON. I yield to the Senator from Wyoming.

Mr. HICKEY. Considering the situation described relating to the Colorado River, where the Flaming Gorge Dam is located in Utah, just beyond the Wyoming State line, and Glen Canyon Dam is located as indicated by the Senator, would Wyoming, which supplies the waters for those dams, be precluded from participation in the power generated by them?

Mr. JACKSON. Absolutely; Wyoming would be completely excluded.

Let me point out still another disastrous effect of each State being a separate marketing area. All the dams in a river basin are coordinated and operated together as a part of a single system. The total amount of power generated by such a system operation is greater than the sum of the generation of each plant operating by itself. But with this amendment, power from each dam would be reserved for use in that State, and system operation would not be possible.

These great projects were conceived, developed, and built on the basis of geography, so that the engineers could make the best possible use of the great resources which were available. They were not developed according to State lines. If that had been done, it would obviously have prevented the sound engineering operation of those plants. Certainly no private utility would have proceeded in that way, and the Federal Government cannot afford to proceed in that way. Each river basin would lose power because it could not utilize its plants to the best advantage.

These examples—and I could cite others—demonstrate that these amendments, with their State-by-State approach, would make a shambles of existing Federal power marketing statutes and policies. I might point out that my State would gain by this approach. Washington would receive three-fourths or more of the Federal generation in the Columbia River Basin. But we would not be a party to such irresponsible action.

If the Goldwater-Mundt, State-by-State approach to power marketing were to become law, it would break, for example, the TVA apart—into seven separate State marketing States. It would fractionalize the Southeastern Power Administration and the Southwestern Power Administration.

The Tennessee Valley Authority serves a power marketing area which includes most of the State of Tennessee and portions of the States of Kentucky, Mississippi, Alabama, Georgia, North Carolina, and Virginia. There are power generating facilities, hydro or steam, in Tennessee, Kentucky, Alabama, Georgia, and North Carolina. No TVA generating capacity of any kind exists in Mississippi or Virginia. Mississippi and Virginia, therefore, receive greater power loads from TVA than they produce. Georgia also receives greater power load than it produces, even though it has two TVA hydro generating facilities within its borders. Under the amendments offered by Senators GOLDWATER and MUNDT, Georgia, Mississippi, and Virginia would be deprived of their present power service from the TVA.

In one fell swoop, the Goldwater-Mundt amendments would repeal 60 years of Federal power policy, and disrupt the power supply of public power agencies all over the United States.

Speaking of the TVA, I find the attitude of some Senators difficult to understand. Only a few years ago they were insisting that the marketing area of TVA be defined by Congress. They objected to TVA extending its marketing area to include new municipalities or co-ops. I do not recall that they were worried about "balkanizing" the TVA, to use the term of my friend the Senator from South Dakota [Mr. MUNDT].

As a matter of fact, they were arguing with all their might that TVA's marketing area should be circumscribed by the Congress—"balkanized," as the Senator from South Dakota [Mr. MUNDT] would say.

I urge that the Senate reject these irresponsible amendments. They are presented for only one reason—to defeat the bill which they would amend. For 3 years the Committee on Interior and Insular Affairs has had before it the problem of defining an economic power marketing area for the Pacific Northwest. We have reported S. 3153 to the Senate as a sensible economic solution. If the proponents of the amendments have problems of Federal power marketing which genuinely concern them and their States, the committee will be happy to consider them in the same careful way it has considered S. 3153.

Mr. HICKEY. Madam President, will the Senator from Washington yield for the purpose of permitting me to ask him some questions on the bill?

Mr. JACKSON. I am happy to yield for that purpose to the distinguished Senator from Wyoming.

Mr. HICKEY. On page 1 of the bill, I note a definition of "Pacific Northwest," which includes Wyoming within the Columbia drainage basin, and indicates that the Secretary may determine what is within the marketing area of the Federal Columbia River power system.

Last evening I had an opportunity to examine a map which included western Wyoming within the Federal Columbia River power system—the general area of Jackson, Wyo., and the Afton-Star Valley area of western Wyoming. Is it the conclusion of the Senator from Washington that those areas, falling within the description of section (b), which includes Wyoming, would be given a preference in the Bonneville power use?

Mr. JACKSON. They would, upon the extension of the Bonneville marketing area by the Secretary of the Interior. This area is subject to executive order on the part of the Secretary of the Interior.

At present, that area is not within the Bonneville marketing area because it is not delivering power in that area; but the area would be eligible for that coverage.

Mr. HICKEY. Is it a fact that the uniqueness of the bill which has been introduced by the Senator from New Mexico [Mr. Anderson], and for which the Senator from Washington is speaking, is based primarily upon a unique provision written into the basic reclamation law in some of the States; namely, a provision which was proposed and subsequently adopted as a committee amendment, referring to the Hungry Horse Dam Act?

Mr. JACKSON. Yes, the Hungry Horse project situation is a unique one. It stemmed from extensive hearings by this committee at the time when the Hungry Horse project was authorized by Congress. The Hungry Horse project produces a little more than 200,000 kilowatts at site; however, it contributes, downstream, more than 800,000 kilowatts of power. Hungry Horse points up dramatically the importance of regional development of power, because each dam in a coordinated river system is related to the others. The Hungry Horse project contributes, downstream, almost four times the amount of power that is produced at site.

Under the pending amendment, this concept would be thrown out the window, and we would "Balkanize" the project by States—to use the expression which was used by the Senator from South Dakota [Mr. Mundt].

However our entire program, going back to the days of that great American, Theodore Roosevelt, is based on the premise that when Federal funds are invested, natural geographical regions—not just State lines—are taken into consideration.

We would not be requesting the enactment of this bill, except for the fact that the private utilities in the Pacific Northwest and some of the plants built there during the war have contracts with the Bonneville Power Administration; if the BPA sells this extensive surplus energy to public bodies in California in the absence of this legislation, its marketing area would be extended to California, and the preference clause would apply.

As the Senator knows, we have opinions from the Solicitor of the Department of the Interior in both the present administration and the previous administration.

Mr. HICKEY. Is it the opinion of the Senator from Washington that the intent of the amendment known as the Goldwater-Mundt amendment might be to attempt retroactively to put the various States in the same position that the Hungry Horse project legislation puts Montana in?

Mr. JACKSON. I do not know what is intended, but it would not do that.

Mr. HICKEY. My suggestion is that the Hungry Horse project legislation gives a State preference to Montana for the power generated therein.

Mr. JACKSON. At the site.

Mr. HICKEY. Yes, at the site; and that was a portion of the basic legislation which created the Hungry Horse project.

Mr. JACKSON. Yes, that is correct.

Mr. HICKEY. Many of the States, including my own, have had basic legislation, but have not had written into it a provision similar to the one included in the Hungry Horse project legislation—thereby putting them in the position of the areawide use of streams, in which I fully concur, as the Senator from Washington has explained it.

But I thought perhaps the pending amendment might be an effort to back up and to write into the basic law that which has always been called retroactive legislation, which we know is not valid.

Mr. JACKSON. That is what they are trying to do.

Mr. HICKEY. And it would not be valid legislation.

Mr. JACKSON. That is correct.

Of course, the only sensible approach is to examine each region's problems at public hearings, so that the interested States can present their testimony and all the private utilities and public bodies can be heard. But we should not attempt to alter in one stroke all the Federal legislation in this field which has been enacted since the first public project was built in 1907: the Roosevelt Dam, in Arizona. This amendment would upset all those laws, without affording an opportunity for the States and the individual customers in those areas to be heard.

Mr. CHURCH. Madam President, will the Senator from Washington yield?

Mr. JACKSON. I am happy to yield.

Mr. CHURCH. The distinguished Senator from Wyoming has mentioned the Hungry Horse project, in Montana. I think it might be useful to point out that the priority right to the use of power generated at Hungry Horse Dam was originally derived from the authorization act for that particular project, was it not?

Mr. JACKSON. That is correct.

Mr. CHURCH. And if in connection with any given project, by virtue of its contribution to downstream power within the region, or for any other consideration, it might prove desirable to write into the authorization bill the same reservation for priority use of the onsite power, is it not correct that the place to do that is in the authorization bill, in connection with which all the factors which relate to that particular project are given careful consideration by the committee?

Mr. JACKSON. Certainly. That has been the record in the past when we have had to adopt special rules in given situations. The late Senator Francis Case, of South Dakota, I believe, put an amendment of that nature into the Big Bend Project Act.

My point is that all we are requesting is an opportunity for the Pacific Northwest to sell $30 million worth of dump power without jeopardizing the power supply which Bonneville Power Administration provides private utilities and private industry. No other issue is at stake—although I think an effort is being made to confuse this matter. An effort is being made to tie this measure to a Federal transmission grid. That is regrettable; nothing could be further from the truth. We simply want to sell this surplus power to either public bodies or private bodies outside the Pacific Northwest; and certainly we should not be penalized because we want to save the Federal Treasury millions of dollars each year and stop dumping large amounts of power into the Pacific Ocean.

Mr. CHURCH. Will not the Senator from Washington also agree that if the pending amendment were to be adopted, owing to the retroactive effect it would have upon established systems all over the country, the result might very well be chaotic?

Mr. JACKSON. Oh, there is no question about that; it would disrupt established marketing arrangements all around the Nation.

If those who submit these amendments wish to follow the pattern we have suggested, they should request consideration on a region-by-region basis and should ask that their region too, be permitted to sell secondary or dump power under similar conditions as those provided in this measure, without endangering the power supply of private utilities and private industry.

Instead, the pending amendment proposes to fractionalize, on a State-by-State basis, these power-development projects throughout the Nation. In the past no one ever thought of developing projects in that manner. To do so would ignore the geography of the country. No sound proposal could be worked out in a river basin by simply making arbitrary decisions based on State lines. That is the vice of the pending amendment.

I would not object for a moment if Senators would offer amendments providing for similar treatment of Federal projects in their regions. That would be logical. But that is not being attempted here. Instead, the attempt is to create a monstrosity out of this bill, by creating 50 separate marketing areas, an absurd proposition.

I may say that our State would benefit from this attempt. Washington would have a "corner" on hydroelectric power, if the decision were to be based on State lines. But we believe the development should be regional.

All of us know that there is more than one way to attempt to kill a bill; and yesterday and today we have witnessed one of the ways of attempting to kill a bill. We have seen an attempt to make an economic monstrosity out of a measure which is solely for the purpose of helping the Federal Treasury.

Yesterday it was said that we are attempting to "steal" industries. Now I wish to state this emphatically. We in the Northwest are not stealing industry. Most of the great industrial plants that were built there were constructed during the war. Aluminum plants were built in the Northwest because of the power from Grand Coulee not available elsewhere. The result was that the Northwest was able to contribute greatly to our war effort, by supplying aluminum for 50,000 airplanes a year. Some have forgotten that fact, just as they have forgotten that the Hanford atomic plant was located in the Northwest because the power was there. We can thank God that it was.

We have not been stealing industry. The great plants of the Northwest were put there because of the amount of power available; they were put there by the United States during the war. The fact is that in recent years American aluminum companies are building plants abroad.

I do not know whether my colleagues realize it or not, but American companies are now constructing aluminum plants outside the United States, in foreign countries, far in excess of all the aluminum plants operating in the Pacific Northwest. Why? Because we have run out of cheap power, so to speak, and they are going to Africa and other areas to get cheap power to produce aluminum.

The argument that we are taking away industry is without foundation. We have had only the ordinary growth that every other area has had.

I hope Senators will not oppose this measure because of parochial feelings. Some Senator may object to a project, in New England, for example, because it will not benefit his area. If a project will benefit New England, I am for it. If it helps a particular area, it helps the whole country, and we should all support it.

I have supported flood control projects. The cost of these projects is taken entirely out of the Treasury. There is no repayment. On the other hand, the ratepayers in the Pacific Northwest pay back every dime expended for power projects, with interest. The ratepayers include private utilities, private industry, and public bodies.

Let us lay aside, once and for all, the specious argument that we are stealing industry. It is not true. The whole country pays for flood control and navigation projects. But the ratepayers in our region pay all of the cost of our projects, with interest.

I hope the Senate will vote down all the pending amendments, because they involve the same tactic of attempting to making an economic monstrosity out of the pending measure.

The President of the United States has requested this measure. I wish to mention further that the Senate Committee on Interior and Insular Affairs went into this question in a previous Congress. We received an opinion from the Department of the Interior, a ruling, in effect, that without this legislation sales to California preference customers would jeopardize the power supply of industrial customers and private utilities in the Pacific Northwest. We found this legislation was necessary in order to avoid that result.

I trust the Senate will vote down the pending amendments and the other amendments without hesitancy.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The time for the quorum call is to be charged to which side?

Mr. JACKSON. To come out of the time of both sides in the general debate on the bill.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Connecticut [Mr. DODD], the Senator from Missouri [Mr. LONG], and the Senator from Alabama [Mr. SPARKMAN] are absent on official business.

Mr. KUCHEL. I announce that the Senator from Utah [Mr. BENNETT], the Senator from Arizona [Mr. GOLDWATER], the Senator from New Hampshire [Mr. MURPHY], and the Senator from Kansas [Mr. PEARSON] are necessarily absent.

The Senator from Kentucky [Mr. COOPER] is absent because of illness in the family.

The PRESIDING OFFICER. A quorum is present.

Mr. YARBOROUGH. Madam President, will the Senator from Illinois yield 2 minutes to me?

Mr. DIRKSEN. I yield 2 minutes on the bill.

GIVEAWAY IN THE SKY

Mr. YARBOROUGH. Madam President, today there reached my desk a short letter in the personal handwriting of Maury Maverick, Jr., son of a former Member of Congress, a distinguished leader in Texas in his own right, and a member of a family that has defended American freedoms since colonial days.

Since he has so well expressed the cherished hopes and dreams and ideals of Democrats in America, I ask unanimous consent to have printed in the RECORD a letter from Maury Maverick, Jr., of San Antonio, Tex., of August 6, 1962.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MAVERICK BUILDING,
SAN ANTONIO, TEX.,
August 6, 1962.

DEAR JUDGE: My old father stood on a high bluff alongside of George Norris when Franklin Roosevelt pointed to TVA and thanked Mr. Norris. The great Senator from Nebraska wept that day.

Now we Democrats are going against our heritage with the satellite bill.

Keep on fighting that giveaway in the sky.

MAURY MAVERICK, Jr.

VIRGINIA SENATOR A. WILLIS ROBERTSON HONORED FOR 46 YEARS OF WILDLIFE CONSERVATION SERVICE

Mr. YARBOROUGH. Madam President, yesterday evening it was my privilege to attend the 25th anniversary banquet honoring our distinguished colleague from Virginia, Senator A. WILLIS ROBERTSON, as one of the authors of the Pittman-Robertson Act approved 25 years ago.

Senator A. WILLIS ROBERTSON, in 1916, as a member of the Virginia State Senate, helped enact into law the first comprehensive State law on hunting and fishing in Virginia. It is still the foundation of the wildlife laws of the Old Dominion.

In 1926, the administration of commercial fishing was divorced from fresh water fishing and upland game, the latter two being put under a game commission, consisting of five members. Governor HARRY F. BYRD appointed ROBERTSON as the first chairman of that new commission, in which capacity he served for the next 6 years.

In 1934, Senator ROBERTSON organized in the House of Representatives the Select Committee on Wildlife Conservation, on which he served as chairman for the next 12 years.

That committee sponsored the Duck Stamp Act for the protection of migratory birds, the Pittman-Robertson Act, giving Federal aid to States for wildlife conservation, the Coordination Act, which was designed to protect wildlife interests in all water impoundments by the Army Engineers, the development of hunting and recreational areas in the national forests, the construction on farm ponds by the Civilian Conservation Corps and later by the Soil Conservation Service, and so forth.

Last evening at the 25th anniversary banquet, the President of the United States, John F. Kennedy, sent a telegram to Senator A. Willis Robertson, congratulating Senator Robertson for his leadership in the Pittman-Robertson Act in the conservation and restoration of wildlife in America.

Madam President, I ask unanimous consent that President Kennedy's message be printed at this point in the Record.

There being no objection, the message was ordered to be printed in the Record, as follows:

President's Message to Senator Robertson by Telegram, 25th Anniversary Pittman-Robertson Dinner, August 7, 1962

Senator Willis Robertson: I am pleased to add my personal congratulations to you and all the others gathered to commemorate the 25th anniversary of the Federal aid in wildlife restoration program. You can be rightly proud of the Pittman-Robertson Act. It has certainly come to be recognized as one of our major conservation achievements.

At the time the act was signed by President Franklin D. Roosevelt, no one but the farsighted sponsors of legislation predicted the contribution that the act would make to wildlife conservation and outdoor recreation. It is most significant that a major portion of the $219 million that has been made available to the States under this act has been invested in land acquisition and as a result almost $2.5 million acres of land has been purchased and made available for public use.

Our hope is that history will recognize that our administration has made equally significant contributions to wildlife conservation.

John F. Kennedy.

Mr. YARBOROUGH. Madam President, last evening also, in the 25th anniversary banquet, a scroll was presented, signed by Secretary of the Interior Stewart L. Udall, to our colleague, Senator A. Willis Robertson, in grateful recognition and appreciation to him. I ask unanimous consent that the wording of that scroll be printed at this point in the Record.

There being no objection, the statement was ordered to be printed in the Record, as follows:

Presented in grateful recognition and appreciation to Hon. A. Willis Robertson for outstanding effort and contribution to 25 years of wildlife restoration and management in the United States under the Pittman-Robertson program.

Stewart L. Udall,
Secretary of the Interior.

Presented at the National Press Club in Washington, D.C., on the 7th day of August 1962.

Mr. YARBOROUGH. Madam President, also last evening, the Virginia Commission of Game and Inland Fisheries presented to our distinguished colleague from Virginia a beautiful scroll announcing the dedication to U.S. Senator A. Willis Robertson of the Gathright game management area in grateful recognition and appreciation of his many contributions to the sportsmen of Virginia.

Madam President, I ask unanimous consent that this scroll be printed at this point in the Record.

There being no objection, the scroll was ordered to be printed in the Record, as follows:

The Gathright Game Management Area, dedicated to U.S. Senator A. Willis Robertson in grateful recognition and appreciation of his many contributions to the sportsmen of Virginia and the Nation.

Commission of Game and Inland Fisheries.
July 1962.

Mr. YARBOROUGH. Madam President, this 25th anniversary commemoration of Federal aid to wildlife restoration held last evening was sponsored by the Izaak Walton League of America, the National Audubon Society, the National Wildlife Federation, the Sport Fishing Institute, the Wilderness Society, and the Wildlife Management Institute.

This stirring program was presented by an overflow crowd of those who have served for 25 years in programs of wildlife conservation. I ask unanimous consent to have printed at this point in the Record the program of last evening with a brief résumé of Federal aid in wildlife restoration program.

There being no objection, the program was ordered to be printed in the Record, as follows:

Program

Presiding, C. R. Gutermuth, vice president, Wildlife Management Institute.

Presentation of scrolls by Hon. Frank P. Briggs, Assistant Secretary of Interior for Fish and Wildlife.

Hon. A. Willis Robertson, U.S. Senator from Virginia.

Carl D. Shoemaker, secretary, Senate Special Committee on Conservation of Wildlife Resources, 1930–48.

Dr. Ira N. Gabrielson, Chief, Bureau of Biological Survey, 1935–40; first Chief, U.S. Fish and Wildlife Service, 1940–46.

Dr. Albert M. Day, first Chief, Branch of Federal Aid, 1938–42.

Robert M. Rutherford, Chief, Branch of Federal Aid, 1942–57.

Sporting Arms & Ammunition Manufacturers' Institute, Egbert C. Hadley, president.

Special presentation by C. F. Phelps, executive director, Virginia Commission of Game and Inland Fisheries.

Address by Hon. Stewart L. Udall, Secretary of the Interior.

FEDERAL AID IN WILDLIFE RESTORATION PROGRAM

A nationwide action program to give all States urgently needed financial assistance in their efforts to improve conditions for wildlife was launched by this act. Now, 25 years later, it is an outstanding example of how the Federal and State Governments can work with industry and sportsmen to perpetuate valuable natural resources and to provide untold hours of wholesome outdoor recreation.

One of the most significant wildlife enactments of all time—approved September 2, 1937—it is known widely as the Pittman-Robertson program, after its authors, the late Senator Key Pittman, of Nevada, and the then-Congressman and now Senator A. Willis Robertson, of Virginia. Its accomplishments are many.

More than 2,370,000 acres of land have been bought and developed for wildlife and public hunting; nearly 900,000 acres of prime waterfowl habitat given permanent protection; water provided in the arid West; food and cover planted for upland game; and deer and elk winter range purchased and improved.

Research projects have provided understanding and new techniques for wildlife enhancement. The eastern wild turkey, Merriam's turkey, white-tailed deer, antelope, bighorn sheep, elk, and many other mammals and birds have been restored over large areas. More than $275 million of Federal and State moneys have been channeled into essential wildlife restoration activities.

The history of the Pittman-Robertson Act parallels the expansion of State wildlife programs. During its span, and largely under its influence, wildlife management has emerged as a recognized natural science and hundreds of trained specialists now are engaged in State and Federal programs.

The act continues to bring stature and achievement to the entire field of wildlife management, with everlasting benefits to American sportsmen.

The 25th anniversary commemoration is sponsored by Izaak Walton League of America, National Audubon Society, National Wildlife Federation, Sport Fishing Institute, the Wilderness Society, and Wildlife Management Institute.

Mr. YARBOROUGH. Madam President, because of his leadership in Virginia for 46 years and in the Nation for more than 25 years in wildlife conservation work, I ask unanimous consent to insert at this point in the Record a brief biographical sketch of our distinguished junior Senator from Virginia, Senator A. Willis Robertson.

There being no objection, the sketch was ordered to be printed in the Record, as follows:

Biographical Sketch of A. Willis Robertson, U.S. Senator From Virginia

Taxes, tariffs, foreign trade, appropriations, and legislation dealing with fiscal, monetary, and defense production problems are the subjects to which Senator A. Willis Robertson has devoted his primary attention during more than a quarter century of service in Congress.

It was as a Member of the House of Representatives that this Virginian became recognized as an expert on collecting Federal revenue. In the Senate he has been concerned with the spending functions of the Government and its management of fiscal affairs. This double-sided experience has made him a consistent advocate of efforts to balance the national budget and an opponent of inflationary spending schemes.

His political philosophy has been shaped by his admiration for Thomas Jefferson, Woodrow Wilson, Cordell Hull, whose trade program he championed, and Carter Glass, his predecessor in the Senate, who was the "father" of the Federal Reserve System.

The Financial Institutions Act, popularly known as the Robertson bill, which was passed by the Senate in 1957 was described by Banking magazine as "the greatest single piece of banking legislation in our time—certainly the greatest since the Federal Reserve Act," which was sponsored by Senator Carter Glass. Although this bill was not accepted by the House of Representatives in its unit form, many sections from its 250-page text subsequently have been passed and it continues to furnish the basis for proposals to codify and modernize the laws under which financial institutions operate.

A longtime ambition was fulfilled in February 1959 when Senator Robertson became chairman of the Banking and Currency Committee, with which Carter Glass had been so prominently connected. This committee has responsibility for legislation dealing with banking, international finance, Federal Reserve, securities, housing, small business, and production and stabilization.

In addition to holding the committee chairmanship, ROBERTSON continues to act as chairman of the Subcommittee on Banking.

He continues also as a member of the Appropriations Committee, of which Senator Glass had been a chairman. In addition to being chairman of the subcommittee handling Treasury and Post Office appropriations, Senator ROBERTSON serves on the Agriculture, Defense, Independent Offices, and Public Works Subcommittees. He has estimated that these groups handle bills covering more than 95 percent of the Federal budget.

He remains a member of the Joint Committee on Defense Production, which he had headed as chairman during 1957–58 under a Senate-House alternating arrangement and is vice president of the U.S. group in the Interparliamentary Union, of which a House member is president.

WILLIS ROBERTSON first entered politics in 1912 as a delegate to the Virginia Democratic convention pledged to the candidacy of Woodrow Wilson for President.

His interest in Wilson and in political affairs had been stimulated, he said, by Dr. S. C. Mitchell, his history teacher at Richmond College, who stressed the obligations of public office.

But behind this college inspiration, ROBERTSON said, was the influence and the attitude toward the responsibilities of citizenship of his father, the Reverend Franklin Pierce Robertson, of Albemarle County, a Baptist minister, and his mother, the former Josephine Willis, of Culpepper County, a descendant of Col. James Gordon of Lancaster and Nathaniel Harrison of James City County, son of the first Benjamin Harrison of Virginia.

Born in Martinsburg, W. Va., where his father was pastor of a church at the time, WILLIS was one of six children. Part of his boyhood was spent in Lynchburg, Va., where he became an admirer of Carter Glass, whose elder son was his school classmate and a close friend. Thereafter he followed with deep interest Glass' progress as a State senator, Member of the House of Representatives, Secretary of the Treasury, and finally U.S. Senator.

The high school in Rocky Mount from which WILLIS ROBERTSON graduated was the first one established in Franklin County and was made possible by efforts of his mother who headed an organization to raise funds to pay for the building.

Enrolling in Richmond College at the age of 16, ROBERTSON became a campus leader, especially in athletics. As a tackle on the football team he played the entire time through every game for two seasons. He was tennis champion and established a Virginia record in the hammer throw which became permanent when that event was eliminated from Virginia college track meets.

In 5 years at Richmond College he received both academic and law degrees and he was subsequently honored by award of an honorary degree of doctor of laws from this college as well as membership in Phi Beta Kappa (scholarship). Both Washington and Lee University and William and Mary College have conferred honorary degrees upon him and he holds an honorary membership in the Washington and Lee Chapter of Omicron Delta Kappa—a campus leadership fraternity.

After graduation from college, ROBERTSON entered the practice of law at Buena Vista and in 1915 he was elected to represent Rockbridge and Bedford Counties in the State senate.

Volunteering for military service at the outbreak of World War I, ROBERTSON attended officers' training camp, was commissioned a first lieutenant of infantry and assigned to the 80th Division, then in training at Camp Lee. He served as assistant camp adjutant and was discharged in June 1919 with the rank of major.

Resuming his place in the State senate after his military service, ROBERTSON served on the finance, courts of justice, public institutions, and education committees. He was patron of the bill creating the State highway department, a member of the commission that laid out the State highway system and patron of the Robertson Act, under which the first $14 million for State highway improvement was obtained.

In 1922 ROBERTSON left the State senate to become Commonwealth's attorney of Rockbridge County, an office he held for 4 years.

In 1926, when the Virginia Department of Game and Inland Fisheries was reorganized under a commission whose chairman was its executive and administrative head, ROBERTSON, who had sponsored during his first year in the State senate the bill creating the department, was named as chairman. The appointment was made by Gov. HARRY F. BYRD, who had entered the State senate at the same time as ROBERTSON and served on some of the same committees.

During ROBERTSON's 6 years with the game and inland fisheries commission its receipts were doubled, without increasing license fee rates, and its services were greatly expanded, including a more efficient warden service, enlargement of the farm for restocking quail and establishment of the first hatcheries for propagation of trout and bass.

ROBERTSON's interest in outdoor life and conservation began with a boyhood interest in hunting and fishing, and these sports have remained his favorite sources of recreation.

He gave up the game commission post in 1932 when he became a candidate for the congressional seat vacated by the death of Representative Henry St. George Tucker, another Lexington resident. Elected that year as a Congressman at large, because a Court decision had invalidated existing congressional districts, ROBERTSON was reelected to represent the newly constituted Seventh (Valley) District in 1934 and continued to serve in that capacity until he transferred to the Senate in 1946.

Continuing to demonstrate his interest in wildlife after he went to the House of Representatives, ROBERTSON sponsored a resolution setting up a special committee to study and coordinate agencies dealing with wildlife resources. He was made chairman of that committee—the only first-term Congressman to hold a committee chairmanship—and continued as its chairman throughout his service in the House. He was sponsor of the Pittman-Robertson Act, under which more than $180 million collected from Federal taxes on sporting arms and ammunition has been returned to the States for game restoration and conservation projects. In 1945 he received awards from the Hunting and Fishing Club of the Air and from Field and Stream magazine as the outstanding conservationist of the year.

Looking back on this record Senator ROBERTSON has said: "My wildlife conservation work is the happiest I have attempted to do. While my time and efforts in the Congress have been devoted primarily to taxation, foreign trade, banking, currency and allied economic problems, I would be happy if history records my efforts on behalf of conservation as being a worthwhile contribution to my day and generation."

While in the House of Representatives ROBERTSON served on the Committee on Expenditures in the Executive Departments, Insular Affairs, Immigration and Naturalization and Post Offices and Post Roads, but his major assignment was on the Ways and Means Committee. He was the first Virginian in 34 years to serve on that top committee which drafts all tax bills.

During his 10 years on the Ways and Means Committee, ROBERTSON helped to write 12 tax bills, including those required to meet the unprecedented demands for revenue during World War II. His views prevailed over those of a majority of his powerful committee in 1943 when the Robertson-Forand bill set the pattern for putting Federal income taxes on a pay-as-you-go basis. It was as spokesman for the committee, however, that he led recurring floor fights on behalf of the Hull Reciprocal Trade Agreements program. Later, as a Member of the Senate, he continued to advocate Hull's concept of mutually beneficial foreign trade.

The death of Senator Carter Glass in 1946 created a vacancy for which ROBERTSON was chosen by the Virginia Democratic convention which met in September of that year. After completing Glass' term ROBERTSON was elected for a full 6-year term in 1948 and again in 1954.

The fact that Senate rules will not allow two men from a State to serve on the same committee and that Senator HARRY F. BYRD of Virginia was a member of the Finance Committee prevented ROBERTSON from continuing in the Senate the type of work on tax bills he had done in the House but he was successful in obtaining appointment to both of Senator Glass' former committees—Appropriations and Banking and Currency.

On the Appropriations Committee, Senator ROBERTSON demanded close scrutiny of all Federal spending proposals and voted regularly with those trying to keep fund allowances below the total of budget recommendations.

Although he had supported the original Marshall plan for foreign aid as necessary for the rehabilitation of war-ravaged nations, in later years he insisted that foreign loans and grants were continuing at too high a rate. He was instrumental in having foreign aid appropriations cut below budget proposals for several successive years and continued to urge that as a substitute for such aid there be stimulation of private investments abroad and loans from international funds handled on a sound business basis.

As a member of the Banking and Currency Committee he helped to draft inflation control bills needed during the War in Korea and as a member and as chairman of the Joint Committee on Defense Production he had responsibility for checking on administration of price and wage controls and stockpiling programs.

In 1949 ROBERTSON was designated by the Banking and Currency Committee to conduct an investigation of monopolistic practices by labor organizations, especially as applied to the coal industry. The results of his study were submitted to the Labor Committee which handles legislation on that subject, but that committee refused to report the bill he introduced.

Several years of work on the part of Senator ROBERTSON culminated in 1956 in enactment of a bank holding company bill—the first successful effort to obtain legislation to curb monopolistic expansion in that field.

In 1956 ROBERTSON again was designated by the Banking and Currency Committee to handle a study, this time of the Federal laws under which financial institutions operate. The result of this study was the Financial Institutions Act of 1957, designed to codify financial laws, bringing them all together for the first time in one place in the Federal Code, and also to bring them up to date by dropping out obsolete statutes and giving recognition to modern business practices. When this bill passed the Senate the president of the American Bankers Association called it a monumental achievement.

Although the House of Representatives failed to pass the 1957 bill it became the basis for important financial legislation in later years.

In 1958 the Small Business Investment Act was amended as proposed in the Financial Institutions Act.

In 1959 laws dealing with Federal Reserve member bank reserve requirements, savings and loan associations, holding companies controlling stock savings and loan associations, and Federal credit unions—all were revised along lines recommended in the 1957 bill.

Also passed by the Congress in 1959 were 2 bills containing a total of 35 amendments to financial laws which were taken from the Robertson bill. One of these bills simplified and improved laws relating to national banks so as to enable them to carry on their work more efficiently. The other bill contained provisions to improve the efficiency of the Office of the Comptroller of the Currency, who supervises the national banking system, and to give more flexibility to national bank lending powers.

Senator Robertson, who makes his home in Lexington, Va., married Gladys Churchill Willis. They have two sons, A. Willis Robertson, Jr., and Marion Gordon Robertson.

TAX CUT—PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. JAVITS. Madam President, will the Senator yield some time on the bill to me?

Mr. KEATING. Madam President, I yield to my colleague from New York 3 minutes on the bill.

Mr. JAVITS. Madam President, I call the attention of the Senate today to a lead editorial in the New York Herald Tribune entitled "Tax Cut Not the Only Remedy" because I think it bears out so very strikingly the speech which I delivered yesterday on that subject. A tax cut is not the only remedy. I could not agree more. But it is a very important part of a package, and a good deal of that package is laid out in the lead editorial exactly as I laid it out yesterday.

A package to deal with what? The uneasy fear in the hearts of many Americans that we are coming to a time of another recession, and that it should be avoided. Our economy is not moving forward with the velocity which is required by our international responsibilities or by the well-being of the American people, notwithstanding the President's promise in 1960, on which he was elected, that that is precisely what he would do.

So as long as that is the situation, and it is evidenced by a rise in our gross national product not equal to our own or the President's expectation, by the continuance of a very hard and apparently unyielding endemic unemployment which continues with us, by the absence of an opportunity for an estimated 1 million young people to get jobs in that economy, all of those things add up to the fact that we do not have to wait until a recession is upon us, nor do we have to engage in such transient activities as awaiting the figures for a particular month in order to decide a question as big and as important as that.

We ought to have an incentive tax cut. There has been a great deal of talk about a tax cut without recognizing the difference between a tax cut which would merely put money into the pockets of people and a tax cut which would provide an incentive to build, initiate, construct, and employ, as I described yesterday.

But more important than anything else is the fact that other things must be done. These are also questions to which the President must direct his attention. For example, among them is the fact that we have no effective way today to deal with strikes which affect the national interest. It is very much in the interest of labor itself to work with the rest of us in trying to develop a better method of dealing with strikes than we have today. That is one of the real weaknesses of our society.

Second, that the administration of the antitrust laws both in the preceding administration and in the present tends to inhibit and frustrate instead of facilitate, and that therefore the administration should direct its views and activities toward that end.

Third, and very important, American business has not developed an effective technique for seeing workers through the transition period when automation is adopted in order to cut costs.

These urgent matters are urged for action on the part of our Congress and on the part of our President.

The editorial sets forth all of these ideas, with the exception of one, and that is that it urges the application to trade unions of the antitrust laws, or their principle. I do not agree. I believe the prescription I have given with respect to strikes is a much better one. Other than that it poses the issue to the American people and says that here is an opportunity to act in order to avoid a recession before it is upon us. I am in favor of that. An incentive tax cut is not the whole answer; it is only one part of the total package which I urge upon the President and the country. I ask unanimous consent that the editorial may be printed in the Record as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

[From the New York Herald Tribune, Aug. 8, 1962]

Recipe for Recovery—Tax Cut Not the Only Remedy

It seems pretty clear by now that there is going to be no quick tax cut to spur the economy.

Mr. Kennedy has repeatedly said he would wait for the July figures on economic activity, due this week, before deciding whether to recommend one. But he also, and perhaps more particularly, wanted to take the pulse of Congress. It would be damaging, as he well know, to recommend a cut and then have Congress reject it. To assert officially that a cut was needed, then not get it, would be to invite a real crisis of confidence in the Nation's economic future.

In Congress the key man is Wilbur Mills, who has never been enthusiastic about the idea. And the closed-door hearings being held by his House Ways and Means Committee have done nothing to sway him toward the wisdom of cutting. Meanwhile, powerful opposition has developed in the Senate, and a Gallup poll has shown 72 percent of the electorate against cutting taxes now if it means increasing the debt—a figure not likely to be lost on campaigning Congressmen.

But if taxes are not to be cut, what can be done?

The answer: A lot.

The basic ingredient of growth remains what it has been right along: the confidence quotient of thousands of individual businessmen, whose separate investment decisions are what add up to national zip or stagnation.

It is questionable how much their confidence would, in any case, have been stimulated by a quickie tax cut. This is going to have to be built by long-range reforms, and by evidence of Government attitudes rooted not in the urge to manipulate but in the realities of economic experience. In planning capital investments, businessmen are looking less to the next 6 months than they are to the next 6 years. Here there are several critical factors, about all of which something can be done:

Taxes: What's needed is not a shot in the arm, but a comprehensive overhaul of the structure which brings a sharp reduction in rates. The President has promised to recommend such action. Mr. Mills favors it. Its prospects could well have been torpedoed by a tax cut now; to effect it, the President is going to need substantial room for maneuvering in engineering an overall reduction of revenues. It's going to take a massive campaign, such as was mounted in behalf of the trade bill, to get it through Congress. Further, if it is to accomplish its aims, it's going to have to be the kind of restructuring that acts to reward initiative, not, as the present tax laws do, to stifle it. This is going to take political courage. There are sure to be enormous pressures brought to concentrate cuts in the lower brackets, thus further exacerbating the present imbalance and further penalizing achievement. This also, by making Federal benefit programs cheaper for the mass of voters (at others' expense), would further enhance the long-range political pull of more and more Government spending, and thus invite a greater drain on the private sector. These pressures have to be resisted, and a courageously creative reform pressed.

Regulation: The antitrust laws, loosely worded and even more loosely interpreted, have too often lately been used as vehicles of harassment. They are meant to preserve competition, not to hobble growth. For too many of those who choose the business of regulating, regulations becomes an end in itself. Both the laws and the philosophy that guides their enforcement need critical review.

The dollar: Maintaining its stability is vital. And, as a confidence-restorative, clearly evident determination to do so at whatever cost is essential.

Labor: Unions have far outgrown the structure of special privileges and exemptions they were granted when they were fighting for their existence. Now theirs has become the most egregious monopoly, theirs the unchecked power that flouts the public interest for private gain and gets away with it. The time has come to cut back their powers, and to devise a means of applying to unions the principle, if not the letter, of the antitrust laws that long have applied to business.

Profits: These have been badly squeezed, but more is needed than a boost in balance-sheet figures. There has to be a clear, positive and public recognition of the creative role profits play in the free enterprise system. When Mr. Kennedy says he's for profits because the Government gets 52 percent of them, he doesn't make much mileage. Instead, he arouses apprehension that he sees business in the role of provider for government rather than an independent force with its own rights. Profits are the fuel of progress, and if the country is to be got moving its economic engine has to be provided with the fuel it's designed to run on.

Government: What saps business confidence as much as anything else is fear of the unknown in the area of government activity, a fear which both Mr. Kennedy and his top advisers have fed. The antifree enterprise sentiments among liberal Democrats that surfaced so dramatically in the Senate filibuster didn't help. The administration has clamped a lid on public statements by top economic officials in an effort to contain these fears. But the men who have repeatedly pressed for greater Federal intrusion on private decisionmaking still hold their posts, and have not recanted their views; presumably, even though their mouths are publicly shut, they flap as busily as ever within the administration's councils. If confidence is to be restored, there has got to be solid assurance that their advice is not being taken, and will not be taken.

The economic indicators continue mixed; in the present state of the economy, chances are they will continue so for a while to come. Many predict that the present slow recovery will turn to mild recession by early 1963. But it need not—if business can be given assurance of a climate in which its creative force will be unshackled, its initiatives rewarded and its role respected.

AID TO GOVERNMENT-OWNED MASS TRANSPORTATION SYSTEMS

Mr. KEATING obtained the floor.

Mr. LAUSCHE. Madam President, will the Senator yield?

Mr. KEATING. The time is controlled. Would the Senator ask for some time?

Mr. LAUSCHE. I should like to speak for about 4 minutes.

Mr. KUCHEL. How much time is available to both sides on the bill?

The PRESIDING OFFICER. Ninety-seven minutes are available to the proponents of the bill and 104 minutes are available to the opponents.

Mr. KUCHEL. I am glad, in a gesture of friendship, to yield 4 minutes to the Senator from Ohio.

Mr. LAUSCHE. California and Ohio join hands. [Laughter.]

Mr. KUCHEL. I am glad to join hands for 4 minutes.

Mr. LAUSCHE. A few days ago the Committee on Banking and Currency recommended to the Senate the passage of a bill which would make available $500 million over a period of 3 years in the subsidization of mass transportation systems in local communities. The bill provides that this aid shall only be given to those transportation systems which are operated by the Government.

It is interesting to note that in the country there are 1,272 local transportation systems, and that of the 1,272, 60 are operated by the Government.

As I said a moment ago, the aid will go only to governmentally operated transportation systems. That brings us to the interesting question of what will eventually happen to the privately operated systems if it is declared that to get Federal aid they must be publicly or governmentally owned.

I submit that the proposal means the eventual conversion of all transportation systems from private into governmental operations. Perhaps it is in accord with the trend of the times. Perhaps it conforms with the judgment of many in high places of public office, that the private operations of our railroads and mass transportation systems back home ought to be destroyed and converted into governmentally owned operations.

I cannot subscribe to that philosophy. I cannot dismiss from my mind that the great abundance which we have in this country, especially when compared with the paucity of the economic strength around the world in Communist and Socialist countries, would not justify any course of action which would change our system.

The bill, if passed, means the socialization of the local transportation systems throughout the country. Sixty of these 1,272 systems are operated by Government. These 60, in the buying of equipment and in the buying of roadbeds, would receive from the Federal Government $2 for every dollar they spent.

The PRESIDING OFFICER. The 4 minutes of the Senator from Ohio has expired.

Mr. KEATING. I yield 2 more minutes to the Senator on the bill.

Mr. LAUSCHE. I understand that in the Committee on Banking and Currency four of the members dissented. They could not subscribe to that program. Their views will be filed with the report. If it is to take 3 years and $500 million to partially take care of the 60 systems, how much more is it going to cost to take care of 1,212 more? I suggest that it will not be $500 million, but that there will be a program which will last through the years, and the cost of which will run into billions of dollars.

The Senator from New York [Mr. JAVITS] has just spoken about a tax cut. How wonderful it would be if we could prudently give the people of our country a tax cut. However, if we are to give them a tax cut, we will not be able to do it if the Government increasingly enters into subsidization. A tax cut would increase deficits, and increased deficits produce a cheapening of the buying power of the dollar. Deficits cause a blanket of fear to fall upon our short-term foreign creditors throughout the world, who demand that they be paid, not in American dollars, but in gold. It is just poppycock to talk about strengthening the dollar on the one hand and on the other engage in a policy of the type proposed.

The PRESIDING OFFICER. The time of the Senator has again expired.

Mr. KEATING. I yield 1 more minute to the Senator from Ohio.

Mr. LAUSCHE. In due time I will ask unanimous consent to have the bill referred to the Committee on Commerce. If I cannot procure unanimous consent, I will submit to the Senate a motion that the bill be referred to the Committee on Commerce, where it rightly belongs.

I thank the Senator from New York. I yield the floor.

PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. KEATING. Madam President, I offer an amendment to the Goldwater amendments as revised, to add the words "or any other State." I yield myself such time as I may need on that amendment.

Before discussing it, I wish to refer briefly to a few other matters.

WORLD TRADE CENTER ILLUSTRATES SIGNIFICANCE OF PRACTICAL STEPS TO EXPAND WORLD TRADE

Mr. KEATING. Madam President, at a time when the importance of international trade is becoming ever more apparent, it is significant to note the recent action of the States of New York and New Jersey in authorizing the development of a great World Trade Center for the port of New York. This $270 million center, to be developed by the joint agency of the two States, the Port of New York Authority, will be located in lower Manhattan, an area long identified as the principal headquarters of the international trade community. The World Trade Center is tangible evidence of State and local cooperation in the field of international trade.

The basic purpose of the World Trade Center is to promote and to expedite the flow of goods of foreign trade. International businessmen, both American and foreign, will find the center an integrated facility of commerce bringing together the offices of a great variety of agencies and businesses involved in the marketing and service aspects of world trade. By centralizing these functions, the center will greatly simplify and expedite the administrative processing involved in international trade. The result will be better service to the buyer and seller as well as dollar and time savings.

It is expected that the center will include a wide variety of public and private agencies concerned with trade, including the U.S. Customs Service, customs brokers, freight forwarders, foreign consulates, international banks, marine insurance firms, and, of course, exporters and importers. All will be involved in negotiating, financing, arranging and clearing the movement of export-import cargoes through the great port of New York.

Equally important, the World Trade Center will provide a focal point for exhibiting and marketing products from all corners of the globe. It will be a huge marketplace attracting both U.S. and foreign buyers and sellers. The ease with which international buyers will be able to inspect and buy goods on display in the center will stimulate the movement of American products to oversea destinations.

An unmatched source of world trade information will also be available to businessmen at the center through the consolidation of trade information services now located in various and sometimes widespread parts of the bistate port of New York.

Like the trade bill now before a Senate committee, the World Trade Center will serve as a constructive symbol of the importance of international trade. I am confident it will benefit tremendously the people of the port of New York, who rely heavily on port operations as a principal factor in their economic well-being. The Nation as a whole also will clearly benefit since the port of New York is the principal gateway for international trade.

It is important that we realize that trade is more than legislation and negotiations. Trade involves people, businesses, money, transportation, and, above all, hard work. If our Nation's drive for expanded trade is to succeed, it will require practical efforts like those being devoted to the trade center in New York, as much as anything else. Another good example of practical effort in this area that comes to mind is the Commerce Department's "Export E" award program.

Madam President, I commend the officials of the State and city of New York and of the State of New Jersey. I am delighted to call attention to the wonderful progress they have made and to the ambitious and vital goals which they have set for themselves in the months and years ahead.

Madam President, I ask unanimous consent to have printed at this point in the RECORD two articles written by Mr. Alan Schoedel which are a part of an excellent series published in the Journal of Commerce of April 2–6, 1962. The first article quotes extensively Mr. Richard Sullivan, the new director of the trade center, who is extremely well qualified for this key post and who, I feel confident, will do a fine job in it.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

WHEELS SET IN MOTION—BIG TRADE CENTER BENEFITS DUE

(By Alan Schoedel)

Governor Rockefeller's signing of the bill to authorize a World Trade Center in Manhattan sets in motion a project that can transform and modernize the whole vast shipping industry of New York.

COMPANION BILL

Governor Hughes of New Jersey signed a companion bill on February 13. Now the bistate Port of New York Authority can begin brass-tacks negotiating with prospective tenants for what many trade experts believe will be the greatest focal point of international commerce in the world.

OBJECTIVE SIMPLE

The World Trade Center envisioned for Manhattan's lower West Side has one simple and immensely practical business objective. It is to liberate New York's import-export industry from the incalculable waste, the costly delays, the inefficiencies, which stem from the existing helter-skelter pattern of offices and agencies concerned with moving cargo through the Nation's No. 1 port.

INFORMATION CENTER

In addition, its planners say, it will provide an unparalleled source of all types of information bearing on world trade; a center for the exhibiting of goods available for import and export; a "one-stop" meeting ground for buyer and seller.

Right now, the port authority is embarking on one of the most complex assignments ever to face a builder. In virtually simultaneous operations, lease commitments will be negotiated and architects will be designing the World Trade Center to fit the demand for space.

SET FOR WEST SIDE

About the only thing decided on for sure at this juncture is that the World Trade Center—originally slated for an East Side location—will be on the West Side, on a site covering about nine small blocks, bounded generally by the West Side Highway, Church Street on the east, Vesey Street on the north, and Liberty Street on the south.

How many buildings will it contain? How tall will they be? What will they look like? What proportion of New York's foreign commercial attachés will be in the center when it opens?

No one knows yet. Within a few months, the port authority will begin getting the answers.

SULLIVAN IS DIRECTOR

"The one thing that's certain," said Richard Sullivan, newly appointed director of the $270 million project for the port authority, "is that there are a lot of variables."

Like all port authority projects, the World Trade Center must pay its own way. Technically, this will not be established until all the contracts and leases are down in black and white—but the port authority as a whole and Mr. Sullivan in particular are confident that the center will be economically feasible.

What about rents, then? Mr. Sullivan can say only that they will be—must be—at a level comparable with other new buildings in lower Manhattan.

Commercial builders of the usual Manhattan skyscraper line up two or three big "anchor" tenants, then fill in around them with smaller renters. The port authority's job will be just the opposite.

KEY TO SUCCESS

"The success of the World Trade Center will depend on the number of people we get in it," Mr. Sullivan explained. "I would rather have five tenants taking 1,000 square feet than one tenant taking 5,000 square feet."

An exception, of course, would be U.S. Customs, now in cramped, divided, and obsolescent quarters in Manhattan. Unifying the customs operation for the port of New York and providing it with desperately needed space will be one of the basic purposes of the World Trade Center—a purpose that has everyday dollars-and-cents significance for all firms engaged in import-export business in New York.

EAST SIDE PLAN

When the World Trade Center was originally proposed in 1961, it was estimated that 4,000 workers could build it in 5 years. That was for an East Side location. The new site is about 15 percent smaller and the proposed new stock exchange has been eliminated, so it should take less time.

For the East Side project, the port authority had worked out a schedule of phases or stages, so that it could be put into use section by section. This procedure will be followed on the West Side, too, but the staging schedule has not been prepared.

The World Trade Center is part of a package, the other part of which calls for the port authority to take over the bankrupt Hudson & Manhattan Railroad. In fact, the center will rise above the underground terminal of the H. & M. in lower Manhattan.

Two large buildings owned by the H. & M. at 30 and 50 Church Street will be among those demolished to make room for the project.

DELAY HELD WORTHWHILE

New Jersey's Legislature balked at the original package bill adopted in Albany, which called for a World Trade Center on Manhattan's East Side and port authority rescue of the H. & M.—an important line for New Jersey commuters. In the process of reaching a compromise, the center was moved to the H. & M. terminal location. All this dickering caused a year of delay, but the final result makes it seem decidedly worth while.

Shifted from the East Side to the West Side, the World Trade Center will be much more accessible.

Several subway lines have stations directly at the site or close by, in addition to the H. & M. terminal itself. (It is estimated that well over 25 percent of the center's employees will come from New Jersey.)

This convenient access is naturally important to a development that will be visited by many strangers to New York, including foreign businessmen. It may even make it easier for tenants of the center in such a simple necessity as finding secretarial help.

"We have trouble enough getting secretaries to come here," said one freight forwarder in the shipping district at the lower tip of Manhattan. "They don't want to come this far to work. We never could have gotten them to go over to the East Side."

A MECCA FOR BUYERS, SELLERS—TRADE CENTER SEEN AS MARKET

(By Alan Schoedel)

Of all the obstacles to foreign trade, authorities in New York agree, none is greater than the simple lack of essential information.

These authorities, businessmen and Government commercial officials alike, are increasingly aware that countless opportunities for import or export sales are missed only because the buyer and seller never make contact.

AID FOR TRADERS

Expediting such trade contacts, helping the producer find out about foreign markets and helping the buyer find out what is available, will be a primary function of the World Trade Center which the Port of New York Authority proposes to build on Manhattan's lower West Side.

A large area is to be set aside for exhibits of products by private firms and by governments.

Beyond that, it will house what almost certainly will be the biggest library of foreign trade information in the country, perhaps the world. It will be, in effect, a briefing center where the businessman wishing to trade abroad can obtain expert guidance on the needs and requirements of each market, each country.

QUICK CONTACTS SOUGHT

Talks with persons who are daily engaged in some aspect of international trade in New York brought frequent references to this situation:

A businessman from overseas, looking for certain products to buy in this country, arrives in New York. His time is limited. So, of course, is his budget for the trip.

He wants to make contact with the largest possible number of companies in his field.

Scrambling around New York to the offices of a few concerns of which he knows is one possibility, but it takes a lot of time. He may, with luck, find a specialized industrial exhibit that suits his needs.

With enough time, he can get around to some of the trade promotion offices maintained by various States in New York.

But nowhere does he find everything that he really wants to know. He calls a business association or a government agency, in hopes of getting the facts he needs.

Often they can give some help. All too often, say trade experts, he finds his time here has run out before he really can cover the ground he should.

RESERVOIR OF INFORMATION

It is this situation which the World Trade Center could remedy, to a large degree, its advocates say. The center is envisioned as a matchless reservoir of information, more nearly complete than anything now available to the import-export trader.

"There are hundreds of foreign businessmen who come to New York every week," said one official of the Commerce & Industry Association of New York. "They have limited time. The very nature of the inquiries they make to us—at the last minute—makes it obvious that they haven't covered their trade as they should."

More than 2,000 inquiries about trade, most of them from overseas, are received every month at the New York office of the New York State Department of Commerce. These are processed, cataloged, and published. The department even seeks out foreign customers for New York State products.

AID FOR VISITOR

Even so, Thomas J. Higgins, assistant director of the office, and Henry Dodge, its foreign trade consultant, are familiar with the problem of the foreign visitor on a tight business schedule. A World Trade Center, they said, would make it unnecessary for him to go "traipsing all over the New York metropolitan area."

Every morning, their department receives new evidence that world trade depends largely on reaching the small businessman with limited resources.

Some of the trade inquiries arriving in the mail from points as distant as Hong Kong may be on the finest stationery, expertly typed by an excellent secretary. But others are laboriously printed in ink on a page torn from a looseleaf notebook, or scribbled on foolscap.

WIDER INTEREST SEEN

Not only would a World Trade Center simplify the handling of such inquiries, said the New York department officials, but it would encourage even wider interest in trade. They are particularly concerned at the lack of interest in world trade among many American businessmen.

Louis Birnbaum, of the New York office of the U.S. Department of Commerce, also spoke of foreign businessmen whose trade-hunting visits could be "more fruitful" than they often are.

"A great deal of trade results from just finding a product," he added, in commenting on the importance of a centralized exhibit area. At present he indicated, the tendency is to let the businessman "wander around" in search of a needed product, and maybe "stumble on it."

BROADER BASE

Of a centralized exhibit and information area, Mr. Birnbaum observed: "The commercial base is broadened. If the selection is widened, chances are the customer will buy more goods in the long run."

The same view is taken by N. Charles Guccione, secretary of the National Council of American Importers, Inc., and formerly import manager for a large chain of department stores.

"I'm a great believer in permanent exhibits," he said, in talking about the World Trade Center. He cited the permanent display maintained by the giftware industry in a Fifth Avenue building to which buyers come all the year round.

Keith S. McHugh, New York State commissioner of commerce, predicted that the World Trade Center will establish "beyond a reasonable doubt" that the city and port of New York "is the real center of world trade."

"New York always possessed the basic resources for such a claim," said Mr. McHugh. "It has the port, the financial institutions, the private carriers, the brokers, the freight forwarders and, most important, the buyers and sellers.

"But these many resources have been scattered and diffused. The new World Trade Center will provide the physical facilities to centralize all these many interests and greatly facilitate doing business in world commerce."

Mr. KEATING. Madam President, the trade center is tangible evidence of the kind of practical efforts we need to expand trade. These efforts serve as a reminder that world trade goes beyond legislation and economic theory. Trade is business and requires our best efforts if our overall trade position is to improve in the years ahead.

It is in this light that I regard the most important changes in the trade bill made by the other body to be the feature providing for a "special representative" to be the President's chief trade negotiator. This makes sense. It pins responsibility on one man and gives citizens in all walks of life—labor, management, consumers, and taxpayers—a real opportunity to find out what is going on in the field of trade. I shall support this provision enthusiastically, and I ask unanimous consent to have printed at this point in the RECORD a recent statement which I made about it, stressing the importance of practical steps like this, which give meaning and substance to our Nation's trade policies.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KENNETH B. KEATING ON SPECIAL REPRESENTATIVE FOR INTERNATIONAL TRADE

A law is only as good as the men who administer it. This is especially true of trade legislation now coming before the Senate.

It's time for us to turn over a new foreign trade leaf. Traditionally the United States has relied on career State Department officials to handle the bulk of our trade negotiations. Other nations rely heavily upon hard-boiled business experts. For the sake of millions of workers in this country, we should follow their example and this is not intended to be in any way a reflection on the integrity or ability in their proper sphere of those who have heretofore represented us in trade negotiations.

The President's trade bill, I predict, will pass the Senate in much the same form as it passed the House, and it may well be recorded as the single most important achievement of the 87th Congress.

The House approved a special provision for a chief trade negotiator, to be appointed by the President and confirmed by the Senate, who would hold ambassadorial rank. This major change in the law gives the President an opportunity to place a highly qualified person in the driver's seat for tariff negotiations. Assuming that the Senate goes along with the House—I strongly urge that he be a businessman, experienced in trade.

Since 1934 the United States has led the way toward expanded trade among the nations of the free world. The principle of reciprocal trade was a tremendous innovation for which the United States can take full credit.

Now, under the proposed new legislation, the President will be granted power to negotiate further tariff reductions. These would be based upon a simple assumption:

If we lower our trade barriers, other nations will lower theirs. If, for example, we negotiate a lower tariff on Dutch tulip bulbs, the bill requires that the Dutch reciprocate by granting an equivalent tariff cut on American goods moving into their markets—say, machine tools.

This is the true meaning of reciprocal trade. Rather than a giveaway, it is a joint venture in prosperity. To make it effective, however, we must negotiate in a determined, hard-hitting manner. We must act with firmness to insure that other nations lower their tariffs as much as we do. Trade is business and every one knows that unless you strike a fair bargain, you can't stay in business.

In recent months we have been hearing a great deal about misunderstandings between the President and the business community. I can think of no single step which would go farther to reassure business and also the workers of this country than the appointment of a recognized business expert on foreign trade as chief trade negotiator for the United States under the new trade law.

Such an action would dramatically demonstrate the President's oft-professed concern for and confidence in the business community. It would underscore before the world our adherence to the basic principles of a free enterprise economy. Certainly I would not wish to disparage the hard work of the public servants who have carried the burden of our negotiations thus far. But realistically speaking, they have not been tough enough in their insistence upon truly reciprocal trade.

Let the President appoint a qualified businessman to this vital post. Let him ignore the man's politics. In that way, he will best serve the many jobholders and businessmen whose well-being is so intimately tied to the success of any new trade legislation.

The President already has indicated that he does not object to naming a chief tariff negotiator—has implied, moreover, that he intends to rely heavily on such a man.

This is a constructive attitude, which I believe could be brought to constructive reality by the appointment of the type of man I have described. A businessman would bring to bear practiced commercial judgment. He would see to it that American industry, as well as American labor, gets a fair shake. He would make certain that our longrun national interest is served.

Unless we are firm, unless we take a businesslike stand, unless we insist upon equal value for any concessions we grant, the nations of the free world will not respect us, and this bold, new drive for expanded trade—involving the lives and fortunes of millions of Americans—will fail. We must not let it fail. The welfare of thousands of industries and millions of workers requires its success.

Mr. KEATING. Madam President, I have placed this statement in the RECORD because I also believe it is very relevant to the program for the new trade center in New York City. The work of the "special representative" on trade to the President will be made much easier by the fact that we will soon have in New York City, our Nation's greatest port, a huge, concentrated source of information and services which relate to foreign trade. I am anxious to have the Federal Government participate through the relevant agencies in the development of this center, and I think it would be appropriate if, when we pass the trade bill (H.R. 11970), the Federal Government would consider locating an office for the "special representative" to the President and other relevant and related agencies at the trade center. This will be a logical and appropriate setting for information gathering and administrative offices and staff of the Nation's top men in the field of foreign trade.

COMMERCE DEPARTMENT DESCRIBES AGGRESSIVE SOVIET OIL MARKETING TACTICS

Mr. KEATING. Madam President, Monday's issue of the U.S. Government publication International Commerce contains a fine article which discusses the great strides which the Soviet Union has made in the expansion of its petroleum industry. According to the informative and well-documented article, the Soviets have been aggressive in broadening their markets, even though it is estimated that in 1960 Soviet exports accounted for only about 5 percent of the total world petroleum trade. The article makes clear that "the economic-political advantages that the Soviets derive from their petroleum exports were considerable." The article, written by Ferdinand F. Pirhalla, points to the significant development of Soviet oil and gas pipelines to increase the extent of oil exports to Western Europe and undoubtedly also to the rest of the free world.

What the article does not mention is the action being taken by the United States to meet this new Soviet economic threat. The omission is undoubtedly made for a very good reason. So far the United States has done next to nothing. Quite the contrary, in fact, the Department of Justice, through a rigid interpretation of conflict-of-interest regulations, has made it impossible even for the oil companies represented in the National Petroleum Council to prepare a factual report on the problem.

Madam President, in all too common bureaucratic fashion, the right hand of our Government either does not know what the left hand is doing or is incapable of helping it. While the Commerce Department prepares a serious study of the problem, the Justice Department holds back the publication of an already prepared report on the subject, and the Interior Department denies that the report has yet been prepared.

Madam President, this would be a comedy of errors if it did not involve the serious issue—to which I have addressed myself so often on this floor—of economic and political competition with the Soviet Union. Under present circumstances it is a highly regrettable situation under which American businesses are being directly blocked in their efforts to meet Soviet economic threats.

I ask unanimous consent to have printed in the RECORD at the conclusion of these remarks the article by Mr. Pirhalla.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOVIETS PUSHING PETROLEUM PRODUCTION AND EXPORTS; GAP WITH UNITED STATES NARROWING RAPIDLY

(By Ferdinand F. Pirhalla)

The Soviet Union has made great strides in expanding its petroleum industry since the beginning of the fourth 5-year plan in 1946. The 1960 production mark of about 148 million tons more than quadrupled the 1949 figure, and made the Soviet Union the world's second largest producer of crude petroleum (the United States was first).

Although the United States surpasses the Soviet Union in crude production by a wide margin, the gap is narrowing rapidly. In 1946, Soviet production was about 10 percent of U.S. production, whereas in 1960 it was around 42 percent.

The difference between United States and U.S.S.R. production is expected to get smaller in future years.

The Soviet 7-year plan calls for increasing production of crude petroleum from about 148 million tons in 1960 to 230 to 240 million tons in 1965. The goal of 230 to 240 million tons appears to be attainable on the basis of annual rates of growth which averaged 16 percent during 1956–60. Realization of the maximum goal of 240 million tons will put Soviet production in 1965 at about two-thirds of United States 1960 production. To meet this goal an average annual increase in production of slightly less than 10 percent during 1961–65 will be required.

PETROLEUM PRODUCTS

The rapid growth in crude production since 1946 was accompanied by a corresponding growth in production of petroleum products. In 1960 production of the latter amounted to 119.6 million metric tons as compared with an estimated production of 19 million tons in 1946. Planned production for 1965 is 197 million metric tons, or about 64 percent over 1960 production. The bulk of production during 1946–60 consisted of light products—gasoline, kerosene, and light diesel fuels.

The substantial increases in Soviet production of crude and petroleum products since the end of the war resulted chiefly from: successful exploitation and development of immense rich oil deposits in the Ural-Volga region and consequent increases in proved reserves; efficient methods and techniques in drilling and producing; and increased refining capacity.

Because of the exploitation and development program in the Ural-Volga region, production of crude oil in that region increased in 1960 from about 4 million tons, or 21 percent in 1946, to an estimated 104 million tons, or 70 percent of Soviet total production. Concomitant with the development of the Ural-Volga region the Soviet Union's oil reserves expanded significantly. Proved reserves at the end of 1960 amounting to an estimated 24 billion barrels more than tripled proved reserves available at the end of 1946.

Rehabilitation and modernization of old refineries and construction of new ones increased the Soviet Union's primary refining capacity to about 157 million tons in 1960 from an estimated 24 million metric tons in 1946. The goal of the 7-year plan is to increase the refining capacity to an estimated 252 million tons in 1965. The attainment of this goal calls for an annual rate of growth of 10 percent; this is about 4.5 percent less than the increase in the refining capacity in 1960 from the 1959 level.

The Soviet Union maintained a virtual blackout on statistical data regarding its economy from 1939 to 1955. Official Soviet data, therefore, of Soviet foreign trade in petroleum for that period are not available. Primarily because of the war damage to its petroleum industry it is inferred that for several years after the war the Soviet Union was a net importer of petroleum, mainly from Rumania. (It is estimated that Rumania delivered as reparations to the Soviet Union about 9 million tons of petroleum and petroleum products between 1944 and 1948.)

Estimated production of petroleum products in the U.S.S.R., by type of product, 1960, and 1965 planned production

[Million metric tons]

Products	Quantity	
	1960	1965
Gasoline	26.0	35.4
Kerosene	15.3	24.0
Light diesel fuel	24.2	31.8
Heavy diesel fuel	4.9	11.2
Lubricant base oils	5.5	7.9
Residual and other products	43.7	86.7
Total nongas products	119.6	197.0

EXPORT-IMPORT FIGURES

In 1955 the Soviet Union again became a net exporter of petroleum; total exports of about 7 million tons exceeded imports by approximately 3 million.

Since 1955 Soviet exports have risen rapidly. In 1960 they reached 33.2 million tons, almost five times the 1955 figure, and about a 32-percent increase over 1959.

Imports in 1960, on the other hand, remained at about 4.4 million tons, almost the same as in 1955, and consisted chiefly of crude oil from Austria and gasoline from Rumania.

Of the 33.2 million tons exported in 1960, 17.8 million tons consisted of crude and 15.4 million tons of petroleum products. That exports of crude were substantially greater than exports of petroleum products is contrary to the traditional distribution of Soviet petroleum exports but is a continuation of a trend beginning at least in 1955. It may be a development indicating that the greatest markets for future petroleum exports will be for crude.

The bulk of petroleum products exported during 1955–60 consisted of diesel oil and fuel oil. In 1960 these two accounted for about 70 percent of total exports of petroleum products and were exported in almost the same proportion. The free world during 1955–60 took most of Soviet petroleum products in this form. In 1960 about 57 percent consisted of fuel oil and 36 percent of diesel oil. The Sino-Soviet bloc during the same period imported mostly gasoline (about 43 percent in 1960) and diesel oil (about 32 percent in 1960).

EXPORTS TO FREE WORLD

Soviet exports of petroleum to the free world in the postwar period were negligible until 1955. In that year they amounted to about 3.3 million tons and since then have shown significant gains.

It became apparent in 1958 that the Soviets had begun a drive to increase exports to the West. In that year a 50-percent increase over 1957 was noted, amounting to about 8.9 million tons. In 1959 exports jumped about 54 percent over the previous year's level and in 1960, when they amounted to about 20.5 million tons, they were about 50 percent above 1959 exports.

In 1958 the free world took about 49 percent of the Soviet petroleum exports. In 1959 exports to the free world were about 54 percent of total exports and in 1960 they increased to about 62 percent. In 1960 exports of crude petroleum exceeded exports of petroleum products to the free world for the first time since World War I.

Most of the Soviet oil exports to the West have been going to the industrialized countries of Western Europe. In 1960, 66 percent went to Western Europe, 13 percent to Africa and the Near East, 11 percent to South America, and 6 percent to Asia. The leading recipients in 1960 in the Sino-Soviet bloc were: China (23 percent), Czechoslovakia (20 percent), East Germany (16 percent), Poland (16 percent), and Hungary (11 percent).

BROADEN MARKETS

The Soviets have been aggressive in broadening their markets. In 1955, 20 countries were supplied by Soviet petroleum, whereas in 1960 there were 32 countries.

Notwithstanding the substantial increases in Soviet exports during the past several years, the volume of Soviet exports have been relatively small compared to the total volume of petroleum in international trade. It is estimated that in 1960 Soviet exports accounted for about 5 percent of total world trade in petroleum. The economic-political advantages that the Soviets derived from their petroleum exports, however, were considerable. Oil earns valuable foreign exchange for the U.S.S.R. enabling it to import essential goods and equipment which it desires from Western European countries. Increased capability to export oil has enabled the Soviets to make trade arrangements whereby a few Western countries are taking substantial proportions of their petroleum supplies from the U.S.S.R.

The Soviet Union has enhanced its competitive position in certain less-developed countries by accepting soft currencies and hard-to-dispose-of commodities in exchange for oil. In some cases the Soviets have used oil exports to establish ties with free world countries.

The large sedimentary basins of the Soviet Union are expected to provide several new oil provinces in the future. Development of such areas within the U.S.S.R. should lead to substantial increases in production of petroleum. Consequently, it appears that the capability of the Soviet Union to export petroleum will continue to increase.

BACKGROUND INFORMATION

The Soviet Union has a long history as a producer of petroleum. Although a petroleum producer several years before 1871, it is generally believed that Russia drilled its first well in that year. Recently, however, Soviet writers have been claiming that drilling of the first well in their country antedated the first well successfully drilled in the United States in 1859.

It was not until 1925, however, that the Soviet Union made its first serious effort to modernize its oil industry. Up to that time a considerable part of production was from hand-dug shallow wells.

There was a substantial increase in production of crude petroleum from 1871, when production amounted to 26,000 tons, to 1901, when Czarist Russia reached its production peak of 11.6 million tons. In the latter year czarist Russia was the leading producer of crude oil, accounting for 47 percent of total world production.

Subsequently, for almost three decades, production of crude petroleum was below the level reached in 1901. A principal factor for the decrease in the years immediately after 1901 was civil unrest in the country which manifested itself in labor strikes and destruction of facilities in the principal oil producing area. The industrial upsurge beginning in 1908 and the increased demand for petroleum during the initial year of World War I brought a rise in production. From 1908 to 1916, however, production was still below the 1901 level.

Unsettled economic and administrative conditions prevailed for a few years following the overthrow of the czarist regime in 1917. Virtually all industrial production was disorganized. Crude oil production of less than 4 million tons in 1920 and 1921 reflected the conditions of political and economic chaos. The new economic policy under the new Soviet regime, initiated in 1921, promoted economic recovery. Under this program petroleum production began to increase. It was not until 1928, however, that crude oil production reached the 1901 level.

The 5-year plans, the first of which began in 1928, encouraged increased petroleum production by providing for new pipelines, building of new refineries and the creation of new markets. By 1941, the year of the German invasion, production of crude oil reached a new peak of 33 million tons. This was equivalent to about 17 percent of U.S. production in that year.

World War II, however, resulted in severe damage to the petroleum industry and in 1945, the year in which the war ended, production amounted to about 19.4 million tons or about 60 percent of what it had been in 1941.

Except during World War II and in the immediate postwar years, the Soviet Union has been historically a net exporter of petroleum, especially petroleum products. Prior to World War II imports of crude petroleum were about zero and imports of petroleum products were insignificant. Exports of crude petroleum were not of particular importance. After reaching a peak of about 526,000 metric tons in 1932, exports of crude petroleum declined and in 1939 were almost nil. Exports of petroleum products, however, were of considerable significance and played an important part in earning foreign exchange for the country's industrialization program. In 1932 about 5.6 million metric tons of petroleum products were exported—an interwar peak. In that year they accounted for about 17 percent of the total value of Soviet exports. As with crude petroleum, exports of petroleum products after 1932 declined and in 1939 amounted to about 474,000 metric tons.

The decline in exports from 1932 until the beginning of World War II was probably attributable to a combination of several factors, such as decreased demand because of the world depression and recession, increased competition from other countries, increased Soviet consumption, and stockpiling for war purposes. The principal markets for Soviet petroleum during these years were Italy, France, Germany, the United Kingdom, Belgium, Spain, and Sweden.

ROCHESTER APPRENTICE PROGRAM BOASTS MANY ACCOMPLISHMENTS

Mr. KEATING. Madam President, August has been designated as National Apprenticeship Month. My home city of Rochester was among the first cities in the Nation to establish training programs under the provisions of the National Apprenticeship Act of 1937. Rochester was the first city in the Nation to establish apprentice standards for machinists, plumbers and steamfitters, as well as for apprentices in graphic arts and the printing trades.

In Rochester the program since its initiation in 1940 has been under the active leadership of George L. Green. In its 22 years, the Rochester office has processed and registered 3,345 apprentices, representing approximately 240 employers. One hundred and eighty-eight apprenticeship programs covering 83 different trades, have been established. Both management and union have joined enthusiastically in the program, and 103 joint apprentice labor and management committees have been established. The gratifying success of this program in Rochester can be seen from the fact that since 1940, apprentice graduates have put in 13,000 working years or, computed in other terms, 26 million working hours.

This is indeed a proud record by the city of Rochester, and at this time I am delighted to take notice of the city and it leaders.

Madam President, I ask unanimous consent to have printed at this point in the RECORD, an excellent article on the subject, which appeared on July 29 in the Rochester Democrat and Chronicle.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

APPRENTICE TRAINING PROGRAM TO CELEBRATE 22 YEARS HERE

Rochester, one of the first cities in the Nation to establish training programs authorized by the National Apprenticeship Act approved by Congress August 16, 1937, will join in the 25th anniversary next month with an outstanding record of achievement.

The local office of the U.S. Department of Labor, Bureau of Apprenticeship and Training, was set up here December 7, 1940, by George L. Green of 15 Church Street, Le Roy. Green has directed the program for more than 21½ years.

PROCLAIMED BY KENNEDY

August was designated National Apprenticeship Month in a proclamation by President Kennedy. He asserted that "in this era of rapidly changing industrial techniques and new approaches to many aspects of our economic life, the development of this Nation's skilled craftsmen is of vital importance to the continued national security and economic growth of the United States."

Mayor Gillette also issued a proclamation hailing August as Rochester Apprenticeship Month.

The U.S. Post Office will issue a 4-cent apprenticeship postage stamp August 31 to commemorate the 25th anniversary of the program.

TWO DECADES OF PROGRESS

Green summed up more than two decades of progress locally by declaring, "I have found both management and labor very friendly and very cooperative" in initiating and expanding apprentice programs. He termed their contributions outstanding.

In a summary of the apprentice and employee training program, Green disclosed that 188 apprenticeship systems in 83 trades were developed and registered; 78 unions were participating in the registered programs; 103 joint apprentice committees (labor and management) have been established.

The Rochester office has processed and registered 3,345 apprentices in the following categories, representing approximately 240 employers, most of them in the city and county: Building industry, 1,797; machine tool, 1,077; printing, 309; miscellaneous, 162.

Besides Monroe, Green also serves as apprenticeship representative in Orleans, Wayne, Genesee, Wyoming, Livingston, Ontario and Yates counties.

GRADUATES TOTAL 1,506

Apprentice graduates have totaled 1,506 since the first apprenticeship program was registered December 10, 1941, by the Liberty Tool & Die Corp., which graduated its first class at the Powers Hotel, April 27, 1944.

Besides on-the-job training under skilled craftsmen, all apprentices are required to take additional related instruction, at least 144 hours each year, during 4- to 6-year apprenticeships.

The magnitude of the apprenticeship training processes is revealed in figures disclosed by Green.

Since 1940 to July 1 last year, 1,506 graduates put in 13,000 years or 26,000,280 hours, Green said.

Rochester has its share of "firsts" in the apprenticeship program.

WILMONT-CASTLE FIRST

Wilmont-Castle Co. was the first Rochester industry to register standards of apprenticeship for machinists. The company employed the first woman apprentice registered with the New York State Apprenticeship Council, Miss Vivian Holcomb, who received her certificate of completion of apprenticeship November 8, 1947.

As further indications of the impact on the apprenticeship programs, the first such standards in the building trades were developed and registered with the New York State Apprenticeship Council through the Rochester office February 27, 1942. The group was the plumbers and steamfitters. The city now has apprenticeship programs in all 18 building trades.

And the first State apprenticeship standards for the graphic arts or printing trades were established here for the compositors, July 28, 1945, the pressmen, December 10, 1945, the stereotypers on January 1, 1946, and photoengravers, May 24, 1946, at the Democrat and Chronicle and the Times-Union.

PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. **KEATING**. Madam President, how much of the time available on the amendment has been consumed?

The **PRESIDING OFFICER**. The proponents of the amendment have used 12 minutes.

PACIFIC NORTHWEST POWER GRAB

Mr. **KEATING**. Madam President, in my judgment the pending bill is one of the most astonishing and restrictive measures which has ever come before the Congress of the United States in my experience. As I understand the provisions of this bill, it would guarantee a permanent preference for power consumers in the Pacific Northwest area, over power consumers anywhere else in the country. As I understand the bill, it would guarantee electric power consumers in primarily the States of Oregon, Washington, Montana, Nevada, Utah, Wyoming, and Idaho first call on electric energy generated at Federal plants in that region. Other users in other regions would have what is called reciprocal priority, or reciprocal protection, which would only mean that those consumers could also give themselves priority for the use of the electric energy and peaking capacity within their areas.

Madam President, what this bill basically means is that the hydroelectric energy generated by the Bonneville Power Administration will be reserved and restricted for the people in that area, regardless of whether it may be feasible or economic or useful to transmit this power to any other part of the country.

The Bonneville Dam, like other public power installations in the United States, was constructed with the funds of all the taxpayers of the United States. It was not constructed with funds from the States of Washington and Oregon alone. It was not even constructed primarily with funds of the Pacific Northwest. Rather, Madam President, this dam, and the public power works which are a part of it were constructed with money from the pockets of every American taxpayer. New Yorkers, who then contributed about one-fourth of the Federal taxes, undoubtedly paid more for this dam than did any of those who now wish to monopolize its benefits.

It seems quite clear to me that our friends from the States of Oregon and Washington not only are asking too much, but also are placing themselves in a paradoxical position. On the one hand, as ardent Federal power advocates they want the Government to build a high-voltage transmission line which would extend from the Bonneville system down to the Los Angeles area. On the other hand, according to this proposed legislation, it seems clear that our friends from the States of Washington and Oregon do not want to have preference customers in the California area get any guarantee of future power from the Bonneville system, so long as there may be a necessity for the power in the Washington-Oregon area. The desire of these people to retain priority on this Government-subsidized power is certainly understandable. After all, it is the least expensive power in the country. But how can they resolve the principle of a fair distribution of power with their own desires to retain priority or first call on this power?

Madam President, as was pointed out yesterday, the Assistant Secretary of Interior, Kenneth Holum, stated in a speech he made in Nebraska on August 2, 1962:

> As you know, the legislation is related to the proposed construction of an extra-high-voltage common carrier transmission line between the Pacific Northwest and Pacific Southwest.

Mr. Holum went on to say that this legislation is nothing new, that that situation in the Northwest is unique, and that its uniqueness has been recognized for some time by both the Congress and the previous administration. Then Mr. Holum stated that the Senate Interior and Insular Affairs Committee had been concerned with the necessity of regional preference in the Northwest, should an intertie with the Pacific Southwest be constructed.

Madam President, Mr. Holum justified the proposed bottling up of Federal power by saying that a number of important industrial concerns which are dependent upon cheap and abundant power are established in the area, have become dependent upon the low-cost Bonneville power rate, and must continue to have the benefit of it if they are to remain in business. This reasoning astonishes me. In my judgment, any legislation which guarantees regional priority merely on that basis is not only unreasonable, but also is restrictive, and denies the rest of the country any benefits, whether small or large, which they might get from a fairer distribution of the electric energy generated at Federal plants. For example, consider the State of New York. New York wants low-cost electric energy just as much as do Washington, Idaho, Oregon, Montana, Nevada, and Utah, to mention only a few. As proven by the States in the Pacific Northwest, this low-cost electric energy has attracted new industries—industries which have thrived on the low cost. Well, New York would like some share of electric energy to attract and keep our own industries.

Madam President, this bottling of electric energy—"Balkanizing" this Nation, as has been referred to by some persons—is neither reasonable nor economic. Giving regional preference to one section of the country on the basis of an expressed concern for the future welfare of some investor-financed businesses, just does not hold water. I am concerned, as are the rest of my colleagues here in the Senate, with the future of investor-financed businesses all over the country. And I oppose any legislation which attempts to corner Federal electric energy to the detriment of the rest of the country.

That is the reason for my amendment to add the words "and/or any other State" to the amendment submitted by the distinguished Senator from Arizona in the interest of his own State of Arizona, which has been added to by several of my other colleagues, representing their own States.

In another part of his speech, Mr. Holum, speaking for the Interior Department, confirmed one of my greatest fears about this legislative proposal now before us. He said:

> While we have recommended regional preference legislation to meet the Northwest's special problems, we just as strongly assert that we firmly oppose the establishment of regional preference fences around any other portion of the United States.

He further states that he believes his position is consistent with the strong beliefs in the preference clause.

Madam President, if this is the feeling of Mr. Holum, as a spokesman of the administration and the Interior Department, how can the other States ever hope to get even a fair share of Federal electric power? As was further pointed out yesterday, there seems to be another preference within the preference clause. They want preference for their own region and they want to deny preference to all other regions in the country. Madam President, does it seem feasible to guarantee regional preference to one section of the country by passing this legislation? On the contrary, it seems quite clear from the record and from the text of Mr. Holum's statement that this area would vote against any future preference legislation which might benefit another section of the country.

Madam President, I cannot support the preference clause, because I cannot reasonably justify special privileges for any of our citizens. Preferences and privileges create unrest, even antagonism, and thereby weaken our whole form of government. For this reason, I must insist that if there is to be preference, as clearly there would be if this proposed legislation were passed, my constituents must receive similar advantages.

I do not express any lack of confidence in the present Secretary of the Interior in my objection to this measure, but I cannot go along with any measures which would allocate such extensive authority to him or contribute in any way to this further effort at enlarging Federal power.

I have had many occasions to call attention to what I have called the Washington reflex. Too often, it is proposed that all we have to do to solve our problems is pour Federal money on to it. This has always reminded me of the fable of the ostrich who buries his head in the sand and all his troubles fade away. Of course, we all know the moral of this childhood fable—the ostrich's problems, and ours, will only come back to haunt us in ever-increasing proportions.

The problem facing us today is not necessarily one of money—although it cannot be disputed that a huge amount of public revenue has gone into the construction of the basic power facilities. The problem we must meet at this point is one of power, and here again, we seem to think that if we pour a lot of power into the Secretary of the Interior everything will be fine. We cannot solve this problem by granting excessive or additional power to the Secretary to discriminate against some parts of the country in favor of others.

The hearings on this bill, without any reflection on the conduct of them, by and large, gave a very one-sided picture of the situation, since the rest of the country has not been alerted to the nature of the power grab.

The hearings reveal that this preference would undoubtedly be bad for the remainder of the country.

Madam President, we have heard of walls being built in various parts of the world—the great wall of China, the wall around East Berlin—but this is a new kind of wall. It is a wall designed to guarantee one part of the country a substantial hydroelectric power supply, while the rest of the country has no access, or only a very restricted access, to that power. It is a wall to shut in the resources of one area. It is a wall to prevent people from the Pacific Northwest from sharing their hydroelectric riches with any other part of the country. It is a wall to prevent cooperation and mutual development of power resources. In short, it is a wall to deprive the people of the United States of the resources of this country which have been developed with the taxpayers' money, taken from the pockets and pay envelopes of everyone in this country.

Madam President, one may ask what particular considerations have been raised in this case to justify such a power grab in the Northwest. The excuse that was put forward, the pretext for this giveaway, is simply that the Pacific Northwest region is very dependent upon hydroelectric power. The reason this area has become dependent upon waterpower is clear. It is the cheapest form of power that is available in the area. My colleagues from the Northwest are very fortunate that they have such ample supplies of cheap hydroelectric power. It is said that the area does not have any other sources of power, and that it is therefore completely dependent on hydroelectric power.

Madam President, let me say this: In this great country of ours, with all the methods of transportation which we have and with all the different kinds of fuels which are available to us, there is no reason why the Pacific Northwest should be so wholly dependent upon hydroelectric power if it does not wish to be. The truth of the matter is this: Hydroelectric power is cheaper in the Northwest and they have never developed any alternative source. Under the circumstances, perhaps this is very reasonable. But there is no reason why the people of other States who are not so blessed with hydroelectric power should be prepared to exclude themselves permanently from the resources which the Northwest has enjoyed.

Madam President, the Northwest area is not only trying to conserve the power sources already at its command, but it is also trying to maintain and to monopolize the long-term rights to a cheap source of power that will put it at a competitive advantage with virtually every other part of the country. It is clear from some of the testimony presented at the hearings that the Northwest region is not only concerned to maintain its present level of prosperity, but also to expand at the expense of other parts of the country.

Of course, no one can criticize them for that. No one can criticize them for not wanting to stand still and for wanting to progress.

As the senior Senator from Montana so candidly pointed out:

> We want Montana power used for the benefit of Montana people, for the attraction of industries.

Madam President, I cannot complain that the distinguished majority leader wishes to attract industries away from other States, including the State of New York. But I can say here and now that the people of New York do not want the power resources of any part of the United States used to attract industries out of New York to such power surplus areas as this, and, indeed, they protest bitterly against not only having the industries lured away, but also having to pay 20 percent of the cost of the luring of those industries away.

Madam President, it is clear from this testimony that the purpose of this bill is to guarantee the Pacific Northwest a source of power so cheap that it will be in a position to pirate industry from other parts of the country.

Basically, what the Northwest wants to do now is to sell its power in California, because at this point it is profitable to do so. Yet, at the same time, the Northwest wants to keep legislative strings attached to these sales so that when they want extra power all to themselves, they can get it back. That is the gist of this bill. And if this does not constitute a monumental power grab, I do not know what else it can be called. Certainly I do not know when that term could be more properly applied.

(At this point Mr. Burdick assumed the chair as Presiding Officer.)

Mr. KEATING. Mr. President, it is particularly surprising to me that this bill should have the support of the senior Senator from Oregon. He has regaled the Senate for many days with his description of the proposed satellite communications bill as a monopoly. What could be more of a monopoly than this boldfaced legislative attempt to deny to the people of the United States the resources which belong to the Nation? What could be more of a monopoly than the guarantee that only a few States, and parts of others, shall have access to one of the God-given natural riches of our land? What is more, Mr. President, at least in the satellite communications bill, it is anticipated that the new corporation to be created would have to expend much of its own funds before any return would come in. Yet the funds which built the Bonneville Dam were essentially the contribution of the American Federal taxpayer. The State of Oregon and the State of Washington did not build this facility or spend anywhere near the funds upon it that would have to be spent on satellite communications. And yet the Senators from Oregon do not even blush to take from the people of the United States, the returns of their investment and to give this valuable power virtually as a gift to their own constituents.

The amendments which I have offered would insure that the State of New York and all other States will also be guaranteed the right to use Pacific Northwest electrical energy. I am not under any illusions, Mr. President, that it would be economical today or in the near future to transmit the power generated at Bonneville Dam to New York State. But someday, such a transmission may be economical. Stranger things than that have happened in the scientific annals of our country.

Someday, New York might have a lot to gain from the ability to use this power. Moreover, the principle is important here. In all conscience, I could not today support any legislation that would deny forever to the people of my State the right to preferential use of this publicly constructed and publicly generated power.

The people of New York State pay nearly 20 percent of the Nation's Federal taxes. We do not ask for any special favors from the Government. We do not ask that New York taxes be spent in New York State alone. We are prepared to share the industry, the accomplishments, the talents, and the manufactures of our State with all the rest of the country. We do not want to erect artificial walls against the other 49 States of the Union. Frankly, the people of New York State are satisfied with the Federal Constitution as it now exists. We do not want to return to the Articles of Confederation. We do not want to repeal the interstate commerce clause. We are prepared to live and let live. We are prepared to share what we have with the people of the entire country. We are prepared to work with all the country for our common national strength and security. But in all conscience, Mr. President, we are not prepared to provide the other States of the Union on a silver platter with restricted access to power sources that will enable them to pirate our industry, steal our jobs, or underbid our manufacturers.

Mr. President, it is evident that others have observed the peculiarly selfish and restrictive motivation behind this legislation and have wished to gain their share. Both of the Senators from Montana, who are diligent and industrious in protecting the interests of the people of Montana, were among the first to observe that a Northwest power preference might unfavorably affect hydroelectric power within their State.

They got on the job a little quicker than some of the rest of us. They got into the committee. As a result of the persuasive arguments, an amendment was adopted to continue the preference of power users in the State of Montana, which was established by the Hungry Horse Dam Act of 1944. The Senators from Montana have thereby succeeded in protecting the people of Montana and retaining their own exclusive hold upon this power, or their hold shared with the other States in the Northwest.

For that reason, they are now strong supporters of this legislation. But I maintain, Mr. President, that it should be impossible for anyone else in the Senate outside of this small, limited area—naturally, they all support the proposal—to support the bill without a similar amendment to protect the interests of each and every State in our great country.

It would appear that if the amendment which I have offered were accepted, and the Goldwater amendments were then agreed to with my amendment added, it would reasonably take care of the interests of all the taxpayers.

It seems to me we should be very cautious before giving the Secretary of the Interior the authority which is embodied in the proposed legislation.

If the Senate is determined to pass the bill—and I am not at all certain that the Senate will pass it—I think we should at the very least insure that the principle of equality will operate.

Our distinguished majority leader, the Senator from Montana [Mr. MANSFIELD], whom we all admire, took pains to look out for the best interests of his State before the bill reached the floor. He did a fine piece of work, not only in the Senate Chamber, but in the committee room, where, as we all know, the most important work is done. I congratulate the distinguished majority leader, and I congratulate the chairman of the committee for zealously guarding the interests of their people. They have done some fine and important work with respect to the welfare of their own constituents. That is all I am trying to do. I do not consider it in the welfare of the taxpayers of New York State to take money out of their pockets to permit the Northwest to steal industries away from us.

Unfortunately, not all of us had the opportunity, or grasped the opportunity, to look out for the interests of our own States in the committee room.

The only place where we can meet this problem is on the Senate floor. This is our first opportunity to act. Several Senators have offered amendments to the Goldwater amendments to include their own States. The distinguished minority leader seeks to include the State of Illinois. The people of Illinois certainly deserve every benefit under this act. Illinois is a State very similar to my own Empire State. We have a big city also, a bit bigger, but roughly comparable to Chicago. We have miles upon miles of golden fields, a bit more fertile, perhaps, and certainly not as flat. I believe we can speak of the States of Illinois and New York as being roughly comparable in this respect. New York and Illinois are so comparable that it occurs to me that perhaps the amendment which I have offered, to include all States of the Union, might well cover Illinois, which is recognized as one of our great States. It might even appear that it was not necessary to have all of these separate States mentioned but that we could merely include all these States in the words "any other State." This debate has been moving farther and farther east all the time. We started with Arizona and we moved as far as Illinois. I said the other evening that I did not wish to rush in to add New York without thinking it over. The Senator from Arizona is not on the floor at the moment. Whether he has accepted the other amendments to include the other States and whether he will accept my amendment, remains to be seen.

Whether or not it is accepted as a part of the amendments, I shall wish to press the amendment to include all the other States, because it occurs to me, on reflection, that it would be rather selfish merely to add the State of New York, in which I must be pardoned for having a great interest, and that it might be a more equitable amendment simply to provide that every other State should be included in the benefits of the bill.

There is merit in the arguments advanced by all those Senators who have sought to add their individual States in this bill. I do not see how we can accept the Goldwater amendment without adding to it the amendment which I have proposed. It is simple. It is fair. It is certainly more in harmony with the original intent of our Federal system than the scheme of logrolling and selfish aggrandizement which we are now seeking to wrap up in a cloak of legislative legitimacy. It is much more sound, it seems to me, to add the words "any other State" than to limit ourselves to delineating exactly the States which are to benefit under the legislation.

I commend the amendment to the attention of my colleagues in the Senate. I hope my friend from Arizona will not feel that I have abrogated the Arizona-New York entente which was entered into the other day. We might make something quite spectacular out of that.

I feel that it is only fair to adopt my amendment.

I point out that in the entire hearings before the committee the only testimony which could in any way be said to have been critical of the proposed legislation was that given by Hon. CHARLES S. GUBSER, a Representative from California, who represents the 10th Congressional District. Certainly this bill could not be said to be noncontroversial. After all, we have been debating it for quite a while. As I say, only one witness appeared who expressed any opposition to the bill, and he was Representative GUBSER. He said:

> This bill gives too much power to the Secretary of the Interior. I do not say this in a partisan sense because I would oppose the grant of such unprecedented power to either a Republican or Democratic Secretary.
>
> I hold a copy of S. 3153—on which I have underlined the cases where the bill leaves major decisions to the discretion of the Secretary. Mr. Chairman, this is too much power for any one man.

Later in the testimony he said:

> Certainly if California is asked to contribute to support of Northwest power, it should receive some assurance that a marriage is intended which will last beyond the honeymoon.
>
> Bonneville serves a number of nonpreference industrial customers in the Northwest. These include aluminum plants, investor-owned utility companies and other industries. Some of these customers who have been lured into the Bonneville territory with its low power rates might have located in California, and, perhaps, in my district, where they would be paying unsubsidized rates for power, including the tax component which is not a factor in the lower Bonneville rates. Now the Northwest wants these nonpreference customers to have preference over genuine preference customers elsewhere.
>
> If the preference law is as sacred as its proponents have insisted, this is not the kind of perversion it deserves at the hands of Congress.
>
> First, let us see what the Pacific Northwest is supposed to embrace under the bill. According to this bill it is an area that includes: "the region consisting of the States of Oregon and Washington, the State of Montana west of the Continental Divide, and such portions of the States of Nevada, Utah, and Wyoming within the Columbia drainage basin and of the State of Idaho as the Secretary may determine to be within the marketing area of the Federal Columbia River power system, and (2) any contiguous areas, not in excess of 75 airline miles from said region, which are a part of the service area of a distribution cooperative which has (i) no generating facilities, and (ii) a distribution system from which it serves both within and without said region."
>
> Some of these areas are as far, or farther, removed from the Bonneville plants than the California customers the Northwest wants to use temporarily while it denies them any insurance of lasting benefit.
>
> The facts are simply these: Bonneville has some surplus power. Bonneville is operating in the red. If it does not get into the black, it may have to raise its rates. It can sell surplus power in California. If it sells power to preference customers in California, the Northwest preference customers, and nonpreference customers, might not get it back when they need it in the future. So the Northwest wants to do business in California when it is profitable to do so, but it wants also to keep strings tied to the power to pull it back whenever anybody in the Northwest wants it.

The PRESIDING OFFICER. The time of the Senator from New York has expired.

Mr. KEATING. Mr. President, I yield myself as much time as I may need, under the bill.

Representative GUBSER continued as follows:

This committee is well aware of the findings of a task force appointed by the Secretary of the Interior last December that a transmission line from Bonneville to southern California is feasible. That finding of feasibility by a Federal agency would presumably extend the Bonneville service area as far south as Los Angeles because the present Bonneville Act provides that preference agencies within economic transmission distance shall have first call on Bonneville power.

I interpret this finding as follows: California preference agencies now have the right to Bonneville power. Therefore, this bill asks us to give this right away at a time when it promises to become very valuable to California. And we are asked to give it away for no consideration at all.

Consider, for example, the Federal-State San Luis project in California. A proposed tunnel through the mountains which separate the Central Valley and the Santa Clara Valley in my district may be an essential part of that project if we are to get water needed for our orchards and to replenish the continually falling underground water table. Pumps will be needed to lift that water through the tunnel near Pacheco Pass, and they will require vast amounts of power. Congress should recognize a priority of preference for this sort of use over less worthy uses of Bonneville power elsewhere.

The CHAIRMAN. This is the one where you go to the back end of the dam and pull it the other way?

Mr. GUBSER. That is correct.

Some have made emotional appeals regarding the need for low-cost power for these pumps. We hope their voices will be heard now. Government power will soon be on the line from the Federal Trinity plants. But in the mad scramble by the Bureau of Reclamation to get all this power allocated to so-called preference customers, the needs of these pumping plants have been largely forgotten.

It will be some years before the water canals and other facilities which could use this power from the Northwest are completed. But when they are, we may want to exercise our right to this Bonneville power. California cannot afford to give away this right—which this legislation would do. There should be no giveaway with nothing in return.

Let us accept at face value the oft-heard plea that Federal power is for "all the people." These Bonneville plants were constructed with the Federal taxpayers' money for all the people so why should Congress build a Chinese wall around them and say, in effect, that all the benefits from the vast Federal expenditures shall be reserved in perpetuity to a favored few? This bill would make California a second-class State, insofar as preference is concerned.

Another example: The great linear electron accelerator project at Stanford University, in my area, will require vast amounts of electric power. This will be a Federal project. Its power requirements have been mentioned with concern in congressional hearings. Yet this legislation could cut off this Federal facility paid for by "all the people" from Federal Bonneville power.

Mr. President, that is a philosophy which is applicable to the State of New York or to any other States which are not included among the few to which the exclusive benefit of this power which is sought by the bill to be apportioned.

Representative GUBSER cited another example of a Federal project, or a project involving the Federal Government, as follows:

Mr. GUBSER. The Ames Laboratory of NASA at Sunnyvale, Calif., a Federal activity in my district, has a tremendous appetite for power. It is now getting only a portion of its power from the Central Valley project. The power needs of this important Government Laboratory have been previously brought to this committee's attention. My good friend, the senior Senator from California, a member of this committee pointed out to this committee the needs of the Ames Laboratory as one reason why he favored all-Federal development of the Trinity River project in California.

I submit that both Ames and Stanford are Government installations which should be given far greater consideration for Bonneville power than some of the preference and all of the nonpreference customers in the Pacific Northwest, now and in the future.

If Congress builds a fence around the Pacific Northwest, and if the Congress gives nonpreference Northwest customers preference over such thoroughly qualified preference customers as these I have mentioned—and many others in California—Congress would, with this legislation, be abrogating the very principle upon which the preference law is based.

Moreover, were the Congress to adopt this bill, would it not also have to build fences around all the other Federal power installations in the Nation? And if such fences were built, setting up islands of Federal power here and there with "don't tread on me" signs on the fenceposts, what would happen to the dream of the preference-clause proponents who advocate a nationwide network of Federal transmission lines so that more preference customers could be given preference?

I submit, Mr. Chairman and members of this committee, that the preference clause already has been distorted too far. It should not be emasculated so that it can be made to apply willy-nilly to the selfish interests of any region at the expense of the welfare of the Nation and all the people.

This is a personal opinion, Mr. Chairman, but if this bill is passed, preference in 5 years will be a thing of the past.

One last point: If this bill is passed, I want to serve fair notice of my future intentions. I shall be forced, as a matter of principle, to introduce amendatory legislation at the proper time to provide California power consumers the same right to Northwest power that this bill gives to Northwest customers. This amendment will include California within the charmed circle on an equal basis with the Northwest.

Senator JACKSON. Are you worried that California is being mistreated in this legislation?

Mr. GUBSER. Mr. Senator, I was always taught that when you give up a right which is yours today, for no consideration, you are guilty of bad business practice. So the answer to your question is "Yes."

On May 25, 1962, subsequent to his testimony, Representative GUBSER addressed a letter to the distinguished senior Senator from New Mexico [Mr. ANDERSON], chairman of the Committee cn Interior and Insular Affairs, in which he said:

DEAR MR. CHAIRMAN: At the hearings on May 21, 1962, during the course of my testimony regarding S. 3153, I conceded one of the points of my presentation in order to reach the main thrust of my argument; namely, that California is being asked to give up its present rights to Northwest power, and is getting nothing in return. This concession was made to save the committee's time and keep my main point in proper perspective, and was not, in any way, a modification of my position that the bill grants too much power to the Secretary of the Interior.

To implement the point passed over, the following examples are cited:

1. Section 1(b) grants the Secretary of the Interior the power to delimit the protected area within "such portions of the States of Nevada, Utah, and Wyoming within the Columbia drainage basin and of the State of Idaho as the Secretary may determine to be within the marketing area of the Federal Columbia River power system and * * * any contiguous areas, not in excess of 75 airline miles of said region, which are a part of the service area of a distribution cooperative" of a defined type. Thus, the Secretary can decide what sections of Nevada, Utah, Wyoming, within the Columbia drainage basin, what sections of Idaho—plus up to 75 miles of co-op area—he wants to protect, or to leave unprotected. This power is limited by geography rather than economics as under the present law.

2. Under section 3(a), the Secretary cannot deliver energy for use outside the Pacific Northwest whenever "it can reasonably be foreseen" that such delivery would impair his ability to meet the energy requirements of any Pacific Northwest customer. The Secretary by interpretation of "reasonably be foreseen" has the authority to decide when energy may be delivered outside the Northwest.

3. Under section 3(d), in making a determination of energy requirements of non-Federal utilities having generating facilities in the Northwest, the Secretary must determine whether such a utility had disposed of any energy outside the Northwest "which, through reasonable measures could have been conserved." If the Secretary determines that the utility could have conserved some of the energy which it sold outside the region, he can withhold replacement power from the utility. The Secretary can substitute his own judgment using hindsight for the business judgment the utility management was required to make using foresight. The bill does not indicate how the Secretary will determine "reasonable measures to conserve" for any utility. Through an interpretation of this phrase, the Secretary could withhold power from any Northwest utility which sells power outside the Northwest. With such authority he could prevent any non-Federal utility which purchases any type of Bonneville power from making deliveries to a purchaser outside the Northwest.

4. Section 5 allows the Secretary to exchange power and energy with regions outside the Northwest "without regard to the limitations" of section 2 (which would limit exchange to surplus energy and peaking capacity) and of section 3 (which would require the Secretary to withdraw energy from other areas whenever it was needed in the Northwest). Section 5 purports to impose other limitations which, in fact, are illusory. For instance, subsections (4) and (5) allow the Secretary to exchange "peaking capacity" or "surplus peaking capacity for energy." These exchanges are not limited as to time or quantity. These matters are left to the Secretary.

The foregoing are only four examples which support my statement. Others could be made.

Sincerely yours,

CHARLES S. GUBSER,
Member of Congress.

Mr. President, it seems to me that Representative GUBSER's arguments are well taken.

Let me ask the Chair how much time on the bill remains available to this side.

The PRESIDING OFFICER. Eighty minutes.

Mr. KEATING. Mr. President, I yield the floor.

Mr. CURTIS. Mr. President——

Mr. KEATING. Mr. President, I yield the Senator from Nebraska 10 minutes on the bill.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 10 minutes.

Mr. CURTIS. Mr. President, S. 3153, the bill to give the Pacific Northwest first call on electric power from Federal plants there, harms other regions, for the benefit of this one region. That is not a characteristic of good legislation, and this is not good legislation.

In 1958, the Senate was confronted with a similar situation, to which I shall refer at more length in a few moments. That measure also involved a modification of the preference principle, in particular favor of South Dakota. I said at the time that that proposal should be brought in the front door and debated. I said then that it would set a precedent. The bill now pending, S. 3153, is an example of the sort I had in mind. Furthermore, this bill has set in motion a train of other demands for special treatment for local areas. Therefore, this bill would profoundly affect the entire preference structure as it has been developed during the past half century.

As is well known, Nebraska has been in the forefront of this development, and, as an entirely public-power State, is served exclusively by districts which are preferred customers for Federal electric power.

So long as all Federal taxpayers contribute to the construction of these multiple-purpose Federal developments, all citizens should share to the greatest possible extent in the benefits coming from them. But let us consider the meaning of this bill, S. 3153. In effect, it says to customers who happen to live anywhere outside the Pacific Northwest, "You can have power from the Bonneville Power Administration only so long as we don't need it here where our dams produce it; but we will take it back whenever we do need it."

Furthermore, the bill provides that the Secretary of the Interior may recall to the Pacific Northwest any energy already offered and sold outside that region. He could exercise this right if he subsequently determined that this energy is now required there. Purchasers outside the Northwest would be required to accept this power under such conditions at their own risk.

Mr. President, the preference customers in the Northwest would not be the only ones to get the benefit of this proposed exclusive right to Northwest Federal power which Congress is asked to confer. The industrial customers and the privately owned utilities located in the Northwest would also have a prior right to the Federal power, over preference customers in the "have not" States, such as Nebraska, outside that region. That would not be merely a "modification" of preference. If applied universally, it would destroy preference.

In defense of this bill, much has been made of the assertion that the situation of the Pacific Northwest is unique, because of the region's dependence on hydroelectric power at low Federal rates, and its lack of suitable fuels for steam-electric generation. According to this argument regional preference would not need to be applied elsewhere. The Assistant Secretary of the Interior, Mr. Kenneth Holum, advanced this thesis last week, in a speech to the Loup River Public Power District, of Columbus, Nebr.

Mr. Holum said:

> The Northwest's situation is unique, because a number of important industrial concerns dependent upon cheap and abundant power have settled here and are now large customers of the Federal system. Because of their unique operations they are dependent upon the low cost Bonneville Power rate to stay in business. Their purchases have ranged from a high of 60 percent of Bonneville's sales in 1945 to an average of about 36 percent in the last 4 years.

That argument, which is the principal one made in support of S. 3153, is strained, for it is not merely based on preservation of the existing industries of the region, with which the people of the Northwest are concerned. The regional preference for the Northwest which is provided by the bill would apply to all future Federal plants and all future power consumers, industrial and otherwise. It would not apply solely to the plants and customers presently existing. I am informed that in the testimony which Mr. Charles F. Luce, the Bonneville Power Administrator, gave to the House committee, he specifically said, in response to a question, that he would not be satisfied simply with protection of the present Bonneville industrial customers to the extent of their original investment.

As for the statement that the Northwest is so heavily dependent upon hydroelectric power that it differs from other regions of the Nation, by the admission of Mr. Luce in the hearings on this bill the time is fast approaching when reliance in the Northwest, just as in other sections of the country, will have to be placed on steam-electric generation. That time is no more than 10 or 15 years away, Mr. Luce stated. According to a report published in the Portland Oregonian, and reprinted in the daily Congressional Record on August 2, at page A5939, that the Cle Elum steamplant, now in the design stage, in the State of Washington marks the beginning of the end of hydroelectric dominance in the Pacific Northwest. The plant is expected to be completed by the end of 1965. The newspaper commented as follows:

> The region, no longer fat with undeveloped cheap waterpower sites, will begin turning to fuels to solve its power problems, power engineers have pointed out. A beginning is being made at Cle Elum in central Washington. Bituminous coal mined here will be burned to produce power which will firm up enough production to equal the installation of all major Columbia River hydroelectric projects. And the cost of this power will be competitive with most water-produced generation now going on the line. Washington and Montana, both far richer in coal deposits than Oregon, are expected to provide the bulk of future coal-fired steam generation plants as the end of the hydroelectric road is reached.

The coal reserves at Cle Elum, this article went on to observe, are of high grade, nonslacking bituminous coal and are estimated at 282 million tons. Because of this high quality fuel supply, the article says, the Cle Elum plant will be a high-performance steamplant, nearly equal to any plant in the Nation.

It also has been argued in support of S. 3153 that the flow of electricity back and forth between regions to take advantage of seasonal differences in the supply and demand for power among the regions would create additional firm power with existing capacity above what there is available now.

Here again, Mr. Luce testified that this condition cannot be attained in the Pacific Northwest for another 12 to 15 years, until the demand grows in that region. This is approximately the period of time during which the remaining hydroelectric power is expected to be fully developed and after which the region will be dependent for its future growth on steam-electric generation. Thus the alleged uniqueness of the Pacific Northwest in its dependence on low-cost Federal hydroelectric power is seen to be an argument without foundation.

The proposal to establish Pacific Northwest regional Federal power preference is creating dissension and working much harm throughout the remainder of the country. What is happening is exactly what was predicted in 1958 in the debate to which I referred.

At that time the matter in question was the reservation of one-half the electric output of Big Bend Dam on the Missouri River for use in the State of South Dakota, in which the dam is located. South Dakota now enjoys that reservation, which was made in its favor at the insistence of the late, respected Senator, Francis Case. My colleague, Senator Hruska, did me the courtesy of quoting my remarks on that occasion in his statement on S. 3153, the Pacific Northwest bill, on June 7, as reported on page 9960 of the Record. I said in 1958, as he recalled:

> This proviso modifies the power preference clause. That is its purpose; that is what it does. If the power preference clause is to be adopted, that is all right. I think it should be brought in the front door and debated as such, and all the equities weighed.
>
> I add that it is a modification of the preference law. This time it is modified by the location of the dam. To say the least, it lacks uniformity. If we are to have a preference law, it should apply the same all over, in every State, and to all the people.
>
> This proposal establishes a precedent. It will follow that the next time preference will be given to the State in which the dam is located, or so many miles from it.
>
> Although the hour is late, I call to the attention of the Senate the fact that we are approving a modification of the preference clause with respect to federally financed hydroelectric projects.

In 1962 we confront another proposal to modify preference for another reason. I say again, as I did 4 years ago, let us bring it in through the front door.

My forebodings then over the mischief that could result from the precedent of the Big Bend power preference for South Dakota were shared by Senators SYMINGTON, of Missouri; CARLSON, of Kansas; and HUMPHREY, of Minnesota. I take leave to quote them in part:

Senator SYMINGTON said:

> I should like to say to my good friend, the Senator from South Dakota [Mr. Case], that the people of my State are very much worried about this matter because they believe it is the beginning of a leak in the dike of the preference clause; and in our State we purchase a great deal of power from other States.

Senator CARLSON agreed with this view when he said:

> If we open the door, the next thing will be a request to keep the water back and use it to develop electric power inside the one State when the water is for the use of the entire Missouri River Basin. I think if we open a hole in the dike, our action can have far-reaching import in future years.

One of the possible hurtful results of this kind of tampering with the customary preference principle was pointed out by Senator HUMPHREY, of Minnesota. The Senator said:

> But I am not satisfied when a Senator argues that the so-called preference customers in his State will get a preference over the private utilities in his State and also a preference over the preference customers in the regional river valley.
>
> These rivers involve systems; they do not flow only through one State. The Missouri River belongs to the people of the United States. The funds for the Missouri River development are not taken only from the people of South Dakota; they are taken from all the people of the 48 States.
>
> * * * if Senators start to play around with the preference clause in the case of these flood-control projects—and the Missouri River program is under the Flood Control Act—they will run into difficulties in the case of the appropriations, because it is rather difficult for some of us from areas outside the immediate vicinity to justify projects when there will be discrimination in terms of the availability of power.

The report on Pacific Northwest power preference published July 20 by the Committee on Interior and Insular Affairs to accompany S. 3153 said that:

> All existing preference and priority statutes will continue unaffected within the Pacific Northwest and without the Pacific Northwest.

This statement is misleading, for preference customers in Nebraska now have preference for Pacific Northwest power whenever it shall be made available to them. Under this bill Nebraska's preference will be lost. This is so, not only by terms of the bill itself, but even more importantly by its cascading effects.

If preference is not to be equally applied to all qualified groups of citizens, as it is now, there can be no hope that the inequality can be limited to one geographic area, as Mr. Holum urged at Columbus, Nebr., last week in his speech to which I referred. Mr. Holum said further on August 2:

> While we have recommended regional preference legislation to meet the Northwest's special problems, we just as strongly assert that we firmly oppose the establishment of regional preference fences around any other portion of the United States.

It is a pious but a useless hope that regionalism can be limited. Since the introduction of this mischievous Pacific Northwest preference bill there already has been a chain reaction of amendments to apply it to other "have" regions against neighboring "have not" regions.

The majority leader, the Senator from Montana [Mr. MANSFIELD] and his colleague [Mr. METCALF], were first in line with an amendment to preserve for Montana the priority their State was given in 1944 for power from Hungry Horse Dam. The Hungry Horse power reservation is a parallel of the Big Bend reservation for South Dakota. Mr. MANSFIELD has also introduced a separate bill to reserve for use in Montana the capability of power and energy generated at Federal projects now under construction or hereafter constructed within the State, thus laying claim to the power of the proposed Libby and Knowles projects and in part to that of the Yellowtail project which is under construction. If this Montana bill were passed along with S. 3153, Nebraska preference customers could not hope to benefit from Federal power from these sources.

The Senator from Arizona [Mr. GOLDWATER] has offered an amendment to protect Arizona as to power generated at Federal dams in his State, much of which is now used for pumping Colorado River water to southern California. Senator GOLDWATER's amendment is so phrased that each State in turn can insert its own name after that of Arizona and reserve to itself all Federal power generated within the State.

The Senator from South Dakota [Mr. MUNDT] previously had offered an amendment to apply State priority on behalf of South Dakota and North Dakota to power from Federal plants in those two States. The Missouri Basin plants in the Dakotas aggregate nearly 2 million kilowatts of capacity, and Nebraska relies upon its allocation of their power.

Gov. Frank Morrison of Nebraska termed Senator MUNDT's amendment "ridiculous and unthinkable." But it is not the amendments which are at fault. They are logical if the bill itself is logical, which it is not. It is S. 3153 that is illogical and at fault.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CURTIS. I yield myself 5 additional minutes on the bill.

Nebraska is no stranger to this kind of squeeze play. We have always had to resist discrimination against Nebraska in the allocation of Federal power. In 1959, when the Committee on Interior and Insular Affairs held hearings on the reallocation of Missouri Basin power, the Omaha Public Power District, which serves about 40 percent of all power in the State, had been trying for 11 years to get its first kilowatt of electricity from the Missouri River plants. The Nebraska Public Power System, which is the agent for more than 400 public power systems that serve the eastern two-thirds of the State except the Omaha vicinity, protested the formula that was then advanced by the Bureau of Reclamation for the reallocation. Mr. Dewey J. DeBoer, of Columbus, the executive director of the Nebraska Public Power System, said at that time, in the committee hearings on March 5, 1959—report, page 165:

> Under the proposal then the Nebraska Public Power System and the Omaha Public Power District, serving the eastern two-thirds of Nebraska, would be entitled to 23 percent of their requirements as against all of the other preference customers throughout the basin of somewhere between 75 and 85 percent.
>
> We have raised the point that this would indicate that there are two kinds of preference customers in the thinking of the Bureau of Reclamation; namely, those who under this formula would be entitled to approximately 23 percent and those who would be entitled to the large amounts of 75 and 85 percent. We feel that the Congress did not intend that there would be more than one kind of preference customers in the Flood Control Act of 1944.

This past history is pertinent today, because the Senate is here considering a bill which would countenance just such discrimination. The bill draws a distinction between citizens who live in the Pacific Northwest and citizens who live outside the Pacific Northwest, all of whom are Federal taxpayers who have helped build these immensely costly Federal installations and should share equally in the benefits from them.

Senator ANDERSON himself expressed his fears about the bill in the committee hearings over which he presided as chairman. He said:

> It is a dangerous principle to start laying down that because water falls in a certain geographical area, that the people living in that State, no matter where they may be, have preference rights above what others might have gotten.
>
> I am telling you we would be in a very tough situation in the Colorado River Basin if we had to give Colorado 56 percent of all the water in the river and 56 percent of the power. There would not be much left for Hoover Dam, which would naturally dry up under those circumstances, and there might be people that would not regret that, but there are people in California who would, I am sure of that.

A majority of the Federal Power Commission has stated its opposition to the idea of regional preference. Chairman Joseph C. Swidler testified for the Commission at the Senate hearing as follows:

> In principle we are against regional preferences because they stand in the way of the best use of the Nation's resources for the benefit of the whole country.
>
> We have initiated a national power survey which is intended to show how we can make the best and most economical use of all of the Nation's resources for the benefit of the Nation as a whole, and I cannot say that the philosophy of this bill is consistent with the responsibilities of the Commission or with the power survey that we are undertaking.
>
> We hope that this will not be the start of more regional preferences, because one preference breeds another.

The Rural Electrification Administration is opposed to the principle of S. 3153. Administrator Norman M. Clapp said last May 17 in Puerto Rico at the annual meeting of the American Public Power Association, in part:

> Provincialism and parochialism must be avoided among regions if we are to realize the maximum benefit of the electrical revolution.

I trust I have made it crystal clear that Nebraska stands to be gravely injured by the twisting of the meaning of preference represented in this bill, S. 3153, and the destruction of preference by the amendments which it has inevitably and logically invited.

Nebraska, of course, is not alone. I have quoted Senator CARLSON, of Kansas, Senator SYMINGTON, of Missouri, and Senator HUMPHREY, of Minnesota, from the 1958 debate on Big Bend purposely as illustration of the common interest these have-not States share with Nebraska, Iowa, Oklahoma, Illinois, and similarly situated States within areas adjacent to large Federal power developments. Nevada, as well as southern California, is affected by the amendment of Senator GOLDWATER. The list of injured States is certain to grow.

S. 3153 has so many faults, raises so many questions, and does so much harm that its enactment would be a tragic mistake. The bill should be killed.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. CURTIS. I yield briefly to my colleague.

Mr. HRUSKA. I commend the Senator for a splendid and analytical presentation, which is in keeping with other statements he has made on the floor, as well as elsewhere, on this subject.

Am I to understand the Senator's position to be as follows, with reference to the statutory preference clause, which has been in existence 50 or 60 years? If there is to be a modification, revision, or amendment of that statutory preference clause, it should be considered as such, and for that purpose, rather than be considered in a piecemeal manner such as is embraced in the pending bill.

Mr. CURTIS. Very definitely. If the preference clause is to be changed, a bill for that purpose should be introduced, the public should be informed, hearings should be had, and various proposals weighed.

Mr. HRUSKA. Is it not true that all the existing hydroelectric power projects have been justified, both economically and politically, upon the basis of the statutory preference clause?

Mr. CURTIS. Yes.

Mr. HRUSKA. Therefore, if that clause is to be changed now, it should be changed uniformly and on a national policy basis rather than on a regional or parochial basis; should it not?

Mr. CURTIS. I agree. I would go further to say that the preference clause as it now stands is in essence a contract. People have relied upon it and have made other contracts on the basis of it. It should not be disturbed. Certainly it should not be disturbed without approaching the issue in full.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MORSE. Mr. President, will the Senator from Illinois yield me 10 minutes?

Mr. DIRKSEN. Mr. President, I yield 10 minutes to the distinguished Senator from Oregon.

Mr. MORSE. I thank the Senator very much. I appreciate his courtesy, for I must rush to a hearing at the Committee on Foreign Relations at 2:30.

Mr. President, it is my hope that S. 3153, as reported to the Senate by the very able floor leader of this bill, the Senator from Washington [Mr. JACKSON], will be passed by the Senate.

As the Senator from Washington [Mr. JACKSON] has pointed out in the course of the debate, S. 3153 is designed to provide a legislative definition of the Bonneville marketing area. Of tremendous importance is the fact that the bill permits the Bonneville Power Administration to sell surplus electric power and peaking capacity outside the defined marketing area, subject to recall when electricity is needed within the marketing area.

S. 3153 reflects good business sense in a Government operation, in that it will enable BPA to take advantage of the heavy demand for seasonal power in California. Public and private utilities alike in the State of California need this power to displace higher cost steampower. This fortunate arrangement will be a major step in the direction of preventing the threat of the reduction of the surplus in BPA revenue which has accumulated over the years.

S. 3153 is designed to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in the region and to assure electric consumers in other regions reciprocal priority. The Senate should give thorough consideration to the following factors:

First. The Pacific Northwest's economic growth—past, present, and potential—is inseparably linked with the development of Federal hydroelectric power. Secretary of the Interior Udall recently pointed out the importance of this low-cost power to industrial growth in the Bonneville Power Administration's marketing area. He noted that:

> In BPA's present marketing area, for example, there are 19 large electroprocess industries which are direct consumers of BPA. They are located in the BPA marketing area because of availability of low-cost power, which is a major factor in their choice of location. These industries have an original plant investment of $350 million, which would be double at today's prices. They employ directly 15,000 Northwest residents with an annual payroll of $80 million, and indirectly another 30,000 whose salaries and wages approximate $160 million. They purchase between $50 and $60 million worth of Northwest goods and services, and they pay between $6 and $7 million annually in State and local taxes. Altogether, these industries purchase about 36 percent of BPA's power supply—1 million kilowatts of firm power and 250,000 kilowatts of interruptible industrial power.

Second. Prime income-producing activities in the Northwest are timber, agriculture and tourism. All three are subject to the whims of weather. All three exhibit severe seasonal fluctuations and are highly sensitive to business cycles. Electroprocess industries provide stable payrolls. Low-cost power compensates for our long distances from major markets and supplies industrial incentive for creation of new jobs.

Third. Water is the source of our electricity. We have no proven reserves of gas or oil, and known coal resources are limited. Approximately 96 percent of our firm energy capability is hydro and 62 percent of this hydro is owned and operated by the Federal Government. As Charles F. Luce, BPA Administrator, has already told the committee:

> No other area in the United States is so heavily dependent on hydropower. With the exception of the Tennessee Valley, no other region has such a high percentage of federally owned generation.

Fourth. The people of the Northwest are paying off the Federal Government's power investment there—with interest. To date they have returned to the Treasury over three-quarters of a billion dollars.

Fifth. An interconnection between the Northwest and California was outlined in 1935 by the Pacific Northwest Regional Planning Commission, which included a representative of the State of Oregon. The most recent report on this intertie, issued by the Department of the Interior in 1961, shows that such a transmission link is technically and economically feasible.

Sixth. A common-carrier, high-capacity interconnection linking the electrical systems of the two regions can provide enormous benefits to both areas. With public and private electric systems participating and with optimum facilities, it is currently estimated benefits would exceed costs by a ratio of more than 3 to 1.

Seventh. The Senate Committee on Interior and Insular Affairs has recognized the need for proper protection of the interests of power consumers in any energy or capacity interchange involving Federal power. In a resolution of June 21, 1960, the committee requested that no contract be made for transfer of BPA power to California pending completion of further studies and consideration of legislation to preserve the position of BPA customers in the Northwest. I joined with other Northwest Senators in writing then Secretary of the Interior Fred A. Seaton urging that he act in accordance with that resolution.

Gov. Mark O. Hatfield, of Oregon, in June 1960 submitted to the Senate Interior and Insular Affairs Committee a statement declaring that—

> Oregon feels legislation is necessary to carry out the expressed desire of all concerned to give, or obtain full protection to the Pacific Northwest.

The Governor submitted a draft bill to deal with this question.

Eighth. Interconnection of the Northwest and California by major transmission facilities is inevitable. Already two private power companies have announced plans for a 500-kilovolt line hooking together the two regions. A Federal proposal for an intertie is now before Congress. New technology makes it possible to use such lines to transmit power from northern Washington to southern California.

Integrated operation can produce benefits for individual electric systems which are impossible with isolated operation. Power pooling in the Northwest provides a practical demonstration of this fact. Coordination has produced benefits impossible of achievement by power producers operating singly, and this has been accomplished without infringement upon the basic rights and responsibilities of particular utilities. Technology has increased the opportunities for mutually advantageous cooperation. Organizational and operational patterns must keep pace.

It is my sincere hope that the Senate will reject crippling amendments offered from the other side of the aisle. I am satisfied that if these amendments were to be adopted they would upset power marketing arrangements throughout the country. Power marketing has been handled on a regional basis, and if the proponents of amendments to these power marketing programs wish to offer major amendments, they can do so through the orderly process of going before the Senate Interior and Insular Affairs Committee and presenting their arguments and proposals for consideration on the merits.

I sincerely hope that the bill will be passed by the Senate this afternoon as it was submitted to the Senate in the first place.

I thank the minority leader for his cooperation.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. Do I correctly understand that the vote first will come on the amendment offered by the distinguished Senator from New York [Mr. Keating]?

The PRESIDING OFFICER. The Senator is correct.

Mr. DIRKSEN. That amendment, Mr. President, as I understand, is an amendment to the first branch of the so-called Goldwater amendments, as modified.

The PRESIDING OFFICER. The Senator is correct.

Mr. DIRKSEN. Do I also correctly understand that a division of the Goldwater amendments was asked to separate the last portion from what is, substantially, most of the amendments?

The PRESIDING OFFICER. The Senator is correct.

Mr. DIRKSEN. In the event of a vote on the Goldwater amendments, would a separate vote occur on that portion on which the distinguished Senator from California has asked for a division?

The PRESIDING OFFICER. The vote first would come on to the first portion of the Goldwater amendments, as modified. After that was disposed of, there would be a vote on the second portion of the Goldwater amendments.

Mr. DIRKSEN. A further parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. I understand the distinguished Senator from Nevada has in mind the offering of an amendment to the second portion of the Goldwater amendments. That would have to occur, I believe, after action on the so-called Keating amendment to the first portion of the Goldwater amendments.

The PRESIDING OFFICER. That is correct; and also after action on the first portion of the Goldwater amendments.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum, and that the time necessary for the call of the roll not be charged to either side. I shall ask that the roll be called only so long as necessary.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Illinois? The Chair hears none, and it is so ordered.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. AIKEN. Mr. President, is any time available? I need only 1 minute.

Mr. DIRKSEN. Mr. President, I yield 1 minute on the bill to the Senator from Vermont.

Mr. AIKEN. Mr. President, after consultation with the attorney for the Department of the Interior, it is my understanding that the amendment offered by the Senator from New York would nullify the contract between the New York Power Authority and the State of Vermont whereby the State of Vermont obtains St. Lawrence and Niagara power. Therefore it goes without saying that I am unalterably opposed to the amendment.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. KEATING. I disagree completely with that statement. The amendment relates only to the Pacific Northwest, and provides that the power from that area may be available to any State in the Union.

Mr. AIKEN. It appears now that lawyers disagree on that matter; and when lawyers disagree, I shall play safe and vote against the amendment of the Senator from New York.

Mr. KEATING. The amendment would not nullify the Niagara contract?

Mr. AIKEN. I hope that it would not, but I cannot take any chances.

Mr. MILLER. Mr. President, will the Senator yield 3 minutes to me?

Mr. DIRKSEN. Mr. President, I yield 3 minutes under the bill.

STARS AT OUR FINGERTIPS

Mr. MILLER. Mr. President, at a time when there is so much materialism in the world, and when there seems to be a tendency to overlook the fact that our Nation was founded on a belief in God, it is refreshing to come across a baccalaureate sermon such as the one delivered on June 3 at the commencement exercises of Simpson College, Indianola, Iowa, by Rev. Glen W. Lamb, pastor of the First Methodist Church at Indianola. I ask unanimous consent that this timely and truly great sermon be printed in the Record.

There being no objection, the sermon was ordered to be inserted in the Record, as follows:

Stars at Our Fingertips

(By Rev. Glen W. Lamb)

I visited a young man the other day in Paris who is attending the University of Sorbonne. He will soon be receiving his Ph. D. degree in his chosen field. He told me a little about the history and greatness of the university and among other things he mentioned the name of such a great person as Madame Curie as being one of the most illustrious graduates of his school. "It was in this great university," he said, "that Madame Curie as a young student heard a professor say in a classroom 'some of you may have stars at your fingertips.'" We now know her as having been a great devotee for discovering more truth. She fell in love with a Dr. Pierre Curie who was equally devoted to the discovery of more truth and the two of them searched together for a new element. The way was long and rugged; they were laughed at and almost starved. Almost ready to admit failure they walked into their laboratory one night late, to see their evaporation dishes aglow in the darkness. It was radium. Their search was rewarded; a great star at their fingertips was plucked for humanity's good. You may recall that a great tragedy befell Marie Curie; her husband was killed. As she walked through the "valley of the shadow" with confidence, she was sustained by two things, the memory of a great and devoted love which they had shared and which death could not sever, and her devotion to the discovery of still more truth. And then there came that dramatic moment when she stood in the Academy of Science in Paris and delivered a thrilling speech including these words: "No one of us can do much; each of us can perhaps catch some gleam of knowledge which added together shall bring nearer man's dream of truth. It is by these small candles in our darkness that we see the outlines of the dream, and that great plan which shapes the universe. I think science has great beauty, and its spiritual strength will sometime cleanse this world of its evils, its ignorance, its poverty, its diseases, its wars and heartaches. Every age has its own dreams—leave then the dreams of yesterday. Take the torch of knowledge and build the palace of the future." This has been a source of inspiration for countless numbers of persons across the years. Certainly from that discovery of the Curies have come blessings in great numbers—the star at the fingertips of the Curies was grasped and used, and its purpose—revealed—shines ever so brightly because it has opened the doorway into a new world known as the atomic age. And so atomic energy for good or ill, is a part of our common experience.

In like manner, we can look back over two centuries and see the scientist picking stars by the score from the great constellation of knowledge and truth. John W. Klottz, professor of natural science, at Concordia Senior College, Fort Wayne, Ind., says it this way as he reveals the part the scientist has played in the gathering of the stars: "One of the most important agents of God in bringing blessings to those living in the middle of the 20th century has been the scientist. Through his hands the windows of heaven have been opened and God's gifts have rained on us in abundance. Luxury, leisure, and ease are so much a part of our life that we take them for granted. We have a standard of living higher than ever before in the world's history. The average American of 1776 had the help of 1 servant for 2 weeks a year; today through the energy harnessed by the scientist, he has the equivalent of 60 servants all year round. We have been relieved of almost all toil and drudgery. Our work is done for us by machines. No longer are we dependent upon the energy released by human muscles and the muscles of animals, the source of energy in ancient civilization and society. This dependence made slavery almost a necessity. It made a middle class unthinkable. There could only be exploited and exploiters. Society had to be organized as a pyramid with many at the bottom and a few on the top. Only a few men could be wealthy. Only a few could enjoy luxury and ease. The privileges of the wealthy were possible only because the masses were poor.

And then there came a day when the scientist succeeded in harnessing the energy God had placed in coal and it became available to human beings. The industrial revolution was a result. England became a wealthy nation because she had large coal deposits and quickly learned how to utilize them. About a hundred years ago the energy of petroleum was offered to us after the drilling of the first commercial oil well by Colonel Drake at Titusville, Pa., in 1859. In the years following World War II natural gas became widely available as long-distance transportation of the fuel by pipeline became feasible.

And he continues on to remind us of several other things in that book. For instance, he mentions that the scientist has also made living itself more agreeable. He has conquered many of the scourges which once swept through nations and even continents. Many an irrevocable death sentence has been revoked. Even 50 years ago a diagnosis of pernicious anemia or of diabetes was a sentence of death. Today this is no longer true. These disorders are in most instances only nuisances. As a consequence life expectancies have moved steadily upward. In colonial America a baby could expect to live but 30 years. Today a newborn American looks forward to a life expectancy of 70 years, relatively free from sickness.

Scientists have also met the challenge on increasing population in the United States. While it is true that in many lands there is a real population problem this is not the case in our country. Our population has increased substantially, particularly in the years since World War II, but our ability to produce the food has increased even faster. The problem in the United States is not shortages but surpluses. In spite of efforts to decrease food production and limit it, more food is being produced than ever before. By selective breeding, better crop plans have been developed. More wheat, more corn are being produced on fewer acres than ever before.

All of this has represented a tremendous step forward. We are living better than ever before. And these things have come through the research of scientists. The scientists have been God's agents in showering down these blessings on us. The countless stars that have been at the scientist's fingertips have also become a part of our common experience.

Because of this progress we are increasingly aware of the important roles the scientist has played in our society. Our civilization could not have arisen without science, basic and applied, and it could not long continue without it. We owe a tremendous debt to our scientists. We ought to be thankful to God for the blessings they have brought and will continue to bring us for science does not stand still. It is always moving upward and forward. One research builds upon another. Scientific progress moves at an ever-quickening pace. And it is likely that this will continue in the years before us. As a matter of fact, it is probable that science will move forward at what might be called a geometric rate for we know that science has a broader base than ever before. There are more and more bits of research to build on. The result is that we may expect to move forward even faster in the future than we have in the past. So over the past 50 years there have been stars for the picking most everywhere—bringing more light and optimism to everyone.

For the most part it was limited to the earth and then in October 1957 the space age became a reality for it was on October 4, in that year we heard the startling announcement that the Russians had succeeded in launching an earth satellite. And in this way the word "sputnik" came into our language. From that time until now there has been an ever-increasing number of satellites and spacecraft including those historic ones which have carried human beings into outer space. On October 12, 1961, Maj. Yuri Gagarin circled the earth in space. Later two Americans, Alan Shepard, Jr. and Virgil Grissom, traveled shorter distances than Gagarin and still a little later Gherman S. Titov, a Russian air force captain, made 17½ orbits of the earth, spent 25 hours and 18 minutes aloft, and traveled in that time a distance equal to a round trip to the moon and back or a distance of almost 435,000 miles. It was then that man was able almost literally to reach out and pick the very stars in space. Countless new constellations of truth immediately became available as a result of scientific information found by the trips around the earth or into outer space.

There is one cluster or constellation of stars at our fingertips which seem always to elude us, seems always to be just out of reach, and without the light of the stars in this constellation we have discovered a new darkness which comes and with it a new fear—man's fear of his own discoveries and inventions.

Dr. Henry Link, speaking at the celebration of the tercentenary at Harvard said, "In September 1936 a great tragedy was unearthed at Harvard more profoundly tragic than the World War. For 2 weeks learned men reported the findings in various fields of learning and their net conclusion was that while the physical sciences had made tremendous contribution to man's physical well-being, the social sciences had contributed little or nothing to his understanding of himself. As Dr. J. Wallace Hamilton, noted minister and author, indicates, "The darkness is still about us and our hearts are still chilled with foreboding and fear. For the new Eden which science has created is no paradise." And then Hamilton goes on to remind us again of that list which Will Durant set forth which gives a very depressing commentary of what has happened to our world: "We build airplanes and turn them into bombers, we make amazing discoveries in the world of the atom and the first use we make of it was to turn it into a bomb. We created the movies and with it degraded our morals with sex and slapstick. We invented machinery to lighten burdens in our factories and the factories turned our cities into slums in many places. We dreamed up the radio and the TV and filled the airwaves with soap operas and with dreary hours of advertising ballyhoo. There is an awful disproportion between the magnificent possibility of man's inventions and trivial immoral use to which they have been put. God gave us bricks to build a new Jerusalem and out of them we have made this Babylon." So we have a profound skepticism concerning the value of these things. We have cursed the machine. Spengler said, "The time will come when man will so hate his machine civilization that he will block the whole thing from his memory." Philosophers have urged a moratorium on science, at least until morals catch up, and even the scientists themselves are wary of the military mind lest the fruits of their labors be turned into further and more hateful destruction. For a long time I have heard it said, and you have too, that the universe is a great tinderbox from which "God has hidden the matches and now man has found the matches."

All this is the voice of defeatism, the voice of despair. God would never want us to declare a moratorium on science. He would, of course, admonish us less we misuse the power which it makes available to us. But we can never park our brains to save our souls, for the scientist has done nothing in all his efforts to hurt mankind. It has been God's idea from the beginning that we discover His secrets. The energy in the atom bomb that would blow us to bits, should never worry us nearly so much as the ideas that are in our heads as related to what we do with or how we use God's secrets once discovered. It is our complete misconception regarding the material world; that denial in practice that this is God's world and to be used for His purpose, that assumption that it is ours to serve our ends and to do with as we please. Whenever anybody uses this as the ultimate idea then nothing will come out right. It is starting from the wrong assumption.

It is not for us to believe that the inventive genius which has brought us the machine is purely secular, quite apart from divine meaning. It is not those who have made the discovery and laid hold upon the new truths, who have made this world of ours a lopsided, secular civilization. It is rather the generation that has used the discovery, the new inventions, by living a pagan philosophy, believing that the world was theirs to do with as they please.

The greatest constellation of stars yet available to man, the one that has been so elusive, is that one which helps us to realize in our mind and heart that there is no such thing as secular science. The stuff of stars never comes from the devil. It is the gift of God, coming from minds which God has quickened to the truth. And through the inventive genius of man and his product God is trying to say something about his divine purpose. Pascal said, "When God wants to carry a point with his children he plants it in the instinct." When we look at all the marvelous stars that have been grasped we see one great purpose running through all of them, that of breaking down barriers and creating a unity of man. The poet says it, "Something there is that doesn't love a wall." And that something working in the breast of man has been urged on by God himself to pull down walls that separate man from man, and man from God. So one by one stars at our fingertips have been grasped and the world, yea, the very universe, has become a great workshop in which we create our own heaven or hell, for it is as we will, that the earth becomes a cinder or a paradise. The stars at our fingertips for tomorrow—toward which we would reach, are those found in the "moral law within," and we will "leave the dreams of yesterday and its secularism, its materialism, and its clarion call for security and take the torch of knowledge that leads to the moral laws of the universe and build there a palace of the future" out of the stuff of the stars which long has waited our grasping.

FARM SHOWDOWN

Mr. **MILLER.** Mr. President, in the Tuesday, August 7, issue of the Wall Street Journal, there is an excellent article by Mr. Paul Duke entitled "Farm Showdown," which does a good job of pointing up the practical legislative problems facing any comprehensive farm program. Although I would not be so sure as Mr. Duke is that the farm legislative road must turn either to the Benson right or to the Freeman left, and would be more inclined to hope that a suitable program of voluntary acreage reduction could be worked out which, coupled with an expanded program of research to find new industrial uses for agricultural products, will eliminate the farm surplus problem, nevertheless I believe that Mr. Duke's article places the so-called farm problem in reasonable perspective. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FARM SHOWDOWN—ALL SIGNS POINT TO IT AS CAPITOL MOOD, MAKEUP CHANGE

(By Paul Duke)

WASHINGTON.—The day is approaching, slowly or not, when Congress will fundamentally alter Federal farm laws.

At first glance, such a prediction seems preposterous. The major farm organizations are deeply split in their approaches to the problems of Uncle Sam's agricultural overabundance. Republicans and Democrats are more divided than ever. Far from moving toward a solution, the current legislative session again is postponing the day of reckoning and in its anguish is devising little more than another palliative based on expediency. The result almost certainly means more of the vast commodity surpluses and more billions for price props and storage fees.

Nevertheless, these days of drift seem numbered. For all its dallying, Congress seems inevitably headed toward accepting the challenges laid down by two successive Secretaries of Agriculture.

These challenges of Ezra Taft Benson, Republican, and Orville L. Freeman, Democrat, agreed on just one crucial point: The Government cannot go on forever giving farmers both artificially high prices and freedom to produce. Secretary Benson's proposals essentially aimed at denying them the former. Secretary Freeman's planning basically aims at denying them the latter.

Congress, unwilling to accept either harsh prescription, has year after year voted a mishmash—headed neither toward a consistent low-price, free-market agriculture nor toward a tightly regimented high-price farm economy. Yet the course of historic events now makes it practically certain the lawmakers will at least turn down either one road or the other. Not this year, and perhaps not next year. But before long.

Underlying this forecast is the steady decline of the rural bloc's power in Congress—and the likelihood the decline will be intensified. When the Government first started price propping the farmer in the 1930's, 1 of every 4 Americans lived on a farm; today only 1 of every 12 does. More than 800,000 abandoned farming in 1961 and the number of farms, roughly 3.9 million, is only about one-half the total that existed 25 years ago.

This changing of the old order has been accompanied by a diminution of the farmer's ballot box strength. Fewer than 50 of the 437 House Members are now elected from districts having a farm population of 25 percent or more. As more and more of their rural constituents take jobs in cities, Congressmen become less concerned about farmer demands because their votes no longer are so crucial to election.

Moreover, two recent developments bid to hasten this trend.

RISING URBAN INFLUENCE

First, urban areas will score a sizable increase in congressional representation in this year's elections under redistricting plans necessitated by population shifts. The big Corn and Wheat Belt States of Iowa, Kansas, and Nebraska will have fewer House Members to uphold the farmer's causes; so, too, will such predominantly rural States as Alabama, Arkansas, and Mississippi. In contrast, the major gainer is industrially burgeoning California, whose eight new seats have been parceled out to metropolitan areas. Overall, urban dominance of the House is expected to rise from a 6-to-4 to a 7-to-3 ratio.

A second, even more significant, factor is the Supreme Court's recent decision against legislative representation overweighted in favor of rural regions. While the ruling primarily affects State legislatures, it may have an equally profound bearing on further altering House district alinements.

In Wisconsin, for example, a Federal court has decreed a shakeup of the 10 districts that now give a disproportionate share of representation to rural areas. Likelihood: Abolition of one of the three agriculture districts across the northern top of the State and creation of a new Milwaukee urban district.

Thus, more than ever, the growing influence of city lawmakers will be felt in congressional actions. And, with urban delegations increasingly hostile to costly makeshift programs for such surplus-producing crops as wheat and corn, it's not inconceivable they soon will demand reforms—or else.

Some urban Members already are showing their disgust by voting against almost all farm bills. At one stage of the House's recent debate over continuing the current gaping in disbelief as the Chamber actually patchwork wheat and corn programs, the city revolt boiled over and left farm forces gaping in disbelief as the Chamber actually voted to abolish feed grain supports. Only a hasty bit of arm twisting by Majority Leader CARL ALBERT swung enough city Democrats back into line to overturn the stunning verdict.

The action left Farm Belt members quavering in their boots. For the first time some began voicing fears that the ramshackle legislative structure built up over the years might soon come tumbling down. Thus the swing of the congressional power pendulum cityward may stir the squabbling farm bloc to get together on some solution acceptable to urban Congressmen.

Several younger, more flexible Republicans and Democrats already have started huddling to explore ways of achieving bipartisanship in future fights. So far their views are divergent, with near unanimous agreement on just one point: Any sudden removal of supports and controls would produce chaos. A hurried return to free markets, it is argued, would touch off a nightmarish survival-of-the-fittest scramble, precipitate wildly fluctuating prices and bankrupt thousands of farmers.

This fear of a free market is a factor which Secretary Freeman clearly hopes to exploit when he renews in 1963 his fight for rigorous control of farm output and marketings.

SHARP ALTERNATIVES

Though his plans got only one GOP vote in the House when he was trounced this year, Mr. Freeman has at least an outside chance of doing better next time. After all, numbers of the farm State Republicans stubbornly refused to move down the Benson road toward a solution of the farm problem—and if it comes to a choice between sharp alternatives some of them may prefer to go down the Freeman freeway.

And with enough bipartisan farm bloc votes in his pocket, the Agriculture Secretary could realistically figure a Democratic White House and the leaders of a heavily Democratic Congress should be able to drum up enough support from unenthusiastic legislators to put his program into law.

Such a prospect could represent future realities, especially if autumnal elections produce such impressive Democratic gains that they seem to be a mandate for Kennedy programs. But it might equally well prove illusory.

For one thing, the farm bloc's Balkanization could well defy all unity efforts. There is grave doubt such major organizations as the conservative American Farm Bureau Federation and the liberal National Farmers Union can reach a policy rapprochement. Hosts of other groups large and small—the small wheatgrowers of Ohio and the big wheatgrowers of Kansas, for example—remain far apart on legislation. Despite the peace talks, animosity between Democrats and Republicans on the congressional Agriculture Committees won't be easily assuaged.

Chances for Congress agreeing on Mr. Freeman's proposed stern controls of agriculture are open to doubt when the querulous lawmakers cannot even concur on the need for eliminating the outmoded 55-million-acre national minimum wheat planting allotment, written into the law in 1938 when yields per acre were 13.3 bushels compared to today's 26.3.

Though all concerned agree present laws are a crazy quilt, counterpressures automatically are set in motion when new proposals are offered. Thus, the administration's attempt to impose mandatory controls for corn has encountered fervent opposition from cattlemen and poultry raisers who fear a rise in feed prices because of diminished stocks.

Thus it is entirely possible that the farm bloc will continue so splintered that it will remain a force of stalemate, capable only of coming up with more stopgaps. And if this proves true, it's entirely possible that city Democrats in Congress will refuse to endure continued costly chaos.

TURKEY GROWERS VOTE

In some crucial moment of intense frustration, seeing that Mr. Freeman's schemes are doomed, they could well wheel about and team up with a core of GOP conservatives who favor almost complete Government withdrawal from the farm mess. In fact, Republican gains in this fall's elections would make this all the more likely. The result could be a coalition powerful enough to take a sharp turn down the Benson road.

Despite prevailing qualms about a free market agricultural economy, a number of Farm Belt legislators think the Government should at least head in that direction. Younger Midwest Republicans are much less wedded to rural protectionism than their elder brethren; Representative FINDLEY, GOP freshman from Illinois, openly urges a gradual abolition of supports.

Many farmers themselves seem more dubious of Uncle Sam's help. Administration farm planners were stunned recently when turkey growers overwhelmingly rejected marketing restraints. Congressmen report increases in mail protesting the complex of controls and some feel the day is drawing nigh when a majority of growers will prefer to take their chances on the open market.

Many think, too, the transition to a freer market economy wouldn't be as hard as depicted, at least if the Government took a hand in the adjustment. The Committee for Economic Development, a business-financed research group, suggested recently it could be accomplished over a 5-year span. Instead of pouring out billions to keep inefficient producers in business, the committee proposed a variety of steps to encourage people to leave the farm and undertake new pursuits. It suggested Government training programs could channel farmhands into trades needing more personnel.

It would be hazardous to wager whether the past or the present Secretary of Agriculture represents the wave of the future. But it would seem a good bet that Congress, which has given both Mr. Benson and Mr. Freeman such a mauling, will within the next few years be converted to the gospel of one or the other.

Mr. MILLER. Also, Mr. President, Mr. Duke calls attention to the results of the turkey producers' referendum which, as he put it, "stunned" administration farm planners. The editorial in the Journal on July 5, however, entitled "Coming Home To Roost," well points out that the outcome of this referendum reveals a growing awareness that Government intervention in production and marketing creates more problems than it solves. These administration planners would do well to heed this vote instead of pressing for the ill-conceived Kennedy-Freeman farm program which the House recently rejected. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

COMING HOME TO ROOST

Secretary of Agriculture Freeman had every reason to be confident that the Nation's turkey growers would approve national marketing controls. The Government seemed to have everything working in its favor.

For one thing, turkey prices were averaging even lower than a year ago, although this year's production is expected to be about 12 percent below last year's record output. However, heavy stocks of frozen birds left over from last year are helping to depress prices. A vote for controls would certainly have pushed them upward.

For another, under terms of the referendum the 8,000 eligible voters represented only about 15 percent of all growers in the United States. The other 85 percent are in the small producer class, marketing less than 3,600 pounds, or about 200 birds, a year. Controls would have meant that a smaller grower could not have sold more than 3,600 pounds unless a national committee said he could, so presumably he was against them. But he wasn't allowed to cast a ballot, and his future was in effect in the hands of the big growers.

In spite of all this, only 43 percent of the more than 7,000 ballots cast favored controls, for which a two-thirds "yes" vote was needed. The result reportedly stunned the administration's farm planners.

The vote, to be sure, represents the views of a pretty small and rather specialized sector of farm producers. But we think that if the Agriculture Department regards it as some sort of fluke, it will be making a mistake.

For what the outcome reflects is the growing awareness that Government intervention in production and marketing creates more problems than it solves. And that such intervention inevitably erodes and finally destroys the producer's freedom to manage his own operation and make his own decisions. The results of decades of farm regimentation are beginning to come home to roost.

THALIDOMIDE AND OTHER DRUGS

Mr. KEFAUVER. Mr. President, yesterday several of us had the privilege of being present when the President of the United States bestowed an appropriate medal on Dr. Frances Kelsey, as one of our outstanding public servants, along with a number of other civil servants who were entitled to the recognition that they received. I was very glad to see recognition of the fine work of Dr. Kelsey, whose courage and thoughtfulness prevented thalidomide from reaching the market.

I asked the Food and Drug Administration to grant the Antitrust Subcommittee and its staff access to their new drug application file on thalidomide, aside, of course, from those parts which they are prohibited by law from disclosing. In that file I found a history of the FDA activities on this drug, including a chronology of the correspondence and the calls between Merrell & Co.—the firm that applied for permission to sell thalidomide—and Dr. Kelsey and her superiors in the Food and Drug Administration. I have that chronology. The Dr. Smith referred to therein is Dr. Ralph G. Smith, Director of the New Drug Division of the Food and Drug Administration. Dr. F. Joseph Murray is with the Division of Scientific Relations of the William S. Merrell Co.

The chronology shows the telephone calls, the letters, the pressures, and the influence employed in trying to get approval of the medicine. Prepared by Dr. John D. Archer, of the Food and Drug Administration, it illustrates the need to free the FDA's physicians from pressures which are engendered by the present law under which new drug applications are approved automatically in 60 days unless the FDA acts to the contrary. This automatic approval feature would be removed under one of the President's proposed amendments to S. 1552, which is now on the calendar.

I ask unanimous consent that the memorandum may be printed in the RECORD at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. GOVERNMENT MEMORANDUM

APRIL 17, 1962.

To: George P. Larrick, Commissioner; W. B. Rankin, Assistant Commissioner.
From: Bureau of Medicine.
Subject: Kevadon (NDA 12-611).

The following is a chronology of transactions with the William S. Merrell Co. regarding Kevadon (thalidomide). (Dates of correspondence from the firm are listed by date of receipt and, therefore, may not correspond with the firm's date of correspondence.)

September 12, 1960: The application was submitted.

September 15, 1960: We issued a routine letter of acknowledgment.

October 25, 1960, or sometime later: Dr. Murray called Dr. Smith to learn what medical officer was reviewing the application

November 10, 1960: Our letter found the application incomplete and inadequate to demonstrate safety. The chemist's data also were incomplete. The proposed labeling was unsuitable, and appropriate comments were given insofar as possible.

November 30, 1960: Firm submitted some of the data (on chemistry) to partially complete the application.

December 16, 1960: Dr. Murray and Mr. Muhlenpoh met with several of our representatives to submit further data and to present verbal information in support of their application.

December 28, 1960: Mr. Casale submitted additional clinical data; a covering letter from Dr. Murray anticipated another conference.

December 29, 1960: Dr. Kelsey called Dr. Murray to point out a deficiency in the submission of the previous day. Some material was not in duplicate. Dr. Murray said this material was intended for her personal information and not for inclusion in the application. Dr. Kelsey did not agree with this procedure, so another copy was promised. Dr. Kelsey explained the delay and confusion entailed by personal submissions of material. Dr. Murray urged her to set a conference date soon and expressed the applicant's hurry to prepare for marketing the drug. (Presumably the duplicate material was later submitted; it would be in the duplicate copy of the NDA.)

January 9, 1961: Dr. Murray called both Dr. Kelsey and Miss Geismar (the chemist reviewing the application). He gave certain information on chemistry and inquired whether certain other data were sufficient; these had not been reviewed but were thought probably sufficient. He asked for an appointment with Dr. Kelsey to discuss new proposed labeling. Dr. Kelsey agreed to attempt to see him if her schedule permitted. The merits of certain data were also discussed in this telephone call.

January 11, 1961: Dr. Murray personally submitted an amendment to Dr. Kelsey containing chemical, pharmacological, and clinical data.

January 17, 1961: Revised proposed labeling was submitted together with clinical information. Dr. Murray's covering letter requested that he be called if the material were satisfactory so that the applicant might proceed with its plans for production and marketing.

January 17, 1961: Our letter stated that the application was considered withdrawn and resubmitted.

January 25, 1961: Dr. Murray called Dr. Smith. He said he had tried to phone Dr. Kelsey but had learned she would not be available for an indefinite period. Dr. Smith confirmed this fact. Dr. Murray said that NDA awaited only review of revised labeling which they were waiting to have printed. Dr. Smith promised to investigate.

January 31, 1961: Dr. Murray called Dr. Smith and asked if he had anything to report on Kevadon. Dr. Smith said he had spoken with Dr. Kelsey about it and had learned that there was more to review than a few labeling changes. Considerable material submitted before our last letter had not yet been reviewed. Dr. Murray indicated that the firm would have to postpone its marketing schedule and asked to be called if he could help us.

February 1, 1961: Dr. Murray told Dr. Kelsey by telephone that "release" was scheduled for Kevadon on March 6 and wanted to print labeling. Dr. Kelsey indicated that she would review the material as soon as possible but explained the press of other matters keeping her busy.

(Dr. Kelsey's preoccupation with other business is very understandable; this was the time of the hearing to suspend the application for Altafur.)

February 15, 1961: Dr. Murray called Dr. Smith and referred to a recent conversation with Dr. Kelsey. He said Dr. Kelsey told him the application was probably all right if specified labeling changes had been made, but that review was still pending. Dr. Murray spoke of being under pressure to "get it through" because of the need for preparation for marketing. He said the firm's vice president had advised a trip to Washington, but agreed with Dr. Smith that this would be of no use since Dr. Kelsey was not available. Dr. Smith thought Dr. Kelsey would be available after that week.

February 16, 1961: Dr. Murray called Dr. Kelsey, referred to yesterday's call to Dr. Smith, and "wondered about Kevadon." Dr. Kelsey hoped to get to it the next week. Dr. Murray referred to a previous promise to get to it in 1 day; Dr. Kelsey disagreed that such a promise had been made, and Dr. Murray decided he probably had misunderstood.

February 23, 1961: Our letter found the application incomplete. We had learned of reports of neurological toxicity from the medical literature. Therefore, data from further animal studies, which were in progress, were needed. Further clinical information was needed. We asked for a list of the investigators to whom the drug had been furnished and for information on the composition of a combination dosage form of Kevadon referred to the NDA. (It appears that two almost identical letters issued on this date. Apparently, the purpose of the second letter was to take the precaution of correcting an administrative error in the other.)

February 23, 1961: Dr. Murray called Dr. Kelsey to inquire about Kevadon. Dr. Kelsey elaborated on some points made in the letters issuing on that same day. Dr. Murray said the animal studies that were in progress were planned for 2 years with a view to over-the-counter distribution. (Previously, he had stated these were for 1 year.) He said the English company distributing this drug was merely adding a warning in their brochure about the neurological toxicity. Dr. Kelsey, however, believed that more knowledge about the drug was needed before we could permit an effective application.

March 2, 1961: The firm submitted a letter giving some of the information specified in our letter of February 23 and debating the matter of the further animal studies. It appears that Dr. Murray assumed from the telephone conversation of February 23 that pharmacological studies as outlined in the letter were not needed but could be submitted later at the end of the lifetime experiment. Further clinical information was promised when it could be obtained in England.

(Undated memorandum obviously between Mar. 2, 1961, and Mar. 30, 1961. Eventual date of typing was Jan. 9, 1962.)

Dr. Murray called Dr. Kelsey to say that on his recent trip to Europe he found that neurological symptoms did occur with prolonged use of Kevadon. If discovered in time, the effects apparently were reversible. His firm had written their investigators in this country and had obtained some further reports of toxicity. He sought an appointment to discuss proposed labeling. Dr. Kelsey informed him that we regard the toxicity of Kevadon as serious. Dr. Murray said he would be accompanied by the medical director of the firm.

March 30, 1961: Dr. Murray submitted further data and discussed clinical aspects of the application with Dr. Kelsey and Miss Geismar. A revision was proposed in the amendment to provide a warning about the neurological reactions. The visitors indicated the toxicity was low in incidence and rapidly reversible. (Brief perusal of one report indicated this was not always the case.) They pressed for a verbal commitment that the application would become effective with the precautionary information in the labeling. Dr. Kelsey specified the need for a review of the material and indicated that the value of the drug would not warrant untoward reactions. (Dr. Kelsey's memorandum of this conference explained some suspicion of a lack of complete frankness by the firm.)

March 30, 1961: Dr. Murray and Dr. Jones visited Dr. Smith following their conference with Dr. Kelsey and Miss Geismar. They gave him information verbally about the neurological toxicity, believed the advantages of the drug outweighed the risk, and expressed concern about our delay. Dr. Smith offered no commitment, stated the need for serious consideration of the matter and said we might discuss it with investigators or other experts.

March 30, 1961: Our letter stated that the application was considered withdrawn and resubmitted.

April 5, 1961: Additional clinical data were submitted. A covering letter submitted a labeling change regarding dosage, expressed hope of early review, pointed out the age of the application, expressed concern about a possible plan of Dr. Kelsey's to learn more about this or related drugs at a scientific meeting and in the literature, expressed the opinion that the data had provided adequate documentary proof of the relative safety of the drug for use as claimed, and requested to be advised of the decision by telephone as soon as possible.

April 13, 1961: Dr. Murray called Dr. Smith and said that in a previous interview with Dr. Kelsey she had doubted the need for a new hypnotic. In answer to this, they had compiled information on side effects of barbiturates. He expressed hope for early action in view of his management's dissatisfaction with his own efforts about "pushing the application." Dr. Smith advised him that Dr. Kelsey was out of town and probably would want to consult some investigators or experts before reaching a decision.

April 19, 1961: Dr. Murray called Dr. Smith and asked about the application. He said his firm thought some pressure should be exerted. Accordingly, their vice president intended to see Mr. Larrick if nothing were going to be done. They wanted a "yes or no" decision so that they could prepare to go to a hearing if necessary. No answer was given; Dr. Kelsey planned to talk to some of the investigators. Dr. Murray mentioned age of the application and said that Dr. Kelsey earlier had suggested only minor labeling changes, then extended the time, and following this, the matter of neurological reactions had come up. They mentioned their investigation of this and their report to us and discussed the matter of precautionary labeling information. He discussed the experience in other countries, and the acceptability there. They believed Dr. Kelsey was avoiding a decision. Dr. Smith disagreed. Dr. Smith also pointed out that the reactions may be more frequent than is presently known.

April 20, 1961: The firm submitted information on the toxicity of barbiturates and argued in their covering letter that Kevadon compared favorably.

May 5, 1961: Our letter found the application incomplete and inadequate. Further animal studies and additional clinical information were needed to evaluate the seriousness of neurological toxicity. Inadequacy of proposed labeling to warn sufficiently of the reaction was noted. Concern was expressed that evidence of neurological toxicity apparently was known to the applicant without being forthrightly disclosed in the application.

May 9, 1961: Dr. Murray called Dr. Smith and referred to the recent letter signed by Dr. Kelsey and considered it somewhat libelous. He inquired whether the firm was dealing personally with Dr. Kelsey in this connection and if so, whether the letter was subject to reconsideration. Dr. Smith told him that the letter should be considered as from the FDA but that regardless of who signed it, it could be reconsidered if the applicant thought he had sufficient reason for such.

May 5, 1961: Dr. Kelsey wrote a letter to one of the clinical investigators answering a letter she had received from him about Kevadon. She agreed with him (at that time) that the only serious complication with respect to the safety of the drug was pheripheral neuritis. She explained to him that we were not satisfied that we had sufficient information that the reaction is completely reversible and also pointed out that the incidence may be very much greater than he had suggested. Dr. Kelsey stated briefly the responsibility of this Administration regarding new drugs.

May 10, 1961: Dr. Murray and Mr. Woodward visited Dr. Kessenich. The new drug procedure was discussed. The visitors presented their problems in failing to obtain an effective application for Kevadon. Dr. Kessenich gave the visitors no specific remedy for their problems with this application. He referred them back to the Division of New Drugs and made an appointment for them with Dr. Smith and Dr. Kelsey for May 11, 1961.

May 11, 1961: Dr. Murray met with Dr. Smith, Dr. Kelsey and Dr. Archer. He asked what could be done to expedite his application. He explained a failure of communications between his company and the European companies regarding neurological toxicity. Dr. Kelsey, following this conference, was inclined to accept Dr. Murray's statement that he had only learned of the toxicity when he read the British Medical Journal of December 1960. We discussed certain points as being ones on which more information was necessary. These included both animal studies and clinical information. It was at this conference that we specified a need for evidence that the drug would be safe during pregnancy. (Handwritten note on original reads: This was based on peripheral neuritis symptoms in adults.) At this time our concern was only on theoretical grounds.

May 15, 1961: A letter of May 12, 1961, to Dr. Kessenich from Mr. Woodward was received. Mr. Woodward thanked Dr. Kessenich for seeing him and expressed his intention to complete the Kevadon application.

May 25, 1961: Dr. Murray called Dr. Smith and Dr. Kelsey to arrange an appointment to bring in more data.

May 31, 1961: Dr. Murray submitted an amendment to Dr. Kelsey personally containing clinical data. A long explanatory covering letter included, among other things, reference to data in the amendment and previous submissions demonstrating that Kevadon was safe for the fetus when administered to pregnant women. (It should be mentioned that these studies generally were conducted late in pregnancy; I have not determined in this review whether all involved only late pregnancy.)

June 8, 1961: Dr. Murray called Dr. Kelsey to ask "how Kevadon was." He was told the application was in our Division of Pharmacology, and was asked about certain further data.

June 29, 1961: Doctors Murray and Bunde visited Doctors Siegel, Smith, Kelsey, Talbot, and Weiss and Mr. Hauser. (Dr. Archer also was present, but this was inadvertently omitted from the memorandum.) This conference was largely on a separate subject, although Kevadon was discussed. The firm conceded some toxicity but pointed out certain advantages. The discussion centered around whether we would ever grant an effective application. We pointed out the need for further specified studies.

July 10, 1961: A manuscript of a paper based upon data previously submitted was received from the firm.

July 19, 1961: An amendment was submitted containing pharmacological data.

July 26, 1961: Our letter stated that the application was regarded as withdrawn and resubmitted.

July 27, 1961: Dr. Murray called Dr. Kelsey to determine whether we had received certain pharmocological data. We had, but it was not all that was needed. Dr. Murray denied memory of the further requirement. A publication on Kevadon toxicity was discussed.

July 31, 1961: We received a letter from the firm discussing the paper and data mentioned in the memorandum of telephone call on July 27.

August 2, 1961. We received an amendment pointing out neurological toxicity from barbiturates.

August 10, 1961: The firm wanted to bring in a group of investigators to present their experience with Kevadon. Dr. Murray, in a telephone call to Dr. Kelsey, suggested holding this conference in a Washington hotel; she told him to contact Dr. Kessenich. (Although no document is available regarding the telephone call, Dr. Kessenich specified that the conference should be in our own building.)

August 16, 1961: Dr. Murray called Dr. Kelsey regarding details of the forthcoming meeting with investigators.

August 23, 1961: We received a protocol regarding the forthcoming meeting.

August 25, 1961: Dr. Murray called Dr. Kelsey about the conference, which was to be held on September 7, 1961.

September 7, 1961: Our representatives met with Doctors Murray and Jones together with a group of clinical investigators that the firm had brought in. (I do not find a list of names, but our representatives included Doctors Kessenich, Siegel, Smith, Kelsey, Nestor and Archer.) The investigators presented their experience with Kevadon. This included evidence that the drug is effective, has certain advantages over other hypnotics regarding safety, does cause neurological reactions, and some evidence but not conclusive evidence that the reactions are necessarily reversible. There was only a little evidence that the drug would be harmless to the fetus if given during pregnancy, and this evidence was not adequate. (Our concern with this matter of pregnancy was still only on a theoretical basis at that time.)

September 12, 1961: We received a letter from the firm proposing labeling revision regarding dosage and adverse effects.

September 13, 1961: Our letter found the application still incomplete. In particular, we were awaiting receipt of the data relative to the safety of the drug presented orally in the conference of September 7, 1961.

September 18, 1961: Dr. Murray called Dr. Kelsey to determine what additional data were needed. She told him we needed the toxicity data reported at the recent conference.

September 26, 1961: Dr. Murray called Dr. Smith to ask whether he could predict when the application would become effective. He wanted the drug on the market by the middle of November and, in this case, they should commence printing the labeling early in October. He discussed a revised warning statement in the labeling and stated that case reports mentioned at the recent conference would be submitted in a day or so. Dr. Smith offered no prediction; he checked with Dr. Kelsey and informed Dr. Murray that other labeling changes would be necessary including advice against administration in pregnancy. (Our concern with pregnancy still was on theoretical grounds; convincing evidence of safety had not been submitted—we still had no direct evidence of toxicity in this regard.) The telephone call then was switched to Dr. Kelsey. Dr. Murray tried to get a deadline for "release" of Kevadon. She repeated Dr. Smith's statements about labeling. Dr. Murray wondered if he could record labeling changes by telephone and then print labeling for the October deadline (to get the product on the market by Christmas) or bring the labeling in for an "OK." Dr. Kelsey explained that his procedure was unsatisfactory and rejected it.

September 29, 1961: We received revised labeling and additional data, including information on administration during pregnancy, but essentially late pregnancy.

October 2, 1961: We received a letter correcting an accidental omission from the proposed labeling received September 29.

October 19, 1961: We received a further submission relating to the neurological reactions.

October 23, 1961: Dr. Jones talked with Dr. Nestor by telephone to obtain suggestions of who would be good investigators to study Kevadon in children.

November 2, 1961: The firm submitted revised labeling discussed in a recent telephone conversation with Dr. Kelsey. Further published data were promised by the covering letter.

November 7, 1961: Our letter stated that the application was considered withdrawn and resubmitted.

November 13, 1961: National Drug Co. (which had a similar application) submitted a publication on the usefulness of the drug in behalf of Merrell.

November 15, 1961: We received a submission containing papers and translations from the literature and commentaries on these papers. The letter refers also to a submission of samples and to an authorization for inspection of the premises of another firm as required by current regulations.

November 30, 1961: Dr. Murray called Dr. Kelsey and informed her that the drug had been withdrawn from the German market because of recent reports of congenital abnormalities associated with use of the drug in pregnancy. He expressed hope that the association would prove to be only coincidental. Dr. Kelsey pointed out that recent reports indicated the incidence of neurological reactions was higher than previously believed. We questioned the safety of the drug in view of its proposed use.

December 27, 1961: Our letter found the application incomplete in the absence of data relative to the deformities in newborn babies.

March 8, 1962: We received a letter from the firm requesting withdrawal of the application.

March 14, 1962: Our letter acknowledged the withdrawal of the application.

April 11, 1962: Our letter inquired whether Kevadon was still undergoing investigational use. If so, we wanted information on what had been done to warn physicians of its toxic potentialities. We asked what measures were taken by the company to inform physicians of the association between fetal abnormalities and ingestion of Kevadon by mothers during pregnancy, at the time the association first became known to the firm. We also asked for a complete and up-to-date list of all physicians who were supplied with the drug for investigational purposes.

JOHN D. ARCHER, M.D.

Mr. KEFAUVER. Mr. President, I ask unanimous consent to have printed in the RECORD a copy of a letter which I sent to President Kennedy, recommending that the President's Award for Distinguished Federal Civilian Service be granted to Dr. Frances Kelsey and a copy of a letter to the same effect which I sent to the Honorable John W. Macy, Jr., executive secretary of the Distinguished Civilian Service Awards Board.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

JULY 24, 1962.

Hon. JOHN F. KENNEDY,
The President,
The White House,
Washington, D.C.

MY DEAR MR. PRESIDENT: I recommend that you confer upon Dr. Frances Oldham Kelsey of the Food and Drug Administration the gold medal of the President's Award for Distinguished Federal Civilian Service. Her tremendous accomplishment in preventing an epidemic of births of malformed babies in the past year deserves the highest appreciation of the Government and people of the United States.

Dr. Kelsey's work has been widely publicized these past few days in the press in Washington and throughout the country. In the Senate on Wednesday, July 18, I took occasion to commend her, to insert into the CONGRESSIONAL RECORD an account of her achievement appearing in the Washington Post of July 15, 1962, and to state my belief that she deserves a medal at your hands.

Her contribution flows from a rare combination of factors: a knowledge of medicine, a knowledge of pharmacology, a keen intellect, and inquiring mind, the imagination to connect apparently isolated bits of information, and the strength of character to resist strong pressures.

Up to a point, the story is a fairly routine one. A new drug was synthetisized by the German drug company, Chemie Grunenthal, which appeared to be the ideal sleeping pill. It had a sedative effect without any apparent side effects. Overdoses were not fatal. Because of its presumed safety, it was recommended for alleviating "morning sickness" of women in the early stages of pregnancy. Thalidomide was widely marketed in Germany, Great Britain, elsewhere in Western Europe, Australia and Canada, as well as in Japan and South America.

The Wm. S. Merrell Co., a subsidiary of Richardson-Merrell, Inc. (formerly Vick Chemical Co.), obtained a license to sell the drug on the American market, and filed a new drug application with the Food and Drug Administration on September 12, 1960. In the normal course of events, the drug would have been released for marketing on prescription in a few months.

Dr. Kelsey, however, noted that the animal pharmacology data in the application showed the drug did not put the test animals to sleep. She reasoned that human side effects also might not show up in those tests. Perhaps the drug had been tested on the wrong animals. She declared the application incomplete and called for additional animal tests to establish safety. In February 1961 she still found the data incomplete and withheld release. Meanwhile, Dr. Kelsey noted in the British Medical Journal for December 30, 1960, a letter from a doctor in Scotland suggesting that thalidomide was associated with symptoms suggesting damage to nerves in adults.

Here she brought both her knowledge and her imagination into action and took a step the company and its medical investigators had presumably never done. She reasoned that if the drug would cause damage to adult nerve tissue, a relatively tough substance, it might cause much greater damage to the delicate growing tissues of embryos in the first few weeks of their development. Thalidomide might not be the drug to prescribe for pregnant women. She demanded test data from the company as to its effect on pregnant animals.

Meanwhile, the company was exerting pressure on the Food and Drug Administration—a fairly routine procedure. It wanted approval, and was quite willing to press Dr. Kelsey, as well as her superiors. The company made some 50 efforts, in 14 months, to get a favorable decision. Once they used the term "somewhat libelous" about a letter Dr. Kelsey wrote to Merrell concerning the case.

In November, a German physician, Dr. Widukind Lenz, showed enough evidence of connection between the taking of thalidomide by pregnant women and the wave of births of malformed infants occurring in Germany that Chemie Grunenthal withdrew the drug from the German market. Similar findings were being made in England, Scotland, Australia, and elsewhere, and the drug was either withdrawn or restricted in use in most of the countries which had permitted its sale.

The action of the drug has now been analyzed, and the effects are just as feared by Dr. Kelsey. The drug, circulating in the bloodstream of the newly pregnant women, penetrates the placenta and reacts upon the embryo. The effects is to inhibit growth of the buds that begin to form to make arms and legs, when the embryo is but an inch or so long. The damage is permanent.

I have set forth these matters at some length in order to show the horror of thousands of such births which Dr. Kelsey has prevented, to show how she correctly predicted the kind of damage that occurred, and how she stood by her guns in the face of strong pressures by the company. Estimates of malformed births resulting from the use of this drug in Europe run 3,500 to 5,000 and the time limits have not yet run out. Considering the widespread use of sleeping pills in the United States there can be no doubt that Dr. Kelsey averted a major disaster.

Dr. Kelsey's work was made more difficult by the weakness in the present law which provides for automatic release of a new drug unless the FDA acts to the contrary in the all too short period of 60 days. Because the company had claimed the drug to be useful in treating pregnant women, she was provided with a basis of demanding more information. Her basis for delaying action had been virtually exhausted at the time the reports began to appear in Germany associating the drug with the malformations. Had the company not made the claim with respect to pregnancy and had the reports in Europe not begun to appear when they did, the drug would undoubtedly have been introduced in the United States.

There are countless others in the Federal service who, endeavoring to protect the public interest, constantly resist the pressures of private companies and other special groups. They are not only unnoticed and unsung; they are constantly denounced and maligned as obstructionists and petty bureaucrats. Their accomplishments, while less dramatic, are of critical importance in our increasingly complex society. An award to Dr. Kelsey, such as I have proposed, will not only constitute a recognition of her splendid achievements but will be symbolic of the debt which the entire Nation owes to dedicated individuals throughout the Federal service.

Sincerely yours,

ESTES KEFAUVER.

AUGUST 2, 1962.

Hon. JOHN W. MACY, Jr.,
Executive Secretary, Distinguished Civilian Service Awards Board, Washington, D.C.

DEAR MR. MACY: I am sorry that before I had to leave for Tennessee in order to vote I was unable to return your call. The subject which I wanted to discuss with you was my conviction that Dr. Frances O. Kelsey of the Food and Drug Administration deserves a gold medal representing an award for distinguished civilian service. It is my understanding that section 2123 of title 5 of the United States Code provides for honorary recognition of civilian officers of the Government who perform special services in the public interest. Executive Order No. 10717, issued under the authority of this section, provides a gold medal known as the President's Award for Distinguished Federal Civilian Service.

As more and more information develops concerning the thalidomide disaster, Dr. Kelsey's accomplishment appears increasingly remarkable. In Germany the drug thalidomide was literally manufactured by the ton. It was sold in other countries throughout the world, including Canada, which, like the United States, has a Food and Drug Administration. As a sedative the drug appeared to have many attributes, and there can be little doubt that, had the new drug application been approved, the use of the drug in this country would have been immense. The latest estimates by Dr. Helen Taussig of the Johns Hopkins University of the number of children which will be born with deformities as a result of the use of thalidomide elsewhere is 6,000 in Germany and 1,000 in other countries. One can only speculate from these facts as to the number of malformed births which would have occurred in this country had it not been for Dr. Kelsey's courageous action.

Dr. Kelsey's achievement appears all the more remarkable in the face of the high-handed and continuing pressures to which she was subjected by the American licensee, the Wm. S. Merrell Co. It so happens that the Food and Drug Administration prepared on April 17, 1962, a history of the handling of the thalidomide application by that agency, which shows in detail the types of pressures exerted on Dr. Kelsey and her superiors. That an award to Dr. Kelsey is richly deserved should be proved beyond a shadow of a doubt by the events recounted in this history, a copy of which is attached.

Sincerely yours,

ESTES KEFAUVER.

PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. JACKSON. Mr. President, what is the pending question?

The PRESIDING OFFICER. The pending question is on the amendment of the Senator from New York [Mr. KEATING] to the amendments of the Senator from Arizona.

Mr. JACKSON. I am ready to yield back the remainder of my time.

The PRESIDING OFFICER. All time for debate has been yielded back or has expired. The question is on agreeing to the amendment of the Senator from New York to the amendments of the Senator from Arizona.

Mr. KEATING. Mr. President, I ask for a division.

On a division the amendment was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the first portion of the amendments offered by the Senator from Arizona [Mr. GOLDWATER].

The first portion of the amendments was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the second portion of the Goldwater amendments.

Mr. BIBLE. Mr. President, I offer an amendment to the second portion of the Goldwater amendment appearing on page 5, in line 13, to strike out the word 'shall" and to insert in lieu thereof the words "and the adjoining State shall each".

The amendment as it now reads, if adopted, would result in the State of Arizona receiving one-half of the electrical output of Hoover Dam, based upon the fact that Arizona is the adjoining State. It will result in half of the power going to Arizona from Davis Dam, which is in the adjoining State. It so happens, contrary to the record that has been made—inadvertently, I am sure—either yesterday or the day before, that the adjoining State to Arizona, insofar as both Hoover Dam and Davis Dam are concerned, is the State of Nevada.

Therefore if it is a fair proposal insofar as the State of Arizona is concerned, based upon the fact that it is the adjoining State, then it would be equally fair insofar as the State of Nevada is concerned. I am offering the amendment to make it clear that if this power is to be allotted it should be divided 50–50 based upon the fact that the dam is located between these two States, with Arizona to receive half and the State of Nevada to receive the other half.

I am frank to say that the entire situation of the power from Hoover Dam is controlled by contractual relationships with the U.S. Government. These are contracts which run until 1987. In any event, therefore, a provision such as this, in my opinion, would not be effective until at least after the expiration of the contracts.

The Davis Dam situation is somewhat different. It operates under a 10-year contract, and it is presently under negotiation and will be negotiated for a new 10-year period starting as of the first of January 1963.

Therefore, I submit that if it is fair to allot to the State of Arizona one-half of the energy based upon the fact that the dam is located partly in Arizona, it is equally fair to give the other half to the State of Nevada. I ask the Senate to adopt the amendment.

Mr. KUCHEL. My friend from Nevada has correctly suggested that the contractual relationships run until 1987. These contracts provide for an ironclad legislative guarantee that they are renewable. The Goldwater amendments, I say respectfully, are contemptuous amendments, and ought to be tabled. I therefore move that the second portion of the Goldwater amendments be tabled, knowing that tabling of the amendments will carry with them the Bible amendment.

Mr. BIBLE. I yield back the remainder of my time.

Mr. JACKSON. I yield back the time in opposition to the Bible amendment.

Mr. DIRKSEN. I yield back the remainder of the time on the second portion of the Goldwater amendment.

Mr. JACKSON. I yield back the remainder of the time on that amendment.

The PRESIDING OFFICER. All time has been yielded back, and has expired. The question is on agreeing to the motion to table.

The motion to table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. JACKSON. I yield such time to the Senator from Pennsylvania as he may require.

Mr. SCOTT. Mr. President, I move to recommit the bill to the committee.

The PRESIDING OFFICER. How much time does the Senator yield himself?

Mr. SCOTT. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SCOTT. I should like to yield some time to the minority leader. I would like to know how much time he will need.

Mr. DIRKSEN. I should like to speak for about 10 minutes.

Mr. SCOTT. I yield 10 minutes to the minority leader.

Mr. DIRKSEN. Mr. President, it is my conviction that the motion to recommit should prevail. This is indeed a bad bill. The distinguished Senator from South Dakota yesterday used the word "Balkanize" in the course of his speech. Frankly, that is an applicable term, because if the proposed preference is expressed in the statute it is bound to breed legislation for preferences in other areas of the country, and in due course of time we will have a whole conglomeration of areas each looking after its own particular needs.

The term "Chinese wall" has also been applied, and I believe on one occasion it was used by the distinguished Senator from New Mexico [Mr. ANDERSON].

It applies equally well, because if we are to fence in the Northwest area and the Columbia drainage basin, and they are to be given a preference as against all other consumers, and if we are to make it possible, after 7 days' notice, to shut off power to all consumers and make the power, in a sense, interruptible power, there is only one word that will apply, and that is "discrimination."

It is interesting to note that the Chairman of the Federal Power Commission, who I believe is rather liberal in his views, has grave misgivings about the bill. When he testified before the Senate subcommittee, he stated:

> We hope that this will not be the start of more regional preference, because one preference breeds another.

Coming from the Chairman of the Federal Power Commission, in whose general jurisdiction and domain this subject falls, that statement ought to be rather persuasive upon the Senate with respect to the bill.

But I go further. There was another Commissioner on the Federal Power Commission, Mr. Charles R. Ross, who, when he was out in the Northwest last June, was quoted as follows in the Portland Oregonian of June 15, 1962:

> I think it could be very dangerous and would set a precedent for other areas. I don't like to see the local interest concept increased any more than it is.

So we have a statement by the Chairman of the Federal Power Commission, who looks upon the bill with a baleful eye; a statement by Commissioner Ross, of the Federal Power Commission, who takes an equal view of the matter.

Now I shall turn to a statement by Mr. Norman M. Clapp, Administrator of the Rural Electrification Administration. On May 17 of this year, when the American Public Power Association held its convention in Puerto Rico, this is what Mr. Clapp said with respect to the question of regional preference:

> The taxes which develop Federal projects from which low-cost electricity is generated come from all regions. The ultimate benefit should be available with equal impartiality.

Mr. Clapp puts his finger on the important point, because the taxes which are required or the credit which is required whenever funds are loaned belong to all the people in all 50 States, not merely to a segment of States in the Northwest; and when the financial burden which makes these projects possible is placed upon these States, whether it is in the form of cash out of the Federal Treasury or whether by pledging and hypothecating the credit of the people, all the people then should be treated impartially, as Mr. Clapp says, and there should be no discrimination.

So the Chairman of the Federal Power Commission has his misgivings about the bill; Commissioner Ross has his misgivings about it; and the Administrator of the Rural Electrification Administration has his doubts about it.

Former Secretary of the Interior Fred Seaton, of Nebraska, also attacked the bill and the concept, and his comments may be found in the RECORD.

I allude to only one other person, the distinguished senior Senator from New Mexico [Mr. ANDERSON], chairman of the Committee on Interior and Insular Affairs, who conducted the hearing. In a general way, he referred to the geographic preference as "a dangerous principle." I agree with him.

Many other areas are concerned: the Southwestern Power area; the Tennessee Valley power area; the Niagara power area. Probably there are others. Establish this principle and give these preferences to a portion of the people, and it constitutes rank discrimination. In the language of the distinguished Senator from South Dakota [Mr. MUNDT], it constitutes a kind of financial Balkanization of the country.

So, the basic principle being wrong, this concession should not be made, and the bill ought to be sent back to committee for further consideration. It is quite evident from the testimony of representatives of the administrative branch of the Government, who must deal with these problems, that this proposal merits far more thoughtful consideration than it has received. Therefore, I hope that the motion to recommit will prevail and that the bill will go back to committee.

Yesterday we had an excellent example of what could happen, because everyone is interested, first, in his own section of the country, to make sure that there is no discrimination. The committee itself wrote into the bill an exception for the State of Montana. The Senator from Arizona [Mr. GOLDWATER], to make sure that his State would not be bypassed, asked that Arizona be included. He was open to suggestions, so in rapid succession Iowa, North Dakota, and South Dakota were included. Illinois was included when I asked the Senator from Arizona to yield and accept a modification of his amendment, which he did.

Then came the proposal of the distinguished Senator from New York [Mr. KEATING]: Why not include all States? That would be exactly the thing to do. But, of course, the proponents of the bill argue for the principle of the bill and say that if all States were included, the bill and its purposes would be destroyed.

Mr. SCOTT. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield to the distinguished Senator from Pennsylvania.

Mr. SCOTT. I call the attention of the Senator from Illinois to a reference on page 15 of the hearings to the Hungry Horse Act of June 5, 1944, as establishing a power preference in one State. I suggest to the Senator that since the precedent here seems to be Hungry Horse, possibly this is a question of hungry States, and that some hungry States are not quite willing to admit the remaining States, which, while perhaps not quite so hungry, find themselves stimulated to a degree by the demands of the hungry States acting on the Hungry Horse precedent. Does the Senator from Illinois agree that that is substantially the situation?

Mr. DIRKSEN. Indeed so; but over and above all else, the overriding consideration here is that this is a rather alien principle, one which should not be written into the statute, because, in my judgment, it is an affront to all the other people of the country who do not share the benefits proposed by the bill. For that reason, the bill should be referred back to committee. It is not necessary for me to detain the Senate longer. I think the case is clear. The yeas and nays have been ordered on the motion to recommit.

Mr. SCOTT. Mr. President, I understand the distinguished senior Senator from South Dakota has asked permission to speak for 5 minutes on the motion, so I yield 5 minutes to him.

Mr. MUNDT. The Senator from South Dakota was seeking 10 minutes.

Mr. SCOTT. Mr. President, I yield 10 minutes to the senior Senator from South Dakota.

Mr. MUNDT. Mr. President, it seems to me that the Senator from Illinois has made an eloquent argument for sending back to committee, for further consideration, proposed legislation which is of major importance to every State in the Union, but which is obviously clearly misunderstood by a great number of Senators.

Unhappily, Mr. President, a great many Senators will not listen to this debate. So unless they read the arguments made during the last 2 days, many Senators are likely—either through inadvertence or through a lack of adequate information—to vote for this measure; but if they vote for it, their votes will certainly return to plague them in the future.

I point out that this measure received only 1 day of committee hearing during this session. So Senators are asked to vote in favor of writing a new public power policy for the Nation; and they are asked to do so on the basis of only 1 day of committee hearing and 2½ days of Senate debate, listened to by less than 20 percent of the Members of the Senate.

Mr. President, this matter is a very serious one. At least three different areas of serious consequence are involved in the bill. The Senator from Illinois [Mr. DIRKSEN] touched upon one of them when he emphasized the fact that the bill proposes a policy of regional preference and the changing of the Nation into a series of dis-United States with walls around them, so that the

States in which these hydroelectric dams are located will—if the preference policy requested by the Pacific Northwest is followed—have exclusive right to the power which is provided by these projects, paid for by all the taxpayers of the Nation. I do not think that would be a good American policy. But if it is to be adopted for the Pacific Northwest, I believe it should, in simple equity, be made available to the other power-producing States of the Union.

Mr. MAGNUSON. Mr. President, will the Senator from South Dakota yield?

Mr. MUNDT. I yield.

Mr. MAGNUSON. I am sure the Senator would not mind my suggesting that when he uses the phrase "paid for by all the taxpayers of the Nation," he point out that the money was loaned, and was paid back.

Mr. MUNDT. That is correct. The taxpayers' money created these projects; and certainly it is well understood that the money was a loan which was paid back, together with 3 percent interest; and certain other attendant costs were also paid.

Mr. MAGNUSON. Yes.

Mr. MUNDT. I do not know how Senators who live in States outside the Pacific Northwest can in good conscience vote for a bill which would perpetuate for that area 2-mill power, to be available to every industry in that area, but not to be available to any industry outside that area. This bill is a direct invitation to industries to leave Michigan, Ohio, Illinois, and States on the east coast, and move to the Pacific Northwest, because nowhere else in the Nation would they be guaranteed in perpetuity a preferential power rate so essential to the success of a manufacturing business.

South Dakota has no particular interest in that connection, insofar as losing industries is concerned; but we believe that certainly South Dakota should have the same right to provide a magnet to attract industry that would be provided by this bill for the Pacific Northwest.

So, Mr. President, if the pending motion to recommit is rejected, I shall immediately offer an amendment providing for South Dakota, North Dakota, and other States in their situation the same privilege which the bill would provide for the Pacific Northwest—no more and no less.

The Chairman of the Federal Communications Commission, Mr. Swidler, stated at the hearing that each time a preferential privilege is granted, it is necessary to provide for the development of others. Certainly that is correct.

So, Mr. President, if the motion to recommit is rejected, I contemplate submitting an amendment to provide similar privileges for South Dakota and North Dakota, so as to give them the advantages and privileges which this measure, if enacted as it now stands, would present as a fait accompli to the States of the Pacific Northwest.

Furthermore, Mr. President, it is significant to note that the distinguished majority leader, the senior Senator from Montana [Mr. MANSFIELD] has introduced a bill, S. 3558, which proposes for Montana precisely what the pending bill proposes for the States of the Pacific Northwest, and precisely what I now propose, by means of the amendment to which I have referred, for South Dakota and North Dakota. I salute the Senator from Montana for his diligence.

Mr. MANSFIELD. Mr. President, will the Senator from South Dakota yield?

Mr. MUNDT. I yield.

Mr. MANSFIELD. I thought we made clear yesterday that, so far as the two projects—the Hungry Horse project, in Montana, and the Big Bend project, in South Dakota—are concerned, they are projects which are unique, and also that the Niagara project has that sort of preference. So I would call attention to the fact that the Big Bend project, in South Dakota, and the Hungry Horse project, in Montana, are already in existence.

Mr. MUNDT. That is correct; and about one-sixth of all the power produced at Hungry Horse and about one-sixth of all the power produced at Big Bend——

Mr. MANSFIELD. One-fifth of the power produced at Hungry Horse.

Mr. MUNDT. Yes, I accept the correction—one-fifth of the power produced at Hungry Horse—would be covered in that way. But, Mr. President, one does not have to be a mathematical wizard using a calculating machine to distinguish between one-fifth of all the power developed at the Hungry Horse project in Montana and one-sixth of all the power developed at the Big Bend project in South Dakota and 100 percent of all the power developed in the Pacific Northwest. So I think the Senator from Montana was justified in introducing that measure. In other words, if such a precedent is to be established, similar treatment for other regions should be provided.

Furthermore, Mr. President, the second reason for agreeing to the motion to recommit the bill, so that it may receive further committee consideration, is that no Senator knows what impact the bill would have on the REA's and the entire concept of preference customers, because the bill would operate to the disadvantage of preference customers outside this geographic area, but to the protection of the preference customers in this geographic area; and when we begin to establish regional preference with superpower over user preference, we begin to vitiate and destroy the customer preference concept which is so important to the Nation.

Mr. President, there is a reason for providing that preference for REA's. It is that it is very costly and difficult to make power available to private customers in rural areas; and the more scattered the population, the more difficult that becomes. So part of this power, developed with the use of the money of the taxpayers of the Nation, was made available to the rural customers. But now it is proposed to begin to destroy that preference, and to give industry a preference over the REA customers, and to extend that privilege to those just outside the sacred circle enclosing the power area.

I do not think it is necessary, in order to meet the problem confronting the Pacific Northwest, to go to this extent, and to tend to Balkanize the power system of the Nation, and to provide such special consideration which would induce business and industries to flow into the Pacific Northwest because of this particular guarantee of power there.

I think this privilege could be made available to customers outside the area, without forever losing the right to bring back the power.

The Senator from Washington has said that the Solicitor for the Department of the Interior has held that once the power is allowed to go beyond this region, it can never be brought back. But, Mr. President, others find it possible to disagree with that conclusion. Therefore, I do not see why we should base legislation of this sort merely on the fact that one Solicitor of the Department of the Interior has said "Yes," whereas another says "No."

Mr. JACKSON. Mr. President, will the Senator from South Dakota yield?

Mr. MUNDT. I yield.

Mr. JACKSON. Will the Senator from South Dakota indicate the name of the Solicitor who has so ruled? We have been working on this matter since 1959, and I would be interested to know what Solicitor made such a statement, and when.

Mr. MUNDT. On June 28, 1960, Secretary of the Interior Seaton, in a letter to the late Senator Murray, who at that time headed the committee which has this proposed legislation in charge, declared that "no preference consequences would attend" power purchased by the Pacific Gas & Electric Co. from the Bonneville Power Administration, and said:

> Pacific Gas & Electric Co. is, of course, not a preference customer. It is, therefore, not entitled to the protection of the preference clause. It follows that withdrawal of power from Pacific Gas & Electric Co. would leave the company without any right to its restoration. Power sold to Pacific Gas & Electric Co. either at Yamsay or at the California-Oregon border would become the company's property; at that point it would lose its identity as Government power and be in the same class as all other power available for sale by Pacific Gas & Electric Co. No preference consequences would attend such power, the chain of connection with the United States having been severed at the point of sale to the company.

Mr. JACKSON. Who signed the letter?

Mr. MUNDT. It was signed by the Secretary of the Interior, Fred Seaton.

Mr. JACKSON. If the Senator from South Dakota will examine the hearings held in 1960, at page 27, he will find there an opinion dated November 4, 1959, and signed by Raymond C. Coulter, Regional Solicitor of the Department of the Interior. In that opinion he held that sales to California by means of an interconnection would extend the marketing area of the Bonneville Power Administration.

Mr. MUNDT. That is correct.

Mr. JACKSON. I understood the Senator to say that the Solicitor had ruled to the contrary.

Mr. MUNDT. The Senator from Washington quoted a regional solicitor's opinion in 1959.

Mr. JACKSON. That is correct.

Mr. MUNDT. I quoted the opinion of the Secretary of Interior in 1960——

Mr. JACKSON. No.

Mr. MUNDT. Which is clearly a revision of the 1959 opinion from the field.

Mr. JACKSON. With all due respect, I think the Senator is reading from a letter of the Secretary of the Interior, but I want the RECORD to show that lawyers held that it would extend the preference clause to California, and that decision was reaffirmed in the new administration.

Mr. MUNDT. Let me read the Senator another statement supporting my position.

Mr. JACKSON. Very well.

Mr. MUNDT. I go back.

On May 5, 1960, the distinguished Senator from Washington [Mr. JACKSON], noting that preference would attach if a Federal Bonneville Power Administration-California intertie were constructed, asked the Senator from California [Mr. KUCHEL]:

> Would not the same thing apply if you sell power by a private line?

That is to be found at page 24 of the hearings of May 5, 1960.

The Senator from California requested Assistant Secretary Aandahl "to inquire into that." In reply, Secretary Aandahl submitted the following statement for the record:

> Statement re question as to whether proposed sales contract between Bonneville Power Administration and Pacific Gas & Electric Co. establishes any preference rights in California to power so sold?
>
> I am advised by the Solicitor's Office of the Interior Department that the proposed sale of secondary energy by Bonneville Power Administration to Pacific Gas & Electric Co. for delivery, whether at Yamsay, Oreg., or at the Oregon-California border, will not establish any preference rights in California to power sold under such contract over any customers of the Bonneville Power Administration in the Pacific Northwest.

So there is disagreement among the solicitors.

Mr. JACKSON. I do not want to be too technical but I think that particular letter related to sale of power at the border or within Oregon.

Mr. MUNDT. No; it related to sale to the Pacific Gas & Electric Co.

Mr. JACKSON. But within Oregon or at the Oregon-California border.

Mr. MUNDT. The solicitor said "will not establish any preference rights in California." So it must have been dealing with California. Be that as it may, suffice to say that the solicitors have held varying opinions as to whether or not this power could be recaptured.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JACKSON. I will yield the Senator 5 minutes, if I do not lose my right to speak later.

The legislation will certainly clarify the whole situation.

Mr. MUNDT. There is no question about that. The point I am making is that we are legislating on a permanent matter, to establish a new power policy which can be detrimental to every State in the Union outside of this area, which creates a pattern which is not permissible in the other surplus power-producing States, such as Arizona, North or South Dakota, but which will create a resounding demand for equal treatment by those States.

So the second reason for referring the bill back to committee is that there should be a more simple and a more specific manner for meeting the particular problems involved other than creating this new power program in America.

In that feeling I am upheld by the Federal Power Commission, because in the committee's report, on page 14 of the report, the Federal Power Commission itself has some very interesting language in this connection. Certainly, the Federal Power Commission's statement to the committee cannot be considered as a glowing endorsement of the bill. I am fascinated by the adroit circumstances, the adroit language, and the circumspection involved, for example, in the first sentence, which reads as follows. Note this now. This is supposed to be the department of Government most intimately involved in, most knowledgeable about, the problems, which was asked to submit an opinion to Congress. What does it say?

> As an agency functioning under statutes which impose upon it a national perspective in appraising problems in the electric power field, the Commission is unable to be helpful in commenting on the specific terms of a statute providing for regional preferences.

To call that damning by faint praise is indeed the understatement of the year. This is ducking under the cover. But they hedge a little at the end of the statement on page 14, because they suggest an alternative, which is embodied in the motion to recommit:

> The Commission is requesting funds from Congress to undertake a comprehensive national power survey designed to develop a long-range program for meeting the Nation's rapidly expanding electric power requirements through a coordinated and interconnected system. It would suggest in broad outline how the Nation's 3,600 electric systems (private, municipal, cooperative, State, and Federal) can key their future expansion plans to a national scale rather than to a local or area basis. It is the Commission's hope that the construction of such a national network would alleviate regional pressures for preferences and make possible the flow of energy within the Nation, on the basis of the best overall use of electric system resources.

In other words, they plead with Congress not to act precipitately. They throw out a warning light to Senators not to vote to create a policy they do not understand, which can work to the economic disadvantage of every industry in their States, and can work to the economic disadvantage of all the electrical consumers outside of this regional preference area, and give them an opportunity to come up with a long-range answer which will solve the problems not only of the Pacific Northwest but the problems of all America, as the demand for power becomes greater and as the need for interties becomes greater and as the need for coordinated action in the field of complicated power needs and projects can be recommended to Congress for overall action.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. MUNDT. I yield.

Mr. AIKEN. In looking over the report, the hearings on the part of the committee, and some 25 communications, I fail to find anyone who testified against this bill. Were opponents given a chance to testify, or was the hearing put through with only affirmative witnesses?

Mr. JACKSON. May I answer?

Mr. MUNDT. Yes.

Mr. AIKEN. It seems to me only one side was heard.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JACKSON. I yield 5 minutes more.

The record will disclose that we started on this matter in 1959 with the first hearings. We held hearings again in 1960. We held them again this year. All the interested parties were before us. We heard representatives of the utilities, publicly and privately owned, industrial users, and others. All supported the bill. The only individual who appeared before the committee in opposition was Representative GUBSER, of California. If the Senator reads his testimony, I think it will speak for itself.

Mr. MUNDT. In further response to the Senator from Vermont, I will say that, while I did not find anybody opposing the legislation outright, I would consider the report I just read from the Federal Power Commission to be in opposition.

Mr. AIKEN. He questioned it.

Mr. MUNDT. He questioned it.

Mr. JACKSON. He did not oppose it. He raised some questions.

Mr. MUNDT. He did not approve it.

Mr. JACKSON. He simply raised questions.

Mr. MUNDT. He did not approve it. It is on page 14. Anybody can read it.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. MUNDT. I yield.

Mr. JACKSON. I would be very happy to give all regions of the country the same right to sell surplus or secondary power. That is the only question involved here.

We should be happy to go through the orderly process of holding hearings, to consider the problem area by area.

Senators should bear in mind, when there is talk about Balkanization, that some of the same people fighting the bill came in and said, "You must not let the TVA expand." We put the "Balkan wall," if Senators wish to use that term, around TVA. Many people who raised the question with regard to Balkanization are the same people who supported the limitation on TVA.

I merely wish to have the RECORD show that, because there has been much misunderstanding.

I should be the first to grant to the Missouri Basin or to any other area the right to do the very thing we request, but the fact is there is not another situation like ours in the United States.

Mr. MUNDT. At the moment that situation does prevail in North Dakota and South Dakota, and it will prevail increasingly. The people from Arizona tell me it is likely to develop there, as well as in Colorado.

Mr. JACKSON. We can arrange to hold hearings immediately. No request has ever been made for hearings in that regard, since I have been in the Senate.

Mr. MUNDT. It would be much simpler and a much more orderly procedure for the Senate to approve my amendment, if the bill is not recommitted. I shall have to offer the amendment in defense of the area I represent, although I shall do so believing that the basic concept of the proposed legislation is improper and wrong. If this right is to be provided for the Pacific Northwest, I see no reason why Congress should not then say, "If, as, and when the same conditions prevail in the other areas, they shall be entitled to the same."

That is all the amendment would provide.

Mr. JACKSON. The Senator's amendment would break up the Missouri Basin, rather than treat it as a region. It would fractionalize the whole area, and would destroy the very thing the Senator wishes to do in the basin.

Mr. MUNDT. Is it not correct to say that the Senator's proposed legislation would go beyond surplus power and would relate to all power in the future; firm, peaking, or surplus power?

Mr. JACKSON. May I point out what an absurd position we can take in this regard?

Mr. MUNDT. Will the Senator answer my question?

Mr. JACKSON. Would the Senator please state it again?

Mr. MUNDT. Is it not true that the Senator's proposed legislation would go beyond the question of surplus power, and would relate to the future, to whatever power is developed in the Pacific Northwest, whether it be firm power, peaking power, or any other type of power?

Mr. JACKSON. The legislation would permit sales of any power which is surplus to the area, but would do so without prejudice to customers in the Pacific Northwest; such power would be surplus to the needs of the area and would be sold so that it would not be wasted.

Mr. MUNDT. There is some merit to the basic argument which the people from the Pacific Northwest make, which is that because they are the host area of these great Federal developments they should be entitled to some special consideration. I doubt that, however, because these projects were financed by the Federal Government. If we accept that premise, then we must accept it for South Dakota and North Dakota, which have provided many times more the number of fertile acres to be inundated and flooded by some kind of project.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. MUNDT. I yield.

Mr. JACKSON. Would the Senator be willing to have power taken away from the regular customers in South Dakota, to have transmission lines built, and to have the power of South Dakota sent to New Orleans, to Chicago, or to New York, if there were preference customers in those areas?

Mr. MUNDT. We would be willing to abide by whatever should be established as a national power policy, under the study recommended by the Federal Power Commission. We are not ready now to be discriminated against as a result of proposed legislation which would deal with one area in one way and provide that an identical condition would not prevail for other areas.

The PRESIDING OFFICER. The time of the Senator has again expired.

Mr. SCOTT. Mr. President, I yield the Senator 1 more minute.

Mr. JACKSON. I am quite willing to hold hearings tomorrow. If the Senator wishes to come before the committee and to ask for consideration of proposals for disposing of surplus power, which his area wishes to sell outside that area, with the provision that its customers will be properly protected, I am willing to hold hearings immediately. Such a proposal would be a commonsense proposal. I am ready to hold hearings on it tomorrow.

Hearings have been held on this question since 1959, and no one has bothered to come before the committee except the customers in the Pacific Northwest who are confronted with a situation which applies only to the Pacific Northwest.

Mr. MUNDT. A much more ideal situation, from the standpoint of the Senator from South Dakota, Mr. President, would be for the Senate to accept the offer of the Senator from Washington and to make it immediately applicable by sending the bill to the committee for reconsideration now, so that those hearings could be held, thereby wrapping everything up in one ball of wax, to get it all done now.

I should much rather follow that procedure, than to follow the tandem concept.

The PRESIDING OFFICER. The time of the Senator has again expired.

Mr. SCOTT. Mr. President, I yield the Senator another minute.

Mr. MUNDT. I would not wish to have the pending bill passed and to have our situation considered at some date far in the future.

Mr. SCOTT. Mr. President, I am ready to yield back my remaining time.

Mr. LAUSCHE. Mr. President, will the Senator yield me 3 minutes?

Mr. SCOTT. Mr. President, I yield 3 minutes to the Senator from Ohio.

Mr. LAUSCHE. Mr. President, to begin my statement I wish to point out that in the middle 1940's, when I was Governor of my State, I received a communication from a southern Governor asking me to oppose any extension of the Bonneville Power Administration generating project. In reply to that Governor I stated that whatever was good for Washington would eventually be good for the United States and for Ohio as well. I did not at that time oppose what was being promoted.

I am now faced with the proposition that Ohio, as one of the Midwestern States, is suffering an erosion of its businesses and industries, those businesses moving into areas in which they can buy power cheaper and in which they have other advantages. I do not like to take this position because of the gentle and affable qualities of the Senator from Washington, but unless I did I would not be acting in the best interests of my State.

I take the position that I shall vote for the recommittal of the bill to the committee on the ground that when the original law was passed there was no purpose to limit the supply of electricity to any geographical area. The only limitation was one of economic transmission. The Congress stated, "This power shall be available to all areas provided it is economically feasible to make the transmission."

It is now contemplated to change the original concept.

The PRESIDING OFFICER. The time of the Senator from Ohio has expired.

Mr. LAUSCHE. Mr. President, will the Senator yield me 2 more minutes?

Mr. SCOTT. I yield 2 more minutes to the Senator from Ohio.

Mr. LAUSCHE. It is now contemplated to change the intent which was written into the original law. Instead of limiting the area which is to have the electricity available only to where it is economically justified to transmit the energy, it is contemplated to limit it geographically. I cannot go along with that.

I live in the Midwest. Arguments have been made on this floor concerning the erosion we are suffering, especially in respect to procurement contracts. To subscribe to a revision of this law, in my opinion, would not be in the best interests of my State. Therefore, I shall vote to have the bill recommitted to the committee.

Mr. JACKSON. Mr. President, I should like to take about 3 minutes. After I conclude, I understand, the Senator from Pennsylvania will be willing to yield back his remaining time, as I shall be.

First, Mr. President, I wish to yield 1 minute to the distinguished minority whip, the Senator from California [Mr. KUCHEL]. Then I shall use 3 minutes.

The PRESIDING OFFICER. The Senator from California may proceed.

Mr. KUCHEL. Mr. President, waste is completely without justification, whether it be in private business or in government. There is a surplus of electricity in the great Northwest amounting to $30 million worth a year. Some day there will be no surplus there.

Today there is a ready market for that surplus power. In the State from which I come there is a ready market, and there may be a market in many other areas also. As I said earlier, one such area is the city of Los Angeles. The city of Los Angeles is now prepared to enter into a contract not only to purchase surplus energy from Bonneville, but also to underwrite the cost of a transmission line to bring the power to that community.

Thus, because of the unique situation involved; and because the proposed legislation which has come from the committee and is now before the Senate is the only way to eliminate the waste which now plagues the Northwest and protect the future of the Northwest, I vigorously oppose the motion to recommit.

Mr. JACKSON. Mr. President, I yield myself 3 minutes with the understanding that my friend the Senator from Pennsylvania [Mr. SCOTT] will yield back the remainder of his time, as I shall yield back the remainder of my time.

Mr. SCOTT. Mr. President, I am prepared to yield back the remainder of my time at the conclusion of the time used by the Senator from Washington.

Mr. JACKSON. I thank the Senator.

Mr. President, first, I wish to make clear that the bill has not been handled in slipshod manner.

We have held three separate hearings dating back to 1959. We have gone into the question thoroughly. All the interested parties have been before the committee. We have given everyone an opportunity to be heard. I think we have done a thorough and careful job.

What we find here is a situation that does not exist in any other place in the country. In the Northwest there is an electric energy system that is 96 percent hydroelectric. There is no other area like it. We are dumping and wasting $30 million a year in power. The water is going over the dams and into the ocean. All our customers in the Northwest, including the private utilities, the public utilities, and industry are pleased to join in a proposal that will make it possible for the Federal Government to recoup the $30 million that is being wasted each year if their power supply is properly protected.

We have had opinions from the proper legal authorities in the Eisenhower administration and in the Kennedy administration, making it clear that if we sell the surplus power in California, we will have extended the preference clause, and the power supply of customers in the Northwest will be in jeopardy. It is that clear. There is no other situation like it in the country.

Mr. President, I am rather surprised at the remark that we should sell power any place in the country, regardless of cost of transmission and administration. My good friend from Ohio is interested in economy. It is possible that we could sell power to users in New York City. Would the Senator wish to have the Bonneville Administration maintain offices all over the United States to administer such a program? Would he want to disrupt the $450 million worth of transmission lines integrating the private and public utilities in the Northwest so that power can be conserved?

A hydroelectric system is of such a nature that it is very important that all hydroelectric producers, public and private, coordinate their systems. By doing so we greatly increase our load-carrying capability.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. LAUSCHE. I would desire it, provided the power could be transmitted economically. That was the purpose of the original legislation. If it is economically feasible to transmit the power, it should be transmitted to the extent that it can be.

Mr. JACKSON. I point out to the Senator that at the time the act was passed and those words were used, the economical transmission distance was the extent of the basin—200 miles. Now the economical distance is 2,000 miles.

I wish to say a word about industry. If my friend from Ohio can name a single industry that has moved from any part of the United States to the Northwest because of the availability of power, I would like to know about it.

Mr. LAUSCHE. I cannot do so. But I do know that industry settles where electric power or other power rates are low.

Mr. JACKSON. Does my friend know how the industry he has discussed was established in the Northwest?

Mr. LAUSCHE. I think it got there substantially on the basis of the power available from the Bonneville generating plant.

Mr. JACKSON. I wish to be fair with the Senator. Does he know under what circumstances the large aluminum plants were established in the Northwest?

I wish to help by reminding the Senate that the plants were established in that area by Presidential order at the outset of World War II, because only in the Northwest was sufficient power available to produce a substantial portion of the aluminum used in building 50,000 planes a year.

We have not taken any industry away from any area.

It has been intimated that because there are power projects in the Northwest, we have taken industry from some other part of the country. The truth is, as I pointed out earlier, that U.S. aluminum companies are going abroad and are building aluminum plants in Africa and other places.

The aluminum companies now have under construction or have built outside the United States, aluminum plants whose production aggregates more than the total production of the aluminum plants in the State of Washington.

Thank God for the Northwest's power. It made possible the Hanford project during World War II. We are not taking industry away. I have heard this argument time and again. I have heard Senators say, "You took an industry from my State." The fact is that such a thing has not occurred in the Northwest.

I wish to add one further point. We are paying for projects such as the one we are discussing in the Northwest. I have voted for projects in the State of Ohio for which the people of the State represented by the Senator did not alone pay. All the people pay for flood control projects. Who pays for flood control projects? All the people of the United States. Who pays for the power projects? Power projects, all of them, are paid for by the ratepayers with interest.

Mr. LAUSCHE. Mr. President, will the Senator yield for 1 minute?

Mr. SCOTT. I yield for the purpose of a question.

Mr. LAUSCHE. There is no question that Ohio has been losing industry to other areas of the country in which publicly generated power is available at a price below the price at which it is available in Ohio. I cannot recall exactly the names of the plants, but a search of the record would undoubtedly show that while they may not be moving into the Bonneville area, they are moving into other areas.

Mr. JACKSON. They are moving into Ohio.

Mr. LAUSCHE. Just one moment. I have the floor.

The Senator from Washington has not explained my charge that the bill is an effort to change the purpose and intent of the law which was enacted by the Congress.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. LAUSCHE. Mr. President, will the Senator yield 2 additional minutes?

Mr. SCOTT. I yield 2 additional minutes.

Mr. LAUSCHE. At the time it was intended that there should be no limitation on the distance to which power could be transmitted. The only limitation was that the transmission be economically feasible. Under such language California can get all the power it wants. If it can be sent to a user on an economically feasible basis, the user is entitled to it. I am for that.

But the proposal contemplates that a user shall have the power only if it is available on a secondary surplus basis. When the act was passed, it provided that there should be no limitation upon the right of any citizen of the United States to acquire power if it could be transmitted to the user on the basis of economic feasibility. Now it is contemplated that a provision should be written into the act that, even though such transmission is economically feasible, it shall not be permitted if the transmission would impair the supply of primary power, or otherwise, to the Northwest territory. I do not agree with that. As I said a moment ago to the Senator from Washington, I should like to go along with his proposal. However, I cannot do so. I think I owe it to the citizens of Ohio to express myself on a proposal in the manner in which I see fit.

Mr. JACKSON. I wish to conclude my remarks. The Senator from Ohio has discussd the loss of industry. The Northwest lost aluminum plants to his State and to other States in the Ohio Valley. After considering locating in the Northwest, the Oremet Corp. located at Clarington, Ohio; Alcoa located at Evansville, Ind.; and the Kaiser Aluminum Co. located at Ravenswood, W. Va. I thought my friend from Ohio would like to know that Ohio is getting some industry instead of our area.

Another example of Ohio industrial development is the Portsmouth gaseous diffusion plant, a tremendous Federal investment, which was located in that State because power was available.

Industry is moving into Ohio. The RECORD should so indicate. These charges are made without support. I am offering evidence. Aluminum companies considering expansion in the Northwest located in Ohio instead.

Mr. SCOTT. Mr. President, I yield 1 minute to the Senator from Maryland.

Mr. BEALL. Mr. President, I am asked to vote for a bill which will take tax dollars from Maryland citizens to provide low-cost power for people in the Pacific Northwest. This low-cost power for the Northwest, we are told, will help attract new industries—perhaps from my State.

I do not criticize the proponents of this legislation for looking out for the best interests of their States. I hope they will appreciate my desire to similarly serve the people of Maryland.

During the past 4 years, the Bonneville Power Administration has operated under a deficit. Yet I have not heard of any plans to increase rates to meet these deficits. The States of the East have just as much need for new industry as do those of the West. We welcome the opportunity to compete for new industry. But, I, for one, shall not vote to handicap my State in this competition.

Mr. President, I shall vote against passage of S. 3153. I shall also support the motion to recommit.

Mr. JACKSON. Mr. President, I yield back the remainder of my time.

Mr. SCOTT. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the motion of the Senator from Pennsylvania to recommit the bill.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The question is on agreeing to the motion to recommit. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Connecticut [Mr. Dodd], the Senator from Missouri [Mr. Long], the Senator from Wyoming [Mr. McGee], the Senator from Georgia [Mr. Russell], the Senator from Florida [Mr. Smathers], and the Senator from Alabama [Mr. Sparkman] are absent on official business.

I further announce that the Senator from New Mexico [Mr. Anderson], the Senator from Pennsylvania [Mr. Clark], and the Senator from Minnesota [Mr. Humphrey] are necessarily absent.

On this vote, the Senator from Pennsylvania [Mr. Clark] is paired with the Senator from Kansas [Mr. Pearson]. If present and voting, the Senator from Pennsylvania would vote "nay," and the Senator from Kansas would vote "yea."

On this vote, the Senator from Minnesota [Mr. Humphrey] is paired with the Senator from New Hampshire [Mr. Murphy]. If present and voting, the Senator from Minnesota would vote "nay," and the Senator from New Hampshire would vote "yea."

On this vote, the Senator from Missouri [Mr. Long] is paired with the Senator from Utah [Mr. Bennett]. If present and voting, the Senator from Missouri would vote "nay," and the Senator from Utah would vote "yea."

On this vote, the Senator from Wyoming [Mr. McGee] is paired with the Senator from Arizona [Mr. Goldwater]. If present and voting, the Senator from Wyoming would vote "nay," and the Senator from Arizona would vote "yea."

I further announce that, if present and voting, the Senator from New Mexico [Mr. Anderson], the Senator from Connecticut [Mr. Dodd], the Senator from Georgia [Mr. Russell], the Senator from Florida [Mr. Smathers], and the Senator from Alabama [Mr. Sparkman] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Utah [Mr. Bennett], the Senator from Arizona [Mr. Goldwater], the Senator from New Hampshire [Mr. Murphy], and the Senator from Kansas [Mr. Pearson] are necessarily absent.

The Senator from Kentucky [Mr. Cooper] is absent because of illness in the family.

On this vote the Senator from Utah [Mr. Bennett] is paired with the Senator from Missouri [Mr. Long]. If present and voting, the Senator from Utah would vote "yea," and the Senator from Missouri would vote "nay."

On this vote, the Senator from Arizona [Mr. Goldwater] is paired with the Senator from Wyoming [Mr. McGee]. If present and voting, the Senator from Arizona would vote "yea," and the Senator from Wyoming would vote "nay."

On this vote, the Senator from New Hampshire [Mr. Murphy] is paired with the Senator from Minnesota [Mr. Humphrey]. If present and voting, the Senator from New Hampshire would vote "yea," and the Senator from Minnesota would vote "nay."

On this vote, the Senator from Kansas [Mr. Pearson] is paired with the Senator from Pennsylvania [Mr. Clark]. If present and voting, the Senator from Kansas would vote "yea," and the Senator from Pennsylvania would vote "nay."

The result was announced—yeas 33, nays 53, as follows:

So the motion to recommit was rejected.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. DIRKSEN. Mr. President, I yield 2 minutes on the bill to the distinguished senior Senator from South Dakota.

Mr. MUNDT. Mr. President, several Senators have inquired whether I propose to call up either or both of my two amendments which are at the desk. For their information and for the benefit of other Senators who may have duties off the floor of the Senate, since the issues involved in my amendments are precisely the issues which were involved in the motion to recommit, which has now been defeated upon a yea-and-nay vote, I do not believe in engaging in exercises of futility.

It is obvious that approximately the same vote would obtain on each of my amendments.

The issues have been thoroughly ventilated in the course of the debate during the last 3 days, and the debate on them will be available to Members of the other body when this bill is considered there, and is available now to the people of the respective States whose interests are involved. They can make their wishes known to the Members of the other House.

I repeat that I think the bill would embark us on a dangerous course—when we begin to rewrite the preference clause involving the availability of power in the Nation. I do not propose to vote in favor of following such a course. I do not propose to call up my amendments now, because they were amendments for defensive purposes only, and were discussed in an attempt to bring under this canopy—one which I do not approve—the States of my area, in order to give them the privilege which the bill, as it now stands, would make available only to the States of the Pacific Northwest.

Mr. President, I think there is a better and more available method to cure the problems of the Pacific Northwest. Although I fear that the pending bill will shortly be passed by the Senate, I hope that when the effect of the bill becomes public knowledge and when Members of the other body consider it, more careful attention and more thoughtful study will result in the defeat of the bill there and the substitution for the bill of a measure providing an equitable power policy under which all the States will be dealt with equitably.

Mr. COTTON. Mr. President——

Mr. DIRKSEN. I yield 1 minute to the Senator from New Hampshire.

Mr. COTTON. Mr. President, it is difficult for me to believe that the Senate fully realized the significance of this bill. If the measure were to be enacted, it would reach far into the future and would involve some very sacred and precious rights of many of the States.

I agree with the distinguished Senator from South Dakota [Mr. MUNDT] that it would be an exercise in futility to indulge in offering amendment after amendment to the bill. That would only prolong the debate and would unnecessarily hold up the work of the Senate.

However, I hope—and this is not with any idea of placing any Senator on record, but because I do believe that the vote about to be taken will be a landmark in connection with the future power picture in the nation—that even though a yea-and-nay vote was taken on the motion to recommit, a yea-and-nay vote should also be taken on the question of passage of the bill.

Therefore, Mr. President, on the question of the passage of the bill, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, before the yea-and-nay vote is taken, I should like to ask the distinguished majority leader about the program for the remainder of today and also for tomorrow.

Mr. MANSFIELD. First, Mr. President, let me take this opportunity to thank the distinguished Senator from Washington [Mr. JACKSON] and Members of the Senate as a whole for the consideration shown in connection with this bill, and especially for the consideration shown in the remarks by the Senator from South Dakota [Mr. MUNDT], the Senator from New Hampshire [Mr. COTTON], and the distinguished minority leader [Mr. DIRKSEN] about this measure. I hope this will serve as a model to be used in connection with other measures which may come before the Senate during the remainder of the session.

It had been anticipated that the Senate would take up the San Diego land bill, following the pending measure. However, because the hearings are still being conducted in the Foreign Relations Committee, and will be for perhaps another hour or so, it is hoped that, with the consent of the Senate and with the concurrence of the distinguished minority leader, the leadership will be allowed to call up some measures on the calendar to which there is no objection.

ORDER FOR ADJOURNMENT TO 10 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at the conclusion of the session today, the Senate adjourn until tomorrow morning, at 10 a.m.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

COMMITTEE SERVICE

Mr. DIRKSEN. Mr. President, if it is in order, I now submit a resolution for which I request immediate consideration.

The PRESIDING OFFICER. The resolution will be read. The resolution (S. Res. 373) was read, as follows:

Resolved, That the Senator from New York, Mr. JAVITS, is hereby excused from further service on the Committee on Banking and Currency and that the Senator from New Hampshire, Mr. MURPHY, is hereby excused from further service on the Committee on Labor and Public Welfare; and be it further

Resolved, That the Senator from New York, Mr. JAVITS be and he is hereby assigned to service on the Committee on Appropriations; that the Senator from New Hampshire, Mr. MURPHY, be and he is hereby assigned to service on the Committee on Banking and Currency, and that the Senator from Idaho, Mr. JORDAN, be and he is hereby assigned to service on the Committee on Interior and Insular Affairs and to the Committee on Labor and Public Welfare.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 373) was considered and agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House concurred in the amendments of the Senate numbered 1 through 35, inclusive, and in amendment numbered 38, to the bill (H.R. 11151) making appropriations for the legislative branch for the fiscal year ending June 30, 1963, and for other purposes; that the House disagreed to the amendments of the Senate numbered 36, 37, and 39 through 45, inclusive, to the bill, agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. STEED, Mr. KIRWAN, Mr. CANNON, Mr. HORAN, and Mr. TABER were appointed managers on the part of the House at the conference.

The message also announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H.R. 11018. An act to amend the act concerning gifts to minors in the District of Columbia;

H.R. 11019. An act to provide that the Uniform Limited Partnership Act shall apply in the District of Columbia;

H.J. Res. 659. Joint resolution granting consent of the Congress to a compact entered into between the State of Maryland and the Commonwealth of Virginia for the creation of the Potomac River compact of 1958; and

H.J. Res. 783. Joint resolution granting consent of Congress to the State of Delaware and the State of New Jersey to enter into a compact to establish the Delaware River and Bay Authority for the development of the area in both States bordering the Delaware River and Bay.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED OR PLACED ON CALENDAR

The following bills and joint resolutions were severally read twice by their titles and referred or placed on the calendar, as indicated:

H.R. 11018. An act to amend the act concerning gifts to minors in the District of Columbia; placed on the calendar.

H.R. 11019. An act to provide that the Uniform Limited Partnership Act shall apply in the District of Columbia; to the Committee on the District of Columbia.

H.J. Res. 659. Joint resolution granting consent of the Congress to a compact entered into between the State of Maryland and the Commonwealth of Virginia for the creation of the Potomac River Compact of 1958; and

H.J. Res. 783. Joint resolution granting consent of Congress to the State of Delaware and the State of New Jersey to enter into a compact to establish the Delaware River and Bay Authority for the development of the area in both States bordering the Delaware River and Bay; to the Committee on the Judiciary.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, I should like to ask the distinguished majority leader what business he contemplates for the session tomorrow, assuming that the calendar measures he has in mind are disposed of this afternoon.

Mr. MANSFIELD. If the San Diego land bill is disposed of this afternoon—although at the moment that is doubtful—it will be followed by the bill for additional elements for the Military Academy, and perhaps the bill for the establishment of a Commission on Science and Technology, and some other bills which have been reported from the Committee on Government Operations.

For the benefit of the Senator from Delaware [Mr. WILLIAMS], let me say that I do not know whether we shall be ready to take up some of the Commerce bills tomorrow; but if we are, I will give him all the notice I can.

Mr. WILLIAMS of Delaware. Mr. President, will the distinguished Senator from Illinois yield to me?

Mr. DIRKSEN. I yield.

Mr. WILLIAMS of Delaware. As the majority leader knows, it is perfectly agreeable to me to have the Senate take up those bills, if the majority leader wishes that done. I shall be glad to cooperate.

Mr. MANSFIELD. Yes, the Senator from Delaware has made that clear for some time.

PACIFIC NORTHWEST POWER PREFERENCE

The Senate resumed the consideration of the bill (S. 3153) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. HRUSKA. Mr. President, will the Senator from Illinois yield 5 minutes to me?

Mr. DIRKSEN. I yield 5 minutes to the Senator from Nebraska.

Mr. HRUSKA. Mr. President, earlier this year I spoke at some length in this Chamber on the reasons why the pending bill, S. 3153, should not be enacted.

At that time I characterized the measure as an unfortunate expedient that gives all power consumers in the Pacific Northwest a priority to Federal power generated at Federal powerplants in that area.

Nebraska has a vital stake in this matter. It is the only State located entirely within the Missouri River basin. We do not have an abundance of Federal hydroelectric facilities. Federal power is obtained from generating facilities in South Dakota and Colorado. Obviously, an abrogation of the present preference arrangements could have serious economic consequences for Nebraska.

The Federal power Nebraska receives from the main stem dams has been allocated in accordance with a preference clause which has been on the statute books for more than a half century.

Up to now, this clause has withstood efforts to modify it. This is not accidental. The clause has remained virtually intact for sound political and economic reasons. Each project consisting of dams, reservoirs, and generating equipment was authorized and later funded only when it could be justified by the same considerations.

The problem now confronting Nebraska by the pending proposal will also face other States in the Missouri River basin, notably Iowa, Minnesota, Kansas, Colorado, and Wyoming. The preference clause which has been on the statute books since the enactment of the first Reclamation Act, affording a first claim to power generated by such Federal projects to publicly owned electric utilities, will be lost. Up to now, the general applicability of the statute assures protection to these preferred users. The present exceptions are quite restrictive in scope and raise few problems concerning the power to be distributed.

However, S. 3153 undertakes to re-do and virtually repeal the preference clause by seeking to confine all power generated in a certain area to that area. Furthermore, it gives preferences to customers who heretofore have not enjoyed a preference. By the same token the bill will deprive certain presently preferred customers of the priority granted them by law.

The report on the bill spells out this design and objective in unmistakable terms. Quoting from page 4 of the report:

> Presently, there is no geographical limitation on the marketing area of the Bonneville Power Administration. The only limit is that of economic transmission distance. If a preference agency in the Pacific Southwest, or elsewhere in the West, has access to the Columbia River power system over an extra-high-voltage interconnection between the two regions, under existing law it can demand power that is needed in the Pacific Northwest to carry the loads of nonpreferred utilities and direct industrial customers in that region. This is true not only of secondary power, but firm power as well. This fact, coupled with economic and physical factors unique to the Pacific Northwest, is the basic reason why S. 3153 is necessary.

Reading further from page 5 of the report:

> But once the interconnecting lines are constructed and available, the preference customers in the Pacific Southwest could demand that the secondary power continue to flow to them even though it might be needed in the Pacific Northwest. They also could demand that firm power needed by nonpreference utilities and by the electroprocess industries in the Pacific Northwest be delivered to them. This bill is necessary to permit the sale of the dump power to the benefit of everyone without endangering the power supply of people in the Pacific Northwest who depend upon the Federal Columbia River system for an economic supply of power.

Mr. President, it is clear that the bill will substantially amend existing law relating to preferences in allocating power generated in any one region of our country.

The impact of this change is enormous. Let us be frank on that score. No longer will the ultimate generating capacity of the Federal hydroelectric plants in operation or under construction in the Pacific Northwest—some 11,500,000 kilowatts—be allocated by the long-established and time-honored principle which now applies.

By contrast, the ultimate capacity of all other areas is about 7,250,000 kilowatts.

Thus, approximately 60 percent of the Federal hydroelectric power in the country will be governed by a newly fashioned, specially designed preference arrangement if this bill passes.

Clearly, S. 3153 cannot be considered an insignificant bill of merely local interest. It affects a substantial portion of industry and a sizable part of our economy. In short, it is a radical change.

The consequences of this course of action have been fully discussed in the debate the past 2 years. I wish to emphasize, however, that the greatest impact of the measure, and its greatest danger as well, is the precedent which would thus be established for similar revisions of the preference clause in other areas.

The warning flag is already up. We have heard the demands for such legislation in this Chamber these past 2 days.

If this comes to pass, we will witness a repudiation of the essential justification for the flood control and reclamation projects in our Nation.

It will mean each State for itself.

These large power projects are justified because of their multipurpose uses and benefits. They are financed with moneys collected from all the Nation's taxpayers. With the adoption of the new formula, however, such major improvements will be reduced to serve the interests of a given region in which they are located.

Surely this does violence to, and repudiates, the basis upon which such projects were made possible. It amounts to a breach of faith with the taxpayers of the Nation who contributed to the heavy cost for such construction.

Senator Miller spoke quite effectively on this point in his remarks yesterday. They are worth recalling here:

> Finally, Madam President, my third point is that the principle of this bill would lock in all present and future Federal power for all present and future consumers in the region of origin, to the detriment of those outside. The enactment of a regional preference bill assumes that the power facilities installed now or in the future in the Bonneville area were installed primarily for the benefit of the people living now or in the future in the Pacific Northwest. This is a false premise. These facilities were built for the people of the United States as a whole. Consumers of electricity located within economic transmission distance of these facilities have just as much right to the electric power produced at any one of these dams as have the people who are within only a mile or two of such installations. This proposed legislation assumes that it is perfectly proper to discriminate against consumers of electricity located at some distance from these projects. This is unfair and contrary to the American principles of fairness and equality.
>
> Greatly increased demands will be made upon the taxpayers of the country to pay for the development of additional electric facilities in undeveloped hydroelectric power sites in the Pacific Northwest. Half of the entire water and power resources of the Nation are located in the Pacific Northwest. Half of all Federal hydroelectric facilities are situated here. Taxpayers throughout the country already have invested $1,700 million in Northwest power facilities. In the future this investment may well be doubled. Taxes paid by all the people build Federal power projects; so all the people should share to the maximum extent practicable in the benefits their taxes have created.
>
> In the Pacific Northwest, according to the Federal Power Commission, there are still 37,129,700 kilowatts of undeveloped hydroelectric generating capacity. Should the Nation's taxpayers as a whole be asked to provide out of tax revenues large appropriations to develop the hydroelectric resources of the Pacific Northwest for the benefit solely of the present and future inhabitants of that area?

In 1958 Senator Humphrey, a member of the Senate Appropriations Committee, phrased the issue in even more pointed terms:

> If Senators start to play around with the preference clause in the case of these flood-control projects—and the Missouri River program is under the Flood Control Act—they will run into difficulties in the case of the appropriations, because it is rather difficult for some of us from areas outside the immediate vicinity to justify projects when there will be discrimination in terms of the availability of power.

Mr. President, S. 3153 will have incalculable repercussions for power-importing States, for States with expanding industries, for States which hope to attract industries on a competitive basis, and for States which still have undeveloped hydroelectric power.

Mr. Fred Seaton forecast the danger of this bill in language which bears quoting here:

> While the announced purpose of this proposed legislation is to deal with the sale of surplus power in the Pacific Northwest to other adjacent areas, including California, it can, if passed without amendment, create a dangerous precedent which would be extremely harmful to the future of the State of Nebraska.

I ask unanimous consent, Mr. President, that there be printed in the Record at this point an article published in the May 25, 1962, issue of the Omaha World-Herald in which Mr. Seaton's concern about this bill is reported in full.

There being no objection, the article was ordered to be printed in the Record, as follows:

Seaton: Power Bill Threat to State's Priority Status

Hastings, Nebr.—Fred A. Seaton, Republican nominee for Governor, said Thursday night that a Senate power bill introduced by Senator Clinton Anderson, Democrat, of New Mexico, chairman of the Senate Interior and Insular Affairs Committee, is a potential threat to Nebraska.

Mr. Seaton said the bill is S. 3135 which Senator Anderson introduced at the request of Interior Secretary Stewart Udall.

The Hastings publisher said, "While the announced purpose of this proposed legislation is to deal with the sale of surplus power in the Pacific Northwest to other adjacent areas, including California, it can, if passed without amendment, create a dangerous precedent which would be extremely harmful to the future of the State of Nebraska."

Mr. Seaton said that Senator Anderson appeared to recognize the dangers.

He quoted Senator Anderson as saying that "it is a dangerous principle to start laying down that because water falls in a certain geographical area, that the people living in that State, no matter where they may be, have preference rights above what others might have gotten."

Mr. Seaton commented that if the bill passed as it stands, the Secretary of Interior could restrict electrical energy now flowing into western Nebraska from the Big Thompson project of Colorado to sale on a surplus recallable basis.

The same, said Mr. Seaton, could apply to power coming into Nebraska from Fort Randall and Big Bend Dams in South Dakota.

"Nebraska, as a public power State, now has a priority preference status under Federal law and we must not lose it. Nebraska public power districts, REA's, municipalities, and other preference customers have a tremendous interest at stake," he said.

Mr. HRUSKA. Mr. President, finally, I fully subscribe to the cogent statement of my colleague, Senator Curtis, voiced during the debate in the Senate on April 1958 on similar effort to modify the preference clause. Senator Curtis focused attention on the basic weakness of such a proposal, the self-defeating effect of regional or local preferences:

> This proviso modifies the power preference clause. That is its purpose; that is what it does. If the power preference clause is to be adopted, that is all right. I think it should be brought in the front door and debated as such, and all the equities weighed. * * *
>
> I add that it is a modification of the preference law. This time it is modified by the location of the dam. To say the least, it lacks uniformity. If we are to have a preference law, it should apply the same all over, in every State, and to all the people.
>
> This proposal establishes a precedent. It will follow that the next time preference will be given to the State in which the dam is located, or so many miles from it.
>
> Although the hour is late, I call to the attention of the Senate the fact that we are approving a modification of the preference clause with respect to federally financed hydroelectric projects.

It is for such reasons, Mr. President, that I am convinced the pending legislation should not be enacted. It introduces the divisive issue of sectionalism. It distorts the logic of preference clause practices. It destroys the justification for supporting, with Federal funds, locally needed projects. I yield the floor.

The PRESIDING OFFICER. Do Senators in charge of the time on the bill yield back the remaining time?

Mr. DIRKSEN. Mr. President, I yield back the remainder of the time under my control.

Mr. JACKSON. Mr. President, I yield back the remainder of the time under my control.

The PRESIDING OFFICER. All remaining time has been yielded back.

The question now is, Shall the bill pass?

On this question the yeas and nays have been ordered; and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Connecticut [Mr. Dodd], the Senator from Missouri [Mr. Long], the Senator from Florida [Mr. Smathers], and the Senator from Alabama [Mr. Sparkman] are absent on official business.

I further announce that the Senator from New Mexico [Mr. Anderson], the Senator from Pennsylvania [Mr. Clark], and the Senator from Minnesota [Mr. Humphrey] are necessarily absent.

On this vote, the Senator from Pennsylvania [Mr. Clark] is paired with the Senator from Kansas [Mr. Pearson]. If present and voting, the Senator from Pennsylvania would vote "yea," and the Senator from Kansas would vote "nay."

On this vote, the Senator from Minnesota [Mr. Humphrey] is paired with the Senator from New Hampshire [Mr. Murphy]. If present and voting, the Senator from Minnesota would vote "yea," and the Senator from New Hampshire would vote "nay."

On this vote, the Senator from Missouri [Mr. Long] is paired with the Senator from Utah [Mr. Bennett]. If present and voting, the Senator from Missouri would vote "yea," and the Senator from Utah would vote "nay."

On this vote, the Senator from Florida [Mr. Smathers] is paired with the Senator from Arizona [Mr. Goldwater]. If present and voting, the Senator from Florida would vote "yea," and the Senator from Arizona would vote "nay."

I further announce that if present and voting, the Senator from New Mexico [Mr. Anderson], the Senator from Connecticut [Mr. Dodd], and the Senator from Alabama [Mr. Sparkman] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Utah [Mr. Bennett], the Senator from Arizona [Mr. Goldwater], the Senator from New Hampshire [Mr. Murphy] and the Senator from Kansas [Mr. Pearson] are necessarily absent.

The Senator from Kentucky [Mr. Cooper] is absent because of illness in the family.

The Senator from Kentucky [Mr. Morton] is detained on official business.

On this vote the Senator from Utah [Mr. Bennett] is paired with the Senator from Missouri [Mr. Long]. If present and voting, the Senator from Utah would vote "nay," and the Senator from Missouri would vote "yea."

On this vote, the Senator from Arizona [Mr. Goldwater] is paired with the Senator from Florida [Mr. Smathers]. If present and voting, the Senator from Arizona would vote "nay," and the Senator from Florida would vote "yea."

On this vote, the Senator from New Hampshire [Mr. Murphy] is paired with the Senator from Minnesota [Mr. Humphrey]. If present and voting, the Senator from New Hampshire would vote "nay," and the Senator from Minnesota would vote "yea."

On this vote, the Senator from Kansas [Mr. Pearson] is paired with the Senator from Pennsylvania [Mr. Clark]. If present and voting, the Senator from Kansas would vote "nay," and the Senator from Pennsylvania would vote "yea."

The result was announced—yeas 51, nays 36, as follows:

So the bill (S. 3153) was passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, as used in this Act—

(a) "Secretary" means the Secretary of the Interior.

(b) "Pacific Northwest" means (1) the region consisting of the States of Oregon and Washington, the State of Montana west of the Continental Divide, and such portions of the States of Nevada, Utah, and Wyoming within the Columbia drainage basin and of the State of Idaho as the Secretary may determine to be within the marketing area of the Federal Columbia River power system, and (2) any contiguous areas, not in excess of seventy-five airline miles from said region, which are a part of the service area of a distribution cooperative which has (i) no generating facilities, and (ii) a distribution system from which it serves both within and without said region.

(c) "Surplus energy" means electric energy generated at Federal plants in the Pacific Northwest which would otherwise be wasted because of the lack of a market therefor in the Pacific Northwest at any established rate.

(d) "Surplus peaking capacity" means electric peaking capacity at Federal plants in the Pacific Northwest for which there is no demand in the Pacific Northwest at any established rate.

(e) "Non-Federal utility" means any utility not owned or controlled by the United States, including any entity (1) which such a utility owns or controls, in whole or in part, or is controlled by, (2) which is controlled by those controlling such utility, or (3) of which such utility is a member.

(f) "Energy requirements of any Pacific Northwest customer" means the full requirements for electric energy of (1) any purchaser from the United States for direct consumption in the Pacific Northwest, and (2) any non-Federal utility in that region in excess of (i) the hydroelectric energy available for its own use from its generating plants in the Pacific Northwest, and (ii) any additional energy available for use in the Pacific Northwest which, under a then existing contract, the utility (A) can obtain at no higher incremental cost than the rate charged by the United States, or (B) is required to accept.

Sec. 2. Subject to the provisions of this Act, the sale, delivery, and exchange of electric energy generated at, and peaking capacity of, Federal plants in the Pacific Northwest for use outside the Pacific Northwest shall be limited to surplus energy and surplus peaking capacity.

Sec. 3. (a) Any contract for the sale or exchange of surplus energy for use outside the Pacific Northwest, or as replacement, directly or indirectly, within the Pacific Northwest for hydroelectric energy delivered for use outside that region by a non-Federal utility, shall provide that the Secretary, after giving the purchaser notice not in excess of seven days, will not deliver electric energy under such contract whenever it can reasonably be foreseen that such delivery would impair his ability to meet, either at or after the time of such delivery, the energy requirements of any Pacific Northwest customer. The purchaser shall obligate himself not to take delivery of or use any such energy to supply any load under such conditions that discontinuance of deliveries from the Pacific Northwest in seven days would cause undue hardship to the purchaser or in his territory, and, further, the purchaser shall acknowledge full responsibility if any such hardship occurs. Deliveries by a non-Federal utility from its generating plants in the Pacific Northwest for use on its own distribution system in an area outside but contiguous to the Pacific Northwest (not including any extension of its outside service area by merger or acquisition after the effective date of this Act) shall not be deemed deliveries by such utility for use outside the Pacific Northwest.

(b) Electric energy generated at Federal plants in the Pacific Northwest which can be conserved, for which there is no immediate demand in the Pacific Northwest at any established rate, but for which the Secretary determines there may be a demand in meeting the future requirements of the Pacific Northwest, may be delivered for use outside that region only on a provisional basis under contracts providing that if the Secretary determines at a subsequent time that, by virtue of prior deliveries under such contract, the Secretary is or will be unable to meet the energy requirements of any Pacific Northwest customer, the purchaser will return the full amount of energy delivered to him, or such portion or portions thereof as may be required, at such time or times as may be specified by the Secretary, except that the Secretary shall not require return during the purchaser's daily peak periods. The Secretary shall require the return of the energy provisionally delivered hereunder, to such extent and at such times, as may be necessary to meet demands at any established rate for use within the Pacific Northwest.

(c) Any contract for the disposition of surplus peaking capacity shall provide that (1) the Secretary may terminate the contract upon notice not in excess of forty-eight months, and (2) the purchaser shall advance or return the energy necessary to supply the peaking capacity, except that the Secretary shall not require such advance or return during the purchaser's daily peak periods. The Secretary may contract for the sale of such energy to the purchaser, in lieu of its return, under the conditions prescribed in subsection (a) of this section.

(d) The Secretary, in making any determination of the energy requirements of any Pacific Northwest customer which is a non-Federal utility having hydroelectric generating facilities, shall exclude any amounts of hydroelectric energy generated in the Pacific Northwest and disposed of outside the Pacific Northwest by the utility which, through reasonable measures, could have been conserved or otherwise kept available for the utility's own needs in the Pacific Northwest. The Secretary may sell the utility as a replacement therefor only what would otherwise be surplus energy.

Sec. 4. Any contract of the Secretary for the sale or exchange of electric energy generated at, or peaking capacity of, Federal plants in marketing areas outside the Pacific Northwest for use within the Pacific Northwest shall be subject to limitations and conditions corresponding to those provided in sections 2 and 3 for any contract for the sale or exchange of electric energy or peaking capacity generated within the Pacific Northwest for use outside the Pacific Northwest.

Sec. 5. Without regard to the limitations specified in sections 2 and 3 of this Act, the Secretary may enter into contracts for the exchange with areas other than the Pacific Northwest of (1) surplus energy during the Pacific Northwest storage refill period, (2) any energy during the Pacific Northwest storage refill period which will be returned to the Pacific Northwest in equal amounts during the same Pacific Northwest refill period or the succeeding storage drawdown period, (3) any energy which will be returned to the Pacific Northwest in equal amounts during the same Pacific Northwest storage drawdown period, (4) peaking capacity, or (5) surplus peaking capacity for energy. All benefits from such exchanges, including resulting increases of firm power, shall be shared equitably by the areas involved, having regard to the secondary energy and other contributions made by each.

Sec. 6. Any capacity in Federal transmission lines connecting, either by themselves or with non-Federal lines, a generating plant in the Pacific Northwest or Canada with the other area or with any other area outside the Pacific Northwest, which is not required for the transmission of Federal energy or the energy described in section 8, shall be made available as a carrier for transmission of other electric energy between such areas. The transmission of other electric energy shall be at equitable rates determined by the Secretary, but such rates shall be subject to equitable adjustment at appropriate intervals not less frequently than once in every five years as agreed to by the parties. No contract for the transmission of non-Federal energy on a firm basis shall be affected by any increase, subsequent to the execution of such contract, in the requirements for transmission of Federal energy, the energy described in section 8, or other electric energy.

Sec. 7. The Secretary shall offer to amend, without imposing any other requirement as a condition to such amendment, all existing contracts for the sale or exchange of electric power generated at Federal plants in the Pacific Northwest to include, and shall include in all new contracts, provisions giving the purchaser priority on electric power generated at such plants in conformity with the provisions of this Act.

Sec. 8. The provisions of this Act shall not be applicable to (1) the Canyon Ferry project and (2), except as provided in section 6, downstream power benefits to which Canada is entitled under the treaty between Canada and the United States relating to the cooperative development of the water resources of the Columbia River Basin, signed at Washington, January 17, 1961, nor to energy or capacity disposed of to Canada in any exchange pursuant to paragraph 1 or 2 of article VIII thereof. Nothing in this Act shall be construed to modify the geographical preference of power users in the State of Montana which is established by the Hungry Horse Dam Act (Act of June 4, 1944, 58 Stat. 270), as amended.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

COMMITTEE MEETINGS DURING SENATE SESSION TOMORROW

Mr. DIRKSEN. Mr. President, I ask unanimous consent that tomorrow the Senate Committee on the Judiciary may be permitted to meet during the session of the Senate.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Illinois? The Chair hears none——

Mr. YARBOROUGH. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. YARBOROUGH. What was the request by the Senator from Illinois?

The ACTING PRESIDENT pro tempore. The Senator from Illinois will repeat his unanimous-consent request.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the Committee on the Judiciary may be permitted to meet during the session of the Senate tomorrow.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Illinois? The Chair hears none, and it is so ordered.

Mr. CARROLL. Mr. President, I ask unanimous consent that the Subcommittee on Minerals, Materials, and Fuels of the Committee on Interior and Insular Affairs may be permitted to meet during the session of the Senate tomorrow. The subcommittee has a number of small bills to consider, as to which Senators have been pressing for action. It should not require long.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Colorado? The Chair hears none, and it is so ordered.

CONVEYANCE OF CERTAIN PROPERTY IN THE CITY OF SAN DIEGO, CALIF.

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1590, S. 1108.

The ACTING PRESIDENT pro tempore. The bill will be stated by title for the information of the Senate.

The Legislative Clerk. A bill (S. 1108) authorizing the conveyance of certain property in the city of San Diego to the regents of the University of California.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Armed Services with amendments.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business may be temporarily laid aside, so that the Senate may proceed to consider some measures on the calendar to which there is no objection.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

BARBARA W. TROUSIL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar No. 1720.

The ACTING PRESIDENT pro tempore. The bill will be stated by title for the information of the Senate.

The Legislative Clerk. A bill (H.R. 3372) for the relief of Barbara W. Trousil, Edward G. Trousil, and Robert E. Trousil.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the the bill (H.R. 3372) for the relief of Barbara W. Trousil, Edward G. Trousil, and Robert E. Trousil, which was ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1761), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

PURPOSE

The purpose of the proposed legislation is to provide that the Foreign Claims Settlement Commission is to have jurisdiction to determine the validity and amount of the claims of Barbara W. Trousil and her sons, Edward G. Trousil and Robert E. Trousil, filed under the provisions of title IV of the International Claims Settlement Act of 1949 for property lost through its nationalization by the Government of Czechoslovakia. The bill would authorize the consideration of such claims without regard to the applicable statute of limitations, and would provide for a certification to the Secretary of the Treasury of the amount due under the law.

The circumstances which gave rise to this legislation are set forth in House Report No. 1377, as follows:

"At a hearing conducted on this bill it was stated that the relief provided for in this bill is required since the beneficiaries named in the bill were misled as to the fate of their property through the deceit and fraudulent concealment of fact by a court-appointed guardian acting in collusion with the Communist government of Czechoslovakia. As a result of this fraudulent concealment this family has been denied relief under the provisions of the International Claims Settlement Act of 1949 for they were thereby kept from filing their claim in time under that act.

"All three of the beneficiaries of this bill are U.S. citizens. Barbara Trousil, the widow, was naturalized on January 27, 1928. Her twin sons, Edward G. Trousil and Robert Emil Trousil are citizens by birth.

"The Trousil family lived in Czechoslovakia during World War II. The father, Bohumil Trousil, now deceased, operated the family business and managed other family holdings which were owned jointly with his mother, Emilie Trousil, now deceased. The sequence of events leading up to the discovery of the fraudulent acts of the court-appointed guardian are as follows:

"During 1944, the father established substantial bank accounts in various Prague savings banks in the names of his twin sons, Edward and Robert Trousil who were then 14 years of age. Thereafter, on February 28, 1945, the family was notified by the Swiss consulate in Prague that as American citizens their property would be protected against confiscation or destruction.

"After cessation of hostilities, Barbara Trousil returned to the United States in 1946, while the boys remained in boarding school. The father, Bohumil Trousil, died intestate on February 1, 1948. The administration of the father's estate was undertaken by the district civil court in Prague, which in due time appointed one Slavomira Ledererova, a friend and employee of the Trousils, as guardian for Edward and Robert Trousil who were 18 years of age at the time of their father's death.

"Upon graduation from school, Edward and Robert Trousil joined their mother in the United States in November 1950. The guardian, in addition to other estate matters, continued operating the family business, and not until November 12, 1953, did the court enter its decree of distribution of the father's estate. Thereafter, the guardian continued to manage the estate in a fiduciary capacity, sent periodic remittances to the Trousils in the United States, and represented the two boys as their guardian in the proceedings related to the estate of their grandmother who died testate on June 23, 1956.

"During the period after November 1950 in response to specific queries sent to the guardian as to the status of their property, the Trousils received assurances from the guardian that all was well. As recently as 1959, the guardian assured the Trousils that the circumstances regarding their property was unchanged, and that the Trousils were not receiving income from their business only because of high taxes and a ruling by the Communist government of Czechoslovakia that prohibited sending any part of the net income out of the country. Attempts to verify the status of their property by written inquiries directed to the Government of Czechoslovakia produced neither an answer to their question nor even an acknowledgment from that Government.

"Finally, in 1960, despite the repeated assurances of the guardian, the Trousils suspected that they were being erroneously informed as to the status of their property, and Barbara and Edward Trousil made arrangements to visit Czechoslovakia to determine the facts for themselves. Although first denied by the guardian, in subsequent confrontations the guardian admitted the true facts and produced papers showing that the Trousils' property had been confiscated or 'nationalized' by the Communist government of Czechoslovakia in 1953. These papers indicated that the confiscation was accomplished with the knowledge, if not the connivance of the guardian. The efforts made by Edward Trousil to ascertain the facts while visiting Czechoslovakia are reflected in the following quotation from an affidavit furnished the committee:

" 'That while in Czechoslovakia in August 1960, Edward Trousil, through his wife, sought information from the Czechoslovak Government, and received no answer; that he contacted the U.S. consul in Prague, and was told that whenever the consul had made inquiries regarding nationalization on behalf of American citizens, they had never received a reply from the Czechoslovak Government.'

"The Trousils filed claim within 30 days of the actual discovery of the concealment of fact, but their claim has been denied by the Foreign Claims Settlement Commission for the sole reason that their claims 'had not been timely filed.'

"On the basis of the foregoing facts it is concluded that a waiver of time limitations to permit the consideration of the claims is justified in this case. It is apparent that the claimants in this country were dependent upon the Czechoslovak guardian for guidance and information. A grandmother who died in Czechoslovakia in 1953 was moved by that country's government to a state home for the aged near Bozice, Moravia, in Czechoslovakia; had never been associated with the business, and therefore had no opportunity to know of the seizure of the business."

The committee notes that the Foreign Claims Settlement Commission considers the granting of relief in this case to be a matter of legislative policy, but the Commission does oppose the bill on the grounds that there are pending in Congress three general House bills designed to extend the time for filing under the Czechoslovak claims program. The committee has no information as to prospects for enactment of any one of such bills.

Under the circumstances above cited from the House report on this bill, it seems clear that the claimants are not chargeable with laches in the sense that they knowingly slept on their rights. Instead, they are the innocent victims of a conscious deception. The contention of the claimants that they were unable to obtain any information or assistance from the Communist government in Czechoslovakia is supported by a statement in the semiannual report from the Foreign Claims Settlement Commission for the period ending June 30, 1961. It is there stated (p. 5):

"The Government of Czechoslovakia refused to furnish any assistance to the Commission, or to claimants seeking to obtain evidence in support of their claims."

If the claimants here are permitted to file their claim, the United States would not seem to be prejudiced in any way by the delay brought about by the deception. The burden of proof in establishing ownership and the extent of loss rests upon the claimants. The amount of recovery will necessarily be small because of the wide discrepancy, noted in the Commission's report, between the $9 million in the Czechoslovak claims fund and the total of potential awards in the amount of $100 million. Title IV of the International Claims Settlement Act provides for an initial payment of $1,000 and thereafter payments on a pro rata basis.

Having already suffered substantial losses at the hands of the Communist government in Czechoslovakia, the claimants ought not, in the committee's opinion, be made to suffer further because they did not claim damages for a loss they did not know had occurred until after the period for filing claims had expired. The committee believes that the beneficial purpose of the Czechoslovak claims program will be served by permitting the claimants the relief provided in the bill, and accordingly recommends that H.R. 3372 be given favorable consideration.

AMENDMENT OF THE UNITED STATES CODE WITH RESPECT TO FEES OF U.S. MARSHALS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar No. 1743.

The ACTING PRESIDENT pro tempore. The bill will be stated by title for the information of the Senate.

The Legislative Clerk. A bill (H.R. 10651) to amend title 28, United States Code, with respect to fees of U.S. marshals, and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill (H.R. 10651) to amend title 28, United States Code, with respect to fees of U.S. marshals, and for other purposes, which had been reported from the Committee on the Judiciary, with an amendment, on page 2, after line 4, to strike out:

" "Where service is requested to be made on a Saturday, Sunday, or holiday, the fees prescribed in the preceding two paragraphs shall be increased by 100 per centum;".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1785), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

STATEMENT

Section 1921 of title 28, United States Code, specifies the fees to be charged by U.S. marshals for the service of various types of process on behalf of private litigants. Those fees have remained substantially the same since they were prescribed by the act of February 26, 1853 (10 Stat. 164), over 100 years ago.

At the time the fee schedule was established, U.S. marshals did not receive salaries. Instead, they were allowed such fees and percentages as they collected, not in excess of $6,000 a year. Deputy marshals received an amount equal to three-fourths of the fees collected by them, subject to reduction by the Attorney General if the earnings appeared unreasonable. The excess of fees collected over the amounts retained by marshals and their deputies was used to defray office expenses or deposited in the Treasury.

In the past, the fees charged under this system were adequate to pay for the services and travel expenses of marshals. The result was that service of process on behalf of private litigants cost the Government little or nothing.

In 1896, this system for the payment of marshals was changed. All fees were to be paid into the Treasury. Marshals and gradually all deputy marshals were put on a salary basis and were paid for their expenses in accordance with general regulations.

Since 1896 both salaries and expense allowances have increased substantially. However, the fees charged by the Government for the services of marshals have, with the exception of mileage, remained the same as they were in the middle of the 19th century.

Recently the Department of Justice and the General Accounting Office conducted a joint survey of the cost of serving process. The survey disclosed that the annual cost of serving process on behalf of private litigants exceeded the fees charged by approximately $411,000.

The committee believes that the bill which would make modest increases in fees charged to private litigants for the services of U.S. marshals is meritorious and recommends it favorably.

Attached and made a part of this report are (1) a letter, dated March 20, 1961, from the Department of Justice, transmitting a legislative proposal to permit the Attorney General to establish a table of fees for the services of U.S. marshals; (2) a letter, dated March 28, 1962, from the Department of Justice, transmitting a legislative proposal identical with the bill, H.R. 10651; and (3) a letter, dated June 11, 1962, from the Department of Justice in regard to the bill, H.R. 10651.

Office of the Attorney General,
Washington, D.C., March 20, 1961.

The Vice President,
U.S. Senate, Washington, D.C.

Dear Mr. Vice President: Enclosed for your consideration and appropriate reference is a legislative proposal to amend title 28 of the United States Code with respect to the fees of U.S. marshals.

Section 1921 of title 28 enumerates specifically the fees to be charged private litigants for services rendered them by U.S. marshals. These fees have not been changed substantially in the past 100 years. However, a joint study concluded several years ago by the General Accounting Office and the Department of Justice disclosed that the annual cost to the Government for handling Federal court process for private litigants exceeds the charges made for such service by approximately $411,000.

It was apparent that the statute relating to marshals' fees was in need of amendment and based thereon the Department of Justice proposed to the 84th Congress and to each succeeding Congress the enactment of appropriate legislation. It is the view of the Department that it is desirable to abandon the present approach of the statute; that is, the specific fixing of fees, and to substitute instead a grant of authority to the Attorney General periodically to promulgate a table of fees. In this way the fee schedules would be more flexible, easily being increased or decreased to approximate the cost to the Government for the service being rendered.

A plan similar to that suggested is now provided for by section 1914(b) of title 28, relating to fees to be collected by the clerks of the district courts.

Section 1921 now provides that for marshals' services in a criminal case there may be taxed as costs a sum to be fixed by the court within certain limits. The proposed legislation would make no substantive change in this provision, but would relocate it in section 1920, the section which pertains to taxation of costs.

The Bureau of the Budget has advised that there is no objection to the submission of this recommendation.

Sincerely,

Robert F. Kennedy,
Attorney General.

DISPOSAL OF PROPERTY AT LOS ALAMOS, N. MEX.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar No. 1749.

The ACTING PRESIDENT pro tempore. The bill will be stated by title for the information of the Senate.

The Legislative Clerk. A bill (S. 3580) to amend the Atomic Energy Community Act of 1955, as amended, to provide for the disposal of federally owned properties at Los Alamos, N. Mex., and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill (S. 3580) to amend the Atomic Energy Community Act of 1955, as amended, to provide for the disposal of federally owned properties at Los Alamos, N. Mex., and for other purposes which was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Atomic Energy Community Act of 1955, as amended, is hereby further amended in the following respects:

Section 21 b. is hereby amended by striking the period after the words "General Manager" in subsection (2), by inserting after the quotation mark: "; or (3) Los Alamos, New Mexico, designated on a map on file at the principal office of the Commission, entitled 'Minimum Geographic Area, Los Alamos, New Mexico,' bearing the legend 'Boundary Line, Minimum Geographic Area, Los Alamos, New Mexico' and marked 'Approved, April 5, 1962, A. R. Luedecke, General Manager.' "

Sec. 2. Section 21 l. is hereby amended for striking therefrom the period appearing after the words "Hanford, Washington" by inserting a comma in lieu thereof and by adding thereafter: "or that area which, on the date Los Alamos is included within this Act, constitutes the County of Los Alamos, New Mexico, excluding therefrom, however, that land which is, on said date, under the administrative control of the National Park Service of the Department of the Interior."

Sec. 3. Section 21 l. is hereby amended by inserting "any natural gas distribution system," after the comma following "electrical distribution system".

Sec. 4. A new subsection is hereby added to section 21, as follows:

"m. The terms 'single' and 'single family' when used in connection with 'house' or 'residential property' shall include each separate unit of a residential structure which the Commission has classified as a residential structure containing two or more separate single family units pursuant to section 41 c. of this Act."

Sec. 5. Section 32 is hereby amended by striking therefrom the third sentence and substituting in lieu thereof the following: "The Federal Housing Commissioner shall be reimbursed from the Community Disposal Operations Fund for the cost of such appraisals."

Sec. 6. Section 36 b. is hereby amended to read as follows:

"b. An occupant of a single family or duplex house shall, upon application therefor, be entitled to a credit, against the purchase price of any residential property purchased through the exercise of a priority right established under the provisions of section 42, for the amount by which the current fair market value of the Government's interest in the single family or duplex house of which he was an occupant is enhanced as a result of improvements to the premises of such single family or duplex house made by, or at the expense of, such occupant."

SEC. 7. Section 41 a. is hereby amended by inserting between the word "Act" and the comma: ", or, in the case of Los Alamos, upon its inclusion within this Act".

SEC. 8. A new subsection is hereby added to section 41, as follows:

"c. Prior to the date any residential property is first offered for sale at Los Alamos, the Commission shall further classify each residential structure within the community of Los Alamos either as a single family house, a duplex house, an apartment house, a dormitory, or as a residential structure containing two or more separate single family units and shall post, at the offices of the Commission at Los Alamos, a list, available for public inspection at reasonable times, showing the classification of each such residential structure. For the purposes of this Act, each such residential structure will thereafter be deemed to be a single family house, a duplex house, an apartment house, a dormitory, or a residential structure containing two or more separate single family units in accordance with its classification. In determining the classification of each such residential structure containing two or more single family units, the Commission shall consider (1) the practicability of selling separately the single family units, and (2) the insurability of mortgages under section 223(a) of the National Housing Act, as amended."

SEC. 9. Section 52 a. is hereby amended by striking the period after the words "chapter 8" in subsection (2) and by inserting thereafter: "; or (3) property which in the opinion of the Commission should be retained by the Commission for its own use."

SEC. 10. The first sentence in section 53 b. is hereby amended by striking everything after the word "bids" and inserting a period at the end thereof.

SEC. 11. Section 53 c. is hereby amended by striking everything after the word "appropriate" and inserting a period at the end thereof.

SEC. 12. Section 55 d. is hereby amended by inserting between the word "community" and the semicolon "or after June 30, 1966, in the case of Los Alamos".

SEC. 13. Section 57 b. is hereby amended by adding the following sentence: "The zoning restrictions to be taken into account at Los Alamos shall be those which the local government is likely to enact with respect to those lots."

SEC. 14. A new section is hereby added, as follows:

"SEC. 58. COOPERATIVES.—The Commission may grant to cooperatives, the entire initial membership of which is restricted to project-connected persons, such priorities for the purchase of apartment buildings as the Commission determines fair and reasonable. The priority with respect to each cooperative shall terminate if within such time as the Commission may prescribe the cooperative has not obtained one hundred per centum initial membership consisting of project-connected persons. The 15 per centum deduction specified by subsection 35 a., the deduction provided by 36 d., the financing provisions of section 62, and the indemnity provided by sections 63, 64, 65, and 66 shall be applicable to priority sales of apartment buildings to such cooperatives. The term 'cooperative' as used herein means a corporation or a trust of the character described in section 213(a)(1) of the National Housing Act, as amended."

SEC. 15. Section 62 a. is hereby amended by deleting "house, apartment building, or dormitory" and by inserting in lieu thereof "such property".

SEC. 16. Section 62 d. is hereby amended to read as follows: "d. The Commission may sell any notes and mortgages acquired under subsections a. and c. of this section on terms set by the Commission. Notwithstanding any other provisions of law and without regard to the provisions of section 3709 of the Revised Statutes, the Commission may, in accordance with such terms and conditions as it may prescribe, (1) enter into contracts for servicing any of the notes and mortgages it has acquired, and (2) sell or enter into contracts to sell to a servicer any notes and mortgages with respect to which a servicing contract has been entered into by the servicer with the Commission: *Provided*, That with respect to sales of notes and mortgages under (2) the Commission shall comply with section 3709 of the Revised Statutes unless it determines that such compliance would not be feasible."

SEC. 17. Section 63 is hereby amended by inserting the following between the word "Act" and the comma: ", or, in the case of Los Alamos, not more than fifteen years after the date it is included within this Act".

SEC. 18. Section 64, clause (a) is hereby amended by inserting between the word "Richland" and the semicolon: "for four thousand six hundred and twenty in the case of Los Alamos".

SEC. 19. Section 64, clause (b) is hereby amended by inserting between the word "Richland" and the period: "or eleven thousand seven hundred and sixty-nine in the case of Los Alamos".

SEC. 20. Section 72 is hereby amended by inserting between the word "Act" and the period: "in the case of Oak Ridge and Richland, or, in the case of Los Alamos, not later than five years after the date it is included within this Act".

SEC. 21. Section 75 is hereby amended by striking the period after the word "transferee", by inserting a colon in lieu thereof and by adding thereafter: "*Provided*, That at Los Alamos, utilities may be given to the county or other local governmental entity."

SEC. 22. Section 81 is hereby amended by inserting the following between the words "Act" and "to cooperate": "in the case of Oak Ridge and Richland, or, in the case of Los Alamos, not to extend beyond five years after the date it is included within this Act,".

SEC. 23. Section 83 is hereby amended by inserting between the word "Act" and the period: "in the case of Oak Ridge and Richland, or, in the case of Los Alamos, not later than five years after the date it is included within this Act".

SEC. 24. Section 118 b. is hereby amended by striking the word "and" between the words "Oak Ridge" and "the sum of", by inserting a comma in lieu thereof, by inserting between the words "at Richland" and "for": "and the sum of $8,719,000 at Los Alamos", by inserting between the words "installations" and "authorized": "and utilities", and by inserting between the words "pursuant to" and "chapter": "chapter 7 and ".

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1792), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

1. Establishment of the atomic energy communities

When the atomic energy projects were started in secrecy during World War II by the Manhattan Engineering District (MED) at Oak Ridge, Tenn., Richland, Wash., and Los Alamos, N. Mex., many factors entered into the selection of the sites. One principal factor was distance from existing communities due to the need for extremely stringent security. It was therefore decided that towns would have to be built to house the employees at these installations. It was the desire of MED, and later the Atomic Energy Commission, to make these towns attractive to the large number of scientists and skilled employees whose abilities were, and still are, of vital importance to the progress of the atomic energy program.

2. Disposal of Oak Ridge and Richland

In 1955, the Congress enacted the Atomic Energy Community Act of 1955, providing for the disposal of the Government-owned communities at Oak Ridge and Richland. A determination was made at that time that security requirements no longer made it necessary for continued Government ownership and that the communities were otherwise ready for disposal. The disposal operation at Oak Ridge is now complete and the Richland disposal has been virtually accomplished.

In the case of Los Alamos, disposal was deferred on four principal grounds which were set forth in a 1952 advisory panel report:

(1) Security required close area control;

(2) There was little demand for incorporation and private homeownership;

(3) The fiscal requirements of the community indicated a continuing need for high Federal subsidies; and

(4) The nature of the housing in the community (only one-third were single units) was an obstacle to disposal.

In recent years, the matter has been reviewed periodically. In 1961-62, at the request of Senator ANDERSON, the Housing and Home Finance Agency conducted an extensive survey and concluded:

"We believe a disposition program for Los Alamos is possible and can be accomplished with a minimum of disruption to the Commission's principal activities."

The Atomic Energy Commission, after reviewing the disposal question, similarly concluded that disposal was feasible and would not impede the work of this vital national defense facility. On this basis, the AEC recommended the necessary legislation to the Congress.

3. Disposal legislation

Because the disposal of the Oak Ridge and Richland communities had proceeded successfully under the authority of the Atomic Energy Community Act of 1955, the legislation recommended by the AEC followed closely the pattern of that act with some modifications based upon prior disposal experience and the special requirements of the Los Alamos community.

The legislation was introduced by Senator ANDERSON (for himself and Senator PASTORE) (S. 3129) and by Representative MORRIS (H.R. 11185) on April 10, 1962. Two clean bills, S. 3580 and H.R. 12718, incorporating certain amendments, were introduced by Senator ANDERSON and Congressman MORRIS, respectively, on August 1 and July 30, 1962.

4. Hearings

Public hearings on the proposed disposal of the Los Alamos community and on S. 3129 and H.R. 11185 were held by the Subcommittee on Communities at Los Alamos on April 23, 1962.

Thirty-eight witnesses testified at the hearings, representing the principal Government agencies involved (AEC and HHFA), as well as public officials and private citizens in the community. In addition, a large number of statements for the record were submitted by residents of Los Alamos.

Among the witnesses who testified were the following:

Brig. Gen. A. W. Betts, Director, Division of Military Application, AEC.

John J. Burke, Manager, Los Alamos Area Office, AEC.

Joseph Brown, Director, Community Disposition Program, HHFA.

Dr. Norris E. Bradbury, Director, Los Alamos Scientific Laboratory.

Ellis Stout, Chairman, Los Alamos Board of County Commissioners.

Mrs. Carol Roberts, chairman, Los Alamos County Planning Committee.

As a followup to the hearings, extensive written interrogatories were submitted to AEC and HHFA. These questions and the written responses of the agencies are included in the record of the hearings. In addition, the record contains an exhaustive compilation of descriptive and financial data pertaining to the Los Alamos community.

5. *Subsequent committee action*

On August 1, 1962, the Subcommittee on Communities met and voted to report S. 3580 and H.R. 12718 to the full committee.

The Joint Committee met on August 1, 1962, and voted to report out S. 3580 and H.R. 12718 with the recommendation that they do pass.

JOINT COMMITTEE COMMENTS

1. *General disposal pattern*

The Atomic Energy Community Act of 1955 is essentially authorizing legislation. It establishes the basic framework of congressional guidance for disposal operations, leaving to the responsible administrative agencies, AEC and HHFA, the task of establishing priorities and completing the detailed pattern of disposal, taking into consideration the individual requirements of the atomic energy communities. Because this is the nature of the Community Act, it may be useful for the Members of the Congress to obtain some view of how disposal was actually implemented at Oak Ridge and Richland. For this purpose, the committee has attached, as appendix I to this report, a brief report prepared by the Atomic Energy Commission on the process of disposal at Oak Ridge and Richland.

2. *Sale and donation of Government property*

The net value of property to be sold for private use at Los Alamos is estimated at $39,091,000 and it is expected that the net proceeds from the sales of these properties will total about $38 million. In addition, it is expected that certain hospital, school, and municipal installations with a net value of $24,712,000 will be donated to the community. (If utilities are sold, rather than donated to the community, this figure would be approximately $22 million.) Donation of such municipal installations to the local government is consistent with the practice followed at Oak Ridge and Richland. To require these communities to pay for these installations, in view of their one-industry nature and their limited taxing and bonding bases, would saddle the new local governments with an almost insurmountable debt, which would only increase the costs of the assistance payments to be made under section 91 of the act.

3. *Construction authorization*

Under section 24 of the bill, approximately $8.7 million would be authorized for necessary plant additions and modifications to be undertaken over the next several years during the period of predisposal and disposal operations. Among the items included in this authorization are municipal government facilities, fire station, road and street rehabilitation, and certain lot development.

Because of its unusual economic characteristics as noted above, it is not possible for Los Alamos to sustain these heavy capital expenditures. It should be noted further that this authorization would be necessary even if Government ownership continued and is not occasioned by the disposal of the Los Alamos community. The AEC, in response to an inquiry from the Joint Committee on this point, stated:

"In summary, all of the construction, modification, and rehabilitation of plant included in the requested authorization will probably be required over a period of several years, even if no action is taken toward disposal of the Government's interests in the Los Alamos community."

Moreover, this authorization should be viewed in the context of the purpose of disposal, which is not only to remove the Government from the community management and real estate business and establish a privately owned independent community with local self-government, but also to preserve a viable, attractive community after disposal.

In the case of Oak Ridge, $518,000[1] was authorized for these purposes, while at Richland the figure was $2,215,000. The reasons for the larger authorization at Los Alamos are as follows:

(1) There is a 30-percent difference in construction costs between Richland in 1955 and Los Alamos in 1962.

(2) The housing shortage at Los Alamos, which did not exist at the other communities, requires some Government lot development and construction to facilitate private home development.

(3) Los Alamos has extensive projected school requirements. Each item of school construction requested by the Commission has been reviewed, and is supported by the Department of Health, Education, and Welfare.

(4) Los Alamos has an increasing population which is projected to reach 18,000 from the present 13,000 over the next 10 years. Richland and Oak Ridge had already passed their population peaks in 1955.

Testimony before the Subcommittee on Communities indicated that Los Alamos Scientific Laboratory has a bright future and that it will continue to play a vital role in diverse scientific fields such as atomic energy for peaceful and military purposes and the Nation's nuclear space program. It must be able to attract and retain the finest scientific minds in the Nation and it is the belief of the Joint Committee that the authorized capital items will materially assist in this endeavor.

In a letter from the General Manager of the Atomic Energy Commission to the chairman of the Joint Committee on April 9, 1962, the following breakdown of proposed construction authorizations was furnished:

1. County court and administrative facility	$750,000
2. Fire station facility	179,000
3. Road and street rehabilitation	904,000
4. Water and sewer systems	958,000
5. Barranca Mesa development	750,000
6. Schools	2,335,000
7. Gas distribution system	2,054,000
8 Electric distribution system	789,000
Total	8,719,000

Of the foregoing items, approximately $2.8 million is for the purpose of improving the gas and electric distribution systems in the event they were donated to the community. However, if the utilities were sold to private entities, as discussed below in paragraph 6, authorization for these purposes would not be required, since the utilities would be sold on an "as is" basis.

In the event the utilities are sold to private companies on an "as is" basis, the Commission is authorized to use $2,843,000 for the purpose of additional lot development at Los Alamos in order to relieve the housing shortage, which is discussed below in paragraph 5.

In connection with the type of lot development to be pursued, it is the view of the committee based upon information developed during the hearings, that development could profitably be undertaken in such areas as the Pajarito acreage development area, North Mesa, and the townsite area.

The Pajarito development would provide acreage tracts, while the North Mesa area is apparently suitable for large-scale, low-cost tract development. The townsite area would provide other desirable locations for private housing. It should be emphasized that the Government would recover all, or substantially all, of its investment in lot development in these areas through the sale of the improved land.

It is the expectation of the committee that these development programs would be undertaken by the Commission after discussion and consultation with public officials and citizens in the Los Alamos community.

4. *Local assistance payments*

Under the terms of section 91 of the Atomic Energy Community Act, the AEC is required to contribute financially for a period of 10 years to the operation of the community. Generally, this payment is intended to reflect the burdens cast on the community both by the tax-exempt federally owned property in the community and by the Federal operations in the project area.

Although it is not possible to project the precise situation which will obtain in 1968—the first year in which it is anticipated that AEC ownership will be fully terminated and the first year in which assistance payments might be made—it is possible to make certain estimates of the costs of community operation versus local government revenues. The AEC has estimated that annual assistance payments for 1968 on this basis would be approximately $2.8 million. (If utilities were sold, rather than donated to the community, the figure would be $3,051,000.)

Local assistance payments at Oak Ridge are currently running approximately $1.25 million, while at Richland the figure is approximately $1.1 million. The reasons for higher projected payments starting in fiscal year 1968 at Los Alamos include the following:

(1) The projected 1968 figure for Los Alamos takes into account expected continuing increases in opertaing costs.

(2) As noted earlier, Los Alamos has an increasing population while Richland and Oak Ridge had already passed their population peaks in 1955.

It is moreover possible, because of Los Alamos' remote location, its one-industry nature, and its limited taxing and bonding bases, that local assistance would have to be sought beyond the statutory 10-year period. In this event, under the terms of section 91d., the Commission would have to present to the Joint Committee its recommendations as to further contributions and, if it recommended continued assistance, the Commission would be required to propose a definite schedule of payments providing for "an orderly and reasonably prompt withdrawal of the Atomic Energy Commission from participation in and contribution toward local government."

The words "orderly and reasonably prompt withdrawal" in section 91d. provide flexible criteria. The committee has been assured that the AEC would not be harsh or seek to escape responsibility for burdens thrown upon the community in exercising its discretion under section 91d.

---

[1] In addition, $2,900,000 was spent at Oak Ridge for a new hospital which was turned over to a local organization upon completion.

5. Housing shortage at Los Alamos

The single factor which most concerned the committee in connection with the disposal of the Los Alamos community is the housing shortage. This shortage is both quantitative and qualitative, since two-thirds of the housing at Los Alamos is of a multiple-family character. The problem is further aggravated by the existence of some substandard housing.

A. Protective amendments: The Joint Committee considered this problem carefully and incorporated two amendments to the Atomic Energy Community Act to ameliorate the effects of any short-term housing shortage as follows:

(1) Section 9 of the bill permits the Commission to retain property which, in the opinion of the Commission, should be retained for its own use. Under the authority of this section the Commission would be able to retain for rental purposes such housing as the "Sundts" (temporary multiple-family wooden dwellings), the "Denver Steels" (metallic prefabricated homes), and the "Wingfoots" (small, trailer-type homes) until such time as this housing could be removed or otherwise disposed of without adverse impact on the community.

(2) Section 8 of the bill adds a new subsection c. to section 41 of the Atomic Energy Community Act, the effect of which is to permit individual sales of separate units of certain residential structures. It is recognized that the "splitting" of multiple-family dwellings will not provide the answer to the Los Alamos housing shortage. It will, however, maximize the opportunity for individual private homeownership. In the event of any individual occupant's dissatisfaction, relief could be obtained through the normal operation of the free enterprise system; namely, by buying out the other party.

B. Need for further home and lot development: The protective amendments discussed above will help to lessen the possibility of a short-term housing scarcity at Los Alamos. This possibility is further minimized by the fact that disposal and sale of Government-owned properties will not begin for approximately 2 years, which should provide time to solicit and encourage the interest of private homebuilders. It is also the view of the committee that disposal, in itself, will provide a stimulus to private development.

Nevertheless, further Government lot development is required at Los Alamos. The authorization now provides for the development of 150 lots at Barranca Mesa. In addition, it is hoped that the utility systems can be sold to private companies on an "as is" basis, thereby permitting the use of an additional $2,843,000 for Government lot development in such areas as the Pajarito acreage development area, North Mesa, and the townsite area, as discussed in paragraph 3. This entire program of lot development would be especially desirable in view of the fact that the Government would recover all, or substantially all, of its investment from the sale of the improved land.

C. Rent control: In the course of the hearings at Los Alamos the Subcommittee on Communities received other suggestions for ameliorating the effect of any possible short-term housing scarcity. There was some suggestion that the Government should institute rent control for a period of time to avoid rent gouging after disposal.

The HHFA has stated its belief that "sale of Government-owned residential property can be timed so as to avoid rent gouging without enforced controls." At the present time, there appear to be sufficient safeguards in the disposal plan to obviate the necessity for rent control. If, at some future point, a necessity for rent control is indicated, the committee will reeaxamine the question.

6. Disposition of utilities

Under the authority of section 73, the Commission is vested with broad discretion in determining the entity to which utilities may be transferred. The Commission can transfer the utilities to the city at the community, the State in which the community, is located, or any political subdivision or agency of the State, or any firm or corporation, or other legal entity. In determining the transferee for any utility the Commission must consider certain criteria set forth in subsection 73 b. of the act.

In the case of Los Alamos there are two principal utilities to be disposed of: the gas and electric distribution systems. With respect to the water distribution system, a municipal installation, the AEC has stated that it will be donated to the local government in accordance with section 84 of the Community Act although AEC will retain the water production system.

With respect to the gas and electric systems there are two alternatives: (1) donation to the community; or (2) sale to private companies.

Although donation to the community would provide a source of continuing revenue for the local government (approximately $200,000 per year), the Commission would be required to invest approximately $2.8 million to place the distribution systems in such a condition that they could be transferred to the community without placing an undue burden on the local government and the community might have difficulty in retaining competent operating personnel. In addition the Federal Government would realize no return for its investment in the utility systems if they were transferred to the local government.

On the other hand, if the Commission sold the utility systems to private companies the Government would realize approximately $2.5 million from the sale and the local government would receive a substantial amount—approximately $25,000 each year—in franchise taxes.

On balance it is the committee's belief that every effort should be made to find a suitable private purchaser or purchasers for the utility systems. This would relieve the community of the burden of having to operate substantial utility systems—a business in which it has no extensive experience. It would also provide a source of revenue to the community and be to the best financial advantage of the Federal Government.

7. Cooperative sale of apartments

The Subcommittee on Communities received some testimony at Los Alamos advocating cooperative sale of apartment buildings to the residents, on a priority basis without competitive bid.

The AEC did not advocate cooperative sales and the HHFA pointed out that "the demand by such purchasers may not be sufficient to make a priority sale feasible."

Although the demand for cooperative apartment purchases may be limited, the committee believes that the Commission should have the authority to meet such demand as may arise for cooperative ownership.

The committee has therefore in section 14 of the bill added a new section 58 to the Atomic Energy Community Act of 1955, authorizing the Commission to sell, on a priority basis, apartments, as appropriate, to cooperatives consisting wholly of project-connected personnel.

The cooperative entity will be entitled to the 15 percent deduction specified in subsection 35a. and the deduction provided in subsection 36d. of the Community Act. The financing provisions of section 62 and the indemnity provided by sections 63, 64, 65, and 66 shall also be applicable. It is the committee's intent that no person shall receive these benefits more than once.

No provision is made for the allowance of tenant improvement credits or for the shifting of such credits by an occupant of an apartment purchasing other property, or by the occupant of other property who seeks to buy into the cooperative.

8. Government financing of new home construction

It was suggested by the Los Alamos County Planning Committee, a local citizens group, that the Atomic Energy Community Act be amended to permit Government financing of new home construction. Both AEC and HHFA were opposed to this suggestion.

It is the committee's judgment that further action on this proposal should be deferred until the disposal situation is clarified. At the present time, approximately 12 financial institutions have indicated a willingness and ability to provide necessary mortgage money. If it appears that private sources of money are not attracted to Los Alamos or should they withdraw or place unreasonable restrictions on mortgage loans, then Government financing might be required.

9. Appraisals

Section 33 of the Community Act sets forth the requirement that the appraised value of Government property offered for sale shall be the current fair market value of the Government's interest in the property. Many persons at Los Alamos, as was the case at Oak Ridge and Richland, suggested that the method of arriving at the current fair market value of the property be spelled out in the legislation. In view of the uncertainties involved in property appraisal, the Joint Committee did not believe it advisable to spell out specific appraisal criteria in the statute. However, the committee expects that appraisals at Los Alamos will take into account a number of factors which were considered at the other atomic energy communities, such as:

(1) The wartime construction of the houses, when applicable;

(2) The wartime construction of the utilities serving the housing, where applicable;

(3) The "monotony effect" of having many identical houses in the same neighborhood; and

(4) The one-industry nature of the town.

In general, it is the committee's expectation that each property offered for sale will be appraised in the light of its individual characteristics, without regard to the housing shortage at Los Alamos, and that the general pattern of appraisal will be at least as favorable as the appraisals at Oak Ridge and Richland.

10. Retirement rights of Federal employees

The fire department at Los Alamos is composed of approximately 94 Federal employees while the police department employs approximately 27 Federal workers. It was brought out at the hearings, by the chairman of the subcommittee on public safety of the Los Alamos County Planning Committee, that if these functions were transferred to the local government, these employees would lose their retirement rights and other similar security benefits under Federal law.

At the hearings it was suggested that the AEC should continue to operate the Los Alamos Fire Department with Federal employees. The AEC concurs in this suggestion. The AEC pointed out that establishment of separate fire departments for the community and technical facilities would "involve expensive and unnecessary duplication of equipment and personnel." The AEC states that fire protection for the community can continue to be provided by the AEC under section 81 of the Atomic Energy Community Act until such time as municipal installations have been transferred to the local government. Authority to continue service beyond this period is questionable and the AEC might, at some future time, have to seek further authority to continue such services. In any event, AEC fire service would probably continue for approximately 5 years. This course of action would obviate any immediate problem in connection with the loss of retirement rights on the part of the 94 firemen.

With respect to the police department, a different problem is presented. The AEC points out that it would be desirable for as many of the experienced personnel as possible to be transferred to the local government. To induce such a transfer it may be necessary to provide retirement benefits which are comparable to those the employees would have under Federal Government.

In the hearings, one witness suggested that the AEC might purchase annuities. Under the Federal retirement system, any Federal employee who has over 5 years of service is entitled to a paid-up annuity and employees whose services have been terminated do have the option to retain this annuity or withdraw their paid-in contributions. Moreover, the AEC intends to encourage an active resettlement program for those Federal employees who decide to continue in Federal employment at Los Alamos.

In any event, the AEC has stated that it has sufficient statutory authority under section 81 to assist the local government in effecting transfers of Federal personnel to the local government and, further, to make section 91 assistance payments so that such personnel will suffer no substantial detriment with respect to pension benefits.

The Joint Committee will continue to follow the question of the retirement benefits of displaced Federal employees, as well as other aspects of the Los Alamos disposal program, very closely. The Joint Committee, through its Subcommittee on Communities, will give prompt consideration to any action necessary in order that disposal may proceed on an orderly and successful basis.

"FORT TOWN," "MAPLE CITY," AND "WINDMILL POINT"

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar No. 1750.

The ACTING PRESIDENT pro tempore. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 824) to admit the vessels *Fort Town, Maple City,* and *Windmill Point* to American registry and to permit their use in the coastwise trade.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill (S. 824) to admit the vessels *Fort Town, Maple City,* and *Windmill Point* to American registry and to permit their use in the coastwise trade, which was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding section 4132 of the Revised Statutes of the United States (46 U.S.C. 11) and section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883), the following three Canadian-built vessels, owned by the Prescott Ogdensburg Ferry Company, Limited, a Canadian corporation wholly owned by the Ogdensburg Bridge Authority, a public benefit corporation created by the State of New York, may, after their transfer to the Ogdensburg Bridge Authority and/or Ogdensburg Bridge and Port Authority, be admitted to American registry and documented under the laws of the United States, and shall be entitled to engage in the coastwise trade and to transport passengers and merchandise between points in the United States, including districts and possessions thereof embraced within the coastwise laws: Fort Town (Canadian official number 175,999), Maple City (Canadian official number 176,000), and Windmill Point (Canadian official number 198,041).

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1793) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE AND BACKGROUND OF THE BILL

The bill would provide that, notwithstanding section 4132 of the Revised Statutes (46 U.S.C. 11) and section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883), three Canadian-built vessels, owned by the Prescott Ogdensburg Ferry Co., Ltd., a Canadian corporation wholly owned by the Ogdensburg (N.Y.) Bridge Authority, a public benefit corporation of the State of New York, may, after their transfer to the Ogdensburg Bridge Authority and/or Ogdensburg Bridge and Port Authority, be admitted to American registry and documented under the laws of the United States, and shall be entitled to engage in the coastwise trade. The vessels for which such authority is sought are the *Fort Town,* the *Maple City,* and the *Windmill Point,* each 70 feet in length, each with a capacity of 10 automobiles and 200 passengers.

CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that there may be a call of the calendar for the consideration of measures to which there is no objection, beginning with Calendar No. 1751, except for Calendar No. 1756.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana? The Chair hears none; and it is so ordered.

The clerk will state the first measure.

"JOHN ROEN, JR." AND "STEVE W."

The bill (H.R. 6456) to permit the tugs *John Roen, Jr.,* and *Steve W.* to be documented for use in the coastwise trade, was considered, ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1794) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

H.R. 6456 would authorize redocumentation under the American flag of the two tugs named, for use in the coastwise trade solely in connection with dredging operations, as long as the owner is a U.S. citizen as defined in section 2 of the Shipping Act, 1916. They would be subject to the usual penalty of forfeitures and fines for transporting merchandise or passengers except as incident to dredging operations.

REASON FOR THE BILL

Both vessels were constructed in U.S. shipyards, the *John Roen, Jr.,* at Chicago, Ill, and the *Steve W.* at Toledo, Ohio, but were transferred to Canadian registry in connection with two contracts with the U.S. Army Corps of Engineers, for dredging operations on the Canadian side of the Detroit River. The contracts required transfer of the tugs in order to permit operation by Canadian personnel in Canadian waters. Such transfer, under the applicable statutes, prevents redocumentation for use in the U.S. domestic trade, which made this bill necessary.

Your committee feels that the circumstances warrant readmission of the tugs, as long as they are restricted to operations incident to dredging. The report of the Department of Commerce offers no objection, for the following reasons:

"It is the opinion of the Department that since both tugs are of small size and horsepower, their use is necessarily restricted to harbors, rivers, and coastal waters. Inasmuch as they were taken out of U.S. documentation for a special purpose, and this special purpose is now finished, the Department has no objection to favorable consideration of the bill."

"BAR-HO IV"

The bill (H.R. 6219) to permit the vessel *Bar-Ho IV* to be used in the coastwise trade, was considered, ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1795) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The bill would provide that, notwithstanding the provision of section 27 of the Merchant Marine Act, 1920, which denies the right to engage in the coastwise trade to any vessel which had been entitled to coastwise privileges and later was sold to a noncitizen, the vessel now known as the *Bar-Ho IV,* U.S. Document No. 284309, built in 1950 at Port Clinton, Ohio, and later transferred to Canadian ownership, shall be entitled to engage in the coastwise trade for so long as it is owned continuously by a citizen of the United States. The vessel now is owned by Barr & Co., Inc., of New York City.

REASON FOR THE LEGISLATION

Since its construction in 1950 the vessel, a pleasure craft of less than 40-foot length, gross tonnage, 19 tons, has been in service almost exclusively in Florida area waters.

It was sold, in 1955, to a Canadian citizen who, your committee understands, reregistered the vessel with the Coast Guard, and used it for some 9 months as a pleasure craft in Florida waters. Under the 1920 act such a transfer to a noncitizen entailed loss of the vessel's former coastwise privileges, even though it was not, we understand, placed under Canadian registry.

The present owner, who acquired the vessel in 1961, applied for and was given a yacht license by the Bureau of Customs. Because of the loss of coastwise rights, due to the sale to the Canadian owner in 1955, the vessel cannot now be used on a charter-for-hire basis. The present bill would lift the restriction now applying, and permit the vessel again to engage in the coastwise trade, as long as it is owned continuously by a U.S. citizen within the meaning of section 2 of the Shipping Act of 1916, as amended.

"LUCKY LINDA"

The bill (H.R. 7741) to permit the vessel *Lucky Linda* to be documented for limited use in the coastwise trade, was considered, ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1796) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

PURPOSE OF THE BILL

H.R. 7741 would provide that, notwithstanding the provisions of section 4132 of the Revised Statutes, as amended (46 U.S.C. 11), and section 27 of the Merchant Marine Act, as amended (46 U.S.C. 883), the vessel *Lucky Linda*, built in Nova Scotia, shall be admitted to American registry and documented under the laws of the United States, and be entitled to engage in the coastwise trade for the carriage of passengers, not to exceed 20 miles to sea from a harbor between Block Island, R.I., and Fire Island Inlet, N.Y., for as long as the vessel is owned continuously by a citizen of the United States within the meaning of section 2 of the Shipping Act, 1916, as amended.

REASON FOR THE BILL

The *Lucky Linda*, under American registry at the time, was purchased by the present owner, a U.S. citizen, in 1955, and was operated for 6 years under a Coast Guard certificate as a charter boat, carrying 12 passengers. The Coast Guard had renewed the certificate in 1959. However, at the expiration of the renewed certificate, on April 30, 1962, the owner was informed that the certificate could not be renewed because of a Bureau of Customs regulation, dated August 5, 1960, which provided:

"Foreign-Built Vessels, Prohibition Against Use in Party Fishing.—Operations of vessels carrying offshore fishing parties for hire, whether or not trips extend beyond territorial waters, are predominantly coastwise in the nature and object of their voyages and foreign-built vessels cannot be documented for such use."

Inasmuch as there had been no such ruling when the *Lucky Linda* was purchased and first certificated, and that the owner had substantially renovated the vessel in 1959, to afford increased safety and improved accommodations, your committee feels that it is only fair to permit him to continue operations by enacting the bill.

STANDARD DREDGING CORP. SCREWS AND BARGES

The bill (H.R. 8168) to admit the oil screw tugs *Barbara, Ivalee, Lydia*, and *Alice* and the barges *Florida, DB-8, No. 220*, and *No. 235* to American registry and to permit their use in the coastwise trade while they are owned by Standard Dredging Corp., a New Jersey corporation, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1797) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

PURPOSE OF THE BILL

H.R. 6168 would provide that notwithstanding the provisions of section 4132 of the Revised Statutes, as amended (46 U.S.C. 11), and section 27 of the Merchant Marine Act, 1920, as amended (46 U.S.C. 883), certain oil screw tugs and barges, all of which, except one tug, the *Alice*, had been both built in the United States and documented under U.S. registry before being transferred in 1957 by their owner, Standard Dredging Corp., a New Jesey corporation, to Standard Dredging de Venezuela, C.A., a subsidiary Venezuelan corporation, and to Venezuelan registry and flag, and are to be retransferred to the former owner, Standard Dredging Co., upon enactment of this act, shall all be admitted to American registry and be entitled to engage in the coastwise trade, solely as an incident to dredging operations, for so long as such vessels or any of them are continuously owned by the aforesaid Standard Dredging Corp., and as long as such corporation is a citizen of the United States within the meaning of section 2 of the Shipping Act, 1916. It is further provided that use of any of such vessels, while documented pursuant to this act, to transport merchandise or passengers except as an incident to dredging operations, shall entail forfeiture of vessel and merchandise to the United States, and the vessel owner shall be subject to a penalty of $200 for each such passenger transported. Any penalty or forfeiture thus incurred may be remitted or mitigated by the Secretary of the Treasury, the bill provides, in accordance with the provisions of section 5294 of the Revised Statutes (46 U.S.C. 7).

The tugs and barges covered by the provisions of the bill are as follows:

(1) The tug *Barbara*, formerly documented under U.S. registery with official No. 254901; built in 1948 at Tampa, Fla. (Venezuelan registry No. MA-3260).

(2) The tug *Ivalee*, former U. S. document No. 293505, built in 1940 at New Orleans (Venezuelan registry No. MA-3261).

(3) The tug *Lydia*, former U.S. document No. 240360, built in 1941 at New Orleans (Venezuelan registry No. MA-3262).

(4) The tug *Alice*, built at New Orleans by the Equitable Equipment Co., Inc., never documented under U.S. flag and registry, sold in 1957 to Standard Dredging de Venezuela, C.A.

(5) The barge *No. 220*, former U.S. document No. 264953, built in 1949 at Tampa (Venezuelan registry No. MA-3263).

(6) The barge *Florida*, former U.S. document No. 254043, built in 1932 at Mobile (Venezuelan registry, No. MA-3264).

(7) The barge *DB-8*, former U.S. document No. 265934, built in 1943 at Galveston (Venezuelan Registry No. MA-3265).

(8) The barge *No. 235*, former U.S. document No. 262984, built in 1950 at Mobile (Venezuelan registry No. MA-3266).

Your committee feels that the circumstances surrounding the transfers of these tugs and barges to Venezuelan registry were such as to be of benefit to U.S. shipping, in that the improvement to Maracaibo Bay entrance and harbor facilitates the activities of the the many U.S. tankers calling there, while the employment of these American-owned tugs, barges, and dredges was very much in the interest of the American economy. Precedent for such approval is found in the readmission to U.S. registry and domestic trade, during the 86th Congress, of the vessel *John F. Drew* which had been transferred to Canadian registry for the specific purpose of being utilized in connection with dredging and marine construction operations in the St. Lawrence Seaway and related power development project in which the U.S. Government was a participant.

The Department of Commerce report to the House offered no objection to favorable enactment of the bill if amended as the Department proposed, which the House did.

DEPARTMENTAL REPORTS

The reports of the Departments of the Treasury, Commerce, and Defense on H.R. 8168 are as follows:

THE GENERAL COUNSEL
OF THE TREASURY,
Washington, April 9, 1962.

Hon. HERBERT C. BONNER,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Reference is made to your request for the views of this Department on H.R. 8168, to admit the oil screw tugs *Barbara, Ivalee, Lydia*, and *Alice* and the barges *Florida, DB-8, No. 220*, and *No. 235* to American registry and to permit their use in the coastwise trade while they are owned by Standard Dredging Corp., a New Jersey corporation.

The bill states that all eight named vessels are American built, that all but the oil screw *Alice* were formerly documented as vessels of the United States and that all eight had been later sold foreign and placed under foreign registry. The proposed legislation would have the effect of authorizing the use of all eight vessels in the transportation of merchandise and passengers between points in the United States embraced within the coastwise laws. Under present law, vessels which have acquired the lawful right to engage in the coastwise trade, either by virtue of having been built in, or documented under the laws of the United States, and later sold foreign or placed under foreign registry, are precluded thereafter from acquiring the right to engage in the coastwise trade (46 U.S.C. 883). The bill, therefore, would confer upon the vessels and their owner certain privileges not available generally to other vessels now owned by citizens of the United States which may be subject to existing statutory prohibitions. Whether such privileges should be granted is a matter of policy on which this Department expresses no opinion.

Since the bill would waive only the prohibition against the use in the coastwise trade of vessels which have been placed under foreign registry, the Department would require the vessels to comply with the vessel inspection laws administered by the Coast Guard. The Department anticipates no administrative difficulty in carrying out the purposes of the bill.

The Department has been advised by the Bureau of the Budget that there is no objection from the standpoint of the administration's program to the submission of this report to your committee.

Sincerely yours,
ROBERT H. KNIGHT,
General Counsel.

DEPARTMENT OF COMMERCE,
Washington, D.C., April 17, 1962.

Hon. HERBERT C. BONNER,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in further reply to your request for the views of this Department with respect to H.R. 8168, a bill to admit the oil screw tugs *Barbara, Ivalee, Lydia*, and *Alice* and the barges *Florida, DB-8, No. 220*, and *No. 235* to American registry and to permit their use in the coastwise trade while they are owned by Standard Dredging Corp., a New Jersey corporation.

With the amendments hereinafter proposed, the Department would have no objection to favorable consideration of the bill.

The bill would authorize the return to U.S. registry, with coastwise privileges, of the oil screw tugs *Barbara, Ivalee, Lydia*, and *Alice* and the barges *Florida, DB-8, No. 220*, and *No. 235*, so long as the vessels are continuously owned by the Standard Dredging Corp. of New Jersey, notwithstanding the provisions of section 4132 of the Revised Statutes of the United States, as amended (46 U.S.C. 11) (which forbids foreign-built vessels from engaging in the coastwise trade), and section 27 of the Merchant Marine Act, 1920, as amended (46 U.S.C. 883) (which forbids the transportation of merchandise, on penalty of forfeiture thereof, between points in the United States in other than domestic built and documented vessels, and provides that no vessel which is built in the United States and later sold foreign in whole or in part, or placed under foreign registry, may thereafter acquire the right to engage in the coastwise trade).

The characteristics of the vessels are as follows:

Name	Type	Tonnage	Length (feet)	Horsepower	Year built
Ivalee	Tug	20	42.0	170	1940
Barbara	do	24	44.9	120	1948
Lydia	do	41	53.5	180	1941
Alice	do	21	45.0	182	1957
No. 220	Barge	65	55.0	None	1949
No. 235	do	209	127.9	None	1950
DB-8	do	222	88.0	None	1942
Florida	do	204	99.8	None	1932

All of the above vessels were built in the United States and, with one exception, were documented under the laws of the United States. With approvals granted by the Maritime Administration in 1954, 1956, and 1957, pursuant to sections 9 and 37 of the Shipping Act, 1916, as amended (46 U.S.C. 808, 835), these vessels were transferred to the Standard Dredging de Venezuela, C.A., a wholly owned Venezuelan subsidiary of a U.S. owner, and placed under Venezuelan registry and flag. The Standard Dredging Corp. of New Jersey is the parent of the Venezuelan corporation.

We have been informed that these vessels were transferred to the Venezuelan subsidiary of Standard Dredging Corp. of New Jersey at the insistence of the Venezuelan Government. The parent corporation was then engaged in performing a dredging contract in Venezuela, and was operating the said vessels as tenders and other auxiliary equipment for its dredge, the *Jamaica Bay*. As a prerequisite to the continuance of these dredging operations in that country, the Venezuelan Government insisted that all these attendant vessels be transferred to ownership in a Venezuelan corporation and to Venezuelan flag and registry. After obtaining permission from the Maritime Administration, these transfers were effected.

We have also been informed that since the end of World War II, Standard Dredging Corp. has performed dredging contracts in Cuba, Colombia, Jamaica, Aruba, Curacao, Egypt, and Iraq, and that none of these countries required the transfer of the tugs and barges to foreign ownership and registry.

It should be noted that section 4132 of the Revised Statutes of the United States, as amended (46 U.S.C. 11), would not be pertinent to the documentation of these vessels. This section forbids the registration of foreign-built vessels for use in the coastwise trade, whereas these vessels are all American built.

Section 27 of the Merchant Marine Act, 1920, as amended (46 U.S.C. 883), is applicable, since it prevents a U.S.-built vessel which is transferred to foreign ownership or registry from acquiring the right to reenter the coastwise trade.

It is our opinion that this bill and the surrounding circumstances with respect to these vessels are somewhat similar to those involved in Private Law 86-203, 86th Congress, which authorized U.S. redocumentation with coastwise privileges of the vessel *John F. Drew*, a then Canadian vessel utilized for dredging and marine construction operations in the St. Lawrence Seaway and power development project. It is the understanding of this Department that if the vessels specified in the bill were permitted to be redocumented in the United States with coastwise privileges, they would be used only to attend a large dredge in performing dredging operations in U.S. waters and not generally to engage in the coastwise trade. If the bill is amended to limit the operation of the vessels in this way, we would have no objection to enactment.

The bill could be amended to carry out our recommendation as follows:

1. Page 4, line 19, insert after the word "trade" a comma and the words "but only as an incident to dredging operations" and a comma.

2. Page 4, line 20, insert after the word "merchandise" a comma and the words "as an incident to dredging operations" and a comma.

3. Page 5, line 4, strike out the period and insert in lieu thereof a comma and the following: "and so long as such corporation is a citizen of the United States as defined in section 2 of the Shipping Act, 1916. If any such vessel, while documented pursuant to this Act, transports merchandise or passengers in the coastwise trade except as an incident to dredging operations, such vessel shall be forfeited to the United States, such merchandise shall be forfeited to the United States, and the vessel owner shall be subject to a penalty of $200 for each such passenger transported. Any penalty or forfeiture incurred under the provisions of this Act may be remitted or mitigated by the Secretary of the Treasury in accordance with the provisions of section 5294 of the Revised Statutes (46 U.S.C. 7)."

The penalties and forfeitures provided by the proposed amendments are the same as those provided by existing law for operation of a vessel in violation of its license and for violation of section 27 of the Merchant Marine Act, 1920.

Attached is a comparative test showing the changes our proposed amendments would make in the bill.

The Bureau of the Budget advises there is no objection to the submission of this report from the standpoint of the administration's program.

Sincerely yours,

C. D. MARTIN, Jr.,
Acting Secretary of Commerce.

"EUGENIE II"

The bill (S. 3264) to authorize and direct the Secretary of the Treasury to cause the vessel *Eugenie II*, owned by J. C. Strout, of Milbridge, Maine, to be documented as a vessel of the United States with full coastwise privileges, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 4132 of the Revised Statutes of the United States, as amended (46 U.S.C. 11), the Secretary of the Treasury is authorized and directed to cause that certain vessel now known as the *Eugenie II*, built in 1955 in New Brunswick, and now owned by J. C. Strout, of Milbridge, Maine, to be documented as a vessel of the United States with full coastwise privileges, upon compliance with the usual requirements, so long as the vessel is owned, and shall continue to be owned by a citizen of the United States.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1798) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

REASON FOR THE BILL

The *Eugenie II* was built in New Brunswick, Canada, in 1955, and hence is not eligible (1) under the provisions of section 27 of the Merchant Marine Act, 1927, to transport merchandise between points in the United States, and (2) under section 4132 of the Revised Statutes (46 U.S.C. 11) to be documented for operation in the coastwise trade. The vessel is owned by J. C. Strout, a U.S. citizen, of Milbridge, Maine, who proposes to use it to supply charter boat and mail service in that area if this bill is enacted. Your committee is informed that no such service is presently available, and that its initiation would be a welcomed addition to the economy of the area.

The vessel is 50 feet in length, and is of approximately 15 net tons.

The Department of Commerce reports that, in view of the small size of the vessel, it has no objection to favorable consideration of the bill, if there is no objection on the part of the Treasury Department whose responsibility it is to administer, through the Bureau of Customs, the navigation laws which cover the documentation of vessels.

FORT BOWIE NATIONAL HISTORIC SITE, ARIZONA

The bill (S. 55) to authorize the establishment of the Fort Bowie National Historic Site, in the State of Arizona, and for other purposes, was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to designate, for preservation as the Fort Bowie National Historic Site, the site and remaining historic structures of old Fort Bowie, situated in Cochise County, Arizona, together with such additional land, interests in land, and improvements thereon, as the Secretary in his discretion may deem necessary to accomplish the purposes of this Act: *Provided,* That the Secretary shall designate no more than one thousand acres for inclusion in said site.

SEC. 2. Within the area designated pursuant to section 1 hereof, the Secretary of the Interior is authorized, under such terms, reservations, and conditions as he may deem satisfactory, to procure by purchase, donation, with donated funds, exchange, or otherwise, land and interests in land for the national historic site. When the historic remains of old Fort Bowie and all other privately owned lands within the aforesaid designated area have been acquired as provided in this Act, notice thereof and of the establishment of the Fort Bowie National Historic Site shall be published in the Federal Register. Thereupon all public lands within the designated area shall become a part of the Fort Bowie National Historic Site.

SEC. 3. The Fort Bowie National Historic Site, as constituted under this Act, shall be administered by the Secretary of the Interior as a part of the national park system, subject to the provisions of the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535), as amended, the Historic Sites Act of August 21, 1935 (49 Stat. 666), and all laws and regulations of general application to historic areas within the national park system.

SEC. 4. There are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this Act.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1800) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

HISTORICAL SIGNIFICANCE OF FORT BOWIE

Established in Arizona in 1862 and abandoned in 1894, Fort Bowie served in that period as the focal point of military operations during the subjugation of the hostile Apache Indians and the settlement of the Southwest. During that time, bloody campaigns were waged against the Chiracahua Apaches under their famed chieftain, Cochise, and later against the renegade Apaches under the leadership of Geronimo. Geronimo was captured and exiled in 1886 and peace was restored.

Fort Bowie was established in Apache Pass which was also the location of a stage station utilized by the Overland Mail Co. Apache Pass was considered the most hazardous point along the entire Butterfield Trail which extended some 2,651 miles along the wilderness between points of origin in St. Louis and Memphis to the western terminus in San Francisco. From 1858 until the Civil War forced its abandonment in 1861, the Butterfield Trail was an important link between the East and the West. It was the first mail and stage route to California from the eastern part of the United States.

PURPOSE OF S. 55

Enactment of the reported bill would authorise the Secretary of the Interior to designate for preservation as the Fort Bowie National Historic Site the site and remaining historic structures of Fort Bowie and such additional land as is deemed necessary to preserve the fort and its historic environs. Actual boundaries within a 1,000-acre limitation would be designated by the Secretary and such designation would be contingent upon the acquisition of privately owned lands within the boundaries. The lands presently proposed for development aggregate about 900 acres, of which approximately 630 acres are public lands and the remaining 270 acres are private lands.

Portions of the original adobe building at Fort Bowie are still standing and the substantial stone foundations are clearly defined. It would be relatively easy to locate and identify other fort structures so as to reconstruct this great chapter in our country's history. Presentation of the story could be accomplished by partial or complete restoration of some of the buildings or through appropriate museum and other interpretative features.

ESTIMATED COSTS

The value of privately owned lands involved in the proposal is estimated to be approximately $50 per acre, or $13,000. Costs of developing the area for public use and enjoyment are estimated at approximately $515,000 and annual administrative costs would approximate $26,000.

FIVE FORKS BATTLEFIELD

The bill (H.R. 10276) to change the name of the Petersburg National Military Park, to provide for acquisition of a portion of the Five Forks Battlefield, and for other purposes was considered, ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1801) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The principal purpose of this bill is to authorize the Secretary of the Interior to acquire 1,200 acres of land at the Five Forks battlefield site in Virginia and to administer them as part of the Petersburg National Military Park, a unit of the national park system. A further purpose is to change the name of this park to Petersburg National Battlefield.

H.R. 10276 was introduced by the Honorable WATKINS M. ABBITT following receipt of an executive communication requesting consideration of such a bill.

NEED

Petersburg National Military Park was established July 3, 1926. Its 1,531 acres, the present statutory limit, however, do not include the lands on which the Battle of Five Forks was fought. This battle is regarded by historians as the most important of the nine engagements which were fought during the Civil War to gain or retain control of Petersburg and thereby to dominate the railway approaches to Richmond. Five Forks, moreover, was the immediate forerunner of Appomattox, which marked the end of the Confederacy. It was at Five Forks that General Sheridan's 30,000 men overwhelmed General Pickett's Confederate forces on April 1, 1865.

A substantial part of the 1,200 acres proposed to be acquired are in such condition that they still display historic features associated with the battle. These features can readily be preserved. The acreage, which is in 11 ownerships, is for the most part undeveloped. There are indications that some parts of it will be donated to the Government if its acquisition is authorized.

Petersburg National Military Park already attracts well over half a million visitors a year. With inclusion of the Five Forks site in it, it will undoubtedly attract a much larger number and will thus serve to bring home to the American public the significance of one of the most important of the battles of the Civil War.

GOVERNMENT IMPROVEMENTS UNDER CONCESSION CONTRACTS

The bill (H.R. 11405) to provide for the maintenance and repair of Government improvements under concession contracts entered into pursuant to the Act of August 26, 1916 (39 Stat. 535), as amended, and for other purposes was considered, ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1802) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of this bill is to authorize the Department of the Interior to continue its longstanding practice of requiring concessionaires who utilize Government-owned buildings in areas administered by the National Park Service to be responsible for the maintenance and repair of those buildings.

NEED

Throughout the national park system there are many buildings which have been constructed by the Government or which were acquired by it at the time the lands on which they stand were acquired. Some of these buildings are occupied by concessionaires furnishing services to the public—restaurants, sleeping accommodations, souvenir stands, service stations, and the like. There are also buildings occupied by such concessionaires which have been constructed by and for themselves but to which the Government holds the title.

It has been normal practice for many years for the National Park Service to include in its concessionaire contracts provisions obligating the concessionaire to keep the buildings he occupies in good repair. Such provisions serve to reduce the appropriations which would have to be made if the Government had to repair and maintain these buildings. They also permit the party who is actually in charge of the buildings to coordinate his maintenance work with his other operations.

Recently, however, the Comptroller General has held that the practice of including such provisions in concessionaire contracts is illegal. He did so notwithstanding the conclusions stated in his report to the House committee on H.R. 11405 that—

> Our reviews of National Park Service operations have not disclosed any findings that might lead us to a conclusion that the practice is objectionable from an accounting standpoint.

There is likewise no intimation that the practice involves any loss to the Government or has otherwise led to abuses. His holding appears to have been based solely on the inconsistency between such provisions and the terms of section 321 of the act of June 30, 1932 (47 Stat. 412), as amended (40 U.S.C. 303b), the text of which is set out in his report attached hereto.

In view of the advantages both to the Government and to the concessionaires which flow from the practice described above and the lack of any showing of disadvantage, the committee finds it desirable and necessary that H.R. 11405 be enacted.

BILL PASSED OVER

The bill (S. 3235) to facilitate the work of the Forest Service, and for other purposes, was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

EXTENSION OF THE INTERNATIONAL WHEAT AGREEMENT ACT OF 1949

The bill (S. 3574) to extend the International Wheat Agreement Act of 1949 was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the International Wheat Agreement Act of 1949, as amended, is further amended as follows:

(1) The first sentence is amended by striking out the language in the first parenthesis and all that follows in such sentence and inserting in lieu thereof the following: "signed by the United States and certain other countries revising and renewing such agreement of 1949 for periods through July 31, 1965 (hereinafter collectively called the 'International Wheat Agreement')".

(2) There is inserted immediately before the last sentence the following new sentence: "Such net costs in connection with the In-

ternational Wheat Agreement, 1962, shall include those with respect to all transactions which qualify as commercial purchases (as defined in such agreement) from the United States by member and provisional member importing countries, including transactions entered into prior to the deposit of instruments of acceptance or accession by any of the countries involved, if the loading period is not earlier than the date the agreement enters into force."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1804) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Committee on Agriculture and Forestry, to whom was referred the bill (S. 3574) to extend the International Wheat Agreement Act of 1949, having considered the same, report thereon with a recommendation that it do pass without amendment.

This bill would extend the International Wheat Agreement Act of 1949 to cover the International Wheat Agreement, 1962. Its sole purpose is to implement that agreement, which has already been ratified with the advice and consent of the Senate.

Under the agreement each importing country undertakes, when prices are within the agreement range, to purchase from member exporting countries a specified percent of its total commercial purchases from all sources, whatever that total may be. Exporting countries in association with one another undertake to make wheat available to member importing countries at prices within the range to enable them to fulfill their obligations, except that if prices reach the maximum, exporting countries then are obligated to furnish importing countries with certain quantities based on historical commercial trade during a previous period, before prices may move above the maximum. In the 1962 agreement, the maximum and minimum prices are 12½ cents per bushel and higher than those of the 1959 agreement; namely, $2.02½ and $1.62½, respectively, in terms of a basic wheat at a basing point at the head of the Great Lakes.

The act authorizes the President, acting through the Commodity Credit Corporation, to make available such quantities of wheat and wheat flour and at such prices as are necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States, and to take certain other action necessary in the implementation of the agreement.

Passage of the bill was requested by the Department of Agriculture.

BACKGROUND INFORMATION

The following constitutes background information pertinent to the extension of the International Wheat Agreement Act of 1949, as amended, to implement U.S. membership for the ensuing 3 years in the 1962 International Wheat Agreement. The Senate gave its advice and consent for ratification of the agreement on July 9, 1962.

SCOPE OF WHEAT AND FLOUR TRADE INVOLVED

The rights and obligations under the agreement are of necessity restricted to commercial trade, inasmuch as exports under special Government programs, notably Public Law 480 and noncommercial barter (United States) and under the Colombo plan and export credits insurance (Canada), by their very nature do not involve rights and obligations such as attach to trade under a multilateral agreement.

U.S. exports of wheat and flour for the crop year just ended June 30, 1962, are expected to total around 710 million bushels. A preliminary estimate of the composition of this trade is as follows:

	Million bushels
(1) Commercial sales to IWA member importing countries	160
(2) Commercial sales to other exporting countries and to nonmember countries	55
(3) Sales to all countries under title I, Public Law 480	410
(4) Sales to all countries under title IV, Public Law 480	7
(5) Noncommercial barter sales to all countries	28
(6) Donations to all countries	50
Total exports	710

Only the segment of trade in category (1) comes under the rights and obligations of the wheat agreement for the reasons mentioned above, and also inasmuch as trade so covered is restricted to exports to member importing countries, the concept of the agreement being one of a multilateral contract between importing purchasers and exporting suppliers.

Under the 1962 agreement, and likewise under the proposed implementing legislation, "member importing countries" is intended to include importing countries with "provisional" membership. The 1962 agreement recognizes a provisional membership to accommodate those countries which participated in the negotiations but whose legislatures do not find it possible to ratify before the agreement comes into force. In such a case an interim instrument is deposited; i.e., an intention to seek acceptance or accession in accordance with the country's constitutional procedures. This allows a country time to conclude those formalities, and the provisional membership expires upon deposit of the full instrument of acceptance or upon expiry of the period granted by the Wheat Council for its deposit, but in no case later than July 31, 1963.

The agreement also recognizes the practical necessity for the concluding of export transactions in advance of shipment, and the inevitable circumstance that some sales for loading the first crop-year in the agreement will be made before some countries have been able to deposit instruments of acceptance or accession. Accordingly, the criterion for recording transactions under the agreement is not the time of consummation of the transaction, but is whether or not the loading period falls within the term of the agreement.

It is the intention that the reimbursement to the Commodity Credit Corporation which in the proposed legislation is authorized to be appropriated, should include net costs to the Corporation with respect to all transactions which qualify as commercial purchases (as defined in the agreement) from the United States by member and "provisional" member importing countries, on the same basis recognized by the Wheat Council.

U.S. PROGRAM UNDER THE AGREEMENT

The Commodity Credit Corporation program which has been conducted pursuant to the International Wheat Agreement Act of 1949, as amended, enables commercial wheat exporters and millers to purchase wheat at domestic market prices and to sell the wheat, or wheat flour product, to purchasers in wheat agreement importing countries, at prices consistent with the agreement price range, in competition with other exporters in the world market. The program costs in connection with these exports are occasioned by reason of the U.S. domestic price of wheat being higher than the competitive world price. The cost per bushel—and this has been the case since 1953—is the difference between the domestic price at ports and the competitive world price as it moves within the limits of the agreement price range. Should prices advance to the maximum, then the program cost per bushel would be the difference between the domestic price and the U.S. equivalents of the agreement maximum, until the U.S. quantitative commitment had been fulfilled, and then prices could advance higher with a compensating reduction in the program cost.

The Wheat Agreement Act of 1949, as amended, requires the Commodity Credit Corporation, in making wheat available under the agreement, to have regard for its responsibility to utilize the usual and customary channels, facilities, and arrangements of trade and commerce to the maximum extent practicable. During the life of the 1959 agreement, all exports of wheat and wheat flour under the agreement were accomplished through the private trade. Insofar as practicable, practices and procedures applicable to ordinary commercial exports are permitted and encouraged. The program requirements are such as to make participation practicable for small business or for any exporter regularly engaged in the exportation of wheat or wheat flour.

Under the program, an exporter in the private trade negotiates a sale of wheat or wheat flour with a buyer in a wheat agreement importing country, in the knowledge of export payment rates which are publicly announced each day by the Commodity Credit Corporation after grain markets have closed. The exporter reports the sale by telegraph to the CCC, and if the transaction is eligible he receives registration under the program within a few hours. He later accomplishes the exportation and upon presentation of evidence of sale and proof of exportation he collects the export payment from an office in his area at the rate per bushel of wheat or hundredweight of flour which prevailed at the time the sale was made. In the case of wheat, the export payment is made in the form of a negotiable certificate which is redeemable only in wheat from Commodity Credit stocks at the domestic market price. This wheat is utilized only in connection with further exports under the program.

EXPORT PROGRAM COSTS

The average payment on combined wheat and flour exports under the wheat agreement during the fiscal year 1960–61 was 57 cents per bushel. This is approximately the low point for any annual average since the beginning of the agreements in 1949 except for 1953–54 when the average was 44 cents; the highest annual average was 79 in 1956–57; and the overall average since 1949 was 63½ cents. It is difficult to estimate the program costs during the life of the 1962 agreement due to the uncertainties inherent in two of the three principal determinative factors; namely, (1) the volume of trade, (2) the level of domestic market prices, and (3) the future export prices which will need to be established in order to remain fully competitive in the world market. The volume of commercial sales to member importing countries is expected to be about 160 million bushels annually. The domestic price factor may be expected to operate to increase unit costs although this depends upon the level of domestic market prices whereas present conditions would indicate that the third factor—the export price—may to some extent decrease unit costs. The closest estimate possible at this time is 65 cents per bushel with a possibility of reaching 70 cents if domestic markets rise materially; or conversely, a lowering of the cost per bushel, should conditions lead to a domestic market decline.

The following information relating to the 1962 International Wheat Agreement is pertinent to the proposed implementing legislation:

PROSPECTIVE MEMBERSHIP

Forty-eight countries participated in the 1962 United Nations Negotiating Conference, but seven of these were importing countries which did not subscribe a percentage obligation prior to the adjournment of the Conference; consequently, only 41 countries are inscribed in the agreement.

Under the terms of the agreement, it was brought into force in its administrative aspects on July 16, 1962, and operationally on August 1, 1962, by the deposit of instruments of acceptance or accession (including provisional instruments in some cases) by countries holding the requisite number of votes.

The membership status as of August 1, 1962, was as follows:

	Exporting countries	Importing countries	Total
Countries which had deposited final instruments of acceptance or accession	4	12	16
Countries which had deposited provisional instruments of acceptance or accession	4	10	14
Countries granted extension for the deposit of instruments	2	5	7
Countries not granted extensions (which did not sign the agreement) which may seek accession as new members		4	4
Total inscribed in agreement	10	31	41

NOTE.—The names of the countries in the foregoing categories are listed in "App. I: Exporting Countries," and "App. II: Importing Countries."

OBLIGATION OF IMPORTING COUNTRIES

Each member importing country undertakes to purchase from member exporting countries a specified percentage of its total commercial purchases from all sources, whatever that total may be. The weighted average of the percentages subscribed by all importing countries under the 1962 agreement is approximately 81 percent. This takes into account the prospective membership of the U.S.S.R. At the level of trade during the crop years 1959–60 and 1960–61, commercial purchases from all sources aggregated around 590 million bushels.

It is expected that the member importing countries will buy within the agreement a much greater proportion of their total commercial requirements than the 81 percent subscribed. Under the previous (1959) agreement, when the weighted average subscribed was 70 percent, the actual commercial purchases for the crop years 1959–60 and 1960–61 approximated 92½ percent.

The importers' obligation exists at the agreement minimum price and throughout the range up to the maximum price. The right of the United States and other exporting countries is to sell this guaranteed percentage that the member importers purchase. This benefit is global in the sense that exporting countries compete with one another in selling importing countries their requirements.

OBLIGATION OF EXPORTING COUNTRIES

The obligation of exporting countries exists if the price reaches the agreement maximum. Then they undertake to furnish any quantities not already purchased in that year, up to a moving average equal to importers' historical commercial purchases during a 4-year period. To purchase up to these quantities at the maximum price, before prices may go any higher, is the importing countries' right. The maximum obligation of the United States, at the maximum price, for the crop year 1961–62 was 168 million bushels. During the life of the 1962 agreement, the maximum obligation each year could be expected to continue at about this figure. Exporters' obligations are global in the sense that an exporting country may discharge its obligation by selling to any member importing countries until the exporter's overall commitment has been fulfilled.

It is interesting to note that commercial sales by the United States for the current year 1961–62 subject to the terms of the agreement, secured competitively under nonmaximum price conditions (projected on the basis of the volume recorded during the first 11 months), totals around 160 million bushels. This approximates the total quantity mentioned in the preceding paragraph which the United States could have been called upon to furnish had prices reached the maximum.

Exporting countries inscribed in the 1962 agreement

31. Poland	([2])	50				X.

[1] Seven additional importing countries participated in the 1962 Negotiating Conference but did not specify a percentage undertaking and consequently were not inscribed in the agreement. Two of these countries, Finland and Greece, applied to the International Wheat Council for accession after the agreement came into force on July 16, 1962. The applications were approved and the countries are now placing membership before their legislatures. The other 5 countries in this category may seek accession in the same manner in the future. These countries are Colombia, Denmark, Morocco, Pakistan, and Syria.

Nine importing countries which were members of the 1959 agreement did not participate in the 1962 Negotiating Conference. One of these countries, El Salvador, applied for accession after the agreement came into force on July 16, 1962. The application was approved by the Wheat Council and the deposit of the instrument of accession is pending. The other 8 countries in this category are Costa Rica, Guatemala, Haiti, Honduras, Iceland, Panama, Peru, and Sierra Leone. Sierra Leone has applied for accession but the Wheat Council has not yet had opportunity to act on it.

Of the 41 exporting and importing countries inscribed in the agreement, all but 4 have deposited instruments, either final or provisional, or have been granted extensions for deposit. The 4 which have not been granted extensions have not applied therefor, nor did they sign the agreement during the prescribed period. These countries are Ceylon, Iran, Libya, and Poland. They are privileged to apply to the Wheat Council for accession under art. 35(4) of the agreement which authorizes the Council by ⅔ votes of exporting countries and ⅔ votes of importing countries to approve accession by the government of any member of the United Nations or the specialized agencies or by any government which was a member of the 1959 wheat agreement.

[2] Not member of 1959 agreement.

THE PRICE RANGE

The basic maximum and minimum prices in the 1962 agreements are $2.02½ and $1.62½ per bushel, respectively, compared with $1.90 and $1.50 in the expiring agreement. These prices are on a gold basis (i.e., equal to U.S. currency) and are in terms of a basic grade and a basing point; namely, No. 1 Manitoba Northern wheat in bulk in store at the head of the lakes.

The equivalents of the agreement basic prices at U.S. ports are determined on the basis of prevailing transportation rates to destinations. As an example, the current f.o.b. equivalents at U.S. gulf ports of the new agreement basic prices are approximately $2.16 maximum and $1.76 minimum. For practical purposes of comparison, these prices must be further interpreted in terms of classes and grades in relation to the basic grade. The United States establishes differentials for its various classes and grades as required in the light of competitive world prices.

Shorter supplies of hard wheats in the higher protein brackets, and price advances of these qualities during the last half of 1961 and early 1962, were factors favorable to the obtaining of the increase in the agreement price range at the negotiating conference. However, this was accomplished in the face of remaining large supplies of ordinary protein wheats and a concerted resistance to price increase on the part of developing countries. Although purchases by developing countries are largely under Government-assisted programs rather than commercial, nonetheless they opposed a higher price range, and by and large it was the industrialized commercial buyers which enabled the United States and other exporting countries to negotiate the price increase.

AGREEMENT ADMINISTRATION

The agreement is administered internationally by a Wheat Council composed of member countries of the agreement. Votes are divided equally between exporting countries and importing countries, with each group having 1,000 votes. The United States holds 290 of the 1,000 exporter votes in the Council.

The U.S. pro rata proportion of the cost of administration under the 1959 agreement averaged $22,600 annually, which is about one-sixtieth of a cent per bushel of wheat exported under the agreement.

DEPARTMENTAL VIEWS

Department of Agriculture,
Washington, D.C., July 20, 1962.

Hon. Lyndon B. Johnson,
President of the Senate,
Washington, D.C.

Dear Mr. President: There is transmitted herewith for consideration by the Congress a draft of legislation which would amend the International Wheat Agreement Act of 1949, as amended, to extend the authority contained in the act to implement the 1962 International Wheat Agreement to which the Senate has given its advice and consent for ratification.

Enactment by the Congress of this proposed implementing legislation is recommended. Under its provisions certain action is authorized to secure the benefits and discharge the obligations of the United States under the agreement, upon the expected entry into force of the operational provisions of the agreement on August 1, 1962. This proposed legislation also is being submitted to the Speaker of the House of Representatives.

The current agreement, by its own terms, expires on July 31, 1962. The 1962 agreement in effect continues it, with some revisions, for a period ending July 31, 1965. The rights and obligations under the new agreement are similar to those in the 1959 agreement. Each importing country undertakes, when prices are within the agreement range, to purchase from member exporting countries a specified percent of its total commercial purchases from all sources, whatever that total may be. Exporting countries in association with one another undertake to make wheat available to member importing countries at prices within the range to enable them to fulfill their obligations, except that if prices reach the maximum, exporting countries then are obligated to furnish importing countries with certain quantities based on historical commercial trade during a previous period, before prices may move above the maximum. In the 1962 agreement, the maximum and minimum prices are 12½ cents per bushel higher than those of the 1959 agreement; namely, $2.02½ and $1.162½, respectively, in terms of a basic wheat at a basing point at the head of the Great Lakes.

The new agreement, like previous ones, covers commercial transactions. As defined in the agreement, this excludes such exports as those pursuant to Public Law 480, bilateral barter, and credit sales where the terms do not conform with those prevailing commercially.

The International Wheat Agreement Act of 1949, as amended, authorizes the President, acting through the Commodity Credit Corporation, to make available or cause to be made available, such quantities of wheat and wheat flour and at such prices as are necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States, and to take certain other action necessary in the implementation of the agreement. Pursuant to this authority the Commodity Credit Corporation has made wheat available by making export payments-in-kind on wheat and cash payments on wheat flour, to commercial exporters, and by the sale to commercial exporters of wheat acquired by the Commodity Credit Corporation under its price-support program; all in connection with exports to importing countries which were members of the wheat agreement. The rate of payment on commercial exports represents the difference between the price of wheat on the domestic market and the selling price of such wheat under the agreement. All transactions are reported to the International Wheat Council for recording.

The 1962 agreement recognizes provisional membership to accommodate those countries which participated in the negotiations but whose legislatures do not find it possible to ratify before the agreement comes into force. In such a case an interim instrument is deposited; i.e., an intention to seek acceptance or accession in accordance with the country's constitutional procedures. The provisional membership will expire upon deposit of the full instrument of acceptance or upon expiry of the period granted for its deposit, but in no case later than July 16, 1963.

The accompanying draft legislation is intended to cover all exports by the United States of wheat and wheat flour which qualify to be recorded by the International Wheat Council as commercial purchases by member, and provisional member, importing countries.

The President's budget for fiscal year 1963 assumes that the International Wheat Agreement will be extended, and a proposed appropriation of $81,218,000 is included for this purpose in the budget. In the event that the act is not extended, costs of wheat exports would be financed from funds of the Commodity Credit Corporation.

The Bureau of the Budget advises that enactment of this proposed legislation would be in accord with the President's program.

Sincerely yours,

Orville L. Freeman,
Secretary.

BILLS PASSED OVER

The bill (H.R. 8520) to amend the Soil Conservation and Domestic Allotment Act to limit financial and technical assistance for drainage of certain wet lands, was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H.R. 10743) to amend title 38, United States Code, to provide increases in rates of disability compensation, and for other purposes, was announced as next in order.

Mr. MANSFIELD. Over Mr. President.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3597) to amend title 38, United States Code, to permit for 1 year the granting of national service life insurance to certain veterans heretofore eligible for such insurance, was announced as next in order.

Mr. MANSFIELD. Mr. President, I believe the bill is not the type which should be considered on the basis of a call of the calendar, so I ask that it go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

TWO-YEAR EXTENSION OF SUSPENSION OF DUTIES ON CERTAIN LATHES

The bill (H.R. 11400) to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing, was considered, ordered to a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1808) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

PURPOSE

The purpose of H.R. 11400 is to continue for 2 years, until August 7, 1964, the existing suspension of duties on copying lathes used for making rough or finished shoe lasts from models of shoe lasts and capable of producing more than one size shoe from a single size model of a shoe last.

GENERAL STATEMENT

Public Law 1012 of the 84th Congress, approved August 6, 1956, transferred from the dutiable to the free list of the Tariff Act for a period of 2 years, by amendment of paragraph 1643 of the Tariff Act of 1930, "Copying lathes used for making rough or finished shoe lasts from models of shoe lasts and, in addition, capable of producing more than one size shoe last from a single size model of a shoe last." The suspension of duties has been in effect continuously since that time, 2-year extensions having been enacted on May 16, 1958 (Public Law 85-416), and on June 30, 1960 (Public Law 86-562). H.R. 11400 would continue the suspension for a further 2-year period, until August 7, 1964.

The suspension of duty was made in order to make available to domestic shoe-last manufacturers highly specialized and expensive copying lathes which can only be obtained from foreign sources. The Commerce Department, in recommending enactment of this legislation advised that "the domestic shoe-last manufacturing industry is very much interested in these lathes, since they greatly increase the production of shoe lasts per unit of investment and production costs. This type of equipment is available only from foreign sources. The duty is 13¾ percent, and continuance of the suspension will benefit the shoe-last manufacturing industry without detriment to domestic equipment producers."

The U.S. Tariff Commission states that "it is believed that the lathes being imported are primarily for the use of last manufacturers who find it necessary to replace their older type lathes in order to remain competitive," and that the Commission "has been apprised of no complaints from domestic interests against the suspension of duties."

ARBUCKLE RECLAMATION PROJECT, OKLAHOMA

The Senate proceed to consider the bill (S. 892) to authorize the Secretary of the Interior to construct, operate, and maintain the Arbuckle reclamation project, Oklahoma, and for other purposes, which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 2, line 21, after "(72 Stat. 319)", to insert a comma and "as amended"; on page 3, line 19, after the word "purposes", to insert "so long as the space designated for those purposes may be physically available, taking into account such equitable reallocation of reservoir storage capacities among the purposes served by the project as may be necessary due to sedimentation,"; on page 4, line 10, after the word "to", to strike out "the project water users" and insert "a water users' organization"; on page 6, line 9, after the word "the", to strike out "preservation and propagation" and insert "conservation and development"; and after line 15, to strike out:

SEC. 9. There is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, such sums as may be required to carry out the purposes of this Act.

And, in lieu thereof, to insert:

SEC. 9. There is authorized to be appropriated for construction of the Arbuckle reclamation project the sum of $13,340,000 (March 1962 prices), plus or minus such amounts as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the type of construction involved herein. There are also authorized to be appropriated such additional sums as may be required for the operation and maintenance of the project.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to construct, operate, and maintain the Arbuckle Federal reclamation project, Oklahoma, in accordance with the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto), for the principal purposes of storing, regulating, and furnishing water for municipal, domestic, and industrial use, and for controlling floods and for the conservation and development of fish and wildlife, and the enhancement of recreational opportunities. The project shall consist of the following principal works: A reservoir on Rock Creek near Sulphur, Oklahoma, pumping plants, pipelines, and other conduits for furnishing water for municipal, domestic, and industrial use, and minimum basic recreational facilities.

SEC. 2. In constructing, operating, and maintaining the Arbuckle project, the Secretary shall allocate the costs thereof among different functions resulting from multiple-purpose development under the following conditions:

(a) Allocations to flood control, recreation, and the conservation and development of fish and wildlife shall be nonreimbursable and nonreturnable under the reclamation laws;

(b) Allocations to municipal water supply, including domestic, manufacturing, and industrial uses, shall be repayable to the United States by the water users through contracts with municipal corporations, or other organizations as defined by section 2, Reclamation Project Act of 1939 (53 Stat. 1187) under the provisions of the Federal reclamation laws, and to the extent appropriate, under the Water Supply Act of 1958 (72 Stat. 319), as amended. Such contracts shall be precedent to the commencement of construction of any project unit affecting the individual municipality or industrial users, and shall provide for repayment of construction costs allocated to municipal water supply in not to exceed fifty years from the date water is first delivered for that purpose: *Provided*, That the water users' organization be responsible for the disposal and sale of all water surplus to its requirements, and that the revenues therefrom shall be used by the organization for the retirement of project debt payment, payment of interest, and payment of operation and maintenance cost. The interest rate used for purposes of computing interest during construction and interest on the unpaid balance shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction is initiated, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for fifteen years from date of issue;

(c) Upon the completion of the payment of the water users' construction cost obligation, together with the interest thereon, the water users, their designee or designees, shall (1) have a permanent right to the use of that portion of the project allocable to municipal water supply purposes so long as the space designated for those purposes may be physically available, taking into account such equitable reallocation of reservoir storage capacities among the purposes served by the project as may be necessary due to sedimentation, subject, if the project is then operated by the United States, to payment of a reasonable annual charge to the Secretary of the Interior sufficient to pay all operation and maintenance charges and a fair share of the administrative costs applicable to the project; (2) be conveyed title to such portions of the pipelines and related facilities as are used solely for delivering project water to the water users.

SEC. 3. Contracts may be entered into with the water users' organization pursuant to the provisions of this Act without regard to the last sentence of subsection (c) of section 9 of the Reclamation Project Act of 1939.

SEC. 4. The Secretary is authorized to transfer to a water users' organization the care, operation, and maintenance of the works herein authorized and, if such transfer is made, may deduct from the obligation of the water users the reasonable capitalized equivalent of that portion of the estimated operation and maintenance cost of the undertaking which, if the United States continues to operate the project, would be allocated to flood control and fish and wildlife purposes. Prior to taking over the care, operation, and maintenance of said works, the water users' organization shall obligate itself to operate them in accordance with criteria specified by the Secretary of the Army with respect to flood control and the Secretary of the Interior with respect to fish and wildlife and recreation.

SEC. 5. Construction of the Arbuckle project herein authorized may be undertaken in such units or stages as in the opinion of the Secretary best serve the project requirements and the relative needs for water. Repayment contracts negotiated in connection with each unit or stage of construction shall be subject to the terms and conditions of section 2 of this Act.

SEC. 6. The Secretary may (1) contract for the construction of any part of the minimum basic recreational facilities with any qualified agency of the State of Oklahoma or a political subdivision thereof, and (2) upon conclusion of a suitable agreement with any such agency or political subdivision for assumption of the administration, operation, and maintenance thereof at the earliest practicable date, construct or permit the construction of public park and recreational facilities on lands owned by the United States adjacent to the reservoir of the Arbuckle project, when such use is determined by the Secretary not to be contrary to the public interest, all under such rules and regulations as the Secretary may prescribe. No recreational use of any area to which this section applies shall be permitted which is inconsistent with the laws of the State of Oklahoma for the protection of fish and game and the protection of the public health, safety, and welfare. The Federal costs of constructing the facilities authorized by this section shall be limited to the nonreimbursable costs of the Arbuckle project for minimum basic recreational facilities as determined by the Secretary.

SEC. 7. The Secretary may make such reasonable provision in connection with the works of the Arbuckle Federal reclamation project, in accordance with section 2 of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended, 16 U.S.C. 661, and the following), as he finds to be required for the conservation and development of fish and wildlife.

SEC. 8. Expenditures for Arbuckle Reservoir, and the water supply aqueduct system, may be made without regard to the soil survey and land classification requirements of the Interior Department Appropriation Act, 1954 (43 U.S.C. 390a).

SEC. 9. There is authorized to be appropriated for construction of the Arbuckle reclamation project the sum of $13,340,000 (March 1962 prices), plus or minus such amounts as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the type of construction involved herein. There are also authorized to be appropriated such additional sums as may be required for the operation and maintenance of the project.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1809) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 392, is to authorize construction by the Secretary of the Interior of the multiple-purpose Arbuckle project in south-central Oklahoma. Through the regulation and storage of the flows of Rock Creek, a tributary of the Washita River, the project is designed to provide municipal, domestic, and industrial water supplies, flood control, and fish and wildlife and recreational opportunities.

The communities in the area that would be served by this project have long recognized the need for a dependable water supply but the urgency of the situation became evident during the severe drought of the 1950's. During this period the communities experienced serious shortages of water, even for human consumption and fire protection. At the peak of the drought in 1956, the use of water had to be rationed in the project area. All springs in the area went dry and the water level in the wells dropped as much as 18 feet. While a number of new wells had been drilled recently, the underground water supply is not considered a firm source for meeting the needs in the project area.

In addition to the drought conditions which have prevailed in the area, the communities are experiencing a rapid expansion in population which creates an ever-expanding need for water.

Although the flood-control benefits from the project are not high, they are important. The reservoir would reduce periods of downstream flooding with the suffering and damage consequent thereto. The storage of floodwater in the reservoir during the period of the project operation study, 1922 to 1958, would have prevented all flooding along Rock Creek and reduced the magnitude of floods on the Washita River. Fishing, hunting, and other recreational opportunities in this area are inadequate and the Arbuckle project would assist in meeting these ever-expanding needs.

PLAN OF DEVELOPMENT AND OPERATION

The plan of development provides for construction of the Arbuckle Dam and Reservoir on Rock Creek, a tributary of the Washita River, about 6 miles southwest of the city of Sulphur. The dam would be a rolled-earth type, 139 feet in height, and the reservoir would have a capacity of about 226,000 acre-feet. A total of 45 miles of pipelines, consisting of three separate lines, would deliver water to the project water users. Water treatment and purification would not be a responsibility of the Federal Government.

Municipal and industrial water would be furnished to the cities of Ardmore, Davis, Sulphur, Wynnewood, and the nearby oil refinery. About 58,000 acre-feet of storage is assigned to conservation which would yield about 16½ million gallons of water daily for municipal and industrial use.

The amount of storage assigned to flood control is about 36,000 acre-feet. In addition, there is surcharge storage amounting to 120,000 acre-feet and about 4,000 acre-feet for sediment. The dead storage of the reservoir amounts to about 8,000 acre-feet.

The fish and wildlife plan includes 1,275 acres for wildlife habitat and provides for sport fishing opportunities at the reservoir. Basic recreation facilities for the protection and accommodation of the public are included as a part of the project. These facilities would include access roads, picnic areas, camping, and boating facilities. It is contemplated that recreational facilities will be administered and operated by an appropriate State agency.

The Department has under consideration the acquisition and development of additional lands and improved facilities for recreational purposes. In the discussion of this during the hearings, Assistant Secretary Holum stated that if the decision is made to recommend additional recreational facilities above the minimum basic requirements, the Department would come back to the Congress for the necessary authority.

The water rights necessary for the successful operation of the Arbuckle project have been assured by action of the Oklahoma Water Resources Board.

This legislation authorizes the transfer to the water users' organization of the care, operation, and maintenance of the project works. The organization which will assume this responsibility is the Arbuckle Master Conservancy District which is in the process of organization under Oklahoma State law. It is this organization which will also execute contracts with the United States establishing requirements for water delivery and repayment. The legislation provides that, upon the completion of payment of the water users' obligation, they will have a permanent right to use of that portion of the project storage allocable to municipal water supply purposes.

Mr. KERR subsequently said: Mr. President, I ask unanimous consent that the vote by which the Senate passed Calendar No. 1766, Senate bill 892, be reconsidered.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KERR. Mr. President, I now ask that the Committee on Interior and Insular Affairs be discharged from the further consideration of House bill 23, which has been passed by the House, and is now in the Committee on Interior and Insular Affairs, and is identical with Senate bill 892; and I ask that House bill 23 be considered and passed at this time.

The ACTING PRESIDENT pro tempore. Without objection the Committee on Interior and Insular Affairs will be discharged from the further consideration of House bill 23; and, without objection, the Senate will now proceed to the consideration of House bill 23.

The question now is on the third reading of the bill.

The bill (H.R. 23) to authorize the Secretary of the Interior to construct, operate, and maintain the Arbuckle reclamation project, Oklahoma, and for other purposes, was read the third time, and was passed.

The ACTING PRESIDENT pro tempore. Without objection, Senate bill 892 will be indefinitely postponed.

Mr. KERR. Mr. President, I move that the vote by which House bill 23 was passed be reconsidered.

Mr. ENGLE. Mr. President, I move that the motion to reconsider be laid on the table.

The motion to lay on the table was agreed to.

MINERAL INTERESTS IN CERTAIN PUBLIC LANDS IN ARIZONA

The Senate proceeded to consider the bill (H.R. 10566) to provide for the withdrawal and orderly disposition of mineral interests in certain public lands in Pima County, Ariz., which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 1, line 3, after the word "That", to strike out "(a)"; at the top of page 2, to strike out:

(b) Nothing in this Act shall be construed to preclude a surface owner of any lands described herein from granting to any person or firm the right to prospect or explore for any class of minerals for which mining locations may be made under the United States mining laws on such terms and conditions as may be agreed upon by the surface owner and the prospector, but no mining location shall be made thereon so long as the withdrawal made by this Act is in effect.

After line 8, to strike out:

(c) The surface owner of any lands may at any time after the effective date of the Act, make application to purchase, and the Secretary of the Interior shall sell to such owner, the interests of the United States in any and all minerals within the boundaries of the lands owned by such owner, which lands were patented or otherwise conveyed under the public land laws with a reservation of such minerals to the United States. All sales of such interests shall be made expressly subject to valid existing rights. Before any such sale is consummated, the surface owner shall pay to the Secretary of the Interior the sum of the fair market value of the interests sold, and the cost of appraisal thereof, but in no event less than the sum of $50 per sale and the cost of appraisal of the mineral interests. The Secretary of the Interior shall issue thereupon such instruments of conveyance as he deems appropriate.

And, after line 24, to strike out:

(d) In the event that any of the minerals to be conveyed under subsection (c) of this section are subject to any lease, permit, license, or contract issued under the Mineral Leasing Act, as amended (30 U.S.C. 181 et. seq.), or any other law, then such conveyance shall contain an assignment of all right, title, and interest of the United States in and to such lease, permit license, or contract, including the right to all rentals, royalties, and other payments accruing under such lease, permit, license, or contract after the effective date of such conveyance.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1810) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF BILL

H.R. 10566 as amended would effect a statutory withdrawal of a tract of some 425,000 acres of land in the outskirts of and near Tucson, Ariz. The surface of this land, much of it former stock raising homestead land, is owned by private individuals, but as required by the Stock Raising Homestead Act and Taylor Grazing Act, mineral rights remain in the Federal Government.

A substantial part of the area has been the subject of intensive urban development and private homes have been built on some tracts. Nevertheless, under the mining laws these lands are subject to mineral location, and the committee was informed that purported prospectors or locators have in fact entered upon the yards and land surrounding private dwellings and have dug holes and set up the markers required for staking out a claim.

While as far as is now known the lands have only nominal value, at best, for minerals, nevertheless these locations have a color of right until invalidated by formal action of the Bureau of Land Management for lack of bona fide discovery of commercially valuable minerals. Such action by an agency of the Federal Government necessarily takes time, and meanwhile the homeowners are subject to annoyance, loss of their privacy, and damage to their property. In some instances, homeowners have paid off purported prospectors to rid themselves of the nuisance.

The threat of such "nuisance locations" has deterred the development of the entire tract, and constitutes for practical purposes a cloud on the title.

SALE OF MINERAL ESTATE IN CERTAIN LANDS

The Senate proceeded to consider the bill (H.R. 8134) to authorize the sale of the mineral estate in certain lands, which had been reported from the Committee on Interior and Insular Affairs with amendments, on page 1, after the enacting clause, to strike out "That the Secretary of the Interior be, and he hereby is authorized, at his discretion to sell to the surface owners, and their successors in title, the mineral estate reserved to the United States in the following described lands which were patented under section 8 of the Taylor Grazing Act, as amended (43 U.S.C. 315g):" and insert "That, subject to valid existing rights, the mineral interests of the United States which have been reserved in patents or other conveyances, heretofore issued under the public land laws, in the lands herein described are hereby withdrawn from all forms of appropriation under the public land laws, including the mining and mineral leasing laws, and from disposal under the Act of July 31, 1947, as amended (61 Stat. 681; 30 U.S.C. 601–604):"; and on page 2, after line 18, to strike out:

All sales of the rights of the United States to the mineral estate under the provisions of this Act shall be on condition of payment of the fair market value for such rights, but in no event shall payment be less than $5 per acre, plus the cost of the appraisal thereof.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1811) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

The purpose of H.R. 8134, as amended, is to effect a statutory withdrawal of some 4,500 acres of land near Phoenix, Ariz., from all forms of entry under the public land laws, including the Mining and Mineral Leasing Acts. The lands are former Taylor Grazing Act lands, the surface of which now has passed into private ownership, but with the minerals retained by the Federal Government.

The surface owners desire to develop the area for high quality residential purposes, but are deterred by the possibility of nuisance locations under the mining laws. These laws give any citizen the right to enter upon and prospect for minerals on the lands, even though the surface may be under intensive use for other purposes. The committee was informed that the reservation of minerals to the Federal Government is hindering development of the area by private enterprise.

JURISDICTION OF MUNICIPAL COURT FOR THE DISTRICT OF COLUMBIA IN CIVIL ACTIONS

The Senate proceeded to consider the bill (S. 3322) to increase the jurisdiction of the municipal court for the District of Columbia in civil actions, to change the name of the court, and for other purposes, which had been reported from the Committee on the District of Columbia, with an amendment, to strike out all after the enacting clause and insert:

That the court established by the first section of the Act entitled "An Act to consolidate the Police Court of the District of Columbia and the Municipal Court of the District of Columbia, to be known as 'the Municipal Court for the District of Columbia', to create 'the Municipal Court of Appeals for the District of Columbia', and for other purposes", approved April 1, 1942, as amended (56 Stat. 190; D.C. Code, sec. 11–751), hereafter shall be known as the "District of Columbia Court of General Sessions". Wherever reference is made in any Act of Congress (other than this Act or the amendments made by this Act) or in any regulation to the Municipal Court for the District of Columbia, such reference shall be held to be a reference to the District of Columbia Court of General Sessions.

Sec. 2. Subsection (a) of section 4 of such Act, approved April 1, 1942, as amended (D.C. Code, sec. 11–755(a)), is amended to read as follows:

"(a) The District of Columbia Court of General Sessions, as established by this Act, shall consist of the criminal, civil, and small claims and conciliation, and domestic relations branches. The court and each judge thereof shall have and exercise the same powers and jurisdiction as were heretofore had or exercised by the Municipal Court for the District of Columbia or the judges thereof on the day before the effective date of this amendatory subsection, and in addition the said court shall have exclusive jurisdiction of civil actions commenced after the effective date of this amendatory subsection, including such actions against executors, administrators and other fiduciaries, in which the claimed value of personal property or the debt or damages claimed, does not exceed the sum of $10,000 exclusive of interest and costs, and, in addition, shall have jurisdiction of all cross-claims and counterclaims interposed in all actions over which it has jurisdiction regardless of the amount involved: *Provided, however,* That nothing herein shall deprive the United States District Court for the District of Columbia of jurisdiction over counterclaims, cross-claims, or any other claims whether or not arising out of the same transaction or occurrence and interposed in actions over which the United States District Court for the District of Columbia has jurisdiction. The District of Columbia Court of General Sessions shall also have jurisdiction over all cases properly pending in the Municipal Court for the District of Columbia on the effective date of this amendatory subsection."

Sec. 3. Subsection (a) of section 5 of such Act approved April 1, 1942, as amended (D.C. Code, sec. 11–756(a)), is amended to read as follows:

"(a) If, in any action, other than an action for equitable relief, pending on the effective date of this amendatory subsection or thereafter commenced in the United States District Court for the District of Columbia, it shall appear to the satisfaction of the court at or subsequent to any pretrial hearing but prior to trial thereof that the action will not justify a judgment in excess of $10,000, the court may certify such action to the District of Columbia Court of General Sessions for trial. The pleadings in such action, together with a copy of the docket entries and of any orders theretofore entered therein, shall be sent to the clerk of the said Court of General Sessions, together with any deposit for costs, and the case shall be called for trial in that court promptly thereafter; and shall thereafter be treated as though it had been filed originally in the said Court of General Sessions, except that the jurisdiction of that court shall extend to the amount claimed in such action, even though it exceed the sum of $10,000."

Sec. 4. Subsection (c) of section 5 of such Act approved April 1, 1942, as amended (D.C. Code, sec. 11–756(c)), is amended to read as follows:

"(c) The District of Columbia Court of General Sessions shall have the power to compel the attendance of witnesses by attachment and any judge thereof shall have the power in any case or proceeding whether civil or criminal to punish for disobedience of any order, or contempt committed in the presence of the court by a fine not exceeding $50 or imprisonment not exceeding thirty days. At the request of any party subpoenas for attendance at a hearing or trial in the District of Columbia Court of General Sessions shall be issued by the clerk of the said court. A subpoena may be served at any place within the District of Columbia, or at any place without the District of Columbia that is within one hundred miles of the place of the hearing or trial specified in the subpoena. The form, issuance and manner of service of a subpoena shall be as prescribed by rule 45 of Federal Rules of Criminal Procedure."

Sec. 5. (a) Section 1114 of the Act entitled "An Act to establish a code of law for the District of Columbia", approved March 3, 1901 (31 Stat. 1189; D.C. Code, sec. 11–1520), is hereby repealed.

(b) The paragraph relating to witness fees under the heading "District of Columbia" in the Act entitled "An Act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June thirtieth, nineteen hundred and two, and for prior years, and for other purposes", approved July 1, 1902 (32 Stat. 552, 561; D.C. Code, sec. 11–1520a), is amended by striking "cases in the police court of the District of Columbia" and inserting in lieu thereof "criminal cases in the District of Columbia Court of General Sessions".

(c) The fees and travel allowances to be paid any witness compelled by subpoena to attend any branch of the District of Columbia Court of General Sessions other than the criminal branch shall be the same amount as paid a witness compelled to attend before the United States District Court for the District of Columbia.

Sec. 6. The court established by section 6 of the Act of April 1, 1942 (56 Stat. 190; D.C. Code, sec. 11–771), hereafter shall be known as the "District of Columbia Court of Appeals". Wherever reference is made in any Act of Congress (other than this Act) or in any regulation to The Municipal Court of Appeals for the District of Columbia, such reference shall be held to be a reference to the District of Columbia Court of Appeals.

Sec. 7. This Act shall take effect on the first day of the first month which begins after the sixtieth day following the date of its enactment.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1812) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Committee on the District of Columbia, to whom was referred the bill (S. 3322) to increase the jurisdiction of the municipal court for the District of Columbia in civil actions, to change the name of the court, and for other purposes, after full consideration, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof a substitute amendment for the bill.

The purpose of this bill as amended is fourfold and its enactment would accomplish the following:

1. Increase the ad damnum jurisdiction of the municipal court of the District of Columbia in civil cases from $3,000 to $10,000;

2. Increase the subpena powers of the municipal court of the District of Columbia to an area without the boundaries of the District;

3. Allow the District Court for the District of Columbia to certify actions to the municipal court which will not justify a judgment in excess of $10,000; and

4. Change the name of the municipal court for the District of Columbia to the District of Columbia court of general sessions, and also change the name of the municipal court of appeals for the District of Columbia to the District of Columbia court of appeals.

The act of April 1, 1942 (56 Stat. 190), consolidated the police court of the District of Columbia and the municipal court of the District of Columbia. A provision of that act set the ad damnum jurisdiction of the newly established municipal court at $3,000. Since enactment of the 1942 statute, there has been a steady rise in costs incident to damage claims. Naturally this has resulted in a greater number of judgments being returned that are in excess of the $3,000 jurisdictional amount. The effect has been to preclude plaintiffs from filing their action in the municipal court. The enactment of S. 3322 will in some measure alleviate this situation and make it again possible for the municipal court to have jurisdiction more in keeping with the intent of Congress when the court was consolidated with the police court some 20 years ago. It also would have the effect of relieving the congested calendars of the U.S. District Court for the District of Columbia of the cases involving relatively small amounts claimed and thus free Federal judges for consideration of the many more and far-reaching classes of litigation that come before it as a Federal court. Further, it will make the minimum ad damnum jurisdiction conform generally with that of the other U.S. district courts.

At the present time, a civil jury action filed in the municipal court entails a waiting period of approximately 3 months before the case can proceed to trial, while in the district court the waiting period is about 20 months. By increasing the ad damnum jurisdiction of the municipal court for the District of Columbia, as provided in the bill, this will allow many cases to be filed in the municipal court, and consequently be brought to trial much sooner than if they were docketed in the district court.

Section 3 of the bill provides authority for the district court to certify actions to the municipal court if it shall appear to the satisfaction of the courts, at or subsequent to any pretrial hearing but prior to trial thereof, that the action will not justify a judgment in excess of $10,000. Under the terms of this section an action so certified shall be treated as though it had been filed originally in the said municipal court, except that the jurisdiction of that court shall extend to the amount claimed in such action, even though it exceeds the sum of $10,000.

In conjunction with the increased ad damnum jurisdiction of the municipal court, section 4 of the bill provides for subpenas to be served beyond the territorial limits of the District of Columbia. This particular section specifically provides that a subpena can be served within 100 miles of the place of the hearing or trial specified in the subpena. In connection with this increased subpena power the court has power to compel the attendance of witnesses by attachment and to punish for disobedience of any order. The aforementioned are important considerations for the reason that it will make possible the municipal court acquiring jurisdiction over witnesses in the entire Washington metropolitan area, and thus enable the court to dispose speedily and competently of the actions coming within its jurisdiction.

Section 5 of the bill makes provision for increasing fees and travel allowances of witnesses subpenaed to the municipal court in civil cases. This particular section amends existing law so as to enable such witnesses to receive the same compensation and travel allowances as are paid witnesses compelled to attend the U.S. District Court for the District of Columbia. The provision makes no change in the fees paid to witnesses subpenaed to the criminal branch of the court.

Sections 1 and 6 of the bill, respectively, provide for changing the name of the Municipal Court of the District of Columbia to the "District of Columbia Court of General Sessions"; and changing the name of the Municipal Court of Appeals for the District of Columbia to the "District of Columbia Court of Appeals."

In recognition of the fact that the jurisdiction of the municipal court for the District is broader and more diversified than the jurisdiction of municipal courts of most cities in the United States, it was the view of the supporters of the bill that by changing the name of the municipal court to the "District of Columbia Court of General Sessions" the court would be assuming a name that would be more appropriate and commensurate with the court's jurisdiction and related responsibilities. Likewise, the Municipal Court of Appeals for the District of Columbia was renamed in order to conform it to the renaming of the municipal court.

The Judiciary Subcommittee of this committee held public hearings on the bill on June 14, 1962, at which time the subcommittee was informed that the principal provisions of the bill were supported by the 1961 Judicial Conference of the District of Columbia Circuit. The subcommittee was further informed that during the 1961 judicial conference a resolution was adopted proposing the enlargement of the municipal court's jurisdiction, and also changing the name of the court to the "District of Columbia Court of General Sessions." After adoption of the resolution a special committee under the jurisdiction of the judicial conference was appointed to study and draft legislation to implement the intent of the resolution.

In late 1961, the special committee finished its study of the matter and also proposed drafts of enacting legislation. In its report, the special committee thought it wise to also include provisions allowing for extraterritorial service of subpenas and also establish a limitation on the time when the district court can certify actions to the municipal court for trial.

The subcommittee was informed at the public hearing that the Bar Association for the District of Columbia has reviewed the pending bill and strongly endorses its enactment. Likewise the Washington Bar Association, the Justice Department, the Bureau of the Budget, and the Commissioners for the District of Columbia have indicated to the committee their approval of the measure. In addition, the committee has been informed that the chief judges of the Municipal Court for the District of Columbia, the Municipal Court of Appeals for the District of Columbia, the U.S. District Court for the District of Columbia, and the U.S. Court of Appeals for the District of Columbia Circuit favor the enactment of this legislation.

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to the consideration of the companion bill, H.R. 12708.

The Senate proceeded to consider the bill (H.R. 12708) to increase the jurisdiction of the Municipal Court for the District of Columbia in civil actions, to change the names of the court, and for other purposes.

The ACTING PRESIDENT pro tempore. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 12708) was ordered to a third reading, was read the third time, and passed.

The ACTING PRESIDENT pro tempore. Without objection, S. 3322 will be indefinitely postponed.

GIFTS TO MINORS IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (S. 3146) to amend the act concerning gifts to minors in the District of Columbia which had been reported from the Committee on the District of Columbia, with amendments, on page 4, line 2, after the word "as", to insert "a security, or any certificate of interest or participation in, any temporary or"; on page 9, after line 10, to strike out:

SEC. 5. (a) A custodian shall be entitled to reimbursement from the custodial property for his reasonable expenses incurred in the performance of his duties.

(b) A custodian may act without compensation for his services.

(c) Unless the custodian is a donor, he may receive from the custodial property reasonable compensation for his services determined by one of the following standards in the following order:

(1) A direction by the donor when the gift was made;

(2) Any statute of the District of Columbia applicable to custodians;

(3) Any statute of the District of Columbia applicable to guardians;

(4) An order of the court.

(d) Except as otherwise provided in this Act, a custodian shall not be required to give a bond for the performance of his duties.

(e) A custodian not compensated for his services shall not be liable for losses to the custodial property unless they result from his bad faith, intentional wrongdoing, or gross negligence or from his failure to maintain the standard of prudence in investing the custodial property provided in this Act.

And, in lieu thereof, to insert:

Sec. 5. (a) A custodian shall be entitled to reasonable compensation for his services and to reimbursement from the custodial property for his reasonable expenses incurred in the performance of his duties: *Provided*, That a custodian may act without compensation for his services.

(b) Compensation shall be according to:

(1) Any statute of the District of Columbia applicable to custodians;

(2) Any statute of the District of Columbia applicable to guardians;

(3) An order of the court.

(c) Except as otherwise provided in this Act, a custodian shall not be required to give a bond for the performance of his duties.

(d) A custodian not compensated for his services shall not be liable for losses to the custodial property unless they result from his bad faith, intentional wrongdoing, or gross negligence or from his failure to maintain the standard of prudence in investing the custodial property provided in this Act.

And, on page 14, after line 23, to insert:

(c) Nothing herein shall be deemed to repeal or modify the Internal Revenue Code of 1954, as amended, and the District of Columbia Income and Franchise Tax Act of 1947, as amended.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act concerning gifts of securities to minors in the District of Columbia", approved August 3, 1956 (70 Stat. 1028; D.C. Code, sec. 21–214), is amended to read as follows:

"Section 1. As used in this Act, the following terms shall have the meaning ascribed to each:

"(1) 'Adult': one who has attained the age of twenty-one years.

"(2) 'Bank': any person or association of persons carrying on the business of banking, whether incorporated or not, in the District of Columbia.

"(3) 'Broker': one who is lawfully engaged in the business of effecting transactions in securities for the account of others; a bank which effects such transactions; and one who is lawfully engaged in buying and selling securities for his own account, through a broker or otherwise, as a part of a regular business.

"(4) 'Court': The United States District Court for the District of Columbia.

"(5) 'Custodial property':

"(A) All securities and money under the supervision of the same custodian for the same minor as a consequence of a gift or gifts made to the minor in the manner prescribed in this Act;

"(B) The income from the custodial property; and

"(C) The proceeds, immediate and remote, from the sale, exchange, conversion, investment, reinvestment, or other disposition of such securities, money, and income.

"(6) 'Custodian': one so designated in the manner prescribed in this Act.

"(7) 'Guardian of a minor': the general guardian, guardian, tutor, or curator of the minor's property, estate or person.

"(8) 'Issuer': one who places or authorizes the placing of his name on a security (other than as a transfer agent) to evidence that it represents a share, participation or other interest in his property or in an enterprise or to evidence his duty or undertaking to perform an obligation evidenced by the security, or who becomes responsible for or in place of any such person.

"(9) 'Legal representative': the executor or the administrator, general guardian, committee, conservator, tutor, or curator of a person's property or estate.

"(10) 'Member of a minor's family': any of the minor's parents, grandparents, brothers, sisters, uncles, and aunts, whether of the whole blood or the half blood, or by or through legal adoption.

"(11) 'Minor': one who has not attained the age of twenty-one years.

"(12) 'Security': any note, stock, treasury stock, bond, debenture, evidence of indebtedness, certificate of interest or participation in an oil, gas, or mining title or lease or in payments out of production under such a title or lease, collateral trust certificate, transferable share, voting trust certificate, or, in general, any interest or instrument commonly known as a security, or any certificate of interest or participation in, any temporary or an interim certificate, receipt, or certificate of deposit for, or any warrant or right to subscribe to or purchase, any of the foregoing. 'Security' does not include a security of which the donor is the issuer. A 'security' is in 'registered form' when it specifies a person entitled to it or to the right it evidences and its transfer may be registered upon books maintained for that purpose by or on behalf of the issuer.

"(13) 'Transfer agent': one who acts as authenticating trustee, transfer agent, registrar, or other agent for an issuer in the registration of transfers of its securities or in the issue of new securities or in the cancellation of surrendered securities.

"(14) 'Trust company': a bank authorized to exercise trust powers.

"Sec. 2. (a) An adult may, during his lifetime, make a gift of a security or money to one who is a minor on the date of the gift, if the subject of the gift is a security—

"(1) in registered form, by registering it in the name of the donor, another adult, or a trust company, followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act';

"(2) not in registered form, by delivering it to an adult other than the donor or a trust company, accompanied by a statement of gift in the following form, in substance, signed by the donor and the designated custodian:

"GIFT UNDER THE DISTRICT OF COLUMBIA UNIFORM GIFTS TO MINORS ACT

"I, (name of donor), hereby deliver to (name of custodian) as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act, the following security(ies): (insert an appropriate description of the security or securities delivered sufficient to identify it or them).

------------------------ (signature of donor).

Dated:-------------------

(Name of custodian) hereby acknowledges receipt of the above described security(ies) as custodian for the above minor under the above Act.

------------------------ (signature of donor).

Dated:-----------------

"(3) If the subject of the gift is money, by paying or delivering it to a broker or a bank for credit to an account in the name of the donor, another adult, or a bank with trust powers, followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act'.

"(b) Any gift made in the manner prescribed in subsection (a) may be made to only one minor.

"(c) A donor who makes a gift to a minor as prescribed in subsection (a) shall promptly do all things within his power to put the subject of the gift in the possession and control of the custodian, but neither the donor's failure to comply with this subsection, nor his designation of an ineligible person as custodian, nor renunciation by the person designated as custodian shall affect the consummation of the gift.

"Sec. 3. (a) A gift made as prescribed in this Act shall be irrevocable and convey to the minor indefeasibly vested legal title to the security or money given, but no guardian of the minor shall have any right, power, duty, or authority with respect to the custodial property except as provided in this Act.

"(b) By making a gift in the manner prescribed in this Act, the donor incorporates in his gift all the provisions thereof and grants to the custodian, and to any issuer, transfer agent, bank, broker, or third person dealing with a custodian, the respective powers, rights, and immunities provided in this Act.

"Sec. 4. (a) Only one person may be the custodian. He shall collect, hold, manage, invest, and reinvest the custodial property.

"(b) The custodian shall pay over to the minor for expenditure by him, or expend for the minor's benefit, so much of or all the custodial property as the custodian deems advisable for the support, maintenance, education, and benefit of the minor in the manner, at the time or times, and to the extent that the custodian in his discretion deems suitable and proper, with or without court order, with or without regard to the duty of himself or of any other person to support the minor or his ability to do so, and with or without regard to any other income or property of the minor which may be applicable or available for any such purpose.

"(c) The court, on the petition of a parent or guardian of the minor or of the minor, if he has attained the age of fourteen years, may order the custodian to pay over to the minor for expenditure by him or to expend so much of or all the custodial property as is necessary for the minor's support, maintenance, or education.

"(d) To the extent that the custodial property is not so expended, the custodian shall deliver or pay it over to the minor on his attaining the age of twenty-one years or, if the minor dies before attaining that age, he shall thereupon deliver or pay it over to the estate of the minor.

"(e) The custodian, notwithstanding statutes restricting investments by fiduciaries, shall invest and reinvest the custodial property as would a prudent person of discretion and intelligence who is seeking a reasonable income and the preservation of capital, except that he may, in his discretion and without liability to the minor or his estate, retain a security given to the minor in the manner prescribed in this Act.

"(f) The custodian may sell, exchange, convert, or otherwise dispose of custodial property in the manner, at the time or times, for the price or prices, and upon the terms he deems advisable. He may vote in person or by general or limited proxy a security which is custodial property. He may consent, directly or through a committee or other agent, to the reorganization, consolidation, merger, dissolution, or liquidation of an issuer, a security which is custodial property, and to the sale, lease, pledge, or mortgage of any property by or to such an issuer, and to any other action by such an issuer. He may execute and deliver any and all instruments in writing which he deems advisable to carry out any of his powers as custodian.

"(g) The custodian shall register each security which is custodial property and in registered form in the name of the custodian, followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act'. He shall hold all money which is custodial property in an account with a broker or in a bank in the name of the custodian, followed, in substance, by the same words. He shall keep all other custodial property separate and distinct from his own property in a manner to identify it clearly as custodial property.

"(h) The custodian shall keep records of all transactions with respect to the custodial property, and make them available for inspection at reasonable intervals by a parent or legal representative of the minor or by the minor, if he has attained the age of fourteen years.

"(i) A custodian shall have and hold as powers in trust, with respect to the custodial property, in addition to the rights and powers provided in this Act, all the rights and powers which a guardian has with respect to property not held as custodial property.

"Sec. 5. (a) A custodian shall be entitled to reasonable compensation for his services and to reimbursement from the custodial property for his reasonable expenses incurred in the performance of his duties: *Provided*, That a custodian may act without compensation for his services.

"(b) Compensation shall be according to:

"(1) Any statute of the District of Columbia applicable to custodians;

"(2) Any statute of the District of Columbia applicable to guardians;

"(3) An order of the court.

"(c) Except as otherwise provided in this Act, a custodian shall not be required to give a bond for the performance of his duties.

"(d) A custodian not compensated for his services shall not be liable for losses to the custodial property unless they result from his bad faith, intentional wrongdoing, or gross negligence or from his failure to maintain the standard of prudence in investing the custodial property provided in this Act.

"Sec. 6. (a) Only an adult member of the minor's family, a guardian of the minor, or a trust company shall be eligible to become successor custodian. A successor custodian shall have all the rights, powers, duties, and immunities of a custodian designated in the manner prescribed by this Act.

"(b) A custodian, other than the donor, may resign and designate his successor by—

"(1) executing an instrument of resignation designating the successor custodian; and

"(2) causing each security which is custodial property and in registered form to be registered in the name of the successor custodian followed, in substance, by the words: 'as custodian for (name of minor) under the District of Columbia Uniform Gifts to Minors Act'; and

"(3) delivering to the successor custodian the instrument of resignation, each security registered in the name of the successor custodian, and all other custodial property, together with any additional instruments required for the transfer thereof.

"(c) A custodian, whether or not a donor, may petition the court for permission to resign and for the designation of a successor custodian.

"(d) If the person designated as custodian is not eligible, renounces or dies before the minor attains the age of twenty-one years, the guardian of the minor shall be successor custodian. If the minor has no guardian, a donor, his legal representative, the legal representative of the custodian, an adult member of the minor's family, or the minor, if he has attained the age of fourteen years, may petition the court for the designation of a successor custodian.

"(e) A donor, the legal representative of a donor, an adult member of the minor's family, a guardian of the minor or the minor, if he has attained the age of fourteen years, may petition the court that, for cause shown in the petition, the custodian be removed and a successor custodian be designated or, in the alternative, that the custodian be required to give bond for the performance of his duties.

"(f) Upon the filing of a petition as provided in this section, the court shall grant an order, directed to the persons and returnable on such notice as the court may require, to show cause why the relief prayed for in the petition should not be granted and, in due course, grant such relief as the court finds to be in the best interests of the minor.

"Sec. 7. (a) The minor, if he has attained the age of fourteen years, or the legal representative of the minor, an adult member of the minor's family, or a donor or his legal representatives may petition the court for an accounting by the custodian or his legal representative.

"(b) The court, in a proceeding under this Act or otherwise, may require or permit the custodian or his legal representative to account and, if the custodian is removed, shall so require and order delivery of all custodial property to the successor custodian and the execution of all instruments required for the transfer thereof.

"Sec. 8. No issuer, transfer agent, bank, broker, or other person acting on the instructions of or otherwise dealing with any person purporting to act as a donor or in the capacity of a custodian shall be responsible for determining whether the person designated by the purported donor or purporting to act as a custodian has been duly designated or whether any purchase, sale, or transfer to or by or any other act of any person purporting to act in the capacity of custodian is in accordance with or authorized by this Act, and shall not be obliged to inquire into the validity or propriety under the provisions of this Act of any instrument or instructions executed or given by a person purporting to act as a donor or in the capacity of a custodian, and shall not be bound to see to the application by any person purporting to act in the capacity of a custodian of any money or other property paid or delivered to him.

"Sec. 9. (a) The provisions of this Act shall be construed to effectuate the general purpose thereof to make uniform the law of those States which enact such provisions.

"(b) This Act shall not be construed as providing an exclusive method for making gifts to minors.

"Sec. 10. If any provision of this Act or the application thereof is held invalid, the other provisions or applications of such provisions shall not be affected thereby.

"Sec. 11. This Act may be cited as the 'District of Columbia Uniform Gifts to Minors Act'."

Sec. 2. (a) All laws or parts of laws in conflict with any provision of this Act are hereby repealed.

(b) The amendments made to the Act of August 3, 1956 (70 Stat. 1028; D.C. Code, secs. 21–214 et seq.), by the first section of this Act shall not affect any right or liability under such Act of August 3, 1956, existing on December 31, 1962.

(c) Nothing herein shall be deemed to repeal or modify the Internal Revenue Code of 1954, as amended, and the District of Columbia Income and Franchise Tax Act of 1947, as amended.

Sec. 3. This Act shall take effect January 1, 1963.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House bill 11018.

The **ACTING PRESIDENT** pro tempore. Is there objection?

There being no objection, the Senate proceeded to consider the bill (H.R. 11018) to amend the act concerning gifts to minors in the District of Columbia.

The bill was ordered to a third reading, was read the third time, and passed.

The **ACTING PRESIDENT** pro tempore. Without objection, Senate bill 3146 is indefinitely postponed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1813) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

The Committee on the District of Columbia, to whom was referred the bill (S. 3146) to amend the act concerning gifts to minors in the District of Columbia, after full consideration, report favorably thereon with amendments and recommend that the bill as amended do pass.

The amendments are as follows:

Page 4, line 2, after the word "as" insert the words "a security, or any certificate of interest or participation in, any temporary or".

Page 7, line 13, after the word "pay" insert the word "it".

Pages 9 and 10, strike lines 9 through 23 and lines 1 through 10, respectively, and insert in lieu thereof the following:

"Sec. 5. (a) A custodian shall be entitled to reasonable compensation for his services and to reimbursement from the custodial property for his reasonable expenses incurred in the performance of his duties: *Provided*, That a custodian may act without compensation for his services.

"(b) Compensation shall be according to—

"(1) Any statute of the District of Columbia applicable to custodians;

"(2) Any statute of the District of Columbia applicable to guardians;

"(3) An order of the court.

"(c) Except as otherwise provided in this Act, a custodian shall not be required to give a bond for the performance of his duties.

"(d) A custodian not compensated for his services shall not be liable for losses to the custodial property unless they result from his bad faith, intentional wrongdoing, or gross negligence or from his failure to maintain the standard of prudence in investing the custodial property provided in this Act."

Page 14, after line 3, insert a new subsection (c) as follows:

"(c) Nothing herein shall be deemed to repeal or modify the Internal Revenue Code of 1954, as amended, and the District of Columbia Income and Franchise Tax Act of 1947, as amended."

The purpose of the bill is to amend existing law by substituting the Uniform Gifts to Minors Act for the present District of Columbia Model Gifts to Minors Act (Public Law 976, 84th Cong.; 70 Stat. 1028). The effect will be to broaden the old "model" law to permit gifts of money, as well as securities, and to enlarge the choice of custodians.

The Model Act, Public Law 976, 84th Congress, was enacted "to facilitate gifts of stock and other securities to minor children within the District of Columbia." It applied "only to gifts of securities to a minor child." (S. Rept. 2663; H. Rept. 2607, 84th Cong.)

The Model Act was enacted in 14 States and the District of Columbia. It removed certain legal obstacles and made possible outright gifts of securities to a minor by using prescribed words of registration and, at the same time, reserved the power of management to a custodian until the minor attained his majority. Of the 14 States which originally enacted the model law, 11 have replaced it with the Uniform Act. Forty-seven States as of now have adopted the Uniform Act. Only three States (Alaska, Georgia, and New Jersey) and the District of Columbia still use the model law.

BILL PASSED OVER

The bill (S. 3010) to amend the act entitled "An act to provide for commitments to, maintenance in, and discharges from, the District Training School and for other purposes," approved March 3, 1925, as amended, was announced as next in order.

Mr. MANSFIELD. Mr. President, over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

MOTOR VEHICLE AND TRAILER LIENS IN THE DISTRICT OF COLUMBIA

The bill (S. 3013) to amend the act of July 2, 1940, as amended, relating to the recording of liens on motor vehicles and trailers registered in the District of Columbia, so as to eliminate the requirement that an alphabetical file of such liens be maintained was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Act entitled "An Act to provide for the recording and releasing of liens by entries on certificates of title for motor vehicles and trailers, and for other purposes", approved July 2, 1940, as amended (54 Stat. 736, 738; sec. 40–706, D.C. Code, 1951 edition), is amended by striking from the sixth sentence "each of two cards" and "cards" and inserting in lieu thereof respectively "a card" and "card", and by striking from the eighth sentence "each of the said cards" and inserting in lieu thereof "the said card".

SEC. 2. Section 7 of such Act approved July 2, 1940 (sec. 40–707, D.C. Code, 1951 edition), is amended by striking "cards" wherever such word appears in the first sentence and inserting in lieu thereof "a card", and by striking "each of said cards" in the second sentence and inserting in lieu thereof "said card".

SEC. 3. Section 8 of such Act approved July 2, 1940 (sec. 40–708, D.C. Code, 1951 edition), is amended by striking from the second sentence "each of the cards" and inserting in lieu thereof "the card", and by striking from the third sentence "each of the cards" and inserting in lieu thereof "the said card".

SEC. 4. Section 11 of such Act approved July 2, 1940 (sec. 40–711, D.C. Code, 1951 edition), is amended by striking from the first sentence "each of the cards" and inserting in lieu thereof "the card", and by striking from the last sentence "cards" and inserting in lieu thereof "card".

SEC. 5. Section 13 of such Act approved July 2, 1940 (sec. 40–713, D.C. Code, 1951 edition), is amended by striking "files wherein he shall file one set of the cards hereinbefore described alphabetically under the name of owner and the other", and inserting in lieu thereof "a file wherein he shall file a set of cards hereinbefore described".

SEC. 6. Alphabetical files established and maintained in accordance with the requirements of section 13 of such Act approved July 2, 1940, may, with the approval of the Commissioners of the District of Columbia, be destroyed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1815) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Committee on the District of Columbia, to whom was referred the bill (S. 3013) to amend the act of July 2, 1940, as amended, relating to the recording of liens on motor vehicles and trailers registered in the District of Columbia, so as to eliminate the requirement that an alphabetical file on such liens be maintained, after full consideration, report favorably thereon without amendment and recommend that the bill do pass.

The purpose of the bill is to amend the act of July 2, 1940, which requires the recording and releasing of liens by entries on certificates of title for motor vehicles and trailers registered in the District of Columbia. Provision is made in such act for the maintenance by the Recorder of Deeds of two card files, one an alphabetical file, the other a file by trade name and engine number of motor vehicles and trade name and serial number of trailers. The alphabetical file maintained by the Recorder of Deeds is in addition to an alphabetical file carrying identical information maintained in the Department of Motor Vehicles.

In view of the fact that the District of Columbia now is maintaining two alphabetical files relating to liens on motor vehicles and trailers, the committee believes it would be desirable both from the standpoint of conserving space and of saving the services of personnel if one of the two alphabetical files could be eliminated. Accordingly, enactment of this bill is recommended by the Commissioners of the District of Columbia, as it will amend the act of July 2, 1940, and thereby allow the Recorder of Deeds to dispense with the maintenance of an alphabetical file.

Enactment of S. 3013 will result in a saving to the District both in terms of space and in terms of personal services.

CUSTODY OF PERSONAL PROPERTY BY METROPOLITAN POLICE DEPARTMENT

The Senate proceeded to consider the bill (S. 3317) to amend provisions of law relating to personal property coming into the custody of the property clerk, Metropolitan Police Department, and for other purposes which had been reported from the Committee on the District of Columbia with an amendment on page 8, line 25, after the word "liens", to strike out the period and "The proceeds of such sale, after deducting the expenses thereof and all other expenses incident to such custody, shall be deposited in the Treasury to the credit of the District of Columbia", and insert a semicolon and "except that the proceeds of such sale shall be available, first, for the payment of all expenses incident to such sale and custody; second, for the payment of such liens so declared null and void; third, for payment to the owner in accordance with subsection (a) of this section; and the remainder, if any, shall be deposited in the Treasury of the United States to the credit of the District of Columbia"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 413 of the Revised Statutes of the United States relating to the District of Columbia, as amended (sec. 4–156, D.C. Code, 1961 edition), is amended by adding thereto the following subsection:

"(e) Whenever the owner of property in the custody of the property clerk has been notified by the property clerk, by registered or certified mail, to take possession of such property within thirty days after the date of mailing of such notification, and such owner fails so to do within such period, such property shall be thereafter treated as other unclaimed, abandoned, or lost property and shall be disposed of as provided in section 417 of this chapter: *Provided,* That if, in the opinion of the property clerk, such property has no salable value, and if within thirty days after the date of mailing such notification such property is not reclaimed by its owner and removed by him from the custody of the property clerk, such property shall be disposed of by destruction or otherwise, as the Commissioners of the District of Columbia by regulation or order shall provide."

SEC. 2. Section 416 of the Revised Statutes of the United States relating to the District of Columbia, as amended (sec. 4–159, D.C. Code, 1961 edition), is amended to read as follows:

"SEC. 416. (a) All property or money taken on suspicion of having been feloniously obtained, or of being the proceeds of crime, and for which there is no other claimant than the person from whom such property was taken, and all lost property coming into possession of any member of the police force, and all property and money taken from pawnbrokers as the proceeds of crime or from persons alleged to be insane, intoxicated, or otherwise incapable of taking care of themselves, shall be transmitted as soon as practicable to the property clerk to be fully registered and advertised for the benefit of all parties interested, and for the information of the public as to the amount and disposition of the property so taken into custody by the police.

"(b) (1) Whenever any money or property of a deceased person of a value of less than $1,000 coming into the custody of the property clerk shall remain in his custody for a period of six months or more without being claimed and repossessed by the next of kin or the legal representative of such deceased person, such money or property shall be disposed of as lost or abandoned property as provided in section 417 of this chapter: *Provided,* That prior to the disposition of such property of a deceased person it shall be the duty of the property clerk to ascertain whether there is pending in the United States District Court for the District of Columbia any petition seeking the appointment of a legal representative of such deceased person, and, if such a petition is pending in such court, the property clerk shall not dispose of such property until final disposition by the court of such petition: *Provided further,* That in any case where the property clerk acquires actual knowledge that a petition for the appointment of a legal representative of such deceased person has been filed or is pending in a court outside of the District of Columbia, the property clerk shall not dispose of such property until final disposition by the court of such petition.

"(b) (2) Whenever any money or property of a deceased person shall be of a value of $1,000 or more and shall have remained in the custody of the property clerk for at least six months, all records pertaining to the same shall be referred by the property clerk to the Corporation Counsel of the District of Columbia for the purpose of instituting appropriate proceedings to effect the appointment of an administrator of the estate of such decedent: *Provided,* That upon expiration of the time for final settlement of such estate under law then in effect, the residue thereof in the absence of any claim by the heirs-at-law or next of kin of the decedent, as provided by law, shall be deposited into the Registry of the Probate Court, and upon the expiration of a period of three years, no demand having been made upon such funds by lawful heirs or other rightful claimants, the amount so deposited in such registry shall be deposited in the Treasury to the credit of the District of Columbia: *Provided further,* That if the administrator does not take possession of such property within three months from the date of his appointment, the property clerk may, after giving such administrator thirty days' notice by registered or certified mail, sell such property at public auction, and, after deducting the expenses of such sale, and expense incident to the maintenance of custody of such property, shall pay the remaining proceeds of such sale over to such administrator.

"(c) Whenever the property clerk has custody of any property belonging to any person who has been adjudged of unsound mind and a committee has been appointed for such person but fails to take possession of the property of such person in the custody of the property clerk within six months from the date of such committee's appointment, the property clerk shall give such committee sixty days' notice by registered or certified mail of his intention to sell such property at public auction or otherwise dispose of such property in accordance with law. If, upon the expiration of such sixty days' notice, the committee has not taken custody of such property, (a) the property clerk is authorized to sell such property at public auction, and, after deducting the expenses of the sale, expenses incident to the maintenance and custody of such property, and any amounts due the District of Columbia for care and maintenance of the adjudicated patient, shall pay the remaining proceeds of the sale over to such committee, or (b) if in the opinion of the property clerk any such property has no salable value, he is authorized to dispose of such property by destruction or otherwise as the Commissioners of the District of Columbia shall, by regulation or order, determine.

"(d)(1) The said Commissioners are authorized, in their discretion, to store in any commercial warehouse or garage in the District of Columbia, or in or on any facility under the jurisdiction of the District of Columbia, any property coming into the custody of the property clerk pursuant to this chapter, including vehicles impounded by any officer or member of the Metropolitan Police force.

"(2) The Commissioners are authorized to fix, by regulation, the fees to be charged to reimburse the District of Columbia for the cost of services rendered by the Metropolitan Police force in taking custody of and protecting such property and for the cost of storing such property in any commercial warehouse or garage, and whenever any such property is stored in or on any facility under the jurisdiction of the District of Columbia, the Commissioners shall fix the storage fee in an amount reasonably estimated by them to be the value of the storage service rendered for each day during which such property is so stored, and to collect all such fees due and owing for such property before releasing such property to its owner or his legal representative: *Provided,* That the Commissioners are authorized, in their discretion, to waive the charging and collecting of such fees for property taken into custody as evidence, the proceeds of crime, or from persons supposed to be insane: *Provided further,* That the property clerk is authorized to sell at public auction pursuant to subsection (a) of section 417 of this chapter any property stored in a commercial garage or warehouse, when the storage charges for such property exceed 75 per centum of its value as determined by the property clerk, regardless of the amount of time for which such property is required by other sections of this chapter to be held by the property clerk.

"(3) Fees collected by reason of this section shall be deposited in the Treasury to the credit of the District of Columbia."

Sec. 3. Subsections (a), (b), and (c) of section 306 of the Act approved June 29, 1953 (67 Stat. 101, ch. 159), are hereby repealed.

Sec. 4. Section 417 of the Revised Statutes of the United States relating to the District of Columbia, as amended (sec. 4-160, D.C. Code, 1961 edition), is amended to read as follows:

"Sec. 417. (a) All property, except perishable property and animals and property of insane persons, not otherwise disposed of in accordance with section 416 of this chapter, that shall remain in the custody of the property clerks for not less than ninety days, except motor vehicles which shall be held for not less than sixty days, without being claimed and repossessed, shall, after having been three times advertised in a daily newspaper of general circulation published in the District of Columbia, be sold at public auction, and the proceeds of such sale, after deducting the expenses of the sale, and all other expenses incident to such custody, having been retained by the said property clerk for a period of at least ninety days without being claimed and repossessed, shall be deposited in the Treasury to the credit of the District of Columbia: *Provided,* That if in the opinion of the property clerk any such property has no salable value, he is authorized to dispose of such property by destruction or otherwise as the Commissioners of the District of Columbia shall, by order or regulation, determine.

"(b) Whenever the property clerk shall have in his custody any motor vehicle upon which there is a lien or liens of record in the Office of the Recorder of Deeds of the District of Columbia he shall, prior to the sale thereof pursuant to this section, notify by registered or certified mail each lienor and lienee in any such case of such custody and impending sale, and if such lienor or lienee fail to remove such property from the custody of the property clerk within thirty days from the date of the mailing of such notification, such lien or liens shall be considered to have been abandoned, and shall be thenceforth null and void. Upon being notified in writing of such fact by the property clerk, the Recorder of Deeds of the District of Columbia is authorized to indicate on his records that such lien or liens are thenceforth null and void and the property clerk is authorized to sell any such motor vehicle at public auction free and clear of such lien or liens; except that the proceeds of such sale shall be available, first, for the payment of all expenses incident to such sale and custody; second, for the payment of such liens so declared null and void; third, for payment to the owner in accordance with subsection (a) of this section; and the remainder, if any, shall be deposited in the Treasury of the United States to the credit of the District of Columbia.

"(c) All money, except money of insane persons, that shall remain in the custody of the property clerk for six months shall be so advertised, and if not claimed and repossessed within thirty days, it shall likewise be deposited in the Treasury to the credit of the District of Columbia."

Sec. 5. Neither the government of the District of Columbia nor any officer or employee thereof shall be liable for damage to any property resulting from the removal of such property from public space, or the transportation of such property into the custody of the property clerk, Metropolitan Police Department, nor for damage to any such property while such property is in the custody of the property clerk, Metropolitan Police Department. When such custody is maintained pursuant to the requirements of law, except that the government of the District of Columbia or any such officer or employee may be liable for damage to such property as a result of gross negligence in the removal, transportation, or storage of such property: *Provided,* That should a judgment be entered for the District of Columbia against any commercial warehouseman or garagekeeper for damage to such property in his care, recovery on such judgment, less all administrative expenses and court costs to the District of Columbia involved in such litigation, shall be paid by the District of Columbia to the owner of the damaged property as determined by the property clerk. For the purpose of this section the term "gross negligence" means a willful intent to injure property, or a reckless or wanton disregard of the rights of another in his property.

Sec. 6. Nothing in this Act shall be construed so as to affect the authority vested in the Board of Commissioners of the District of Columbia by Reorganization Plan Numbered 5 of 1952 (66 Stat. 824). The performance of any function vested by this Act in the Board of Commissioners or in any office or agency under the jurisdiction and control of said Board of Commissioners may be delegated by said Board of Commissioners in accordance with section 3 of such plan.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1816) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

The Committee on the District of Columbia, to whom was referred the bill (S. 3317) to amend provisions of law relating to personal property coming into the custody of the property clerk, Metropolitan Police Department, and for other purposes, after full consideration, report favorably thereon with an amendment and recommend that the bill do pass.

The amendment is:

On page 8, line 25, beginning with the period, strike out all through the period on line 3, page 9, and insert in lieu thereof a semicolon and the following: "except that the proceeds of such sale shall be available, first, for the payment of all expenses incident to such sale and custody; second, for the payment of such liens so declared null and void; third, for payment to the owner in accordance with subsection (a) of this section; and the remainder, if any, shall be deposited in the Treasury of the United States to the credit of the District of Columbia."

The purpose of the bill is to provide more efficient procedures for the disposition of lost, abandoned, and unclaimed property coming into the custody of the Metropolitan Police Department from the estates of deceased persons, insane persons, and unknown owners.

DISTRICT OF COLUMBIA HOSPITAL CENTER

The bill (H.R. 12547) to amend the act of August 7, 1946, relating to the District of Columbia Hospital Center, to extend the time during which appropriations may be made for the purposes of that act was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1817) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Committee on the District of Columbia to whom was referred the bill (H.R. 12547) to amend the act of August 7, 1946, relating to the District of Columbia Hospital Center to extend the time during which appropriations may be made for the purposes of that act, after full consideration, report favorably thereon without amendment and recommend that the bill do pass.

The purpose of this bill is to amend the Washington Hospital Center Act (Aug. 7, 1946, as amended), so as to extend the time during which appropriations may be made under such act from the last day of the 2d session of the 87th Congress to June 30, 1963.

The District of Columbia Department of Public Health, in cooperation with the Hospital Advisory Council, recently made a study and noted a demand in the District of Columbia for over 2,100 chronic and nursing home-type beds. As a step toward meeting this need, the Washington Hospital Center recently completed an initial planning study of long-term care hospital facilities. This study clearly establishes that there is need for a pilot project to develop a comprehensive system of care for hospitals specializing in treatment of chronic, convalescent, and rehabilitative patients.

This bill will preserve the Hospital Center Act as a possible vehicle for obtaining Federal aid in connection with the construction of such a convalescent and chronic disease hospital on the grounds of the Washington Hospital Center.

The Hospital Center Act (60 Stat. 896) authorizes appropriations for financing the construction of a hospital center and making of grants to private agencies for designing, constructing, and otherwise providing or improving private hospital facilities in the District of Columbia. Under the formula for grant authorization, the recipient hospital must match the total grant on a dollar-for-dollar basis. Of the total grant, the District of Columbia, under the act, is obligated to pay 30 percent and the Federal Government 70 percent.

Without prejudice to the merits of the proposed pilot project, the Department of Health, Education, and Welfare opposes the bill on the ground that the Washington Hospital Center Act is not the appropriate financial approach to the project. However, the committee is of the opinion that the decision of allowing the Hospital Center Act to expire should await the study and report of the newly formed Metropolitan Washington Health Facilities Planning Council; and, therefore, recommends enactment of this measure.

The Board of Commissioners of the District of Columbia do not object to this bill and its enactment will not result in additional expense for the District of Columbia.

BILLS PASSED OVER

The bill (S. 3313) to authorize an increase in the borrowing authority for the general fund of the District of Columbia was announced as next in order.

Mr. MANSFIELD. Mr. President, over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H.R. 6413) to extend to fishermen the same treatment accorded farmers in relation to estimated income tax was announced as next in order.

Mr. MANSFIELD. Mr. President, over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

SUSPENSION OF DUTIES ON CERTAIN SPUN SILK YARN

The Senate proceeded to consider the bill (H.R. 10852) to continue for a temporary period the existing suspension of duties on certain classifications of spun silk yarn which had been reported from the Committee on Finance, with an amendment, at the top of page 2, to insert a new section, as follows:

SEC. 2. The Secretary of the Treasury is authorized and directed to admit free of duty one towing carriage and appurtenances (whether arriving in one shipment or in separate shipments) imported for the use of the Virginia Polytechnic Institute.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended, so as to read: "An act to continue for a temporary period the existing suspension of duties on certain classifications of spun silk yarn, and to provide for the free entry of a towing carriage for the use of the Virginia Polytechnic Institute."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1820) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AND AMENDMENT

The purpose of H.R. 10852 is to continue for 3 years, until the close of November 7, 1965, the existing suspension of duties on certain classifications of spun silk yarn.

The amendment would provide for the free entry of a towing carriage for the Virginia Polytechnic Institute hydraulic laboratory.

GENERAL STATEMENT

Public Law 235 of the 86th Congress, approved September 8, 1959, suspended for 3 years the import duties imposed under paragraph 1202 of the Tariff Act of 1930 on spun silk or schappe silk yarn (not dyed or colored, singles of more than 58,800 yards per pound, or plied of more than 29,400 yards per pound). H.R. 10852 would continue the suspension for an additional 3-year period, until the close of November 7, 1965.

Spun-silk yarns are of two principal types: Standard spun-silk (schappe) yarn and silk-noil (bourrette) yarn. Standard or schappe spun-silk yarns for general textile use are manufactured from long parallelized silk fiber stock recovered from waste cocoons and silk filature waste and is used for making sewing thread, decorative stripings for fine worsteds, lacing cord for cartridge bags, and in combination with other fibers, certain types of necktie fabrics, shirtings, dress and suiting fabrics, upholstery and drapery materials.

The silk-noil type of yarn is made from shorter length, and hence cheaper, silk fiber stock than schappe and must be spun on wool-spinning machinery. The material used consists of silk noils discarded as byproducts in preparing silk waste for spinning in standard spun-silk yarns. Such yarns have few civilian uses except in mixture fabrics containing other fibers. Their chief use is in the weaving of silk cartridge cloth for powder bags for large-caliber ordnance.

The suspension of duty was made in order to enable domestic producers of fine yarn fabrics to import fine silk yarns free of duty so as to make it more economical for them to produce fine yarn fabrics in competition with imported similar fabrics. The Department of Labor reports that imports under the suspension of duty "amounted to approximately $855,400 for the last 2 months of 1959, $2,074,800 during 1960, and $743,100 during 1961. Most of these imports have come from Japan, and, to a lesser extent, from Italy."

The Department of Labor states further: "It appears that failure to continue the suspension of duties on these commodities would adversely affect domestic employment, since the domestic textile industry depends primarily upon imported spun-silk yarn for weaving silk fabrics. A reimposition of duties would therefore place the weaving industry at a competitive disadvantage."

The U.S. Tariff Commission reports that it "is unaware of any complaints regarding the operation of the suspension of duties."

The amendment would enable the Virginia Polytechnic Institute to import free of duty a towing carriage for use in its hydraulic laboratory. A letter from the dean of the school of engineering and architecture of that school contains the following information:

"The School of Engineering and Architecture of the Virginia Polytechnique Institute is building up its hydraulic laboratory that will be useful for all of the 3,300 engineering students of this school. This hydraulic laboratory will be especially valuable to the naval architecture and marine engineering students under the department of mechanical engineering. One of the pieces of equipment that we have in this new laboratory is a towing basin through which we can study all of the aspects of vehicles moving through water under varying conditions. This towing basin is 100 feet long, 5 feet wide, and has a depth of 5 feet."

The letter also states that only one company, located abroad, makes this type of equipment and that it could not be obtained in the United States except on a very costly custom-made basis.

The hydraulic laboratory which includes this towing carriage will serve to modernize and enhance the research facilities of the school and the knowledge and experience derived from its use will benefit the boatbuilders, shipping interests, and the Armed Forces of the whole country. The committee urges that the bill, as amended, be adopted.

TRANSFERRING CASEIN OR LACTARENE TO FREE LIST OF TARIFF ACT OF 1930

The Senate proceeded to consider the bill (H.R. 10928) to transfer casein or lactarene to the free list of the Tariff Act of 1930 which had been reported from the Committee on Finance, with an amendment, on page 1, line 10, after "Par.", to strike out "1827" and insert "1828".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1821) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

PURPOSE OF THE BILL AND AMENDMENT

The purpose of H.R. 10928 is to transfer casein or lactarene to the free list of the Tariff Act of 1930.

The amendment is technical in nature. The bill as referred to the committee would have established paragraph 1827 of the Tariff Act and listed casein under that paragraph. However, since the bill was filed a new tariff paragraph 1827 has been established for other commodities placed on the free list. Following that, the next consecutive paragraph would be 1828 and the bill was amended to change the tariff paragraph number from 1827 to 1828.

GENERAL STATEMENT

Paragraph 19 of the Tariff Act of 1930 provides for casein or lactarene (lactarene being a term now obsolete which has in the past been used synonymously with casein) and also for mixture of which casein or lactarene is the component material of chief value not specially provided for. H.R. 10928 would transfer casein or lactarene to the free list, leaving the mixtures in paragraph 19.

Casein or lactarene, and the mixtures were originally dutiable under the Tariff Act of 1930 at 5½ cents per pound. This rate of duty was reduced to 2¾ cents per pound, effective November 15, 1941, pursuant to a concession granted in the trade agreement with Argentina. The reduced rate has been subsequently bound against increase pursuant to concessions granted in the trade agreement with Uruguay and in the General Agreement on Tariffs and Trade (GATT).

The duty imposed on imports of casein or lactarene and mixtures under the Tariff Act of 1930 was temporarily suspended, effective September 3, 1957 (Public Law 85–257), until April 1, 1960. The suspension was continued until July 2, 1960 by Public Law 86–405. Public Law 86-562 further continued the suspension until July 1, 1963, except that the suspension was made inapplicable after July 30, 1960, to "sodium caseinate, sodium phospho-caseinate, or other caseinates * * * of which casein or lactarene is the competent material of chief value."

Casein is a yellowish, medium-hard, granular solid classified chemically as a phosphoprotein. It comprises about 3 percent of cow's milk, and is extracted commercially from skim milk (milk from which the cream or butterfat has been removed) by precipitation, usually with acid but sometimes with rennet (an extract of the stomach of young animals). Acid casein is the more important; the use of rennet casein is relatively small. Skim milk is also the raw material for the manufacture of cottage cheese and powdered dry nonfat milk, both important food products.

Casein is used principally in the manufacture of coated paper, adhesives, emulsions, plastics, paints, and fibers. It is also used for making sodium caseinate and other edible casein derivatives, which are used in turn in sausages, bakery products, pharmaceuticals, and baby foods. These casein derivatives are classified for tariff purposes under the provision in paragraph 19 of the Tariff Act of 1930 for mixtures of which casein is the component material of chief value, and would remain so classified.

The apparent domestic consumption of casein and casein derivatives increased during the last decade from 65 million pounds in 1951 to 103.3 million pounds in 1961. However, whereas about one-third of the casein and casein derivatives consumed in the United States in 1951 had been produced domestically, less than 5 percent was so produced in 1961. The U.S. Tariff Commission states that the decline in domestic production of casein was a direct result of the milk price-support program of the Department of Agriculture, under which the price of nonfat dry milk solids is supported. The report of the Tariff Commission states that "Although the price-support program has operated to increase sharply the total production of whole milk, at the same time it has tended to reduce the relative profitability of converting skim milk to casein."

On the basis of the experience gained under the temporary suspension of duties on casein, which has been in effect continuously since September 3, 1957, it would seem that the transfer of casein to the free list is warranted.

Favorable reports on this legislation were received from the Department of State, Agriculture, Treasury, and Labor, as well as an informative report from the U.S. Tariff Commission.

DISTRICT OF COLUMBIA PUBLIC SCHOOL FOOD SERVICES ACT

The bill (S. 3314) to amend the District of Columbia Public School Food Services Act was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the last sentence of section 5 of the District of Columbia Public School Food Services Act (65 Stat. 369; sec. 31–1404, D.C. Code, 1961 edition) is amended by striking the comma following "motor trucks" and inserting in lieu thereof a period, and by striking the remainder of such last sentence.

Sec. 2. The first sentence of section 6 of such Act, as amended (sec. 31–1405, D.C. Code, 1961 ed.), is amended to read as follows: "Appropriations are hereby authorized for all necessary expenses of the Office of Central Management, Department of Food Services, in the public schools of the District of Columbia, including the payment of compensation for personal services and Government contributions to related insurance costs; for the acquisition, maintenance, and replacement of equipment used or acquired for use in the conduct of the Department of Food Services in the public schools of the District of Columbia, and for reimbursement of the District of Columbia public school food services fund for lunches served in accordance with section 9 of the National School Lunch Act (60 Stat. 233; title 42, sec. 1758, U.S.C., 1952 edition), to children without cost to such children or at reduced cost."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 1822) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the Record, as follows:

The Committee on the District of Columbia, to whom was referred the bill (S. 3314) to amend the District of Columbia Public School Food Services Act, after full consideration, report favorably thereon without amendment and recommend that the bill do pass.

The purposes of the bill are (1) to authorize appropriations of public funds to pay salaries and related costs of operating the Office of Central Management of the Food Services Department in the public schools and (2) to provide for appropriation of public money to pay for lunches furnished to all needy elementary and secondary public school children.

Under existing law (65 Stat. 369) the expenses, salaries, and related costs of conducting the Office of Central Management of the Department of Food Services of the public schools in the District of Columbia are paid from the food services fund. This fund is a revolving account into which all revenues from the operation of food services in the public schools are placed. These receipts are used for the purchase of foods, supplies, and all other services and expenditures of whatever nature which are necessary for the conduct of the Department of Food Services, including personal services, the operation and maintenance of motor trucks, "and the expenses of conducting the Office of Central Management."

In reporting on the bill, the Board of Commissioners made the following statement concerning the need for striking the above quoted language from the existing law:

"Experience has shown that these costs cannot continue to be borne by the school lunch program (salaries and related insurance costs of employees of the Office of Central Management) without this assistance. The Superintendent of Schools reports that conferences with officials of the Department of Agriculture and with food services directors of other cities and States tend to the conclusion that such costs should not be borne by the students any more than the other costs of administering the school system. The Superintendent points out that the staff of the Office of Central Management of the Food Services Department serves in a dual capacity of State and city administration for three Federal programs; namely, the national school lunch program, the special milk program, and the U.S. Department of Agriculture donated commodity program for District of Columbia schools and institutions. The Superintendent further notes that comparable functions in the States are administered by State officials of education, and administrative staff salaries are paid from State appropriated funds, whereas the District of Columbia school lunch program is forced to bear this expense."

In the District of Columbia public schools elementary needy lunch program, authorized by Public Law 86–104, all students certified as needy by the school principal, whether or not their families are receiving public assistance, have their lunches paid for them from public funds. In the secondary school program there is a distinction made between lunches served to needy pupils whose families receive public assistance and lunches served to needy pupils whose families do not receive public assistance.

Public Law 85–901, enacted by the 85th Congress, provides authorization for reimbursement to be made to the secondary schools only in cases where free lunches are served to children of families who are recipients of public assistance granted by the government of the District of Columbia.

During the school year, September 1961 to June 1962, 149,176 lunches were served without charge to needy children in the secondary schools. Of this number, 53,345 were reimbursed for from public funds in accordance with Public Law 85–901. Reimbursement is made at whatever the current student price is at a given time and for this year that price was 30 cents. The cost of the remaining 95,831 free lunches served was absorbed in the overall operation of the Department of Food Services. In other words sufficient "profit" was made on the lunches sold to nonneedy students in the elementary and secondary schools to defray the cost of furnishing free or reduced-cost lunches to the needy students whose families did not receive public assistance.

If the food services fund is reimbursed with public funds for all needy lunches served in the secondary schools, the Food Services Department will be able to improve the quality of the meals furnished, particularly with respect to the variety of food. It will also make it possible for the Department of Food Services to pay its cafeteria workers a better wage. These workers are currently receiving $1.10 an hour. The Department of Food Services wishes to increase this wage rate to $1.25 an hour, which is more in keeping with Federal wage standards.

The cost of the central office operation for the fiscal year 1962 is estimated to be approximately $72,400 for the salaries and related insurance costs for the Director and two assistant directors and for eight other employees, and the cost of providing free lunches to needy secondary school pupils whose parents do not receive public assistance payments from the District will be $31,500, making the total estimated annual cost of the bill of $103,900.

The Commissioners recommend enactment of the proposed legislation at this session of the Congress.

WASATCH NATIONAL FOREST, UTAH

The Senate proceeded to consider the bill (S. 1878) to add certain lands to the Wasatch National Forest, Utah, and for other purposes which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 1, line 11, after the word "States", to insert "or any other land acquired pursuant to this Act", and on page 2, line 4, after the word "any", to strike out "such lands" and insert "lands described in section 2 hereof and other lands within the national forest situated in the townships within which the described lands are located"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That to aid in the control of floods that may originate thereon and the reduction of soil erosion through the restoration of adequate vegetative cover and to promote their management and protection as national forest lands under principles of multiple use and sustained yield, the lands described in section 2 hereof are hereby included in the Wasatch National Forest. Subject to any valid claims now existing and hereafter maintained, any of such lands owned or hereafter acquired by the United States or any other land acquired pursuant to this Act are hereby added to such national forest and shall be subject to laws and regulations applicable to the national forests. The Secretary of Agriculture is authorized to acquire any lands described in section 2 hereof and other lands within the national forest situated in the townships within which the described lands are located not owned by the United States which he finds suitable to accomplish the purposes of this Act.

SEC. 2. This Act shall be applicable to the following described lands:

SALT LAKE MERIDIAN

Township 2 north, range 1 east: Section 1, lots 1 to 4, inclusive, south half north half.

Township 3 north, range 1 east: Sections 1 and 2; section 3, lots 1 and 2, south half northeast quarter; section 11, east half; sections 12 and 13; section 35, northwest quarter, south half northeast quarter, southeast quarter; section 36, south half northwest quarter, northeast quarter, south half.

Township 4 north, range 1 east: Section 1, lots 3 and 4, south half northwest quarter, southwest quarter; sections 2 and 3; section 4, east half; section 9, east half; sections 10 to 15, inclusive; section 16, east half; section 21, east half; sections 22 to 27, inclusive; sections 34 to 36, inclusive.

Township 5 north, range 1 east: South half of sections 26 to 28, inclusive; section 29, southeast quarter; section 33, north half, southeast quarter; sections 34 and 35.

Township 2 north, range 2 east: Sections 6 and 7; section 18, north half; southeast quarter.

Township 3 north, range 2 east: Sections 18, 19, 30, and 31.

SEC. 3. There is hereby authorized to be appropriated not to exceed $400,000 to carry out the purposes of this Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 1823) explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of this bill is to permit the addition of some 24,000 acres of land to the Wasatch National Forest in Utah. Of this acreage, 3,003 acres are national forest lands, 2,206 acres are unreserved public domain, 513 acres belong to the State of Utah, and 18,114 acres are privately owned. The bill would authorize the purchase of the privately owned land.

NEED

The major function of the Wasatch National Forest is watershed protection and the incorporation of the land described in this bill, most of which lies on mountain slopes above the national forest lands, is necessary in order that erosion control measures may be carried out on these lands to protect the existing national forest area and permit a more complete program of watershed protection.

HELENA M. GROVER

The bill (H.R. 5139) for the relief of Helena M. Grover was considered, ordered to a third reading, was read the third time, and passed.

COMMISSION ON SCIENCE AND TECHNOLOGY

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1784, Senate bill 2771.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 2771) for the establishment of a Commission on Science and Technology.

The ACTING PRESIDENT pro tempore. The question is on the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Government Operations, with amendments, on page 2, line 5, after the word "information", to strike out "through the coordination of" and insert "by coordinating"; in line 6, after the word "the", to strike out "efforts" and insert "research and development programs"; in line 7, after the word "Federal", to strike out "Government," and insert "departments and agencies with those of"; in line 8, after the word "industry", to strike out "and our universities"; in line 9, after the word "and", to strike out "private research" and insert "with nonprofit organizations, including universities and other educational or technological institutions"; in line 14, after the word "necessary", to strike out "and desirable"; in line 23, after the word "automation", to strike out "and"; on page 3, line 2, after the word "manpower", to insert a semicolon and "and (h) assessment of how the executive and legislative branches can more effectively achieve common objectives in the legislative process."; in line 6, after "Sec. 2.", to strike out "Looking toward the effectuation of this policy," and insert "To determine the action necessary for implementing this policy,"; in line 9, after the word "to", to insert "studying the"; in the same line, after the word "means", to strike out "of" and insert "for"; in line 13, after the word "agencies", to strike out "operating" and insert "operating, conducting, or financing"; in line 18, after the word "of", to insert "undesirable"; in line 19, after the word "Government", to insert "departments and"; in line 23, after the word "private", to strike out "business and universities" and insert "industry and nonprofit research organizations, including universities and other educational or technological institutions"; on page 4, line 5, after "(4)", to strike out "To determine the desirability of" and insert "The determination of the need for"; in line 8, after the word "or", to insert "for"; in line 10, after the word "to", to strike out "other" and insert "existing or new"; in the same line, after the word "departments", to insert "or agencies"; in line 14, after the word "be", to strike out "desirable," and insert "necessary,"; in line 18, after the word "new", to strike out "function" and insert "functions"; in line 20, after the word "private", to strike out "business or universities" and insert "industry or nonprofit organizations, including universities and other educational or technological institutions"; on page 5, line 16, after the word "scientific", to insert "or technological"; in line 18, after the word "science", to insert "or engineering, or who are qualified and experienced in policy determination and administration of industrial scientific research and technological activities"; in line 23, after the word "science", to insert "or engineering, or who are qualified and experienced in policy determination and administration of industrial scientific research and technological activities"; on page 6, line 7, after the word "science", to insert "or engineering, or who are qualified and experienced in policy determination and administration of industrial scientific research and technological activities"; on page 7, at the beginning of line 16, to strike out "Staff" and insert "Administration"; on page 8, line 2, after the word "exceed", to strike out "$50" and insert "$75"; in line 5, after the word "private", to insert "business and nonprofit research";

in line 6, after the amendment, just above stated, to strike out "organizations to carry out" and insert "organizations, including universities and other educational or technological institutions, to conduct"; in line 9, after the word "to", to strike out "carry out" and insert "discharge"; after line 10, to insert:

(d) Financial and administrative services (including those related to budgeting, accounting, financial reporting, personnel, and procurement) may be provided the Commission by the General Services Administration, for which payment shall be made in advance, or by reimbursement, from funds of the Commission in such amounts as may be agreed upon by the Chairman of the Commission and the Administrator of General Services: *Provided*, That the regulations of the General Services Administration for the collection of indebtedness of personnel resulting from erroneous payments (5 U.S.C. 46d) shall apply to the collection of erroneous payments made to or on behalf of a Commission employee, and regulations of said Administrator for the administrative control of funds (31 U.S.C. 665(g)) shall apply to appropriations of the Commission: *And provided further*, That the Commission shall not be required to prescribe such regulations.

On page 9, at the beginning of line 5, to strike out "panel of" and insert "panel, including"; in line 6, after the word "scientific", to strike out "community" and insert "and technical communities"; in line 7, after the word "United", to strike out "States" and insert "States,"; in the same line, after the word "as", to strike out "scientific"; in line 11, after the word "of", to strike out "members" and insert "qualified persons drawn equally from Government, private industry and nonprofit organizations, including universities and other educational or technological institutions"; in line 15, after the word "adequate", to strike out the comma and "and" and insert "who"; at the beginning of line 16, to strike out "from Government officers and employees and from individuals in private life"; on page 10, line 9, after the word "than", to strike out "April 30, 1963" and insert "January 1, 1965"; in line 11, after the word "are", to insert "deemed"; at the beginning of line 12, to strike out "carry out" and insert "achieve"; and on page 11, line 4, after the word "and", to strike out "directed" and insert "directed, to the extent permitted by law,"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

DECLARATION OF POLICY

SECTION 1. It is hereby declared to be the policy of the Congress to strengthen American science and technology as an essential resource toward the attainment of the highest potential of Government contribution toward (a) the promotion of the national security; (b) continued national progress in an era of universal scientific and technical development; (c) the procurement and training of the best qualified leadership to maintain and promote world peace; (d) insuring the maximum utilization of all available scientific know-how and information by coordinating the research and development programs of the Federal departments and agencies with those of American business and industry, and with nonprofit organizations, including universities and other educational or technological institutions; (e) the establishment of national policies which will require coordination of Federal science and technology programs and operations of the Federal Government through necessary reorganizations of departments, bureaus, agencies, boards, commissions, foundations, offices, independent establishments, and instrumentalities of the executive branch of the Government which relate directly to Federal science generally, scientific research, and technology; (f) insuring increased efficiency in establishing systems for acquiring, translating, storing, documenting, indexing, retrieving, and distributing scientific information through the establishment of the most modern systems of technology and automation; (g) improvement of policies for recruiting, training, and utilizing Federal scientific and engineering manpower; and (h) assessment of how the executive and legislative branches can more effectively achieve common objectives in the legislative process.

OBJECTIVES

SEC. 2. To determine the action necessary for implementing this policy, the Congress hereby declares that immediate consideration should be given to studying the means for attaining the following objectives:

(1) The establishment of programs, methods, and procedures for the effective reorganization of Federal departments and agencies operating, conducting, or financing scientific programs and supporting basic research in science and technology, with the purpose of insuring more effective performance of these essential services, activities, and functions;

(2) The elimination of undesirable duplication and overlapping between Government departments and agencies engaged in scientific and technological research, and in information storage, processing and distribution services, activities and functions, with particular emphasis upon effecting the maximum utilization of the resources of private industry and nonprofit research organizations, including universities and other educational or technological institutions;

(3) The assurance of the conservation and efficient utilization of scientific and engineering manpower;

(4) The determination of the need for establishing within the executive branch of the Government a Department of Science and Technology, or for the reorganization of existing Government scientific and technological functions through the transfer of such functions to existing or new executive departments or agencies, in order to provide more effective and better coordinated Federal science programs and operations; and

(5) If the establishment of a Department of Science and Technology is found to be necessary, the determination of functions now exercised by other departments or agencies of the Federal Government which should be transferred to that or other departments and what, if any, new functions should be given to such departments, as well as those which more properly should be transferred to and performed by private industry or nonprofit organizations, including universities and other educational or technological institutions.

SEC. 3. (a) In order to carry out the purposes of this Act, there is hereby established a commission to be known as the Commission on Science and Technology (in this Act referred to as the "Commission").

(b) Service of an individual as a member of the Commission or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of section 281, 283, 284, 434, or 1914 of title 18 of the United States Code, or section 190 of the Revised Statutes (5 U.S.C. 99).

MEMBERSHIP OF THE COMMISSION

SEC. 4. (a) NUMBER AND APPOINTMENT.—The Commission shall be composed of twelve members as follows:

(1) Four appointed by the President of the United States, two from the executive branch of the Government who are participating in Federal scientific or technological activities, and two from private life who are eminent in one or more fields of science or engineering, or who are qualified and experienced in policy determination and administration of industrial scientific research and technological activities;

(2) Four appointed by the President of the Senate, two from the Senate and two from private life who are eminent in one or more fields of science or engineering, or who are qualified and experienced in policy determination and administration of industrial scientific research and technological activities; and

(3) Four appointed by the Speaker of the House of Representatives, two from the House of Representatives and two from private life who are eminent in one or more fields of science or engineering, or who are qualified and experienced in policy determination and administration of industrial scientific research and technological activities.

(b) VACANCIES.—Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

ORGANIZATION OF THE COMMISSION

SEC. 5. The Commission shall elect a Chairman and a Vice Chairman from among its members.

QUORUM

SEC. 6. Seven members of the Commission shall constitute a quorum.

COMPENSATION OF MEMBERS OF THE COMMISSION

SEC. 7. (a) MEMBERS OF CONGRESS.—Members of Congress who are members of the Commission shall serve without compensation in addition to that received for their services as Members of Congress; but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(b) MEMBERS FROM THE EXECUTIVE BRANCH.—The members of the Commission who are in the executive branch of the Government shall serve without compensation in addition to that received for their services in the executive branch, but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(c) MEMBERS FROM PRIVATE LIFE.—The members from private life shall each receive $100 per diem when engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of such duties.

ADMINISTRATION OF THE COMMISSION

SEC. 8. (a) The Commission shall have power to appoint and fix the compensation of such personnel as it deems advisable, in accordance with the provisions of the civil service laws and the Classification Act of 1949, as amended.

(b) The Commission may procure, without regard to the civil service laws and the classification laws, temporary and intermittent services to the same extent as is authorized for the departments by section 15 of the Act of August 2, 1946 (60 Stat. 810), but at rates not to exceed $75 per diem for individuals.

(c) The Commission is authorized to negotiate and enter into contracts with private business and nonprofit research organizations, including universities and other educational or technological institutions, to conduct such studies and to prepare such reports as the Commission feels necessary in order to discharge its duties.

(d) Financial and administrative services (including those related to budgeting, accounting, financial reporting, personnel, and procurement) may be provided the Commission by the General Services Administration, for which payment shall be made in advance, or by reimbursement, from funds of the Commission in such amounts as may be agreed upon by the Chairman of the Commission and the Administrator of General Services: *Provided*, That the regulations of the General Services Administration for the collection of indebtedness of personnel resulting from erroneous payments (5 U.S.C. 46d) shall apply to the collection of erroneous payments made to or on behalf of a Commission employee, and regulations of said Administrator for the administrative control of funds (31 U.S.C. 665(g)) shall apply to appropriations of the Commission: *And provided further*, That the Commission shall not be required to prescribe such regulations.

SCIENCE ADVISORY PANEL

SEC. 9. (a) The Commission shall establish an advisory panel, including competent and experienced members of the scientific and technical communities of the United States, to serve on request as consultants to the Commission or to individual members of the Commission while performing the duties of the Commission.

(b) The panel shall consist of such number of qualified persons drawn equally from Government, private industry and nonprofit organizations, including universities and other educational or technological institutions, as the Commission deems to be adequate, who shall be chosen on the basis of competence, experience, integrity, availability, and ability to communicate not only to professional scientists by to laymen.

(c) Any member of such panel who is a Government officer or employee shall receive no compensation for his services as such a member, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of his duties as such a member.

DUTIES OF THE COMMISSION

SEC. 10. (a) INVESTIGATION.—The Commission shall determine means of attaining the objectives of this Act as stated in section 2.

(b) REPORT.—The Commission shall submit interim reports to the President and the Congress at such time or times, as the Commission deems advisable, and shall submit its final report to the President and the Congress not later than January 1, 1965. The final report of the Commission shall propose such legislation and administrative actions as in its judgment are deemed necessary to achieve its recommendations.

POWERS OF THE COMMISSION

SEC. 11. (a) HEARINGS AND SESSIONS.—The Commission, or any member thereof, may, for the purpose of carrying out the provisions of this Act, hold such hearings and sit and act at such times and places, and take such testimony, as the Commission or such member may deem advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(b) OBTAINING OFFICIAL DATA.—The Commission is authorized to secure directly from any executive department, bureau, agency, board, commission, office, independent establishment or instrumentality information, suggestions, estimates, and statistics for the purpose of this Act; and each such department, bureau, agency, board, commission, office, independent establishment or instrumentality is authorized and directed, to the extent permitted by law, to furnish such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman or Vice Chairman.

EXPENSES OF THE COMMISSION

SEC. 12. There are hereby authorized to be appropriated such amounts as may be necessary to carry out the provisions of this Act.

TERMINATION OF COMMISSION

SEC. 13. The Commission shall cease to exist thirty days after submitting its final report as required under section 10.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FPC WORKS TO BREAK CASE BACKLOG

Mr. CARROLL. Mr. President, as chairman of the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary, I have been vocally critical, on the floor and in hearings, of the mountainous backlog of cases which exist in the independent agencies and executive departments of the Government which are responsible for carrying out the regulatory laws which have been passed by the Congress.

In April of 1961 I introduced, on behalf of myself and the Senator from Michigan [Mr. HART], S. 1734, to amend the Administrative Procedure Act. This bill was based upon the premise that hearing examiners can and should be given greater finality of decision in administrative procedures. This was our legislative approach. Hearings were held and various revisions have been made in the wording of that bill.

While I sponsored this legislation, I felt that the agencies, under existing law, could do more to expedite their proceedings. Whenever I referred to backlogs, the first agency which came to my mind and which I would invariably cite as the "horrible example" was the Federal Power Commission.

I am happy to report that the Federal Power Commission is making a determined effort to clear up its backlog of cases and to revise its hearing procedures. Some of these efforts and the future plans of the Commission were described by the Chairman of the Federal Power Commission, Joseph C. Swidler, before the American Bar Association at its convention in San Francisco, Calif. on Monday of this week. I am pleased to see the new proposed regulations which I am sure will serve to reduce the tremendous backlog which has plagued this Commission for many years.

Mr. President, I ask unanimous consent that I may have printed at this point the address by Chairman Swidler to which I have referred.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE CHALLENGE OF NATURAL GAS REGULATION

(An address by Joseph C. Swidler, Chairman, Federal Power Commission, before the American Bar Association, San Francisco, Calif., August 6, 1962)

The title announced for this talk, which I selected months before I knew what I was going to say, is broad enough to cover anything remotely touching upon the Federal Power Commission's functions in natural gas regulation. Perhaps I should disclose to you now that the corner of this very large field which I shall dwell upon today is the need for improvement in hearing procedures before the Commission.

The current interest in improving administrative procedures represents a healthy reaction to the increasingly apparent need for administrative reform. On all sides there are demands that the procedures in each agency be reviewed critically and objectively with a view to putting into effect whatever reforms may be required to enable them to do their jobs in their particular areas of activities. The establishment by President Kennedy of the Administrative Conference, under the leadership of Judge E. Barrett Prettyman, is perhaps the most important and potentially useful of the many current approaches to administrative improvement. Through the Administrative Conference it is possible to bring to bear upon the problems of Federal administrative agencies the insights and talents of practitioners, judges, and scholars as well as of the responsible officials of administrative agencies.

I do not mean to slight the study and effort which were devoted in the middle forties to the problem of insuring an impartial disposition of cases before administrative tribunals. As a result of this effort, Congress passed the Administrative Procedure Act, which dealt primarily with the problem of the fairness of the administrative process, and particularly with insulating the administrative process in contested proceedings from external pressures.

The present focus is on the efficiency of the administrative process. There need be nothing inconsistent between the objective of fairness in administrative adjudication and the objective of conducting the proceeding in such a way as to make the best possible use of agency staff and of the counsel and witnesses of the litigants, and to bring the case to a conclusion as soon as the nature of the case permits. On the contrary, a speedy trial is a basic element of fairness in any proceeding and in many types of administrative hearings it is just as true as in judicial hearings that justice delayed is justice denied.

Delay feeds on itself. After a segmented and protracted hearing the facts which were proven are likely to be out of date by the time the case is ready for decision. The test year upon which the case has been tried has become ancient history. According to their interests, counsel will urge disposition on a stale record or holding further hearing to consider later operating periods. The hearing examiner, or the Commission itself, is faced with the dilemma of making a decision on a record which is out of date or of starting the case on a new round of hearings.

The natural gas cases before the Federal Power Commission are too important to be permitted to drag on over the years. They are among the most important cases decided before any adjudicative tribunal in the country, judicial or administrative, except for courts of review. Natural gas rate cases involve the gas bills of 34 million consumers throughout the country. The sums of money at stake in rate suspensions in individual cases may accumulate with time so as to be the controlling factor in the financial strength of interstate pipelines and may strongly affect the value of the securities of the many thousands of stockholders in these companies. In the past year, there have been disposed of over a dozen pipeline rate cases each of which involved rate increases of more than $5 million annually collected subject to possible refund. We have still pending before the Commission one pipeline rate case in which the sums collected subject to refund over a period of years approaches the staggering figure of $400 million, and the amount increases at the rate of $9 million a month.

It is obvious that extended delay in these proceedings may cause great damage to all concerned. A company cannot plan its future with assurance and investors cannot determine the value of its securities when the potential refund obligation is equal to a large part of the equity capital. Consumers who have been forced to pay inflated gas bills for many years find little comfort in refund prospects which are hedged with contingencies, including the ability of the consumer to survive until the refunds are ordered and paid.

The aggregate of money collected by the interstate natural gas pipelines subject to refund in cases pending before the Federal Power Commission is still over $900 million, despite the success of the Commission's settlement program, because the accretion of additional amounts in the remaining cases almost offsets the large amounts involved in the cases which have been settled or decided. There are also pending certificate applications for a billion dollars of pipeline construction. This figure has smaller significance than the refund figure because much of the pipeline construction is covered by temporary authorizations, and some of the rest may represent duplicate facilities or may be disallowed for other reasons. There can be no doubt, however, as to the necessity for speedy disposition of FPC rate and certificate proceedings which have such a broad impact on a basic industry and the consumers it serves.

I am happy to be able to report that we are moving steadily to dispose of the mountain of pending pipeline rate cases and have in recent months ordered refunds of approximately $150 million including one individual case in which the refunds exceeded $40 million. The Commission is determined to clear up its existing backlog of cases and to revise its hearing procedures to insure that future cases are handled with dispatch.

I had the pleasure a few months ago of speaking to the members of the Federal Power Bar Association to which many of you here belong. In my talk I spoke of the vital role of the examiners in moving our cases along with dispatch. The handful of men in the Office of Examiners of the Federal Power Commission are basic to the discharge of the Commission's work.

I take this occasion to say that one of the most important contributions which Congress could make to the improvement in the administrative process would be to provide for adequate compensation to examiners in agencies such as the Federal Power Commission where the responsibilities of the examiners are so great and the benefits of improvement would mean so much to the public and to the great industries under FPC regulation. All of the suggestions for administrative reform assume an even greater degree of control of administrative proceedings by the examiner. Implicit in these recommendations is a basis of compensation which will make it possible to hold the excellent examiners already on our staff, and to attract candidates for examiner positions in whom the Commission could safely lodge broad additional responsibilities.

In my talk before the Federal Power Bar I also spoke of the need for the cooperation of the bar in eliminating wasted time and inflated transcripts in proceedings before the Commission. I urged practitioners to exercise restraint in introducing cumulative testimony and proof of limited or doubtful probative value. I urged a double dose of restraint in cross-examination, and especially with respect to evidence which might better have been dispensed with in the first place, pointing out that there was no point to loading a record with a mountain of material which a detached appraisal by counsel at the outset would have convinced him was most unlikely to be of controlling importance in winning his case, whether before the Commission or the courts.

Let me add on this score that cases before the Federal Power Commission are not likely to be won on technicalities. The Commission is just as much impressed with a solid point of law or of administrative policy whether it is based on 10 pages of record or a thousand and its conclusions of law and findings on the facts are not likely to be swayed by cumulative testimony no matter how elaborately developed. Extended arguments with expert witnesses in an effort to persuade them of the falseness of the theories upon which they have built their professional lives add bulk but not light to a transcript. Cross-examination of an expert witness on his qualifications or his testimony, of the kind used in attempting to sway a jury to discount what he says, is wasted in an FPC proceeding.

Sometimes the Commission finds in cases which have been in hearing for many months that basic issues have not been raised and important factual areas have not been touched upon, so that the Commission is' required to send the case back for further hearings. We have been forced to conclude that mass cannot be equated with thoroughness or completeness and may in fact represent a poor alternative for a carefully thought out presentation of a complete basic case.

Let me describe for you the tortuous hearing course of one of our rate cases. The original filing was made in February of 1957. The first hearings were held in April of 1957, recessed to July and continued off and on through the remainder of 1957. Hearings were held in January and February of 1958. The hearings then recessed again to October when a further recess until December was granted, and then yet another recess was granted until January and then further postponed to March, April, and May of 1959. Hearings were finally resumed during May of 1959 and then recessed until September.

Three days of hearings were held in September and then the case was recessed until November, at which time it was further postponed to December. In December of 1959 the record was closed on one issue and an examiner's decision on this issue was rendered in May of 1961. The Commission twice heard oral argument on this one issue and issued its final decision in February of 1962. The rest of this case, I regret to say, is still with us.

There is something radically wrong with this way of conducting a rate case. This was a complex case, true enough, but it was not that difficult, nor is its history unique. No one who participated has great reason for pride in the way the case has been handled thus far. I say this although all the counsel involved were able and dedicated and the examiner dealt skillfully with many issues in an elaborate record. The fault was not the fault of the individuals but of the system, or rather lack of system.

Our staff made a recent study of rate investigations, rate filings and abandonment applications. This study showed that from the date of filing to a final decision, it has taken an average of 1,782 days on rate investigations initiated by the Commission, 1,865 days on filings by pipelines for increased rates, and even in abandonment cases, which should be reasonably simple, it has taken an average of 493 days. The average rate investigation has accumulated 3,172 pages of transcript and 868 pages of exhibits. Any system which requires so much time for decision and such voluminous records must contain ample room for improvement.

What happened in these and similar proceedings is water over the dam, or perhaps to this audience I should say gas flared to the atmosphere. It becomes now our responsibility to distill the lesson from what has happened, and to avoid additional administrative monstrosities in the future.

The first conclusion one reaches from a study of the lugubrious record of the case whose 5-year history I have just reviewed, and of many similar cases, is that they were not planned that way; they just drifted. There was no early definition of the issues; there was no broad stipulation of the readily provable facts; there was no collaboration among the parties on the presentation of proof; there was no schedule of the presentation of testimony; there was no target date for each of the steps and for completion. Without such advance planning and preparation and without advance arrangements for cooperation in the presentation of the case, it is inevitable that there will be waste motion, confusion and delay, most of which could have been avoided by a well-organized prehearing conference at the inception of the case.

The Commission has long recognized the need for improvement in prehearing conference procedure. In November 1959, the Commission promulgated its Order No. 217 providing for the use of prehearing conferences and the early designation of the presiding examiner. However, Order No. 217 has not been invoked and the attempts to use prehearing conferences have been without great success. I do not know every factor which militated against successful use of such conferences, but I can point out some of the reasons they did not work.

In the first place, I am told that the parties who attended the few conferences that were held went into them with little preparation. Few of the parties were well enough prepared to be willing to agree to the undisputed facts, to identify the issues, or even to plan for an orderly hearing. Moreover, some of the participating counsel seemed to think of an administrative proceeding as a contest in the courtroom skills of counsel. They wanted to save their ammunition to ambush the opposition at the hearing, rather than to lay their forensic guns on the conference table and devote themselves to simplifying and expediting the process of bringing out all the relevant facts.

In addition, examiners were compelled to supervise the prehearing conference with little or no knowledge of the case and, being saddled with a predetermined hearing date, no room in which to operate with the degree of flexibility which I believe is the very essence of a successful use of the prehearing procedure. The prehearing conference was thus merely the anteroom to the hearing maze.

The Commission now proposes to revitalize the prehearing conference procedure. We are impressed by the fact that almost every group that has sought for ways to improve administrative procedures has agreed not only that the prehearing conference can be made a valuable part of the decisional process, but that it is essential to the prompt and effective disposition of complex cases, the kind which abound in the work of the Federal Power Commission. Order No. 217 was adopted as a result of suggestions by the American Bar Association and the Federal Power Bar. The House Subcommittee on Legislative Oversight strongly recommended that agencies make use of this procedure. Senator Carroll's Judiciary Subcommittee on Administrative Practices and Procedure also recommended it and the existing Administrative Conference, on which I am serving as a member, has under consideration strong proposals for more effective use of prehearing conferences.

It appears, therefore, that there is general agreement that prehearing conferences should be beneficial if we can make use of them properly. In order to make a prehearing conference procedure work we must first understand its objectives and then determine precisely how to achieve them.

I believe the first objective of a prehearing conference is to give every party an opportunity to know and evaluate the positions of the other parties. Its purpose is to eliminate the surprise element, which, I submit, has no place in administrative proceedings, and which is being progressively restricted even in Federal court proceedings under the Federal Rules of Civil Procedure, as well as in the courts of many of the States. The obligation of the parties in a prehearing conference is to identify the genuine and substantial issues, to reject the spurious ones at the outset, to stipulate all the relevant facts which cannot honestly be controverted, to arrange for the reconciliation of factual differences where this is feasible, and to list the key matters in factual dispute which can only be resolved in a hearing. Matters which can be fully investigated and resolved without open trial should be eliminated from the hearing.

As a basic step to attaining these objectives, Prof. A. J. G. Priest, of the University of Virginia Law School, in his report to the Administrative Conference, emphasizes the importance of identifying the big case at the outset, and of the use of the prehearing conference device in these cases. His advice is especially pertinent to the FPC because we have so many big cases and also because we have already perfected techniques for disposing of the routine cases expeditiously. The big cases, once identified, must be assigned to the examiner at once so as to enable him to provide the necessary control of the proceedings. With the examiner in control, Professor Priest suggests that there must be early definitions of the issues, confinement of discovery within the boundaries of the defined issues, and careful procedural planning.

These are excellent suggestions and I agree with all of them, but to make them work the pleadings must be adequate to permit detailed case analysis when the prehearing conference is held. This has not been required in the past in FPC proceedings, and this defect we propose to remedy. The Federal Power Commission, with the advice of all interested parties, is revising its regulations to provide that original pipeline rate filings shall contain sufficient information to allow all parties to a proceeding to identify the difficult cases, the issues therein, and to prepare their own cases with dispatch.

As many of you know, our proposed new rules provide that pipeline rate filings must be so complete as to provide in substance the pipeline's case-in-chief, should suspension of the filing prove necessary. On the basis of the applicant's exhibits and the supporting testimony, our staff and all interveners should at an early date prepare and file their own rebuttal exhibits and testimony.

As soon as our staff is ready to present its answer to the filed information of the applicant, an examiner should be assigned but no hearing date should be set.

The examiner could then call a prehearing conference, confident that an analysis of all the submitted evidence will refine and reduce to a minimum the issues which he must decide. Once assigned, the examiner would be in control. If it appeared at the first prehearing conference that some necessary evidence was missing, he could call a short recess to obtain that evidence and then resume the conference. As soon as he felt the issues and evidence had been refined as far as possible, he could set a date for a hearing confined to those matters on which cross-examination appeared to be necessary.

Where analysis of the issues and comparison of the testimony revealed that the differences were small, or lent themselves to compromise, there would be no point to proceed to trial. The exercise of complete control of the proceedings by a competent examiner who fully understands the unresolved issues is extremely important in deciding for the parties whether a trial or settlement conference is more appropriate as a next step.

I make a final suggestion for expediting hearings which may come as a shock to those of you who have become accustomed to recesses as a way of life in FPC hearings. I suggest a single continuous hearing directed to full cross-examination of all witnesses presented by all parties. Of course, the examiner would have wide discretion in handling the hearing and he might, where circumstances warranted, make use of "during the hearing" conferences. In general, however, once the prehearing conference has been concluded and the hearing scheduled and begun, counsel would be expected to present their entire case without substantial interruption for the preparation of testimony or cross-examination.

It seems to me that the use of continuous hearings is a logical outgrowth of the full filings now required by our regulations and of a revitalized and flexible prehearing conference procedure. Following a full presentation of a written case and an exploration of all issues in a prehearing conference, a continuous hearing should be less burdensome than in a court trial, where a continuous hearing is taken as a matter of course.

It should be clear that the procedure in which all parties will prepare their direct case in advance of a single continuous hearing will greatly deemphasize the role of cross-examination in the proceedings before the Federal Power Commission. This, in my judgment, will be all to the good. I do not mean to say that cross-examination is not an important part of the adversary process but I believe there has been far too much reliance by counsel on the use of cross-examination for making their own case. The new procedures will also have the salutary effect of forcing counsel for all parties to present their facts in a more orderly and concise manner.

Improvement in administrative adjudication means a constant search for improvement at every step of a proceeding. All who participate in a proceeding must be alert to take advantage of opportunities large or small to do a quicker or better job than we are now doing. The small improvements are important in total, but we cannot rely on them alone. We must also be willing to consider and adopt such major and radical changes as I have proposed.

Administrative reform cannot be achieved by any one device or stratagem. It can only result from an unremitting drive for excellence in every phase of the administrative process. An administrative agency is a unit. If the agency as a whole is deeply motivated to achieve a high standard of performance the results will show at every stage of its work including the conduct of its hearings. Conversely an agency operating on slack standards is not likely to be a model in the handling of its caseload. The Federal Power Commission is aiming at a high quality of administrative performance in every aspect of its work.

I do not doubt that the practitioners before the Federal Power Commission will have their problems of adjusting to the new procedures and quickened pace, many of which they themselves have long advocated. The bar which practices before the Commission is an integral part of the machinery for the discharge of the Commission's adjudicative functions. The bar and the Commission must now help each other in the quest for a system of administrative justice in natural gas cases of which we can all be proud.

A BASIS FOR PRIORITIES IN THE EXCHANGE OF ELECTRIC ENERGY BETWEEN REGIONS

Mrs. **NEUBERGER.** Mr. President, the Senate recently passed the Bonneville power bill, which was presented to the Senate under the able leadership of the Senator from Washington [Mr. JACKSON]. His able handling of the bill did not call for any comments from me at the time. His success in securing its passage attests to his ability. However, at this time I should like to make a few comments in regard to the bill, which is so vital to my part of the country. I evidence my support of S. 3153, the bill which will establish a basis of contractual understanding between electric consumers in regions of the West. This legislation is essential to spell out the reciprocal rights which will be in effect when electric energy is transported between the Pacific Northwest and the Pacific Southwest.

There is a sound reason for enactment of this bill. In the absence of legislation, it is conceivable that a Secretary of the Interior or a Bonneville Power Administrator could, through a contract, export power from Federal dams of the Columbia basin to other regions, thereby prejudicing sound long-range development of the Pacific Northwest. Enactment of S. 3153 will foreclose any such undesirable possibility.

The protection and priorities established under S. 3153 are the necessary forerunners to the valuable and beneficial interconnection of generating facilities of the Pacific Northwest and California. Construction of high voltage transmission facilities between these two western areas will mark a forward stride in conservation. Millions of kilowatts of secondary Columbia River power are wasted through lack of a market, while vast quantities of fuel are being consumed to generate energy in California. We can ill afford such profligate use of our resources.

I wish to emphasize that benefits will flow in two directions with the establishment of an interconnection. A high-capacity transmission line between the Pacific Northwest and the Southwest would make it possible to increase the firm power supply of the Northwest by some 200,000 to 400,000 kilowatts. This would be a very significant benefit to the people in Oregon. The firm power gain in the Northwest from such an arrangement alone is equivalent to the construction of a large-size dam.

The characteristics of our Pacific Northwest hydroelectric system, where we have little or no steam-generated energy, are such that we are able to generate tremendous amounts of secondary energy during periods of high streamflow. During periods of low streamflow—about the middle of September through the middle of April—water releases from storage reservoirs are made in order to increase our firm power capability. It is primarily the firm power capability of the system which determines our ability to market the power under long-term sales arrangements to rural, domestic, and industrial customers. The market for sales of secondary energy is quite limited in the Northwest.

By changing the operation of the storage reservoirs it is possible to "firm up" some of this Northwest secondary energy through use of an interconnection with California. The Northwest utilities could release water stored in their reservoirs faster than normal in order to produce firm power early in the storage drawdown period. Thermal-generated energy from California would then be used in the latter portion of the normal storage drawdown period to develop additional firm power needed at that time. By having the assurance of the availability of this steam-generated energy from the Southwest, we can create a new, firm, valuable resource in the Northwest.

The bill does nothing more than clarify the buyer-seller relationship. Power consumers in California should know precisely on what terms they can expect delivery of our surplus power; and we in the Pacific Northwest must have the same sort of assurances with respect to delivery of power to our region.

One point I should like to add is that some concern was expressed in respect to the manner in which the bill might be subject to misinterpretation because of uncertainty of meaning. But the testimony and the legislative history of the bill satisfied me. In case there is any question in respect to the meaning of terms, the 1949 glossary of important power and rate terms prepared under the supervision of the Federal Power Commission will be used in defining terms not expressly defined in the bill.

Another question directed to me by the Governor of Oregon had to do with prior notice to customers of the Bonneville Power Administration. I find from many inquiries that it is the established practice of the Bonneville Power Administration to give at least 30 days' prior notice to its existing customers when entering into contracts with new users. So it would seem unreasonable that the Secretary of the Interior would not give notice well in advance. I believe those people are protected.

NEW YORK CUSTOMS A DISGRACE

Mrs. NEUBERGER. Mr. President, last winter I received a telephone call from New York from an indignant taxpayer who had just gone through the frustrating experience of clearing customs in New York.

I reported her experience to the Treasury Department, Customs Division.

A month later this same civic-minded citizen, interested in encouraging foreign visitors to be our guests, went to the dock to meet a couple on their first visit to the United States. She reported the 2-hour delay in getting an inspector, the freezing temperature on the dock, and the inability to find one person who could speak German to help out a poor traveler who spoke no English.

Again I took this up with the Treasury, and received a courteous letter. Now, I call the attention of the Senate to a column in the August 7 issue of the Washington Post by Bill Gold, dealing with the same subject.

I ask unanimous consent to have printed in the RECORD the column written by Bill Gold.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 7, 1962]

COMMUNICATION

(By Bill Gold)

We have already established in previous columns that the filthy, frigid docks at which steamship passengers go through customs in New York are not under the control of the Bureau of Customs. However, the latest letter to reach me on this subject is interesting enough to warrant our attention, despite its misconceptions, chaotic language, lack of punctuation, and great length. Here is a brief sample, faithfully reproduced:

"Because you are honest and fair we will write this letter to you as we never write letters to the papers but we pray you can do something about our customs in New York, in the first place let us say we would not vote for the or any mayor of New York or the Governor or anyone that allows customs conditions as they exist in New York and I defy anyone to say what we are telling you is not the facts for it is more than the facts and no one should brag about America with the New York Customs the worst in any country, we have traveled in many countries, small and large and the customs in every country surpassed and some were wonderful and all better than the customs in New York City, N.Y.

"The last time we returned in December it was so cold that we almost froze, yes we were on a big liner and had some influence and prestige but it did not take away the heartache of crying cold children, the many from other countries cold and shivering and the time and the waste and the poor customs officers freezing and running into the little office to warm up and let the passengers wait and the awful sight of the suitcases and baggage open and clothes flying away in the wind and storm and the many friends packed like animals in the wire enclosure, cold and shivering waiting for their people, and the sick and in wheelchairs, some given more attention but one man in particular with a heart condition waiting until he fell and had to be taken away."

The description of conditions on the docks gets worse as it goes along. But it would run more than a column in length, and I think this much is enough to get the general idea across.

NATIONAL SERVICE LIFE INSURANCE

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1764.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 3597) to amend title 38, United States Code, to permit, for 1 year, the granting of national service life insurance to certain veterans heretofore eligible for such insurance.

The ACTING PRESIDENT pro tempore. The question is on the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Finance, with an amendment, to strike out all after the enacting clause and insert:

That subchapter I of chapter 19 of title 38, United States Code, is amended by adding at the end thereof the following new section:

"§ 725. Limited period for acquiring insurance

"(a) Any person (other than a person referred to in subsection (e) of this section) heretofore eligible to apply for national service life insurance after October 7, 1940, and before January 1, 1957, shall upon application in writing made within one year after the effective date of this section, submission of evidence of good health satisfactory to the Administrator at the time of such application, and payment of the required premiums, be granted insurance under the same terms and conditions as are contained in standard policies of national service life insurance except (1) five-year level premium term insurance may not be issued or renewed on the term plan after the applicant's fiftieth birthday; (2) the net premium rates shall be based on the "1958 Commissioners Standard Ordinary Basic Mortality Table", increased at the time of issue by such an amount as the Administrator determines to be necessary for sound actuarial operations, and thereafter such premiums may be adjusted as the Administrator determines to be so necessary but at intervals of not less than two years; (3) an additional premium to cover administrative costs to the Government as determined by the Administrator at time of issue shall be charged for insurance issued under this subsection and for any total disability income provision attached thereto, and thereafter such costs may be adjusted as the Administrator determines to be necessary but at intervals of not less than five years; (4) all cash, loan, and paid-up insurance values shall be based on the "1958 Commissioners Standard Ordinary Basic Mortality Table" and all extended term insurance values shall be based on 130 per centum of such table; (5) all settlements on policies involving annuities shall be calculated on the basis of the annuity table for 1949; (6) all calculations in connection with insurance issued under this subsection shall be based on interest at the rate of 3 per centum per annum; (7) all rights under such insurance and any total disability income provision attached thereto, whether in force or lapsed, shall terminate effective upon the date the policyholder enters on active duty or active duty for training under a call or order to such duty for a period of thirty-one days or more; (8) the insurance shall not be payable for death which occurs while the insured is on active duty or active duty for training under a call or order to such duty for a period of less than thirty-one days, if dependency and indemnity compensation is payable in such case at the time of death, however, the cash value, if any, less any indebtedness shall be paid to the designated beneficiary, if living, otherwise to the insured's estate; (9) the insurance shall include such other changes in terms and conditions as the Administrator determines to be reasonable and practicable; (10) the insurance and any total disability income provision attached thereto shall be on a nonparticipating basis and all premiums and other collections therefor shall be credited to a revolving fund established in the Treasury of the United States and the payments on such insurance and disability provision shall be made directly from such fund.

"(b) (1) There is authorized to be appropriated such sums as may be required to provide capital for the revolving fund to carry out the purpose of this section. Such appropriations shall be advanced to the revolving fund as needed and shall bear interest as determined by the Secretary of the Treasury, taking into consideration the average yield on all marketable interest-bearing obligations of the United States of comparable maturities then forming a part of the public debt and shall be repaid to the Treasury over a reasonable period of time.

"(2) The Administrator is authorized to set aside out of the revolving fund established under subsection (a) of this section such reserve amounts as may be required under accepted actuarial principles to meet all liabilities on insurance issued under subsection (a) of this section and any total disability income provision attached thereto. The Secretary of the Treasury is authorized to invest in and to sell and retire special interest-bearing obligations of the United States for the account of the revolving fund. Such obligations issued for this purpose shall have maturities fixed with due regard for the needs of the fund and shall bear interest at a rate equal to the average market yield (computed by the Secretary of the Treasury on the basis of market quotations as of the end of the calendar month next preceding the date of issue) on all marketable interest-bearing obligations of the United States then forming a part of the public debt which are not due or callable until after the expiration of four years from the end of such calendar month; except that where such average market yield is not a multiple of one-eighth of 1 per centum, the rate of interest of such obligations shall be the multiple of one-eighth of 1 per centum nearest such market yield.

"(3) Notwithstanding the provisions of section 782 of this title, there are hereby authorized to be made available for expenditure out of the revolving fund such sums as Congress may deem appropriate to pay the cost of administration of insurance issued under subsection (a) of this section, and any total disability income provision attached thereto, for transfer to the appropriation, 'General Operating Expenses, Veterans' Administration,' or as may otherwise be specified in appropriation Acts.

"(c) Any person who applies for insurance under subsection (a) of this section and who cannot qualify for insurance thereunder solely because of a service-connected disability for which compensation would be payable, if 10 per centum or more in degree, shall be granted insurance under the same terms and conditions as are contained in standard policies of national service life insurance except (1) five-year level premium term insurance may not be issued or renewed on the term plan after the applicant's fiftieth birthday; (2) an additional premium to cover administrative costs to the Government as determined by the Administrator at the time of issue shall be charged for insurance issued under this subsection and for any total disability income provision attached thereto (for which the insured may subsequently become eligible) and thereafter such costs may be adjusted as the Administrator determines to be necessary but at intervals of not less than five years; (3) the insurance and any total disability income provision attached thereto shall be on a nonparticipating basis; (4) all settlements on policies involving annuities shall be calculated on the basis of the annuity table for 1949, and interest at the rate of 3 per centum per annum; (5) the insurance shall include such other changes in terms and conditions as the Administrator determines to be reasonable and practicable; (6) all premiums and other collections on the insurance and any total disability income provision attached thereto shall be credited directly to the national service life insurance appropriation and any payments on such insurance and total disability income provision attached thereto shall be made directly from such appropriation. Appropriations necessary to carry out the provisions of this subsection are hereby authorized. Notwithstanding the provisions of section 782 of this title, there are hereby authorized to be made available for expenditure out of the national service life insurance appropriation such sums as Congress may deem appropriate to pay the cost of administration of insurance issued under this subsection, and any total disability income provision attached thereto, for transfer to the appropriation 'General Operating Expenses, Veterans' Administration,' or as may otherwise be specified in appropriation Acts.

"(d) Notwithstanding the provisions of section 782 of this title, a medical examination (including any supplemental examination or tests) when required of an applicant for issuance of insurance under this section or any total disability income provision attached thereto shall be at the applicant's own expense by a duly licensed physician.

"(e) No insurance shall be granted under this section to any person referred to in section 107 of this title or to any person while on active duty under a call or order to active duty for a period of thirty-one days or more.

"(f)(1) Whenever insurance issued under subsection (a) of this section and any total disability income provision attached thereto is terminated as provided in such subsection, the cash value, if any, less any indebtedness, of a permanent plan policy shall be paid to the insured. Any person whose term or permanent plan policy, not including a reduced paid-up policy, was so terminated while it was not lapsed may, upon written application and payment of the required premium made within one hundred and twenty days after separation from active duty or active duty for training, replace such policy and any total disability income provision attached thereto which was in force at the time of termination. The policy and provision issued to replace the terminated insurance shall be on the same plan and shall not be in excess of the amount of insurance which was terminated. Any person whose permanent plan policy was so terminated while such insurance was not lapsed may reinstate such insurance and any total disability income provision attached thereto which was in force at time of termination, upon written application, payment of the required premium and reserve within the one hundred and twenty day period specified above. A person whose paid-up policy was so terminated may reinstate such paid-up insurance within the one hundred and twenty day period specified above, and any total disability income provision attached thereto which was in force at time of termination, upon written application and payment of the required premium and reserve. Waiver of premiums and total disability income benefits otherwise authorized under this chapter shall not be denied in any case of reinstatement or replacement of insurance or the disability provision under this paragraph in which it is shown to the satisfaction of the Administrator that the total disability of the applicant began before the date of his application.

"(2) Any person whose rights under a term or permanent plan policy or any total disability income provision attached thereto were terminated under subsection (a) of this section, while the insurance and provision were in a lapsed status, may upon separation from active duty or active duty for training, replace such policy and provision on the same plan and not in excess of the amount of insurance terminated, upon written application made within one hundred and twenty days after separation from such duty, payment of the required premium and submission of evidence of good health satisfactory to the Administrator.

"(3) Any person whose rights under a term or permanent plan policy or total disability income provision attached thereto were terminated under subsection (a) of this section, whether the insurance and provision were in force or lapsed, may upon separation from active duty or active duty for training (A) reinstate such permanent plan policy and provision upon written application, payment of the required premium and reserve, and submission of evidence of good health satisfactory to the Administrator; or (B) reinstate such term policy and provision (within the term period) upon written application, payment of the required premiums, and submission of evidence of good health satisfactory to the Administrator

"(4) Five year level premium insurance may be issued under this subsection but not renewed on the term plan after the applicant's fiftieth birthday. Insurance replaced under this subsection shall be issued at the premium rate for the applicant's then attained age."

SEC. 2. Section 704 of title 38, United States Code, is amended (1) by inserting "(a)" immediately before "Insurance"; and (2) by adding at the end thereof the following:

"(b) Under such regulations as the Administrator may promulgate a policy of participating insurance may be converted to or exchanged for insurance issued under this subsection on a modified life plan. Insurance issued under this subsection shall be on the same terms and conditions as the insurance which it replaces, except (1) the premium rates for such insurance shall be based on the 1958 Commissioners Standard Ordinary Table of Mortality and interest at the rate of 3 per centum per annum; (2) all cash, loan, paid-up, and extended values shall be based on the 1958 Commissioners Standard Ordinary Table of Mortality and interest at the rate of 3 per centum per annum; and (3) at the end of the day preceding the sixty-fifth birthday of the insured the face value of the modified life insurance policy or the amount of extended term insurance thereunder shall be automatically reduced by one-half thereof, without any reduction in premium.

"(c) Under such regulations as the Administrator may promulgate, a policy of nonparticipating insurance may be converted to or exchanged for insurance issued under this subsection on a modified life plan. Insurance issued under this subsection shall be on the same terms and conditions as the insurance which it replaces, except that (1) term insurance issued under section 621 of the National Service Life Insurance Act of 1940 shall be deemed for the purposes of this subsection to have been issued under section 723(b) of this title; and (2) at the end of the day preceding the sixty-fifth birthday of the insured the face value of the modified life insurance policy or the amount of extended term insurance thereunder shall be automatically reduced by one-half thereof, without any reduction in premium. Any person eligible for insurance under section 722(a), or section 725 of this title may be granted a modified life insurance policy under this subsection which, subject to exception (2) above, shall be issued on the same terms and conditions specified in section 722(a) or section 725, whichever is applicable.

"(d) Any insured whose modified life insurance policy is in force by payment or waiver of premiums on the day before his sixty-fifth birthday may upon written application and payment of premiums made before such birthday be granted National Service Life Insurance, on an ordinary life plan, without physical examination, in an amount of not less than $500, in multiples of $250, but not in excess of one-half of the face amount of the modified life insurance policy in force on the day before his sixty-fifth birthday. Insurance issued under this subsection shall be effective on the sixty-fifth birthday of the insured. The premium rate, cash, loan, paid-up, and extended values on the ordinary life insurance issued under this subsection shall be based on the same mortality tables and interest rates as the insurance issued under the modified life policy. Settlements on policies involving annuities on insurance issued under this subsection shall be based on the same mortality or annuity tables and interest rates as such settlements on the modified life policy. If the insured is totally disabled on the day before his sixty-fifth birthday and premiums on his modified life insurance policy are being waived under section 712 of this title or he is entitled on that date to waiver under such section he shall be automatically granted the maximum amount of insurance authorized under this subsection and premiums on such insurance shall be waived during the continuous total disability of the insured."

SEC. 3. The amendments made by this Act shall take effect as of the first day of the first calendar month which begins more than one year after the date of enactment of this Act.

SEC. 4. The analysis of subchapter I of chapter 19 of title 38, United States Code, is amended by adding at the end thereof the following:

"725. Limited period for acquiring insurance."

The **ACTING PRESIDENT** pro tempore. The question is on the committee amendment.

Mr. LONG of Louisiana. Mr. President, I believe some explanation of the bill would be desirable. The bill, S. 3597, contains the administration's version of a measure which I introduced on behalf of myself and a number of other Senators. There are some differences, but for the most part they do not change the general nature, intent, and purpose of that bill.

In effect, this bill provides that there shall be a 1-year period during which veterans of World War II and the Korean war may take out national service life insurance. The program will pay for itself entirely.

Furthermore, insurance rights for term insurance will terminate at age 50, but the option of veterans to convert the term insurance into a modified life insurance plan for any amount up to $10,000 insurance after their 50th birthday will be reserved.

In my opinion, the bill is an improvement over the bill which I introduced on behalf of myself and other Senators. It is what we have been working for a number of years. We have been seeking to obtain a vote in the House of Representatives. The House was scheduled to vote on a motion to suspend the rules to bring up a veterans' insurance bill on Monday. The question is now before the House Committee on Rules.

I have been assured by the chairman of the Veterans' Committee in the House that, in the event a rule is denied by the House Rules Committee, he will again seek a motion for a suspension of the rules and will endeavor to see that a measure is passed in that body.

I believe it would be well for the Senate to initiate action on the question and send to the House the measure in order that it may be considered. The House may see fit to substitute the House bill for S. 3597 and go to conference with us on this bill.

I therefore hope that the bill will be passed.

The **PRESIDING OFFICER**. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COMMITTEE MEETING DURING SENATE SESSION TOMORROW MORNING

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Armed Services be permitted to meet during the session of the Senate tomorrow.

The **PRESIDING OFFICER**. Without objection, it is so ordered.

THE PHILIPPINE WAR CLAIMS BILL MUST PASS

Mr. KUCHEL. Mr. President, our allies and friends in the Philippines constitute one of the great and last bastions against communism on the far side of the Pacific. Our two nations have much in common. We seek a shared goal of peace and freedom. Moreover, we have fought together to achieve that end.

Her sons stood with ours, shoulder to shoulder throughout the rigors and deprivations of the Second World War. Filipinos fought bravely at Bataan and Corregidor. During Japanese occupation of their islands, many of these proud people retreated to the hills where they carried on a fierce guerrilla warfare in the very midst of the enemy. Indeed, they constituted one of the greatest sparks of hope in the Pacific theater during the dark days of that war.

When we again view the turmoil of southeast Asia, we realize how valuable their continuing and unfailing friendship has been. And, because it is so clearly in our interest to retain the close spirit of cooperation which has bound together our two nations, we must be particularly careful not to endanger that friendship by failing to honor a rightful debt of the Second World War.

The Philippines sustained extensive damages and loss of life during the war. Much of this damage was done by American bombers, warships, and artillery units in the successful efforts to rout out the Japanese from the Philippine homeland. The United States pledged to help the Filipinos repair that damage. Our President made that promise during the war.

Subsequently, Congress provided for war damages through the enactment of the Philippine Rehabilitation Act of 1946. It set up a War Damages Commission, which carefully examined the claims presented to it. The 1946 bill required not only valid proof of claim but also proof that the claimants had already reinvested in the repair or reconstruction of their property a sum equal to that which they were to receive from the Commission. This insured that the money we paid out compensated claimants for real efforts they had made to rehabilitate the Philippine economy.

The plan was to authorize payment of up to 75 percent of the claims approved by the Commission. Congress appropriated $400 million, but funds ran out when only 52½ percent of the claims had been settled.

Year after year, Congress has failed to vote funds to pay the remaining $73 million still due, despite pleas of the State Department, as well as of Presidents Truman, Eisenhower, and Kennedy. The unpaid balance has been an irritant that is both unnecessary and morally unjust. The Philippine people and their Government have been repeatedly and justifiably dismayed and angered by the repudiations of this acknowledged debt.

Congress must face this problem and resolve it favorably before we adjourn. At the very least, the United States has a moral obligation to make final payment.

Earlier this year, the House failed to pass a Philippine war damages bill. I deeply regret that action. I am gratified that a revised version finally passed the House on August 1.

The House-passed bill, H.R. 11721, authorizes the payment of the outstanding balance of awards approved by the Philippines War Damages Commission under the authority of the 1946 law. No new claims can be filed. It simply provides for the discharge of an obligation—which has been outstanding for more than a decade.

I am hopeful that the Senate will now act speedily and enact this revised bill into law before this Congress adjourns. The passage of this bill may very well bolster the efforts of the new and progressive Macapagal administration to spur the Philippine economy. A strong and vigorous economy is the strongest bastion behind a vibrant democracy. It is also democracy's strongest weapon against the aggressive thrusts of international communism.

It is the good faith of the United States which is at stake. I am one Senator who does not think we should waste any more time in meeting this oft-deferred, recognized, and longstanding obligation.

I ask unanimous consent that the editorial entitled "Unfriendly Move," published in the Los Angeles Herald Examiner of May 15, 1962, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

UNFRIENDLY MOVE

Congressional action in disapproving war damage claims by the Philippines just does not make sense.

The Philippines are our firm ally in Asia; our bonds are tempered in tradition and battle.

In a surprise move, the House of Representatives has turned down—201 to 171—a bill to pay the Philippines $73 million. The funds would have completed our payments on claims arising from World War II combat between American and Japanese forces.

On the other hand, torrents of dollars are flowing to alleged neutrals and other nations of dubious attitudes toward the United States.

In the Philippines, the reaction is bitter. Vice President Emmanuel Palaez rightly comments that "It seems the United States treats her friends more shabbily than those who are not with her."

President Kennedy has expressed regret over the House action and hope that it will not change the plans of President Diosdados Macapagal to visit the United States next month. We join in that hope.

We are happy to note that there is a move afoot in Congress to reintroduce the payment bill at this session. We urge all Representatives and Senators to heal this rift between friends.

THWARTING THE CONGRESSIONAL WILL

Mr. HRUSKA. Mr. President, a profound feeling of shock and disappointment has followed in the wake of President Kennedy's curiously watered down proclamation of Captive Nations Week.

By studiously avoiding the word "communism," by failing to mention the captive nations by name, and by the generally accommodating language of the proclamation, the President has violated the spirit, if not the letter, of Public Law 86-90 in which the Congress authorized and requested the President to proclaim the third week in July as Captive Nations Week. This proclamation is to be issued each year until such time as freedom and independence shall have been achieved for all the captive nations of the world.

The original joint resolution, approved on July 17, 1959, had as a principal proposition the fact that enslavement of a substantial part of the world's population by Communist imperialism makes a mockery of the idea of peaceful coexistence between nations. It cited the imperialistic and aggressive policies of Russian communism and noted that these policies had led to the subjugation of more than a score of nations.

This is what the Congress had in mind, when it called on the President to proclaim Captive Nations Week. Both in the soft language he used and in virtual blackout of publicity, the congressional will has been thwarted. The document signed by Mr. Kennedy has even been viewed, not as a courageous condemnation of Communist aggression, but as a simple endorsement of anticolonialism policy in behalf of the so-called emerging nations of Africa and Asia.

Mr. President, in order that the comparison may be perfectly clear, I ask unanimous consent that there be inserted in the Record at this point, the text of Public Law 86-90 and the text of Mr. Kennedy's proclamation.

There being no objection, the material was ordered to be printed in the Record, as follows:

Public Law 86-90, 86th Congress, Senate Joint Resolution 111, July 17, 1959

Joint resolution providing for the designation of the third week of July as "Captive Nations Week"

Whereas the greatness of the United States is in large part attributable to its having been able, through the democratic process, to achieve a harmonious national unity of its people, even though they stem from the most diverse of racial, religious, and ethnic backgrounds; and

Whereas this harmonious unification of the diverse elements of our free society has led the people of the United States to possess a warm understanding and sympathy for the aspirations of peoples everywhere and to recognize the natural interdependency of the peoples and nations of the world; and

Whereas the enslavement of a substantial part of the world's population by Communist imperialism makes a mockery of the idea of peaceful coexistence between nations and constitutes a detriment to the natural bonds of understanding between the people of the United States and other peoples; and

Whereas since 1918 the imperialistic and aggressive policies of Russian communism have resulted in the creation of a vast empire which poses a dire threat to the security of the United States and of all the free peoples of the world; and

Whereas the imperialistic policies of Communist Russia have led, through direct and indirect aggression, to the subjugation of the national independence of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, White Ruthenia, Rumania, East Germany, Bulgaria, mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Tibet, Cossackia, Turkestan, North Vietnam, and others; and

Whereas these submerged nations look to the United States, as the citadel of human freedom, for leadership in bringing about their liberation and independence and in restoring to them the enjoyment of their Christian, Jewish, Moslem, Buddhist, or other religious freedoms, and of their individual liberties; and

Whereas it is vital to the national security of the United States that the desire for liberty and independence on the part of the peoples of these conquered nations should be steadfastly kept alive; and

Whereas the desire for liberty and independence by the overwhelming majority of the people of these submerged nations constitutes a powerful deterrent to war and one of the best hopes for a just and lasting peace; and

Whereas it is fitting that we clearly manifest to such peoples through an appropriate and official means the historic fact that the people of the United States share with them their aspirations for the recovery of their freedom and independence: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the third week in July 1959 as "Captive Nations Week" and inviting the people of the United States to observe such week with appropriate ceremonies and activities. The President is further authorized and requested to issue a similar proclamation each year until such time as freedom and independence shall have been achieved for all the captive nations of the world.

Approved **July 17, 1959.**

Captive Nations Week, 1962—A Proclamation by the President of the United States of America

The White House, *July 13, 1962.*

Whereas by a joint resolution approved July 17, 1959 (73 Stat. 212), the Congress authorized and requested the President of the United States of America to issue a proclamation designating the third week in July 1959 as "Captive Nations Week," and to issue a similar proclamation each year until such time as freedom and independence shall have been achieved for all the captive nations of the world; and

Whereas there exist many historical and cultural ties between the people of these captive nations and the American people; and

Whereas the principles of self-government and human freedom are universal ideals and the common heritage of mankind: Now, therefore,

I, John F. Kennedy, President of the United States of America, do hereby designate the week beginning July 15, 1962, as Captive Nations Week.

I invite the people of the United States of America to observe this week with appropriate ceremonies and activities, and I urge them to give renewed devotion to the just aspirations of all people for national independence and human liberty.

In witness whereof, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the city of Washington this 13th day of July in the year of our Lord 1962, and of the Independence of the United States of America the 187th.

John F. Kennedy.

By the President:

Dean Rusk,
Secretary of State.

Mr. HRUSKA. Mr. President, it is barely possible that references to communism and Russian imperialism were omitted through inadvertence. Yet this seems hardly likely when one considers the widespread chagrin, even outrage, which followed the issuance last year of a similarly innocuous proclamation. No; the omissions were not inadvertent.

Nor was the timing of the proclamation calculated to call the Nation's attention to the plight of those enslaved in Iron Curtain countries. This year's proclamation was issued on a Friday, just before the Kennedys left for Hyannis Port, and only 2 days before the beginning of Captive Nations Week.

Mr. President, typical of the resentment at Mr. Kennedy's action are two articles from the editorial page of the Los Angeles Herald-Examiner for August 5, by George Todt and Fulton Lewis, Jr. I ask unanimous consent that they be printed in the Record.

There being no objection, the articles were ordered to be printed in the Record, as follows:

[From the Los Angeles Herald-Examiner, Aug. 5, 1962]

Curtain of Slavery

(By George Todt)

Not long ago I spoke to an SRO crowd at the Lithuanian Culture Center in Los Angeles. The occasion was Captive Nations Week.

How our hearts must go out to the people who have been conquered and enslaved behind the Iron Curtain today.

Especially the defeated countries of central Europe and the Baltic nations which have been cruelly oppressed—gobbled up by the international criminal Communist conspiracy.

This is the modern imperialism which seeks to incorporate an entire world under its totalitarian banner of Red slavery for all, freedom for none.

Why does the United Nations refuse to discuss this captive nations matter?

Why do we send billions of dollars worth of aid to Red tyrants like Tito of Yugoslavia and Gomulka of Poland—which will help keep them in power over those whose liberty has been shut off?

Why do we allow the fraudulent and deceitful Communist propaganda machine to label us "imperialists" to the emerging nations of the world—and do next to nothing in the U.S. Information Agency about explaining Captive Nations Week to these same worthies?

One of the big thrills at the ceremonies here in Los Angeles came when the proclamation of Mayor Sam Yorty was read by Dr. Emil Onaca, chairman of the committee in charge of events. These were the meaningful words:

"Whereas those of us who live in freedom have watched with deep concern the slow spread of a malignant social order that seeks to replace liberty with repressive regimentation; and

"Whereas we are shocked that by trick or by shoddy political device this enslavement by dictatorship has been extended to control nations with long histories of independence and freedom; and

"Whereas today our national objective is to keep this darkness of tyranny from engulfing the entire world; and

"Whereas as we stand firm we recall with pride and gratitude that in these captive nations most peoples did not surrender their hearts and minds to the oppressive rule imposed upon them: Now, therefore, be it

"*Resolved*, That to honor those who revere and cherish freedom even if their nation is enslaved, I hereby proclaim the week of July 15–22, 1962, as Homage to Citizens of Captive Nations Week, with the certain hope that one day right and justice will again prevail in these troubled countries."

Let all concerned Democrats and Republicans rally to the cause of freedom for mankind against totalitarian oppression wherever we may find it. We serve our Republic best that way.

Let us have an end to appeasement of the Red slave bloc in the United Nations—and insist on discussion of captive nations.

Let us demand around the world: "Ivan, go home."

[From the Los Angeles Herald-Examiner, Aug. 19, 1962]

TEETH PULLED IN CAPTIVE NATIONS WEEK

(Fulton Lewis, Jr.'s commentary)

WASHINGTON.—Three years ago an angry Nikita Khrushchev howled as Dwight Eisenhower proclaimed a Captive Nations Week and threw the spotlight of public indignation upon the enslaved millions of Eastern Europe.

Under a joint resolution of July 17, 1959, the President of the United States is authorized to designate the third week of July each year as Captive Nations Week. Thus did John Kennedy proclaim the week of July 15, 1962, as Captive Nations Week. But there was, this year, no outcry from Nikita Khrushchev.

It is possible the Soviet boss did not know of the President's proclamation. Mr. Kennedy made no public statement to indicate that Captive Nations Week had been announced.

Late on the afternoon of Friday, July 13, as the President made his way to Hyannis Port, the White House released a mimeographed copy of the proclamation to what few newsmen remained at 1600 Pennsylvania Avenue.

The proclamation received virtually no press coverage. It is just as well, for John Kennedy's declaration is a masterpiece of appeasement. It would be difficult to write a resolution on captive nations that does not mention by name the horrible imperialism of Soviet Russia.

But John Kennedy's does just that.

The resolution reads:

"Whereas there exist many historical and cultural ties between the people of these captive nations and the American people; and

"Whereas the principles of self-government and human freedom are universal ideals and the common heritage of mankind:

"Now, therefore, I, John F. Kennedy, President of the United States, do hereby designate the week beginning July 15, 1962, as Captive Nations Week."

The President's proclamation was drafted at the State Department by officials who do not, apparently, wish to "offend" the Soviet Union. They are the same men who have persuaded Secretary of State Dean Rusk to oppose the creation of a Permanent Congressional Committee of Captive Nations, Mr. Rusk wrote to Congress:

"It would likely be a source of contention and might be taken as a pretext for action by the Soviet Union which would interfere with the resolution of the present crisis concerning Berlin."

There were some in the State Department who urged the President not to proclaim a Captive Nations Week at all. Mr. Kennedy did not, apparently, wish to disregard the congressional resolution of 1959. So he did the next best thing and issued a proclamation without mentioning Soviet imperialism.

The captive nations declaration of Dwight Eisenhower is quite a contrast:

"Whereas many people throughout the world have been made captive by the imperialistic and aggressive policies of Soviet communism; and

"Whereas the peoples of the Soviet-dominated nations have been deprived of their national independence and their individual liberties; and

"Whereas the citizens of the United States are linked by bonds of family and principle to those who love freedom and justice on every continent. * * *

"Now, therefore, I, Dwight D. Eisenhower, President of the United States of America, do hereby designate the week beginning July 19, 1959, as Captive Nations Week."

NOTE.—Gov. Nelson Rockefeller stole one up on President Kennedy with his own proclamation of Captive Nations Week. The New York chief executive made it crystal clear in his declaration who the captors were:

"The roll of nations held captive by Communist colonialism is one of appalling length and it is disheartening to note that the Reds are becoming ever more firmly entrenched in Cuba."

Mr. KUCHEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ENGLE in the chair). Without objection, it is so ordered.

ORDER FOR ADJOURNMENT TO TOMORROW AT 12 O'CLOCK MERIDIAN

Mr. MANSFIELD. Mr. President, I ask unanimous consent that, instead of meeting at 10 o'clock tomorrow morning, as previously agreed to, when the Senate adjourns tonight, it adjourn to meet at 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KUCHEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that further proceedings under the quorum call be suspended.

The PRESIDING OFFICER (Mr. MANSFIELD in the chair). Without objection, it is so ordered.

CONVEYANCE OF CERTAIN PROPERTY IN THE CITY OF SAN DIEGO, CALIF.

The Senate resumed the consideration of the bill (S. 1108) authorizing the conveyance of certain property in the city of San Diego to the regents of the University of California.

Mr. KUCHEL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KUCHEL. What is the pending business?

The PRESIDING OFFICER. The pending business is Calendar No. 1590, S. 1108, a bill authorizing the conveyance of certain property in the city of San Diego to the regents of the University of California.

Mr. KUCHEL. Mr. President, I shall make a very short statement on the pending bill.

I introduced this proposed legislation, along with my colleague from California [Mr. ENGLE], and it was sent to the Senate Committee on Armed Services.

The facts, briefly, are these: Almost half a century ago, the city of San Diego made a gift of some 60 acres of property to the Government of the United States. Subsequent to that time, Mr. President, the Government of the United States wanted some additional property, and asked the city of San Diego for a gift of additional property. The city of San Diego responded, and the second parcel of property was transferred from the municipality to the Federal Government as a grant. No money was involved.

The Government of the United States, having no further need for the earlier transferred property, returned that property to the city of San Diego. In the intervening years, the U.S. Navy Department has used the second parcel of property. No further use is now contemplated by the Navy Department of that property.

Our bill would provide that the U.S. Government, acting through the Navy Department, would transfer this property, now known as Camp Matthews, to the University of California, provided that the University of California utilize this property for educational purposes only.

When the bill was introduced in the Senate, the Navy Department responded and interposed no objection.

The Department of Health, Education, and Welfare responded and interposed no objection.

The General Services Administration responded and interposed no objection.

The Budget Bureau has no objection to this legislation.

Hearings were held before the Senate Armed Services Committee, and the bill was unanimously reported by the Armed Services Committee to the Senate.

The University of California desires to use this property for a new campus for that great State institution, to be located in the San Diego area, at which it is contemplated that some 27,500 students will be enrolled. The University of California has gone forward with the acquisition of property in the vicinity of Camp Matthews.

Under present Federal law, the university could ask for a transfer administratively when the Secretary finally shall have determined that the transfer of the military functions of Camp Matthews north of Camp Pendleton shall have terminated. The university, however, seeks this means of being given the assurance now that it may acquire the property when the Secretary of the Navy has concluded his transfer.

This bill is in the public interest. The bill, I repeat, Mr. President, represents a request for a transfer of property by the Federal Government to a great public educational institution at no cost. That is the manner in which the Federal Government acquired the property from the city of San Diego, at no cost.

The city of San Diego has passed appropriate resolutions urging that this bill be adopted. The county of San Diego has done likewise. In the communications from all of the executive agencies downtown, as contained in the report, their recommendations have been unanimously in favor of this legislation.

That, I think, is a brief explanation of the bill which is now the pending business of the Senate.

Mr. ENGLE. Mr. President, I ask unanimous consent that tomorrow the morning hour proceed from 12 to 12:30, the Senate to meet at noon, by previous order of this body; that thereafter 15 minutes be allowed on each side on the Morse amendment which will be subsequently offered, and that the vote on the Morse amendment and all other amendments, and on the bill itself, be had at 1 o'clock p.m.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. MORSE. Mr. President, reserving the right to object——

The ACTING PRESIDENT pro tempore. The Senator from Oregon reserves the right to object.

Mr. MORSE. I want the Senator to take note of the fact that I started by saying "reserving the right to object."

I wish to make sure that I understand the request by my good friend the Senator from California [Mr. ENGLE]. The unanimous-consent agreement would begin to run on the amendment at 12:30, rather than 12 o'clock?

Mr. ENGLE. The Senator is correct. The unanimous-consent request would limit the morning hour to a half hour.

Mr. MORSE. Fine.

Mr. ENGLE. Otherwise, the morning hour would require a longer period of time.

Mr. MORSE. I thank the Senators from California for accommodating me in regard to this matter. As the Senators know, I am engaged in the hearing in the Committee on Foreign Relations with reference to the satellite communications bill. A hearing is scheduled for tomorrow morning. I am sure the committee will recess at 12:30. I can get to the Chamber in a minute or two, or can leave the committee meeting a minute or two in advance.

The ACTING PRESIDENT pro tempore. Without objection, the quorum call required by the rule will be waived; and, without objection, the unanimous-consent request offered by the Senator from California is agreed to.

Mr. KUCHEL. Mr. President, will the Presiding Officer restate the request which has been agreed to?

Mr. ENGLE. I shall be glad to restate it, for the benefit of all Senators.

The unanimous-consent agreement is that the morning hour tomorrow shall run until 12:30, the Senate having previously agreed to meet at 12 o'clock by unanimous consent; that, thereafter, 15 minutes shall be allowed on each side—15 minutes to the Senator from Oregon and 15 minutes to the opponents of his amendment—that thereupon, at 1 o'clock, a vote will occur upon the Morse amendment, all amendments to the bill, and the bill.

Mr. KUCHEL. I am not sure I fully understand.

Mr. MORSE. If the Senator will withhold a moment, we may have to reconsider that.

I say to the Senator from California, after there is a yea-and-nay vote on the Morse amendment I may not care whether there is a yea-and-nay vote on the bill. I have no objection to such a vote on the bill, but I do not wish to be put in the position that some Senator may be offended by my insisting on two yea-and-nay votes. I shall insist on a yea-and-nay vote on the Morse amendment.

Mr. ENGLE. Mr. President, I ask unanimous consent that a yea-and-nay vote be ordered on the Morse amendment.

Mr. KUCHEL. Mr. President, will the Senator withhold that request until tomorrow?

Mr. ENGLE. I am willing to withhold that request. I am prepared to tell the Senator from Oregon that I shall be glad to see that he gets a yea-and-nay vote on his amendment.

Mr. KUCHEL. Mr. President, so am I. My instructions, as acting minority leader, are never to consent to a request for a yea-and-nay vote in the absence of the stipulated, required number of Senators. I say to my friend that I shall be glad to urge a yea-and-nay vote.

Mr. ENGLE. We understand. I agree to that.

Mr. MORSE. Mr. President, I not only appreciate the assurances of the two Senators from California, but also our very able staff director, who is on the floor, has said to me he does not think I should hesitate to accept the unanimous-consent agreement because the Senate cannot, under the rules, bind itself to a yea-and-nay vote tomorrow.

Mr. President, let the record show that I am seeking to extend, as I always seek to do with respect to procedural matters in situations like this, every consideration to my colleagues in the Senate. I said to them a few moments ago that I consider this question to be of such importance to me, from the standpoint of my record in the Senate with respect to a formula for which I have fought since 1946 and to which I have never made an exception, that I would do everything I could to assure myself of a yea-and-nay vote.

I do not have to tell the present Presiding Officer [Mr. METCALF in the chair] that I would not have any difficulty, undoubtedly, in bringing that about, if I did not go along with the unanimous-consent agreement tonight and proceeded to use the floor for such time as I thought necessary, as I thought might be helpful to me in getting a yea-and-nay vote.

I have been sitting down all day. I am greatly in need of exercise. Therefore, I am in good condition to stand for quite some time and to discuss the question. But that is not what I wish to do. I think my friends from California know that.

I hope my colleagues will realize tomorrow that I am waiving that right and privilege tonight in order to accommodate my friends from California. I trust that when we ask for a yea-and-nay vote tomorrow we will have no difficulty in getting it. I am willing to take that gamble, along with my friends from California. Therefore, I am willing to accept the unanimous-consent request.

Mr. ENGLE. Mr. President, I withdraw the unanimous-consent request that the Senate agree to take a yea-and-nay vote tomorrow on the Morse amendment, when offered, for the reasons explained by the senior Senator from Oregon. In withdrawing that request, I give the Senator my assurance that I shall cooperate with him in getting the yea-and-nay vote.

Otherwise, I ask that my unanimous-consent request be agreed to.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from California? The Chair hears none, and the unanimous-consent request of the Senator from California is agreed to.

The unanimous-consent agreement, subsequently reduced to writing, is as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That on Thursday, August 9, 1962, at the hour of 12:30 p.m., the Senate resume the consideration of Calendar No. 1590 (S. 1108) authorizing the conveyance of certain property in the city of San Diego to the regents of the University of California, that debate on an amendment to be proposed by Mr. MORSE to said bill be limited to 30 minutes, to be equally divided between the proponents and opponents and controlled by Mr. MORSE and the majority leader, and at the conclusion a vote be taken on said amendment and all other amendments to said bill, if any, and on the final passage of the bill itself.

Mr. ENGLE. Mr. President, the purpose of this measure is to authorize and direct the Secretary of the Navy to convey without monetary consideration to the regents of the University of California, 544 acres of land at Camp Matthews, Calif., together with improvements and appurtenances thereon, when he determines that the said land is available for such conveyance. The bill provides that the property shall be used for educational and related purposes in perpetuity, or title thereto shall revert to the United States.

Mr. President, the lands described in this bill are located at Camp Matthews, Marine Recruit Depot, San Diego, Calif., and are now being used as a weapons training facility or rifle range.

Mr. President, I have been to that rifle range. The reason it has been necessary to abandon it is that the Marines are not sure of the marksmanship of all involved. I say this in no derogation to the Marines, because ordinarily they are very good marksmen. However, if some recruit should raise his rifle at the wrong angle, considering the present development around this particular area, he could shoot into a schoolhouse or into a local residence. Therefore, the Marine Corps has found it necessary to abandon this area and to move to Camp Pendleton.

The last military construction authorization bill, I believe, contained an item of some $5 million for the purpose of moving this particular installation to Camp Pendleton, farther north on the coast of California. This is why the area has become surplus to the needs of the Department of Defense.

The State of California has requested this area, to be used for a university campus near San Diego.

I emphasize that the property was exchanged with the city of San Diego in 1916. The Federal Government secured title to this property at no cost to the Federal Government. The Federal Government, over the 46 years, has used this property as a rifle range and for Marine Corps activities. After 46 years of use, with no compensation at all, the property is deemed to be surplus, and the State of California has asked to have it back, with the consent of the city of San Diego and with the consent of the County of San Diego, for the purpose of dedicating the property to the highest use to which any public lands can ever be put; namely, an educational use.

The university has acquired, through a transfer from the city of San Diego, 500 acres of land adjoining the Camp Matthews property and has initiated construction of its San Diego campus on this property. In laying out its long-range plans, the university has determined that it will be necessary to provide a campus which will ultimately accommodate 27,500 students. The presently owned site is insufficient for this major campus without the Camp Matthews property which, incidentally, is adjacent to it.

The university is not in a position to proceed with its long-range development plans unless it can be assured of its ability to acquire the Camp Matthews property. Such an assurance cannot be provided under the terms of existing law.

It is pertinent to point out that under the terms of the Federal Property and Administrative Services Act of 1949, the Department of Health, Education, and Welfare may convey such property for school purposes at 100 percent public benefit allowances.

Mr. President, the issue boils down to the fact that the United States owns approximately 500 acres in San Diego County adjacent to the city of San Diego. The State of California has acquired approximately 500 acres for the purpose of establishing a great university campus. The Federal Government acquired the property in 1916 at no cost to the Federal Government. In 1966 the State of California could again take back the property under existing law without paying a red cent or a thin dime. We have introduced the proposed legislation because it is necessary, first, for the State of California to be able to plan its campus. It cannot do so if it must wait until the State can act under the ordinary procedures of the General Services Act, which would permit the property to go to the State without cost. Second, it is necessary to readjust the boundary lines in order to make some changes in such boundary lines in order to fit the land into a university campus. That is all the bill amounts to. The present law would give the university the property at no cost in 1966. We cannot wait until 1966 because we must plan the university campus now.

In placing the proposed legislation before the Congress, we have made the bill more restrictive than present law. We would get a few years lead time, but in exchange for that, we would provide that, instead of the property reverting to the United States in 20 years if it is not used for educational purposes, as the present law provides, it would revert to the United States if the property were not used in perpetuity for educational purposes. In other words, under existing law, after 20 years the State of California would acquire fee title. Under the bill the University and the State of California would never acquire fee title because there is a reverter in the bill that if the property is ever used for other than educational purposes, it will have to come back to the Federal Government. That is the first restriction placed in the bill.

The second restriction is that we have an Air Force base in California from which jets are operated. It is the Naval Air Station at Miramar. There has also been concern that the noise from jets and the other hazards of jets might create liabilities to the Federal Government. The bill requires that the State of California insist on an absolute waiver of liability for hazard and noise, and that that waiver apply to all property that is exchanged for the purpose of lining up the boundaries. So in two important particulars we have put restrictions in the bill that do not exist in the present law, which would apply if we were to wait until 1966. We cannot wait until 1966 because we are trying to establish a great university campus.

I should like to address myself for a moment to my friend from Oregon and say that, much as I approve of the formula which he has enunciated in the Senate so many times, I do not believe that, in justice or in equity, it ought to apply in the present case to what we are doing.

In the first place, there is involved a piece of property which the Federal Government received for nothing in 1916. It used that property for 46 years without rent or cost as a rifle range. Now it is declared surplus for the needs of the Federal Government. The State of California, which owns 500 acres adjacent to that property, has stepped in and said, "Give it back to us in order that we may use it for the highest purpose for which public lands can be used, namely, the building of a great educational campus in the State of California."

I plead with my friend from Oregon not to insist upon the application of his formula in that instance. I believe that in the present case, although perhaps the bill would violate the technical legal aspects of his formula, the bill would not violate its spirit. As an educator and a former professor of a university, the Senator from Oregon must know—and I am sure he does—that public lands in our Nation cannot be used for any greater or better purpose than to build a great university campus. That is the purpose of the bill.

Mr. President, the reason we ask for passage of the bill is that we need action now in order that the State of California may plan. If we could wait until 1966, we would have no objection to going through the normal procedures of existing law, under which preferences are given. According to the statements already made by representatives of the Department of Health, Education, and Welfare we would be entitled to receive the property without any compensation to the Federal Government. We would have to wait those additional years. But we cannot wait. We must act now. In addition, we must be able to readjust the boundary somewhat, which will require an exchange of property, as provided for in section 4 of the proposed legislation.

I only hope that my good friend from Oregon, who has a formula under which from time to time he has asked that adequate compensation be paid to the Federal Government when Federal property is delivered to another, will not be too hard in the present case, because I believe morally and equitably we are entitled to what we are seeking under the circumstances stated.

Mr. MORSE. Mr. President, I send to the desk an amendment designated "A" to the bill (S. 1108) and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment of the Senator from Oregon will be stated.

The LEGISLATIVE CLERK. On the first page, line 10, it is proposed to strike out "without monetary consideration therefor but".

On page 2, line 18, immediately after "(a)", it is proposed to insert the following: "the regents of the University of California pay to the United States as consideration for the property conveyed an amount equal to 50 per centum of its fair market value as determined by the Secretary of the Navy after appraisal of such property; (b)".

On page 2, line 23, it is proposed to strike out "(b)" and insert in lieu thereof "(c)".

The ACTING PRESIDENT pro tempore. The question is on the amendment of the Senator from Oregon.

Mr. MORSE. Mr. President, I appreciate very much the presence of the Senator from California [Mr. ENGLE] on the floor of the Senate while I discuss my amendment and my opposition to the bill. I am disappointed that I do not have the pleasure of the attendance of his colleague on the other side of the aisle for this seminar, for I think this really amounts to a seminar on the legislative history. The Senator's colleague and I have frequently discussed the subject off the floor and I can well imagine that his colleague is of the opinion that there is nothing more that I could possibly tell him as to my reasons in opposition to the bill. So I fully understand his absence. I am not the least bit offended, only disappointed.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. ENGLE. Lest it appear in the RECORD that my senior colleague is inattentive to his business, let me say that he was present in the Chamber a few moments ago and he will be back immediately. I know he wishes to be present to hear the remarks of my friend the senior Senator from Oregon.

Mr. MORSE. I know he is a good reader, so he can read the RECORD whether he comes back or not. I am always happy to be in the company of the Senator's colleague as well as the Senator himself. I only wish to take note of the fact that I am disappointed that I have not up to this moment shared his companionship as we discuss the subject. But I am sure that if any reader of the cold print in the future might have any question as to the mood and attitude of the senior Senator from Oregon, the RECORD should show that the Senator speaks jocularly and in all good humor.

As the Senator from California [Mr. ENGLE] knows, there has been a great deal of conversation between the Senators from California and the senior Senator from Oregon on the subject. I think we all expected we would be together during the discussion of the bill.

First, in reply to my good friend from California, I am a strong proponent of Federal aid to education for institutions of higher learning.

My good friend, the senior Senator from California [Mr. KUCHEL], has returned to the Chamber. I want him to know that I am much happier now that he is here than I was 30 seconds ago.

Mr. KUCHEL. I am delighted.

Mr. MORSE. Now that I have his charming presence in the Senate, I am much happier than I was when he was absent from the Chamber.

Mr. KUCHEL. I know my good friend did not have any regrets that I was compelled to leave the floor for a few minutes.

Mr. MORSE. I always regret when the Senator from California [Mr. KUCHEL] is absent from the Chamber and I am engaging in a discussion of a matter of mutual interest. I thank him for his return.

As I was saying to the Senator from California [Mr. ENGLE], and now to both Senators from California, I am a strong advocate of Federal aid to education, elementary, and secondary, and higher education, with grants to public institutions and loans to private institutions, under such safeguards as can be found in the various pieces of Federal aid to education legislation which I have cosponsored or offered or supported over the many years that I have been in the Senate. I believe that as early as 1947, I was one of the cosponsors of the first Taft bill on Federal aid to education. I am in favor of Federal aid to education, however, on the basis of the principle of uniformity and equality. I do not believe in the application of a principle of Federal aid to education in which we select this institution or that institution or some other institution and give it a special benefit which is not to be enjoyed by all the educational institutions falling in the same classification.

Therefore, I say to my good friend, the Senator from California [Mr. ENGLE] that I do not yield to anyone in my desire to help institutions of higher learning. I could not possibly select the great University of California—and it is one of the greatest—and support what in my judgment the bill amounts to, namely, preferred treatment for that institution in contrast to other institutions.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. MORSE. I am delighted to yield.

Mr. ENGLE. The bill would cost the State of California $4 million, roughly, for the 543 acres that are involved. We resist the Senator's amendment because, in the beginning, the Government acquired this property free of charge. It has held it for more than 40 years. Now it is through with it. We say it ought to give it back to the State of California, which today is building three new university campuses and six new junior colleges. We are straining to the utmost to meet the educational requirements of our State.

The Governor of California is sweating out every dime of his budget for that purpose. If we were rich, I would say, "What is the difference?"

I recall that not long ago the Senator from Oregon protested and sought to apply his formula to a ship which I was trying to have turned over to the State of California. I cannot remember the exact cost, but it was something like $12,500 or $25,000, so far as the contribution was concerned, to meet the Morse formula requirements. He will recall that I met him outside the Chamber and said, "I will not argue with you about it. We will accept your amendment." However, here we have a case in which we believe we have great equity. We cannot afford to pay what would be required.

The property has not cost the Federal Government a dime. The Federal Government should not be an Uncle Shylock. I would like to see the property turned over for the finest and greatest public benefit that public lands can be used for, namely, educational purposes. I know that when I say that, my friend from Oregon, himself a university professor and the dean of a law school, will applaud the use of public property for that purpose.

Mr. MORSE. I had intended later in my discourse to cover the point my friend raises, but I will discuss it now. The Senator has said several times that the Federal Government obtained this property for nothing and therefore it would not cost the Federal Government anything to give it back. I say good naturedly that California has some of the great law schools of America. There are the law schools of the University of California and Stanford, and the law school of the University of Southern California. Then there are the standard law schools. There is also a law school in California with the greatest faculty, in my judgment, of all the law schools in America—greater than Harvard, Yale, Columbia, Michigan, Minnesota, Chicago, or Wisconsin, and all the rest. Even though it is not a standard law school, it is a great law school. I refer to Hastings Law School at San Francisco.

Mr. ENGLE. I thank the Senator. I am a graduate of Hastings.

Mr. MORSE. It is a great school. It has a great faculty. There is in effect generally in the law schools of the country a very unsound retirement principle. The principle is followed by a great many institutions of higher learning. There are various reasons for it. For example, a college president may not want to make a value judgment on the competency of teachers when they reach advanced years by saying to Professor Brown, for example, "I am sorry; however, I recommend that you voluntarily retire, because we are satisfied that you are no longer in possession of the abilities which you once possessed, and therefore it would be in the best academic interest of the institution for you to retire."

In other instances a college president may decide to permit such a professor to teach because he has reached the point in his life at which he can do the best teaching and is of greatest value to a college.

In many other institutions there is in effect a compulsory retirement age of 65. The age may vary, but as a general rule it is 65. In the case of a few, I understand, it is somewhat less, and in a few it is somewhat more. Retirement, however, is automatic at a certain age.

Hastings is the beneficiary of the automatic application of that rule in many of the law schools of the country. If the Senator wishes to check into the matter he will find that Hastings has on its faculty, for example, Edward Morgan, formerly of Harvard. He is probably one of the two or three greatest scholars in the field of constitutional law. The faculty also includes a great legal scholar, who, in my judgment, is far out in front among the legal scholars in the field of real property, my old law school dean at Minnesota, Everett Fraser.

Also, on the faculty at Hastings is one of the four or five greatest scholars of our time in the field of criminal law and criminal procedure, Professor Kidd, formerly of the University of California Law School.

Also we find on that faculty a brilliant scholar in contracts and also criminal law, the former dean of Illinois, Dean Harno.

Thus we could go down the list and find a remarkable faculty of brilliant legal scholars teaching on the staff of the alma mater of the distinguished junior Senator from California [Mr. ENGLE]. But the other California law schools I have mentioned are also good law schools. So there has been no paucity of legal talent in California.

Also, California has been served in recent years by great Attorneys General. For many years the great present Chief Justice of the United States, Chief Justice Warren, was the Attorney General of California. He was very active in the field of public law in 1937. The present Governor of the State was at one time its Attorney General.

The question might be running through the minds of the Senators from California as to what these comments of the Senator from Oregon have to do with the bill before the Senate. I respectfully suggest that my comments have more to do with the bill than the Senators may at first have thought. It is not the fault of the Senator from Oregon that when California and San Diego made this grant to the U.S. Government they attached no reservations or no conditions to it. The grant was a fee simple grant, and when the fee simple vested in the property, the property became the possession of every citizen of the United States from coast to coast.

The argument has been made over the years that because some State, some city, or some institution gave certain property to the Federal Government, therefore some years later the entity ought to be allowed to get the property back for nothing. But we are dealing here with the vestment of a property interest which belongs to all the people of the Nation, and there is no reason, from the standpoint of the original transfer, why the Federal Government should give it back at this time for nothing to the State of California for use by the University of California.

If that principle is ever adopted in the handling of Federal surplus property, there will be utter confusion.

Mr. ENGLE. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. ENGLE. That is a provision of existing law.

Mr. MORSE. I will cover that.

Mr. ENGLE. Under present law, California could get the property back without any compensation whatever to the Federal Government.

Mr. MORSE. Not until 1966.

Mr. ENGLE. We are cutting off only a few years because it is necessary to plan the campus.

Mr. MORSE. I shall speak about the great difference between 1962 and 1966 from the standpoint of the interest rights of the taxpayers and the U.S. Government. The position of the Senator from California is based on the assumption that no possible unforeseen conditions could develop between now and 1966 which might make it desirable for some other agency of the Federal Government to retain this property. The time schedule of the existing law is a protection to the taxpayers of the Nation, and it is something of value. The interesting thing is that the Senators from California seek, in effect, by the bill to amend the existing statute so that instead of providing, in effect, for 1966, it will be 1962. But that just is not the law.

Mr. ENGLE. Will the Senator agree that if California waited until 1966 it could get the land for nothing?

Mr. MORSE. Only if between 1962 and 1966 no other agency of the Government exercised its rights to the property.

Mr. ENGLE. No other agency has displayed any interest in it.

Mr. MORSE. Not as of now; but how do we know what will happen between 1962 and 1966? We have not the slightest idea of what unforeseen condition may develop between 1962 and 1966 which might make it highly desirable that the Army, the Air Force, or some other agency of the Government use this property for Federal use. Until 1966 has arrived and the law has run its course, California is not entitled to the property for nothing, as a matter of law.

Mr. ENGLE. Mr. President, will the Senator yield for a further comment?

Mr. MORSE. I yield.

Mr. ENGLE. I cannot believe that the senior Senator from Oregon, himself an educator, would wish to see this property used for any other purpose than the highest purpose to which public land can be put, namely, an educational institution. I believe that if he had the decision to make, and even if some bureaucratic agency said it wanted to build a warehouse on the land in order to store goods for the General Services Administration, he would say, "Stand back and let the predominant purpose of government go forward, namely, the education of the people." I am convinced that if the Senator from Oregon had the right to make the decision now or in 1966, that would be his decision.

Mr. MORSE. I am sorry to tell the Senator from California that he could not be more wrong about the position of the Senator from Oregon. I take the position, as a Member of the Senate who has battled as I have for the Morse formula—and I shall shortly have something to say about the Morse formula—I have no right to waive the law as it now reads in light of all sorts of potentialities that might develop between now and 1966 which might make it highly advantageous for the Federal Government to exercise the present rights it has enjoyed under existing law to use the property for some Federal purpose other than for the educational purpose for which the Senator from California seeks to make use of the property.

I make this statement by way of résumé concerning the history of the Morse formula. I have discussed it so many times since 1946, when the formula first became effective, that I know it is repetitious to Senators; but also I am confronted with the fact that the controversy over the bill may cause some Senators after reading the RECORD, to look into the situation, and without an explanation of the Morse formula in the RECORD, they might find it difficult to understand the position of the Senator from Oregon.

In 1946 I was a member of the Committee on Armed Services. A subcommittee of that committee was appointed, of which I was the chairman. It was my first committee chairmanship following my election to the Senate in 1944.

My colleagues on that committee were the Senator from Massachusetts [Mr. SALTONSTALL] and the Senator from Virginia [Mr. BYRD]. We were assigned the task of looking into the disposal of surplus military property and recommending a policy which the Committee on Armed Services and through it the Senate, should be asked to adopt in connection with the disposal of surplus property. The reason why the subcommittee was appointed was that the full committee had noted in 1946 that a large number of bills were being introduced in the Senate, seeking to obtain for nothing very valuable pieces of surplus military property.

That surplus military property took a variety of forms. In some instances it involved trucks and mechanical equipment; in other instances it involved office buildings. In many instances it involved large tracts of land. I remember that in some instances the value was very large. In fact, a few years ago a computation was made of the amount of money saved by means of application of the Morse formula, and the total came to more than $600 million. A computation of the total amount saved by means of the application of the Morse formula has not been made recently; but I am satisfied that if one were made now, it would be found that the application of the formula has saved the taxpayers of the Nation much more than $600 million.

We came from the subcommittee with a unanimous report; and the full Armed Services Committee adopted it unanimously, and it was adopted by the Senate. It simply provided that if a public body, such as a State, municipality, county, school board, or any other local government entity should seek, through a bill in the Senate, to obtain possession of and title to surplus military property, it would have to pay 50 percent of its appraised fair market value; but if, on the other hand, a private institution or agency sought to obtain possession of and title to a given piece of surplus military property, that entity would have to pay 100 percent of the appraised fair market value.

I was aware that the decision of the Senate Armed Services Committee applied only to surplus military property. So I took the position that in fairness and equity the same principle should apply to any bill, introduced by any Senator, in regard to any surplus property, regardless of the committee which had jurisdiction of the bill. Therefore, I announced that during the call of the Legislative Calendar, the so-called Consent Calendar, I would not agree to unanimous consent for the passage of a bill giving away, for nothing, surplus Federal property. I took the position that I would object to the passage of any bill—whether within the jurisdiction of the Armed Services Committee, within the jurisdiction of the Committee on Interior and Insular Affairs, within the jurisdiction of the Commerce Committee, or within the jurisdiction of any other Senate committee—which provided for giving away, for nothing, surplus property belonging to the Federal Government; and I have consistently, without exception, followed that course of action all these years. It has not been easy. In the earlier years it was rather difficult, for undoubtedly I offended some Senators. However, the Morse formula was not an instrumentality for the purpose of winning a popularity contest whenever such an issue arose. Yet, Mr. President, to the everlasting credit of most Senators it can be said that from the very beginning, Senator after Senator said to me, "You are right about this; and although on the floor I may have to oppose you, because in my State there is such a strong demand to obtain this piece of property for nothing, so long as you are consistent, and do not make exceptions, and so long as you insist upon a uniform application of the formula, I must admit that I cannot particularly resent your course of action." I have appreciated those expressions of friendship and understanding of the formula.

Mr. President, I have spoken of the many hundreds of millions of dollars that my formula has saved the taxpayers of the Nation. We do not know how many additional millions of dollars have been saved because Senators have said to constituent groups, "I cannot introduce a bill seeking to obtain this property for nothing, because Senator Morse will not agree; and the chances are that the bill will be handled on the Legislative Calendar, and thus can be passed only by unanimous consent."

All of us know that most of the measures passed by the Senate are not passed by means of a motion, but are passed by means of unanimous consent during the call of the Legislative Calendar. Many persons do not realize that, but I believe the point should be made on the Record of the debate tonight. My guess is that perhaps 85 percent, or probably 90 percent, of the bills passed by the Senate at each session are passed, not by means of a motion, but by means of unanimous consent during the call of the Legislative Calendar.

That procedure enables us to be familiar with the bills, for each side has its calendar committee and, in addition, I have in my office an employee who devotes probably two-thirds of his time to checking the Legislative Calendar and keeping me informed regarding the measures on it. He knows my policies and my legislative philosophy, and from time to time he advises me about some calendar bill which he believes I would not favor if I knew about it. And the distinguished Senator from California [Mr. Engle] has from time to time performed a great service for the Senate as one of the members of the Democratic Calendar Committee. He knows the procedure. If a Senator cannot be in the Chamber during the call of the Legislative Calendar, but if he is opposed to a particular calendar bill, he files his objection with the chairman of the Calendar Committee, and objection is made in his behalf—although I have taken a great deal of pride, over the years, in being on the floor of the Senate most of the time during the call of the Legislative Calendar, being absent only when official business has kept me away from the Chamber or when I have been in my State in connection with a campaign or for some other justifiable reason.

So, Mr. President, by and large the Morse formula has stood the test in the Senate, because I have made no exception to its application. Many times, Senators have told me that that caused them a little difficulty with some of their constituent groups, because when they were asked to introduce a bill which provided for obtaining for nothing some surplus Federal property, they insisted either that the bill not be introduced at all, because of the Morse formula, or that the Morse formula be written into the bill. I have always been very grateful to Senators who have cooperated in that way; and the two Senators from California are no exception. The Senator from California is quite correct. We had a difference over the so-called research ship bill earlier this year; and I stated to the two Senators from California the reasons for my objection to the bill. I wish to say, in their defense and in their behalf, and for the knowledge of their constituents, that they did their best to carry out the desire of their constituents in regard to the bill. They honestly believed there was enough difference between the facts in that case and the requirements of the formula to justify the making of an exception to the Morse formula in that case. However, I did not share their point of view; and the end result was that they accepted the formula, and it was written into the bill. That is typical of a good many scores of similar instances which have developed in connection with the application of this formula over the years, and it is typical of the relationships I have had in regard to it with other Senators.

Let me make very clear to the two Senators from California now that, so far as the senior Senator from Oregon is concerned, this is a completely impersonal matter. If I yielded to my inclinations to let friendship direct my course of action, I would accede to their request in regard to this bill. My interest is purely a professional and impersonal one. I want them to know that as I strive for the adoption of my amendment.

Sometimes, over the years, the leadership of the Senate, through various administrations, has been fit to take a bill that the senior Senator from Oregon thought involved the Morse formula off the unanimous-consent calendar and take it up by motion. That is the situation we are in tonight. Had this bill remained on the unanimous-consent calendar, the Senators from California would have had no chance to get the bill passed in this session of Congress, because I never would have given unanimous consent to its passage.

I have never agreed with the leadership in any session of the Congress past, any more than I do now, in its decision to do what, in my opinion, has amounted to circumventing the Morse formula by taking a given bill off the unanimous-consent calendar and bringing it up by motion.

It is true that some bills with respect to which that was done presented such special, extraordinary sets of facts that it was very difficult for the leadership in the Senate to refuse to take a bill off the unanimous-consent calendar and not bring it up on the floor of the Senate by motion.

The Senators from California may recall that one of the most difficult bills, involving an extraordinary set of facts, was the Boy Scouts bill, in which it was proposed to give a very valuable piece of property to the Boy Scouts of America with no compensation. It was not very easy to object to that bill, but I did, for it just could not be reconciled with the Morse formula—and I yield to no one in my enthusiastic support of the objectives and programs of the Boy Scouts. But, after all, if we start giving away, for nothing, surplus Federal property to the Boy Scouts of America, where are we going to start to draw the line? Are we going to make surplus Federal property available free to every organization with such laudable purposes as the Boy Scouts? Are we going to start giving it to various youth groups associated with various churches? Are we going to start giving it to various organizations that you, Mr. President, and I may believe have very laudable purposes, but which millions of our fellow citizens may be very much against?

As I recall, there was another bill, which involved the 4-H Club, or Future Farmers, or a similar organization, and I took the same position, that the formula should apply.

I cite these instances because the record is crystal clear that I insisted upon the application of the formula to the tough and hot cases as well as to the routine ones. That was the background in the Boy Scouts case. The bill was brought up by motion. In the youthful farmers case, the bill was brought up by motion. I was defeated, but my record was not defeated. My consistency was not destroyed.

So now I turn to this case, for it is another tough one. It is not an easy case, but, in my judgment, the bill does not meet the formula. Therefore I have to oppose it, and for these reasons.

Mr. President, I ask unanimous consent that S. 1108 and a copy of my amendments thereto be printed in the Record immediately following my remarks.

The PRESIDING OFFICER (Mr. Pell in the chair). Without objection, it is so ordered.

(See exhibit 1.)

Mr. MORSE. Mr. President, S. 1108 would authorize the Secretary of the Navy "when he determines that—the 544 acres of land described in the bill—is available for conveyance to the regents of the University of California for educational and related purposes," to convey the land to the regents by quitclaim deed without consideration.

The deed, when issued, would contain conditions to the effect that the property could be held by the regents so long as it is used for educational purposes, and if not used for educational purposes, the title would revert to the United States without the payment of compensation. The deed of conveyance to the regents would be subject to such other conditions as the Secretary of the Navy might deem appropriate to protect the interest of the United States.

Title to the 544 acres in question was acquired by the Federal Government in 1937 through an exchange of 60 acres owned by the Government in the city of San Diego. The exchange was made between the Federal Government and the city.

As I implied before, it was made without the slightest reservation being attached to the conveyance. Despite the availability of capable legal counsel in the great State of California, they decided to give it without reservation.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. ENGLE. They should have had a graduate from Hastings acting as their legal counsel.

Mr. MORSE. They should have had a good lawyer acting as their legal counsel, and certainly one from Hastings would qualify.

But I want to make the point that this was an out-and-out fee simple transfer that vested the property in all the people of the United States, just like putting the equivalent of its value in the Treasury of the United States.

That is why I respectfully say I do not accept the argument—and it has been made on other bills in the past—that because it was given to the Federal Government for nothing, therefore California ought to get it back for nothing.

Furthermore, I point out something that I think may not be so apropos here, but I think it is to some degree. I am always interested in that argument, because, when we go into the history of many of these cases, we find that the property, in the first place, was given for nothing because the chamber of commerce, civic organizations, labor unions, and other organizations were anxious to get into the community, the Federal installation that would be developed from the grant made, because the use of the property by the Federal Government would enrich the community.

Therefore, they are perfectly willing to give the property to the taxpayers of the country for nothing.

I say, good naturedly and most respectfully, they ought to stand by their bargain and should not be what is so frequently referred to—I shall not use that term, because we have reached the point now that we cannot use some of the old adjectives or truisms without being charged with violating civil rights. The Senator knows what I mean when I say that, after all, we have recognized for a long time that when someone gives something away it should not be expected that some time later he will ask to get it back. A gift is a gift. A grant is a grant. Fee simple title is fee simple title.

As I said, this created additional wealth in the Treasury of the United States. The State of California has no more reason to get this property for nothing than it has reason to get any other piece of property which not a single subdivision of that government ever owned, for nothing.

Senate Report No. 1630 accompanying S. 1108 indicates that the property to be conveyed gratuitously is worth $6,000 to $8,000 per acre—an estimated $3,264,000 to $4,352,000.

That is no small amount. It gives some idea of what is the value of this property, in terms of the Treasury of the United States.

In addition, the Senate report indicates that improvements constituting an estimated $3.1 million have been placed on the land.

That is no small amount, either.

The 60 acres which was the subject of the exchange of 1937 had been acquired by the Government through donation from the city of San Diego. However, the original donor of the 60 acres—the city of San Diego—is not seeking the property. It is being sought by a third entity, namely, the University of California.

Let the record be clear. What really happened is that the Federal Government had 60 acres of land in the city of San Diego, or practically in the city of San Diego, and it was worth a large amount of money.

The city of San Diego wanted to be accommodated in regard to this 60 acres of land, so it went to the Federal Government, in effect, and said, "Will you not help us out by entering into a trade for property supposedly of equal value?" As I understand the record of this case, that is what happened. The Federal Government said, "Yes. We will trade you that 60 acres, practically in the boundaries of San Diego and very important for the expansion of the city in the meeting of its municipality needs. We will trade it to you for some 500 acres of land farther removed, which we will use for other purposes, if you consummate the trade."

And the trade was made.

I point out, Mr. President, that the land has not been declared excess to the needs of the Navy—although presumably it might be declared excess to the Navy needs in 1966—and it has not been declared surplus to the needs of other agencies of the Federal Government.

It is with respect to this vital operative fact that my two good friends from California [Mr. KUCHEL and Mr. ENGLE] and I part company. I wish to stress it, because it is the controlling fact so far as the senior Senator from Oregon is concerned, which makes it imperative for me to insist on the application of the Morse formula.

I repeat: the land has not been declared excess to the needs of the Navy—although presumably it might be declared excess to the Navy needs in 1966—and it has not been declared surplus to the needs of other agencies of the Federal Government.

I quite agree with the Senator from California [Mr. ENGLE], that if the conditions of today are the conditions of 1966, when we reach 1966 undoubtedly the land will then be available to the State of California under existing law, which I shall discuss momentarily, without cost.

But let me make it perfectly clear that we do not know what emergency, contingency, or unforeseen condition can develop between 1962 and 1966 which might make it highly desirable for the Federal Government to exercise its inherent right of ownership over this piece of property and to declare it not eligible for surplus characterization.

To illustrate by using a very extreme, imaginative set of facts which illustrate the point, let us suppose that between now and 1966 we find ourselves in a nuclear war and we find that such a set of operative facts develop that this particular piece of property is essential to meeting the needs of the Government of the United States for any one of a variety of purposes—for health purposes, for shelter purposes, or for defense purposes—after we have given it away to the University of California, contrary to any right to do so under existing law.

Does anybody think for a moment that if the Federal Government had the right to give this property away under existing law we would need to pass the bill of the two Senators from California. For the State to obtain the property now, the Senators from California find it necessary to have the bill passed. I cannot give more irrefutable proof of the fact that the State is not entitled to it now. The State cannot get it now without passage of the bill, for the simple reason that the land is not now surplus.

It is true, Mr. President, that if the property were declared excess to the needs of the Navy Department, the various Federal agencies would be screened and if it were found that no Federal agency needed the 544 acres in question, the land would be declared excess to the needs of the Government. At that point, the property could be transferred by the Administrator of the General Services Administration to the Secretary of Health, Education, and Welfare for disposal for educational uses and such disposal could include an educational institution such as the University of California. These disposals are authorized by title 40, United States Code, section 484(k)(1)(A). In fixing the sale value of the property, the Secretary of Health, Education, and Welfare is permitted to take into consideration the public benefit to accrue, from the transfer for educational purposes (title 40, United States Code, section 484(k)(1)(C)).

The committee report on S. 1108 and the letter by the Senator from California [Mr. KUCHEL] of July 19, which I shall discuss momentarily, both allude to the fact that "the University would be able to acquire it at no cost, and the University of California would be in a preferred position to do so according to information made available by the Department of Health, Education, and Welfare."

The proponents argue that the land will go to the University of California when the property is declared excess to the needs of the Navy and surplus to the needs of Federal Government agencies in 1966.

But 1966 is not 1962. If unforeseen conditions develop that make that piece of property necessary to the Federal Government, it will never go to the HEW under the law.

What the Senators from California by their bill are in effect doing is seeking to amend the law that has until 1966 to run in connection with the property by asking that it take effect now—not in 1966—because of the very laudatory desire to get on with the building of a branch institution of the University of California near San Diego, where the property is located. But the Senate cannot erase from the statute books the fact that they are not entitled to it as of now, and the language of the law as it exists has a very good purpose behind it. I do not know what will happen to any certainty in the law if, every time two able Senators see an opportunity to get some property for an educational institution in their State, they introduce a bill that in effect would waive the operation of existing law 4 years. I must object to it as a matter of principle. I object to it as matter of legislative policy. I object to it because I think it may open a Pandora's box of exceptions in many other phases of legislation on the books. I do not believe that is the way to legislate in the Senate.

Mr. President, under the law, other equally important needs such as hospital or public health uses could come into the picture and HEW might have to choose among several important public uses in making a transfer to the State of California or one of its subdivisions or instrumentalities.

I wish to stress that point. The Senators from California are given no assurance under the terms of the law that in 1966 HEW would automatically have to decree that the University of California should get the property. Under the law, in 1966, HEW might decide that a much more important public use exists than the educational needs of the University of California. As I have said, if some horrendous emergency should develop, such as a nuclear explosion on the west coast, or in the Pacific, the Federal Government through the HEW might decide that the property ought to be used for the building of a subsurface hospital. That does not require too much of a stretch of the imagination on the part of those of us who have some briefing information as to some of the steps that would have to be attempted at least in case of a nuclear holocaust. We might have to move quickly into building hospitals below the surface of the earth to take care of the afflicted. I use that example only to dramatize the point I wish to make. There is no guarantee to the Senators from California that if the law should run its course until 1966 the University of California would automatically obtain a decision from the Department of Health, Education, and Welfare that it, and no other user, would get the property.

That provision is placed in the law for a sound public policy purpose. What the Senators are seeking to do in effect is to get a waiver in 1962. In effect, they are seeking to have a bill passed that would take the discretion away from the Department of Health, Education, and Welfare. They are really seeking in 1962 to obtain the passage of a bill that in effect would say to the Department of Health, Education, and Welfare, if we were to let the law run its course until 1966, "You must give the property to the University of California and to no other user."

I do not think that is good public policy. I do not think that is a good precedent. I do not think that is sound legislative policy in the Senate.

The next point I wish to make is that despite the fact that the present bill would be more restrictive than would section 484(k) of the law, the bill, S. 1108, in its present form violates the Morse formula.

To date, the 554 acres covered by S. 1108 have not been declared surplus to the needs of the Federal Government. In addition, the Surplus Property Disposal Act provides an orderly and uniform method for disposing of Federal surplus property throughout the United States. Every bill such as S. 1108, that provides for an exception to the uniform operation of the law, weakens the surplus property disposal law and clears the way for future special relief bills. Each of these bills weakens the foundation of the uniform law.

S. 1108 is designed to "sew up" the property for the University of California if and when it is declared surplus in 1966. I feel that it is much better to follow the law even though in the long run the University of California may get a better deal under the law. The only difficulty from the university's standpoint is that it will have to worry about this matter for 4 more years and a lot may happen in that interval of time that will not entitle the University of California, from the standpoint of the best public interest in our country, to get the property in 1966.

Under date of July 19, my good friend, the Senator from California [Mr. Engle], sent me a letter in which he set forth his views on the bill and the history of the bill as he saw the bill. I am sure the Senator will not object if I ask unanimous consent that his letter be printed at this point in the Record, because I wish to allude to the Record and I want the Record to show the Senator's argument.

There being no objection, the letter was ordered to be printed in the Record, as follows:

U.S. Senate,
Committee on Appropriations,
July 19, 1962.

Hon. Wayne Morse,
U.S. Senate,
Washington, D.C.

Dear Wayne: This is in further reference to S. 1108 which Clair Engle and I have introduced to authorize and direct the Secretary of the Navy to convey for educational purposes without monetary consideration to the regents of the University of California 544 acres of land at Camp Matthews, Calif., when the Secretary determines that such land is available for conveyance.

As you know, the Committee on Armed Services amended our bill to provide that, if the property conveyed is not used for educational purposes in perpetuity, title shall immediately revert to the United States. We, of course, wholeheartedly agree with this amendment. The Camp Matthews property was granted to the United States without fee in an exchange with the city of San Diego for some 60 acres of Government-owned land in the city which itself had been originally given without cost by the city to the United States.

Under the terms of the Federal Property and Administrative Services Act of 1949, the Department of Health, Education, and Welfare may convey this property for school purposes at 100 percent public benefit allowances. Thus, when the land does become surplus, the university would be able to acquire it at no cost. Since the county and city of San Diego have endorsed the development plan of the university for this area, they have waived their own interest in the property for any other health or educational purposes and, thus, the University of California, according to the Department of Health, Education, and Welfare, would be in a preferred position to acquire the campus once these lands are declared surplus. The Department of the Navy has indicated that its weapons training facility will be removed to Camp Pendleton by 1966 and that the property would then become available for transfer.

As I have indicated, in 1966 this property would then go to the University of California at no cost. The purpose of this legislation is to assure the university that this transfer will be made so that they can now proceed with some assurance with their development plans for the San Diego campus which will ultimately accommodate 27,500 students. The university already has acquired 500 acres of land through transfer from the city of San Diego adjoining the Camp Matthews property and has already initiated construction of the campus. The Scripps Institute of Oceanography, a branch of the university, has long been located on other adjacent property.

Since, as I have indicated, this transfer would be made in 1966 and since adequate protection in the form of an exclusive grant of the property in perpetuity for educational purposes has been provided, I hope that you will agree with me as to the necessity for this legislation in order to permit the university to proceed with its development plans at this time.

With kindest regards.

Sincerely yours,

Thomas H. Kuchel.

Mr. MORSE. Mr. President, I will close by reading the letter which I wrote to the Senator from California [Mr. Kuchel] and by making a few comments about some of the observations set forth in the letter. Under date of July 24, 1962, I sent the following letter to the Senator from California:

July 24, 1962.

Re S. 1108.
Hon. Thomas H. Kuchel,
U.S. Senate,
Old Senate Office Building.

Dear Tom: This will acknowledge, with thanks, your letter of July 19 in which you provided me with very helpful background information concerning the proposed transfer of 544 acres of land at Camp Matthews, Calif., to the University of California. Upon receiving your letter I made a thorough review of S. 1108 and of Senate Report No. 1630. It is beyond question that the project for the acquisition of additional land to be used for the San Diego campus of the University of California is highly desirable; however, in fairness to you I should point out that I have serious reservations concerning the procedure that is being employed with respect to the proposed acquisition of Federal lands for use by the university.

As you know the Federal Property and Administrative Services Act of 1949, as amended, sets forth an orderly and uniform procedure for the disposal of surplus real property for educational uses. Title 40 U.S.C. section 484(k) sets forth the provisions of the law that are most germane to the matter under discussion. As I understand the procedure set forth in the law, the agency having jurisdiction of the Federal land (in this case the Department of the Navy) would have to make a determination that the land is excess property. In other words, the Navy Department would have to determine that the land is not required for the needs of the Navy.

After the property has been declared excess to the needs of the department having immediate jurisdiction, a report to that effect is submitted to the General Services Administration and other Federal agencies are then screened by GSA to determine whether the land is needed by them. After the screening process has been completed, it would then be appropriate to determine whether other public agencies such as States and their political subdivisions and instrumentalities or tax-supported institutions needed the property for educational, public health, or civil defense purposes. The manual issued by the GSA entitled "Disposal of Surplus Real Property" sets forth the relevant procedures, including the notice requirements, in considerable detail on pages 7–10.

The foregoing analysis constitutes a brief résumé of the procedures prescribed by the Federal Property and Administrative Services Act of 1959, as amended, for the disposal of real property such as the 544 acres covered by S. 1108. As the author of the so-called Morse formula, the problem that confronts me under the facts of this case is this: S. 1108 constitutes proposed special legislation to remove the disposal of the 544 acres of Federal property from the orderly procedures prescribed under the existing law; it constitutes a predetermination that the land is to go to the University of California the moment that the Secretary of the Navy determines that the land is available for conveyance to the University of California. Obviously, S. 1108 constitutes a shortcut and a bypassing of the provisions of the existing law, otherwise it would serve no useful purpose.

Under the Federal law providing for the uniform handling of these property disposal cases, the determination by the Secretary of the Navy that the property is excess to the uses of the Navy would be merely the first step of a procedure for a thorough screening of the property and for a possible disposal to the University of California.

We have no way of knowing what the situation, with respect to this real property, will be in 1966 when, according to Senate Report No. 1630, it is estimated that the Marine Corps will have completed the move from Camp Matthews to a new site selected for the training of recruits. We cannot guarantee with certainty today that some other agency of the Federal Government might have an urgent requirement for the 544 acres; we have no way of knowing today whether the land might be found more useful for public health or civil defense purposes. If S. 1108 were to be enacted by the Congress and signed by the President, it would foreclose a determination of other urgent Federal public health or civil defense uses of the land.

If we were to assume, for the purpose of discussion, that the 544 acres would be conveyed to the University of California about 4 years hence at a 100 percent public benefit discount—and I hasten to add that the assumption cannot be made with certainty—it would be true, as you point out, that the conditions imposed upon the proposed transferee by S. 1108 would provide advantages to the Federal Government that are not to be found under the existing Federal surplus property laws. However, I feel that these advantages are far outweighed by the disadvantages which would be occasioned by the enactment of S. 1108 at this time. Such enactment would prevent our giving consideration in 1966 to what might be higher and more important Federal or public uses of this extremely valuable real property.

The fact is that the 544 acres in question have not been declared excess property by the Navy and have not been found surplus to the needs of the Federal Government. We have on the Federal statute books a law providing a uniform and orderly method for the handling of such property disposals. Every bill such as S. 1108 that provides for an exception to the uniform operation of the law weakens the surplus property disposal law and clears the way for future special relief bills. Each of these bills weakens the foundation of the uniform law. The so-called Morse formula is designed to implement and to go hand in hand with the Federal property disposal law in those cases where the Congress, in its wisdom, determines that special relief legislation is essential.

As you know, for many years I have insisted upon the uniform application of the Morse formula in the State of Oregon as well as in the other 49 States. I assure you that this has not been a pleasant task but it is my opinion that it has been worth the effort because I am satisfied that the Morse formula, as now applied by individual Senators and Congressmen, by congressional committees and on the floor of the Senate through appropriate amendment has saved the taxpayers of the United States millions of dollars.

Under the circumstances of this case, I feel I have no alternative other than to ask for an application of the Morse formula if S. 1108 should be scheduled for action and discussion on the floor of the Senate. If I were to make an exception in this case, I would have to make exception in future cases wherein the formula is applicable and eventually the formula would become meaningless.

For your information, I enclose a copy of the Morse formula amendment which I propose with respect to S. 1108.

I am deeply appreciative of your having written to me and conferred with me on this subject, and I send my best personal regards.

Sincerely,

WAYNE MORSE.

As we lawyers say, after we have presented our evidence and our arguments, I rest my case.

EXHIBIT 1

S. 1108

A bill authorizing the conveyance of certain property in the city of San Diego to the regents of the University of California

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy, or his designee, is authorized and directed when he determines that the following described land at Camp Matthews, California, is available for conveyance to the regents of the University of California for educational and related purposes, to convey said land, together with all improvements and appurtenances, to the regents of the University of California by quitclaim deed without monetary consideration therefor but upon the conditions set forth in this Act.

SEC. 2. The property to be conveyed comprising approximately 544 acres of land is more particularly described as follows: The easterly half of pueblo lot 1300; all of pueblo lot 1309; all of pueblo lot 1310; all of that portion of pueblo lot 1311 lying easterly of Pacific Highway and southerly of Miramar Road; all that portion of pueblo lot 1314 lying southerly of Miramar Road; all that portion of pueblo lot 1315 lying southerly of Miramar Road; all that portion of the westerly half of pueblo lot 1316 lying southerly of Miramar Road; said pueblo lands being according to the map thereof made by James Pascoe of 1870, a certified copy of which is filed as miscellaneous map numbered 36 in the office of the county recorder of San Diego County, California; excepting therefrom any property previously conveyed to the State of California or the city of San Diego for highway purposes.

SEC. 3. The deed of conveyance executed pursuant to this Act shall include the conditions that (a) such property shall be held by the regents of the University of California so long as the property conveyed shall be used for educational purposes; (b) if at any time the Secretary of the Navy determines, upon advice received from the Secretary of Health, Education, and Welfare, that the property so conveyed, is not held for such purposes, title thereto shall immediately revert to the United States; and (c) in the event of any such reversion, title to all improvements made thereon by the regents of the University of California during its occupancy shall vest in the United States without payment of compensation therefor. Such deed of conveyance shall be subject to such other conditions as the Secretary of the Navy may deem appropriate to protect the interests of the United States.

SEC. 4. The regents of the University of California may exchange portions of the property described in section 2 for other adjacent lands of approximately equal value in order to develop such property boundaries as may be best suited for the purposes of the University of California.

SEC. 5. Section 3 shall be applicable in all respects to any land received by the regents of the University of California under the exchange provisions authorized in section 4, and any land conveyed by the regents of the University of California pursuant to such exchange shall be received by the grantee thereof free and clear of the conditions prescribed in the first sentence of section 3.

S. 1108

Amendments intended to be proposed by Mr. MORSE to the bill (S. 1108) authorizing the conveyance of certain property in the city of San Diego to the regents of the University of California:

On the first page, line 10, strike out "without monetary consideration therefor but".

On page 2, line 18, immediately after "(a)", insert the following: "the regents of the University of California pay to the United States as consideration for the property conveyed an amount equal to 50 per centum of its fair market value as determined by the Secretary of the Navy after appraisal of such property; (b)".

On page 2, line 23, strike out "(b)" and insert in lieu thereof "(c)".

On page 3, line 2, strike out "(c)" and insert in lieu thereof "(d)".

Mr. ENGLE. Mr. President, the bill before the Senate has certain committee amendments in it which have not been agreed to. I ask unanimous consent that the committee amendments be considered en bloc and be agreed to, without affecting the status of the pending amendment by the Senator from Oregon, and that the bill be treated as original text for further amendment, if any.

The PRESIDING OFFICER. Is there objection.

Mr. MORSE. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments, agreed to en bloc, are as follows:

On page 2, at the beginning of line 20, to strike out "for a period of twenty years after the date of such conveyance for educational purposes; (b) if at any time during that period" and insert "so long as the property conveyed shall be used for educational purposes; (b) if at any time"; on page 3, line 6, after the word "therefore.", to insert "Such deed of conveyance shall be subject to such other conditions as the Secretary of the Navy may deem appropriate to protect the interests of the United States."; and, in line 19, after the word "conditions", to strike out "established in section 3" and insert "prescribed in the first sentence of section 3"; so as to make the bill read:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Navy, or his designee, is authorized and directed when he determines that the following described land at Camp Matthews, California, is available for conveyance to the regents of the University of California for educational and related purposes, to convey said land, together with all improvements and appurtenances, to the regents of the University of California by quitclaim deed without monetary consideration therefor but upon the conditions set forth in this Act.

"Sec. 2. The property to be conveyed comprising approximately 544 acres of land is more particularly described as follows: The easterly half of pueblo lot 1300; all of pueblo lot 1309; all of pueblo lot 1310; all of that portion of pueblo lot 1311 lying easterly of Pacific Highway and southerly of Miramar Road; all that portion of pueblo lot 1314 lying southerly of Miramar Road; all that portion of pueblo lot 1315 lying southerly of Miramar Road; all that portion of the westerly half of pueblo lot 1316 lying southerly of Miramar Road; said pueblo lands being according to the map thereof made by James Pascoe of 1870, a certified copy of which is filed as miscellaneous map numbered 36 in the office of the county recorder of San Diego County, California; excepting therefrom any property previously conveyed to the State of California or the city of San Diego for highway purposes.

"Sec. 3 The deed of conveyance executed pursuant to this Act shall include the conditions that (a) such property shall be held by the regents of the University of California so long as the property conveyed shall be used for educational purposes; (b) if at any time the Secretary of the Navy determines, upon advice received from the Secretary of Health, Education, and Welfare, that the property so conveyed, is not held for such purposes, title thereto shall immediately revert to the United States; and (c) in the event of any such reversion, title to all improvements made thereon by the regents of the University of California during its occupancy shall vest in the United States without payment of compensation therefor. Such deed of conveyance shall be subject to such other conditions as the Secretary of the Navy may deem appropriate to protect the interests of the United States.

"Sec. 4. The regents of the University of California may exchange portions of the property described in section 2 for other adjacent lands of approximately equal value in order to develop such property boundaries as may be best suited for the purposes of the University of California.

"Sec. 5. Section 3 shall be applicable in all respects to any land received by the regents of the University of California under the exchange provisions authorized in section 4, and any land conveyed by the regents of the University of California pursuant to such exchange shall be received by the grantee thereof free and clear of the conditions prescribed in the first sentence of section 3."

Mr. ENGLE. Mr. President, I will take only 2 minutes to summarize, for the interest of Senators who may read the Record, what our points are:

We gave this property to the Federal Government, and it did not cost Uncle Sam one single thin dime.

The Federal Government used this property for 46 years as a rifle range, not as a great plant which added to the tax rolls or to the employment of that particular area, and without paying rent or any cost.

The property is now surplus to the needs of the Federal Government.

The Federal Government is no longer able to use it.

Under existing law we could get this property in 1966 for no compensation to the Federal Government because it would be used for educational purposes.

The only purpose of our bill is to speed up the time, because time is of the essence in establishing the great university campus, which must be planned now, and for which the State of California has already acquired more than 500 acres of land.

Mr. President, that is our case; and, as the senior Senator from Oregon has said, we rest our case.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, August 8, 1962, he presented to the President of the United States the following enrolled bills:

S. 296. An act for the relief of Hanna Ghosn;

S. 1174. An act for the relief of Dr. Kwan Ho Lee;

S. 1882. An act for the relief of Assunta Bianchi;

S. 2455. An act for the relief of Mrs. Elizabeth Lovic;

S. 2572. An act for the relief of Merritt-Chapman & Scott Corp.;

S. 2614. An act for the relief of Mr. and Mrs. Alfredo Hua-Sing Ang;

S. 2675. An act for the relief of Yiannoula Vasiliou Tsambiras;

S. 2769. An act for the relief of Renato Granduc;

S. 2807. An act for the relief of Mrs. Juliane C. Rockenfeller; and

S. 2844. An act for the relief of Alice Amar Froemming.

ADJOURNMENT

Mr. ENGLE. Mr. President, in accordance with the order previously entered, I move that the Senate adjourn until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 6 o'clock and 50 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Thursday, August 9, 1962, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate August 8, 1962:

Federal Home Loan Bank Board

John deLaittre, of Minnesota, to be a member of the Federal Home Loan Bank Board for the term of 4 years expiring June 30, 1966, vice Ira A. Dixon.

Postmasters

The following-named persons to be postmasters:

ALABAMA

Max A. Hand, Autaugaville, Ala., in place of F. R. Gresham, deceased.

ARKANSAS

Ben W. Parham, Bald Knob, Ark., in place of O. H. Parham, retired.

Robert E. Richardson, Reyno, Ark., in place of E. E. Reynolds, removed.

CALIFORNIA

Mary E. Gwynne, Alamo, Calif., in place of B. V. Linhares, retired.

Barbara H. Potter, Avila Beach, Calif., in place of V. M. Canet, retired.

Thelma M. Lynch, Bethel Island, Calif., in place of V. E. Boxhill, deceased.

Helen M. Lowey, Downieville, Calif., in place of J. M. Costa, retired.

Jerome B. McKernan, Ridgecrest, Calif., in place of E. E. Fowler, retired.

Jettie R. Bean, Running Springs, Calif., in place of A. E. Kitselman, resigned.

CONNECTICUT

Carmine J. Grote, Chester, Conn., in place of J. L. Grote, retired.

Charles N. Doane, Jr., Essex, Conn., in place of P. D. Guptill, deceased.

John J. Falvey, Groton, Conn. Office established November 1, 1960.

James L. McPherson, Marble Dale, Conn., in place of S. M. Straight, retired.

FLORIDA

Madge C. Jones, Cross City, Fla., in place of M. E. Mills, retired.

William B. Dowling, Dunnellon, Fla., in place of G. W. Shuman, retired.

George W. Creamer, Jr., Eastpoint, Fla., in place of D. H. Tucker, resigned.

Percy E. Hardaker, Kathleen, Fla., in place of H. A. Harrelson, removed.

William K. Bryant, Longwood, Fla., in place of C. E. Nelson, removed.

Dorothy C. Lindelius, Loxahatchee, Fla., in place of E. P. Jarriel, retired.

Gladys S. Bland, Pinetta, Fla., in place of F. L. Bush, retired.

Jose A. Gonzalez, Tampa, Fla., in place of S. G. Harrison, retired.

Hoke S. Fitzgerald, Jr., Waverly, Fla., in place of M. P. Blanchard, retired.

GEORGIA

Blanton H. Knight, McDonough, Ga., in place of W. W. Turner, Jr., resigned.

Fred N. Stewart, Manchester, Ga., in place of E. L. Hanger, deceased.

Alonzo C. McCorvey, Pavo, Ga., in place of W. U. Scott, retired.

Herbert R. Coker, Sycamore, Ga., in place of W. F. Humphreys, deceased.

John E. Griffin, Tunnel Hill, Ga., in place of W. C. Griffin, retired.

HAWAII

Norman M. Kimura, Kalaheo, Hawaii, in place of J. A. Robello, resigned.

IDAHO

Orville J. Slette, Deary, Idaho, in place of G. H. Wylie, retired.

Robert E. Magnuson, Kendrick, Idaho, in place of F. O. Stedman, transferred.

Dale O. Pierce, Malta, Idaho, in place of J. H. Thompson, retired.

Melvin K. Pope, Richfield, Idaho, in place of T. M. Vaughn, resigned.

ILLINOIS

Eugene E. Boeckman, Bartelso, Ill., in place of J. C. Mueller, retired.

Arthur J. Lawrence, East Alton, Ill., in place of E. R. Hill, deceased.

Richard C. Hazer, Elizabeth, Ill., in place of E. J. Coveny, deceased.

Charles J. Nash, Greenville, Ill., in place of D. J. McAlister, retired.

Paul D. Jordan, Herscher, Ill., in place of A. C. Westphal, retired.

George L. McNamara, Lansing, Ill., in place of W. E. Erfert, retired.

Leonard A. Finnegan, Mattoon, Ill., in place of H. A. Lange, deceased.

Bernard C. Wilson, Minier, Ill., in place of H. E. Davis, retired.

Leo A. Hayes, Ramsey, Ill., in place of O. W. Hinton, removed.

Charles F. Schultz, Reynolds, Ill., in place of B. W. Sharp, retired.

Frank J. Wiedemann, Ringwood, Ill., in place of P. H. Eberle, transferred.

Rita F. Winkler, South Elgin, Ill., in place of Delbert Hood, Jr., removed.

INDIANA

Reynold W. Scudder, Dillsboro, Ind., in place of G. C. Gerster, retired.

Ernest W. Groves, Dunkirk, Ind., in place of E. D. Littler, retired.

Rex R. DeMoss, Edwardsport, Ind., in place of M. F. Shepard, retired.

Robert F. Seider, Fountain City, Ind., in place of F. L. Scarce, retired.

Malcolm Emswiller, Middletown, Ind., in place of R. A. Purdue, transferred.

Frank W. Stevanson, Moores Hill, Ind., in place of L. H. Barkley, retired.

Doris C. Lamott, Pershing, Ind., in place of C. E. Rodenberg, deceased.

Warren F. Buser, Roachdale, Ind., in place of W. E. Etcheson, retired.

Virgil E. Utterback, Trafalgar, Ind., in place of J. E. Truman, deceased.

Robert H. Meier, Westphalia, Ind., in place of Oscar Nierste, retired.

Ruth J. Schirr, Westville, Ind., in place of D. B. Schirr, resigned.

IOWA

John E. Rooney, Maxwell, Iowa, in place of E. L. Wood, retired.

KANSAS

Donald E. Strohmeyer, Axtell, Kans., in place of J. H. Jessee, retired.

Larry K. Earnest, Holcomb, Kans., in place of D. H. Clare, deceased.

Cyril F. Kraus, Ransom, Kans., in place of V. E. Schreiber, deceased.

LOUISIANA

Louis J. Andermann, St. James, La., in place of Emma Andermann, retired.

MAINE

Thomas W. Churchill, Kezar Falls, Maine, in place of S. H. MacDaniel, retired.

MARYLAND

George L. Hart, Sudlersville, Md., in place of E. W. Hart, retired.

MICHIGAN

Andrew J. Yalch, Honor, Mich., in place of E. S. Martin, retired.

Roberta B. Wernette, Mecosta, Mich., in place of E. E. Osborn, retired.

Clarke H. Jeffers, Milford, Mich., in place of V. E. Boyle, removed.

Ethelwyne M. Vaughan, Oscoda, Mich., in place of L. J. Hartel, resigned.

Donald F. Bowen, Palmyra, Mich., in place of A. C. Johnston, transferred.

Laverne H. Maginity, Thompsonville, Mich., J. O. McCarthy, deceased.

Curtis E. Heyman, Watersmeet, Mich., in place of E. A. Dickson, retired.

MINNESOTA

Robert J. Blair, Brownsville, Minn., in place of J. J. Serres, retired.

Raymond C. Wilkins, Glencoe, Minn., in place of C. T. Merrill, retired.

Robert D. Gunderson, Gonvick, Minn., in place of Emma Jones, retired.

Connie H. Crever, Hugo, Minn., in place of L. M. Muller, retired.

Vernon Hovelsrud, Trail, Minn., in place of T. T. Hamrey, retired.

Palmer J. Kyllo, Wanamingo, Minn., in place of B. C. Moe, retired.

MISSISSIPPI

Lorie D. Gollette, Jr., Biloxi, Miss., in place of E. V. Shove, retired.

MISSOURI

H. Buhler Sears, Bolckow, Mo., in place of Walter Fraser, retired.

Martin F. Moran, Milan, Mo., in place of M. B. Lee, retired.

NEBRASKA

Roy E. Boham, Bassett, Nebr., in place of F. C. Diehl, deceased.

NEVADA

Oman L. Olsen, Mesquite, Nev., in place of J. E. Hughes, retired.

N. Constance Gilmore, Zephyr Cove, Nev., in place of A. M. Gabler, resigned.

NEW HAMPSHIRE

Walter M. Plummer, Bristol, N.H., in place of H. L. Goodhue, retired.

Harry E. Moses, Haverhill, N.H., in place of A. S. R. Wells, retired.

NEW YORK

Eleanor J. Carmichael, Canandaigua, N.Y., in place of F. R. Cougevan, deceased.

James J. Connolly, Catskill, N.Y., in place of H. W. Becker, retired.

Donald P. McSweeney, Long Lake, N.Y., in place of E. J. McSweeney, deceased.

Fraser Bushey, Mooers Forks, N.Y., in place of L. T. LeDuc, retired.

Edna V. Monica, North Bangor, N.Y., in place of M. E. Shonyo, deceased.

NORTH CAROLINA

Jesse A. Tripp, Blounts Creek, N.C., in place of D. F. Sawyer, Jr., transferred.

Leo Mercer, Chadbourn, N.C., in place of E. I. Baldwin, retired.

William L. Sloop, Concord, N.C., in place of B. E. Harris, resigned.

McElree B. Hilliard, Macon, N.C., in place of A. L. Nicholson, deceased.

L. Penn Hunter, Marion, N.C., in place of J. A. Finley, deceased.

Noel D. Atkins, Mayodan, N.C., in place of J. V. Highfill, retired.

NORTH DAKOTA

Richard D. Grieve, Buffalo, N. Dak., in place of J. U. Pavlik, deceased.

OHIO

Carl C. Kindt, Bellville, Ohio, in place of C. C. Dill, transferred.

Edmund W. Reed, Malinta, Ohio, in place of G. L. Burkett, resigned.

Warren G. Reed, Morrow, Ohio, in place of William Corrigan, retired.

Madeline A. Wilson, Rawson, Ohio, in place of Pearl Burket, retired.

Jane G. Apfeld, Somerville, Ohio, in place of R. L. Bergamyer, retired.

OKLAHOMA

Hicks A. Smith, Jr., Ada, Okla., in place of M. H. West, deceased.

Gleason W. Roe, Agra, Okla., in place of M. C. Nixon, retired.

Grant W. Keeton, Bethany, Okla., in place of F. H. Stockton. deceased.

Woodrow W. Wilson, Carnegie, Okla., in place of W. F. Stratton, retired.

Robert B. Lovell, Dill City, Okla., in place of J. H. Hughes, deceased.

Bessie D. Zentz, Goodwell, Okla., in place of V. A. Little, deceased.

Mina M. Williams, Oakhurst, Okla., in place of S. L. Clayton, retired.

Woodrow F. Kolar, Prague, Okla., in place of W. C. Placke, deceased.

OREGON

Henry R. Kaiser, Jr., Corvallis, Ore., in place of W. W. Wooddy, retired.

PENNSYLVANIA

Robert I. Grove, Alexandria, Pa., in place of R. N. Lankard, resigned.

Bernard F. Cooney, Jr., Austin, Pa., in place of M. G. Collins, retired.

Michael A. Eannace, Burgettstown, Pa., in place of R. L. Bell, retired.

Daniel G. Phillips, Dunns Station, Pa., in place of J. D. Fulton, retired.

Russell G. Kratzer, Richfield, Pa., in place of O. G. Leitzel, deceased.

Kenneth A. Harrison, St. Thomas, Pa., in place of J. M. Martin, retired.

SOUTH CAROLINA

John W. Rogers, Pelzer, S.C., in place of Sue Scott, retired.

TENNESSEE

Bob S. Wray, Gleason, Tenn., in place of W. L. Newberry, retired.

James C. Savage, Linden, Tenn., in place of E. G. Harder, retired.

Onon E. Story, Monroe, Tenn., in place of L. G. Franklin, transferred.

Charles E. Stone, Union City, Tenn., in place of R. E. Rankin, deceased.

TEXAS

Lois M. Everheart, Bells, Tex., in place of Leta McElligott, retired.

Edward A. O'Kelley, Bloomburg, Tex., in place of H. I. Pettit, retired.

Clarence J. Hafernick, Lolita, Tex., in place of L. E. Seale, retired.

Jack E. Easton, Lovelady, Tex., in place of M. E. Gimon, retired.

Curtis R. Smith, Tatum, Tex., in place of B. K. Martin, retired.

UTAH

Clare S. Larson, Eureka, Utah, in place of F. B. Gear, deceased.

VERMONT

John P. Wellman, Readsboro, Vt., in place of A. J. Graiff, resigned.

VIRGINIA

Katherine A. Webb, Callaway, Va., in place of J. P. Fisher, transferred.

Dude W. Bowen, Duffield, Va., in place of E. P. Tompkins, retired.

Henry H. Downing, Front Royal, Va., in place of A. O. Haley, retired.

Harry S. Sommers, Paeonian Springs, Va., in place of E. N. Reed, retired.

Walter D. Wood, Powhatan, Va., in place of C. G. Coppedge, retired.

WASHINGTON

Melburn E. Mason, Battle Ground, Wash., in place of F. O. Keith, retired.

Wellington D. Duke, Vantage, Wash., in place of W. C. Duke, deceased.

Lester O. Johanson, Warden, Wash., in place of G. A. Therriault, retired.

WEST VIRGINIA

Beulah W. Ash, Buffalo, W. Va., in place of E. K. Beitz, resigned.

WISCONSIN

Gordon E. Mead, Dalton, Wis., in place of J. W. Moore, Sr., retired.

Richard P. Nelson, Jim Falls, Wis., in place of D. B. Mills, retired.

Beatrice J. Houtz, Somers, Wis., in place of C. C. Ruthe, resigned.

Douglas G. Runkel, Strum, Wis., in place of F. C. Spangberg, deceased.

WYOMING

Helen E. Wambeke, Deaver, Wyo., in place of R. A. Olsen, retired.

Ada D. Vogel, Lusk, Wyo., in place of A. B. Mills, retired.

EXTENSIONS OF REMARKS

The Lesson of the Preamble

EXTENSION OF REMARKS

OF

HON. ROMAN L. HRUSKA

OF NEBRASKA

IN THE SENATE OF THE UNITED STATES

Wednesday, August 8, 1962

Mr. HRUSKA. Mr. President, in the June–July issue of Highway Highlights there is carried the text of an address given by our colleague, Senator Karl E. Mundt, of South Dakota, before the National Highway Users Conference earlier this year. This address is a splendid presentation and an excellent warning to all Americans. It urges them to guard the sovereignty of the individual States and the individual authorities against further encroachments by the Federal Government.

I ask unanimous consent to have the remarks of Senator Mundt printed in the Congressional Record for the information of all my colleagues.

There being no objection, the article was ordered to be printed in the Record, as follows:

The Lesson of the Preamble—Americans Are Urged To Guard State Sovereignty, Individual Authorities Against Federal Encroachment

(By Senator Karl E. Mundt)

Back on the third day of July 1776, the day before the Declaration of Independence was signed, a great American wrote a letter to his wife, Abigail. This American was John Adams, and he wrote his wife and said, "Yesterday the greatest question was decided which ever was debated in America, and a greater problem will probably never be debated. A resolution was passed, without one dissenting colony, that these united Colonies are and of right ought to be free and independent States."

That sentiment was found in the Declaration of Independence, too: "these united Colonies are and of right ought to be free and independent States."

From that early beginning, there has been a continuing controversy in America as to what is the rightful position of the individual citizen; as to what is the individual position of the individual State, and as to what are the proper responsibilities and authorities to be delegated to the central state and to our Federal Government.

ONLY IN THE UNITED STATES

While we have sought to encourage other lands and other areas to follow our example in that regard, it is only in the United States where it is specifically put down in the charter of freedom that the rights of people in jobs like mine, your Federal politicians, shall be limited solely to those rights and authorities specifically delegated to us by the States or by the people.

While I am normally described as a Midwestern conservative, I am an advocate of a constitutional formula which is the greatest liberal document of government ever written or employed anywhere. Because down through history the liberal has always been opposed to a concentration of authority; that was the liberalism of Woodrow Wilson, that was the liberalism of Thomas Jefferson. That to me is the only kind of liberalism which is genuine, and anybody who describes liberalism as a device for giving fewer men more power over additional people is describing a synthetic form of liberalism and an error of semanticism. Because, as a liberal who believes that the functions should lie with the people in States and in individual offices and shops and businesses, and that Federal politicians in jobs like mine should be circumscribed in the powers we exercise over the average citizen, I submit that this is a concept which is, in fact, genuine liberalism.

That being true, I speak, as one who believes that instead of trying to delegate more power and more authority and more responsibility to the central state, somehow or other, we should learn as States and as individuals, as groups and as organizations and as entities, to assume the responsibilities and exercise the authorities which are essential to progress.

HIGHWAY PROBLEMS

I think that is true in the field of safety legislation, for example, in highways; I think it is true in the controversial problem of reciprocity. I think it is true in the field of uniform highway traffic signals. These are all important to all Americans. Somebody will have to solve the problem. Wherever a problem gets too tough, or remains unsolved, or the situation becomes too odious, a clamor arises at once for the Federal Government to step in, and pass a whole family of bills.

I think nobody will quarrel with the fact that reciprocity is desirable, that safety is desirable, that uniformity in traffic signals is desirable; but I don't think you have to go to the Federal Government to achieve these desirable objectives, because, when we pass legislation, we have to exercise controls. Inevitably, we have to do something to you when we are doing something for you. We can't just by a magic wand create utopia in a painless fashion.

I happen to be the owner of a nice new 1962 automobile. It is a mighty fine automobile. It is the best automobile I have ever driven, but some engineer, if you please, hid the signal lever, which indicates whether you are going to turn right or left, some place down on the dashboard, where I guarantee even an FBI agent couldn't find it.

A colleague in the Senate bought the same kind of car I had. He wants to have a Federal law making it illegal to hide the signal lever in that car, but I don't think it is the responsibility of the Federal Government to nurse these automobile manufacturers along and tell them how much horsepower they have to have and what is the maximum and minimum speed on the highway and how many layers of nylon or whatever to put in automobile tires.

UNIFORMITY

The matter of uniformity of traffic law happens to be a special fetish of mine, because on at least three occasions I have been privileged to visit in virtually all of the countries of Europe and on two occasions all of them. I was impressed, most of all, by something which I suppose escapes the eyes of many tourists, but the one lasting impact made upon me was the fact that throughout Europe with all its diversity of languages and flags and nationalities and passports and currencies and border controls, they have been able to develop a uniformity of traffic signals far exceeding anything we have in the United States.

I think it is a very desirable objective. In a part of the world that can agree on virtually nothing else, where you have a wall between East Berlin and West Berlin, the only thing the same on both sides of Germany today are the traffic signals on the highway.

I don't know how they did it, but I am glad they did it because that demonstrates to me that there certainly must be some way that in America we can develop a degree of uniformity in traffic signals without having Uncle Sam do the job, because they haven't any central government there. They did it somehow through conferences, somehow through private people working through their respective government to say, "This is a good idea." And they said, "Ja," or "Oui," or "Da-Da," or whatever the language happened to be, and they succeeded.

We can do that in our country. If we can do that in highways, we can do it in a great many other areas of activities, I think. Therefore, it is important that you guard your State sovereignties, that you guard your individual authorities, that you question with a jaundiced eye any—any—additional suggestion to expand the power of people in jobs like mine over people in jobs like yours, because, if you don't, we find this increased power to be a kind of heady and intoxicating wine. It is kind of enjoyable to be able to push a lot of people around and pass a lot of legislation and make everybody call you on the telephone to see whether they can buy a new automobile or whether they can do this or that. And the thing tends to grow.

It has been seriously suggested, and so far not acted upon either affirmatively or negatively by this session of Congress, that we should deliver to the Executive, power by his own decree and his own decision to modify the tax structure of America, to reduce, to change, to modify. This is a pretty serious encroachment to my way of thinking on the powers of the people and the powers of the Congress.

Another great controversy raging in this country involves tariffs, which would propose to give to the Executive the entire authority to levy tariffs, to increase them, to decrease them, to abolish them, or to impose them on any segment of the economy. Just as the power to tax is the power to destroy, the power to decide which industry has a tariff and which does not also is the power to compel or to coerce and to destroy.

TARIFF VIEW

Now, I say this as one who believes that our tariff legislation in operation is hopelessly out of date. I say that as one who was appointed to serve as a delegate to the NATO conference in Paris this last year, and served my good friend Lyndon Johnson.

Lyndon came to me and he said, "Karl, we have to have some Republicans among the delegates to the NATO Conference, and as long as I have an appointment, I might as well appoint a black one. How would you like to go?"

So I went. I visited for a long time with the members of the countries who are going into the Common Market. I think it is a wise decision on their part. I think Britain in self-defense is going to be compelled to go in. I think this faces us up to a whole new economic challenge in America.

That far I go along. Where I disagree is the fact that, having confronted this great serious new challenge, we ought to delegate its solution to a group of nameless, faceless individuals over whom you have no control at all.

I would like to do it by empowering the Tariff Commission, which is a branch of the Congress, with additional flexibility and authority, so when the thing goes wrong, you can still hold the people responsible closest to you and look to them for correction.

These are areas, it seems to me, in which highway users should be interested, because a drift or a drive or a tendency to build up this much concentrated power in the hands of people in Washington cannot possibly overlook for long the various particular aspects of freedom in which they are essentially interested. This age-old controversy about which John Adams wrote his wife in 1776 is still with us. It is still being decided.

We are an impatient group of people, sometimes in our impatience to get something done fast, we fail to recognize the damage that we are doing to a formula which has enabled us to get things done enduringly and successfully down through the ages.

THE DIFFERENCE

I think those who wrote the Constitution put it all pretty well in the preamble when they spelled out the eternal underlying difference between our concept of a private economy and individual responsibility and a division of powers between the Central Government and the States. When they wrote out the preamble as a reason for having a Constitution and a government, as justification of the Revolutionary War, as a lodestar toward which to move in this new Republic, along with talking about domestic tranquillity and many other things, they got around to the functions of the Federal state and part of the function of the Federal state, they rightly said, was to provide the common defense. And what is the next statement in the preamble? "In order to provide the common defense, promote the general welfare." Have you ever stopped to reflect how easy it would have been for those fellows at Philadelphia to have said "in order to provide the common defense and the general welfare," just a simple little conjunction, but those meticulous men and those linguistic masters, to whom every syllable meant a sermon in its own, carefully used a different word. The one that will provide is the central state; when it comes to the general welfare, our responsibilities are to promote the conditions, the environment, the opportunities for people and for States to help themselves.

I hope we don't forget the lesson of the preamble to the greatest Constitution ever written.

The Farmer's Market Is Worldwide

EXTENSION OF REMARKS

OF

HON. CHARLES B. HOEVEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. HOEVEN. Mr. Speaker, we who represent the Midwest in Congress have a great responsibility to agriculture. One of the ablest spokesmen for the farmer is my colleague from Minnesota, Congressman ANCHER NELSEN. On August 6 Mr. NELSEN addressed the silver anniversary of soybean processing at Mankato, Minn., and I believe his remarks on that occasion will be of interest to all Members of Congress. Under leave to extend my remarks in the RECORD, I include his speech herewith:

THE FARMER'S MARKET IS WORLDWIDE

Some months ago, when the idea for this meeting began to take shape, I was intrigued with the proposal and delighted that I should be asked to participate. And, as I thought about it, it seemed to me to be a fine opportunity for all of us to talk awhile about the things that bring us together rather than the things that divide us. I've made this special trip from Washington in the midst of much turmoil, political and economic, where the angry heat of a Washington summer and the hot winds of campaign argument sometimes warp the judgments of the sanest man.

So in this atmosphere of southern Minnesota perhaps we can look at some of these matters with more objectivity, as we join in celebrating the silver anniversary of an industry which was nothing 30 years ago, and which now represents America's fifth biggest cash crop—a billion dollar soybean product with its countless ramifications in farm income, in industrial employment and in foreign trade.

I come to you, therefore, knowing that though we may differ sharply on matters which are close to us, we have a number of substantial common interests. Suppose, for my text, I recite some of these common interests:

First. I'm certain that I shall have no argument when I say that every person in this room is interested in a prosperous and successful agriculture.

Second. I am equally certain that every one of us accepts the fact that foreign trade is of vital importance to us all.

Third. There can be no argument, I know, that every one of us is for a strong, healthy, peaceful America.

And finally—you can argue this one with me if you like, but I offer it regardless—every last one of us is interested in his own personal well-being.

Now, suppose we take each of these points and look at the facts. First, that we agree we want a prosperous agriculture. Sometimes, I suppose, it doesn't look that way as we quarrel about how to achieve it, but I think it's fair to say that as you look back over the years, there has never been any program dealing with agriculture that has stabilized in any one pattern long enough to establish its worth as far as achievements are concerned. You don't have to dig very deeply into the record of farm programs for 30 years or more to find a bewildering maze of actions which range from plowing under corn to crusading for big production for war, to bemoaning the billion dollar surplus stocks of wheat.

And you don't have to dig very deep to find puzzlement in shifting proposals of high supports, low supports, flexible supports; of controlled production and freedom; of penalties and incentives.

And right on the surface are the obvious facts of political parties and farm organizations alike fighting perennial contests to prove that you're wrong and I'm right; of Farm Bureau with one story, Farmers Union with another, and the Grange frequently in the middle. Pity the poor city Congressman who tries to referee between these arguments, while he seeks to protect his consumers; while we who represent the farmers watch with constant concern as we strive for badly needed increases in farm income.

I do not propose to add to the turmoil in this discussion, because I am hopeful that we are getting a farm program at least for next year which will be good for most of us. That is, we may get an acceptable program, although the maneuvers between Senate and House the last week or two leave plenty of room for doubt. The feed grain bill of last year had many desirable features, actually very much like the bill which I and some of my Midwest colleagues introduced in the previous session. I, however, did not like the feature of the bill which was designed to interfere with the free marketing of grain. I do not believe the Secretary of Agriculture should have power to dump grain on the market at will, at prices of his choosing, setting aside normal marketing procedures to the injury of private trade and farmers alike. Similarly, I support extension of the law for the next year—a matter still pending between the two Houses—in the hope that sooner or later we could get earnestly to work on a long-range program.

I'd like to talk a little about my view of such a long-range program, but first it might be well to review briefly a few of the factors which have made this year's debate so involved.

In the first place, in considering the proposals presented by the administration, let's recall that Secretaries of Agriculture for many years had the right under the law to include corn in a controlled program. And yet, whether the Secretary was Henry Wallace or Claude Wickard or Clinton Anderson or Charles Brannan or Ezra Benson, never did he at any time submit corn and feed grains to a program of controls, and you must admit that this was indeed a diverse series of Secretaries of Agriculture.

So when the GTA Digest said as long ago as last February that "This may be too much for Congress to swallow in one gulp—it may even be more than farmers are ready right now to approve at the ballot boxes," it was, to say the least, prophetic. Because not only did Members of Congress find it impossible to swallow, but my mail and the mail of every Member with whom I talked ran tremendously against the compulsions of the program. And I want to tell you with all honesty that Farmers Union members showed very little more interest in the proposals than did their Farm Bureau friends down the road.

So by May of this year the GTA Digest was able to say, without shedding a visible tear, that the alternative is continuation of this year's program, and added simply, "It makes good sense."

Statements like this could be made because we farmers are, at least in small measure, learning to curtail production, and to make some adjustment to the realities of life. And we are demonstrating that we can do it if we are handed a workable combination of incentives and supports which we can buy of our own free will.

Perhaps the lessons of deals which developed when the House considered the administration bill should not quickly be forgotten. When it came before us after months of deliberation in committee, and when its sponsors accepted amendment after amendment simply to garner votes, the product was a measure which bore little resemblance to the bill they started with. Areas that were considered feed grain deficit areas were granted exemption from strict compliance features; producers having 40 acres or less of feed grain base were granted special treatment; then, to top it all off came the cynical offer to permit cottongrowers to plant feed grain when a cotton crop failed. When we were all through it was evident that some 13 Midwest States would bear the brunt of reduction in production, along with a phasing out of payments for retired acres.

Not only was it evident that the result would be discrimination against farmers of this area, but it would not produce the desired result in the way of a farm program. It seems to me that total participation as well as cross compliance are essential for an effective program.

At the same time we all know that as far as wheat is concerned, the United States is the only country in the world which is curtailing its production. We know, too, that it is Hard Winter wheat which is responsible for virtually all of the surplus, that most of the Government holdings are less than the best in quality, and that yields in recent years have increased sharply due to better varieties and methods. It, of course, was demonstrated sharply in the feed grains last year—and undoubtedly will this year—when fertilizer sales jumped upward to offset in some degree the decline in acreage.

What I've been trying to say is that your chances of being right when you attempt to draft farm legislation are next to nothing—at least, in the minds of some of our friends. If my friend Bill over here thinks I'm right, then the chances are my friend Tom over there will violently disagree. So I suggest, among other things, a bit of patience by all of us.

So with all that, I propose that the following be the basic ingredients of a farm program which I believe will work, which will be acceptable, and which will be good for the Nation, and which I would hope would be necessary only so long as we do not have the markets for the tremendous production and handling capabilities of American agriculture:

First. All farmers participate in a land retirement program. If a farmer refuses to take land out on a voluntary basis, he forfeits any and all payments and supports that come from the Federal Government.

Second. In dealing with land retirement we have in mind that each farm has individual characteristics adapted to different types of family-farm operation and that instead of dealing with separate commodities as we now are doing, we deal with total cultivated acres on each individual farm, requiring a certain percentage of reduction.

Third. The payment could be a modest one per acre if the farmer wishes to receive cash, and if the farmer operates a livestock farm where all of his feed is used on the farm, make a liberal payment out of surplus feed to replace the feed that he would have raised on his own acres. The requirement in this case would, of course, be that these commodities be not thrown back into the competitive market.

Fourth. Supports should be adjustable to meet requirements either of surplus or of deficit. I am sure we have all seen examples of supports set at such a level that surplus results; on the other hand, low supports can reduce surpluses but sharply reduce farm income as well. But an adjustable system without a vast army of policemen to enforce it should certainly be possible. You would have the wholesome attitude of voluntary participation which could be stimulated tremendously under a tillable acre approach. It would provide some flexibility of operation that could accommodate the individual characteristics of every farm in the country.

Fifth. Commodity Credit surpluses should not be dumped as permitted under the present program. We should revert to the previous level at 105 percent of supports—higher would be better.

Sixth. I recommend an on-the-farm storage program, liberalized over the present procedure and made more acceptable, reducing the redtape involved, where the farmer by signing proper agreements with the local ASC committee would build storage on the farm which could be amortized out of storage fees. This facility when fully amortized by fees collected becomes the property of the farmer but would be available for surplus grain on the farm at no cost to the Government. This could be a long-range program that would not violently disrupt commercial facilities but would progressively move toward a proper location of the stored grain; right on the farm where in many cases the farmer would buy it back at a later date. I have no objections to a reasonable commercial storage participation, but we have seen the extremes come about which is not good even for the grain trade.

Part of the acceptable and essential business of assuring a prosperous agriculture is undoubtedly a good system of farmer cooperatives. I don't suppose there is really any difference of opinion here, although the argument waxes heavy on equality, on taxes, on allegations of competitive advantage. I can recall that in my days in the Minnesota Legislature we did many things to encourage marketing cooperatives as part of the continuing task of assuring the farmer adequate access to markets and some measure of control over his markets.

I think most of us can agree that there is room in our great economy for both the cooperative method and private industry; that competition between them must be fair; that the middle ground requires that there be no monopoly on either side. It is out of this philosophy, of course, that the battle has been waged over the taxation of cooperatives, and out of it has come a proposal which would tax cooperative dividends—wholly satisfying neither side and therefore a compromise which is rather typical of the legislative process.

You will recall, of course, that President Kennedy has urged such a tax. He said in his tax message last year:

"Contrary to the intention of Congress substantial income from certain cooperative enterprises, reflecting business operations, is not being taxed either to the cooperative organization itself or its members. This situation must be corrected in a manner that is fair and just to both the cooperatives and competing businesses."

Of course, here too we remain in a state of uncertainty, because the proposed tax on cooperative dividends has become an incidental item in a protracted argument over the general tax bill—a bill which has already suffered defeat of withholding on dividends and interest, a bill which is getting extensive argument in the Senate while we wait to see what the President is going to ask for in the way of tax reductions—a bill which could yet wind up in the wastebasket. Whatever happens, it is apparent that if a tax bill is enacted, it will include a revision of the tax treatment of cooperatives.

I want to discuss foreign trade in a minute, but first a comment or two about this amazing soybean industry which we are celebrating tonight. When you stop to think of it, it's as glamorous as any other of the new ventures which spring up, whether it be television or space flight or whatever. Because here is a billion-dollar product which has sprung up in a quarter of a century, and which is a tremendous item in our foreign trade. We supply 75 percent of the soybean, soy oil, and cotton oil in world trade, so it is certainly a mighty factor. And I understand that 40 percent of the product of this Honeymead plant in Mankato goes abroad.

I voted for the Trade Extension Act a few weeks ago, but I did so with some hesitation because I am not at all sure that the United States will do such a good job of trading abroad that our farmers won't be left holding the sack. GTA Digest, for example, said just 5 months ago, with reference to negotiations of the last year and a half with Common Market countries, that "U.S. agriculture came out on the short end of the stick."

Yet, we have no choice but to gamble that we'll come out all right. Because, after all, one-fourth of our agricultural products are exported; American farmers have a market in Western Europe of nearly $3 billion—wheat, soybeans, and soy oil, dairy products, meats, cotton, and many other products; during the past decade Japan has bought more of our farm products than any other country; last year alone, for example, Japan bought $100 million worth of soybeans from the United States.

So we must protect what we have, develop marketing and trading arrangements with these good customers of ours, bargain to the best of our ability so that we don't run into the equivalent of a customs union in the Common Market which could shut us out. We must get our production and our costs in such shape that we can deal, and work toward a selling job that will give us an expanding market rather than one that might well decline.

The choices are not easy. We could develop domestic programs designed to achieve a higher unit price for our farm products, by curtailing production, and in the process flirt with the possibility of losing foreign markets because we would be unable to compete. Or we can let costs and prices drop for competitive purposes, making it easier to sell abroad, but endangering the income of our farmers—which certainly none of us want to do. Let's hope the happy medium will be our answer.

But let's not forget that virtually every other country in the world, from our Canadian neighbor to the primitive farms of Asia, is expanding production and encouraging farmers to raise more, while we alone are fighting to cut back. Let's not forget that some of our best friends are free to sell vast quantities of wheat to Red China—a market which we cannot touch. Let's keep in mind, too, that the loss of our foreign markets for farm products could cut our farm income by 40 percent and be disastrous to our entire economy.

So the great international game is full of hazards, aggravated, I must confess, by our domestic tendency to be careless with our own monetary policies, to be always willing to give until it hurts—and too often until it hurts us—and affected by the fact, which we must never forget, that every last one of these nations is developing its plans for their own sake, just as we must never forget our own interest.

And our own interest demands that we step up our own selling abroad, particularly of our agricultural products, in spite of the handicaps which confront us. Food for Peace, through Government channels, is most helpful in disposing of some of our surpluses, but if we leave it to Government to function for us in the world market, we are courting disaster. Here is indeed a selling job such as some of you in this room are familiar with and doing well at. But let's pool all the best brains in all branches of marketing so that we can bring out the best ideas for the good of all, so that we can really dig into our surplus problem, so that we can make our food and our influence felt with the needy of the world.

I want to add another point: I said earlier that we might find ourselves out-traded in the quest for markets under trade agreements. I suggest that those in positions of power whose responsibility the negotiations will be, make full use of the skills and the knowledge of men in the business of marketing so that we can really progress.

This leads me to my last two points which are not too unrelated. Certainly I know we all agree that our great Nation must be strong—economically, spiritually, militarily—yet peaceful in our aims and determined to prove our honorable intentions even to those who suspect us. To be these things, our agriculture must be healthy, our industry must be successful, our economic and fiscal structure in such fine shape that we can hold our heads high and serve both ourselves and the world. Therein lies our self-interest.

And similarly, I do not believe we need to be ashamed of the fact that every last one of us, as individuals, as companies, as organizations, are devoted to our own interest. We want success, we want progress for ourselves, whatever our occupation. Our problem always is to make that self-interest a mutual one in that we allow ourselves the luxury of believing that the other fellow has rights too; that it is possible to work together for the common goals which I have enumerated, while defending our own rights and positions.

I found in my tour of duty as head of the REA that it is possible by patience and reason, by convincing people that each point of view is deserving of consideration, that partnership is possible even between competitors. Despite the antagonisms, I found that utilities, REA cooperatives, municipalities, public-power groups could be brought together if an atmosphere of confidence could be developed, if it became possible to convince men that reason should prevail. We found it possible to provide the people with service, to reduce power costs, to reduce the burden on Government. I must confess, however, that this atmosphere could be developed only if those in positions of power were willing to be the umpires rather than the dictators.

So my plea tonight is that we think in terms of developing an atmosphere and an attitude of confidence, based on these things which we all are for, so that we can sit around together and consider how best to improve America, how best to assure that we perform wisely and well in the world in which we must lead, how best to serve agriculture in which we all are interested, and how best to reduce some of the suspicions and animosities which make progress so difficult.

This atmosphere of teamwork and dedication to common goals will put us in the position to meet the challenge which should be facing American agriculture today—that of finding and selling the markets to feed the hungry people in other nations of the world. The result then has to be a strong, prosperous agriculture in a greater, more prosperous America.

A Proposed Constitutional Amendment To Restore the True Intention of the Framers of the Bill of Rights Regarding the Establishment of a State Religion

EXTENSION OF REMARKS
OF

HON. EDWIN B. DOOLEY

OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 8, 1962

Mr. DOOLEY. Mr. Speaker, I have today introduced a proposed amendment to the Constitution that is designed to restore to the Constitution the true intention of the framers of the Bill of Rights with regard to the establishment of a state religion. This proposed amendment would be completely unnecessary if the Supreme Court had only adhered to the philosophy of the Founding Fathers, instead of being beguiled and confused by slogans such as "a wall of separation between church and state."

Nothing could have been further from the minds of the godly statesmen of the 18th century than the setting up of a godless state, and I am sure that they would be horrified and scandalized if they could see how grossly their intentions have been twisted in recent years. Rt. Rev. James A. Pike, the Protestant Episcopal Bishop of California, has discerningly said that the actual effect of the Court's decision in the New York State Regents' prayer case was to establish a state religion, "namely, that of secularism." His Eminence, Francis Cardinal Spellman has asserted:

> The Supreme Court's decision to declare unconstitutional a simple and voluntary expression of dependence on God by our public school children is a tragic misreading of the prayerfully weighed words of our Founding Fathers, and strikes at the very heart of the godly tradition in which America's children have for so long been nurtured.

How can the recent Court decision be reconciled with the language of Article III of the Northwest Ordinance of 1787 which stated:

> Religion, morality, and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged. * * *

This was drafted at the same time that our Founding Fathers were gathered in Philadelphia and, in fact, represented a statutory bill of rights for residents of the Northwest Territory of the United States.

When practically every other provision of the Constitution is being interpreted "liberally" by the Court with the result that many of our freedoms are being turned into licenses, the one provision that is receiving a rigid and stultifying interpretation "according to the letter" is that relating to the freedom of religion. The epistle to the Corinthians in which it was said "not of the letter, but of the spirit; for the letter killeth, and the spirit giveth life" is still sound today and is the basis of a canon of constitutional construction that certainly should be applied to the first amendment—that each clause of the Constitution must be construed according to the spirit of the entire document.

If the Constitution prohibits the Congress from establishing a state religion—and properly so—by what right and authority does the Court now do so, as Cardinal Spellman and Bishop Pike have suggested? In setting a precedent by which future courts may bar any mention of the Almighty from our public schools and facilities, the Court is, in effect establishing a state religion, for secularism is a creed espousing material and temporal values.

Mr. Speaker, my proposed amendment simply reaffirms and strengthens the original meaning of the first amendment in language that will clearly guide any present or future Court. This is precisely the reason why my resolution is designed specifically to amend the first amendment to the Constitution of the United States, to read as follows:

> Congress may not make any law establishing secularism or any religious denomination or sect, or prohibiting the free exercise of religion; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

By eliminating the broad phrase "respecting the establishment of religion" my proposed amendment more clearly gives effect to the intention of the Founding Fathers to prohibit the establishment of a state church, while at the same time permitting the Congress to implement that intention by legislation should the need to do so ever arise. This the Congress could not do if the phrase were given a literal construction, because any law on the subject could be construed as a law "respecting the establishment of a religion."

Just as I deplore those who would destroy the Supreme Court because of this decision, so, too, do I hold no brief for those who regard the proposal of a constitutional amendment as a disparagement of the Court. In establishing the system of checks and balances our Founding Fathers saw clearly the need for orderly public veto over the judicial as well as the legislative and executive branches. To completely isolate one from the pulse of society would be to destroy the delicate balance of that system.

Yet, I do not offer my amendment in order to override the recent decision in the New York State Regents' prayer case alone. Rather, I do so because I fear the future judicial pronouncements emanating from it. Under similar misinterpretations of the intent of the first amendment's establishment clause, I fear for the future legality of such traditions as baccalaureate services in public schools and tax exemption for religious properties.

Indeed, I fear for the very survival of the spiritual and moral values which set our and other nations so far apart from the sterile materialism of our Communist enemies. While our Constitution properly forbids the promotion of any one form of worship, it likewise was never meant to preside over the decline of religion, for as Moses warned the people of Israel in the ancient Book of Deuteronomy:

> Beware lest you say in your heart, my power and the might of my hand hath gotten me this wealth. * * * And if you forget the Lord your God I solemnly warn you this day that you shall surely perish. Like the nations that the Lord made to perish before you, you shall surely perish.

Ins and Outs

EXTENSION OF REMARKS
OF

HON. THOMAS B. CURTIS

OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 8, 1962

Mr. CURTIS of Missouri. Mr. Speaker, there is great concern among those who live by grace of the New Frontier to assure that they are always on the right—or perhaps I should say correct—side of the line that marks the New Frontier ins and outs. The gentleman from New Jersey [Mr. FRELINGHUYSEN] has done great service for those who must watch their step along these lines by devoting a part of his August 2 newsletter to an in-and-out guide of the New Frontier. The New York Herald Tribune, having learned the importance of knowing the ins and outs of the New Frontier, reprinted the gentleman's sage advice and, since those most interested in staying on the "in" side might not be on the gentleman's mailing list or might not be readers of the Herald Tribune, I am placing this handy guide in the RECORD to help separate the ins and outs.

THE INS AND OUTS OF THE NEW FRONTIER

(By Congressman PETER FRELINGHUYSEN, JR.)

(This is the newsletter sent to his constituents today by Mr. FRELINGHUYSEN, Republican, of Morristown, N.J.)

On the New Frontier you are either in or out.

Some of the people who are in are Robert Frost, Pablo Casals, and Harry Truman.

Roger Blough was out but he is now in. Senator SMATHERS was in but he may now be out. Bobby is so in he is way out. Teddy will soon be in, they hope.

Pool parties in Bobby's backyard are in, as are many of the guests. Harvard professors are in. Princeton professors are out. MIT, Minnesota, and Dartmouth are in. Rutgers, Columbia, Purdue, and Cornell are out.

Twisting on the New Frontier is obviously in, the mashed potato is out. Antiques are in, modern out.

Everyone thinks the ADA is in but it is really out. Needless to say, the AMA is out.

The white tie is out. At the Justice Department shirtsleeves are in.

Talk about the stock market is out. Africa is in. Spain is out. So are France, Belgium, the Netherlands, and Peru. Italy is in. Chiang Kai-shek is so far out that he is in. The United Nations is in.

Chester Bowles was in. Now he is out.

Testifying before congressional committees is out.

Pat Brown thinks he is in. Secretary Freeman has a feeling he is out.

It is in to refer to the New Frontier hospitalization bill as medicare. No one knows yet whether a tax cut is in or out. It is out to watch the "Ev and Charlie Show." It is in to make fun of it.

The Washington Post is so far in that it is almost out. The New York Herald Tribune is coming back in. To be mentioned in Reston's column is in but the New York Times may be on the way out.

Senators who want to be in are out. Only their votes are in. Southern Democrats are in. Doris Fleeson is out. Roscoe Drummond doesn't care whether he is in or out, so he is in.

Drew Pearson is out. But a Drew Pearson column is in.

Membership in the Metropolitan Club is out. The Capitol Hill Club can never be in. Neither can Richard Nixon, Barry Goldwater, or Nelson Rockefeller.

To be seen with one of the astronauts is in. Traveling with J.F.K. on the Presidential plane the *Caroline*, is in. It is better than a junket.

Nehru is in. Souvanna Phouma is in. So are two-button suits.

Touch football is going out but Bobby hasn't been told yet. Water skiing is in, for the summer. Golf is an enigma.

LYNDON JOHNSON is out. He always was.

Texas is out.

Billie Sol almost got in. Now even mention of him is out.

Remarking that the New Deal was grand is out.

The phrase "one term" is out. Because of Adlai Stevenson, New York is out.

Newport, Hyannis Port, Squaw Island, and Palm Beach are in. Glen Ora is going out fast. Pecos, Newark, and Gettysburg are out.

The fireside chat is out. The press conference is in. Reporters are in. Publishers are out. No exceptions.

Television is out, except when J.F.K. is on.

Sinatra is out for all time. Peter Lawford took care of that. Morton Downey may be taking his place.

Among Republicans it is fashionable to be out. Among Democrats it is fatal, unless they live south of the Mason-Dixon line.

Superpatriots are out.

Congress is out.

The watchword: Sophistication.

(With apologies to "The In and the Out Book," Viking, 1959, which you should read. If it is not in, it ought to be.)

We Are Running Out of Money So We Are Now Sending Our Jobs Overseas

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. O'KONSKI. Mr. Speaker, at one time we had $30 billion worth of gold in our Nation. Because of our giveaway program, we now have about $16 billion left. If the nations of the world called in the gold that is due them, the United States of America would be "broke" with not a dollar's worth of gold; in fact, we would owe $7 billion in gold that we do not have.

Running out of money, we are now in the process of giving away the jobs of American workers. Iron ore mines are closing, one by one, and our ore is coming in from Liberia, Africa, Venezuela, and Canada.

Our plywood plants have closed and our plywood is coming in from Japan.

Our mink farmers are losing money and closing out while furs are shipped in from Red China and Russia.

Our shoe factories are closing and we are importing shoes from Czechoslovakia and Italy.

Our steel mills are running at 50 percent of capacity, and our Government is buying steel from Germany.

Our fishermen on the Great Lakes are going broke and we are importing fish from Canada.

Our farmers are barely making a living, yet we import a billion pounds of meat from Australia, Argentina, and Canada.

Our dairy farmers are going out of business and we are importing millions of dollars of dairy products.

Our shipbuilding on the Great Lakes is merely hanging on, while our Government pays subsidies to foreign shippers. American shippers are going broke, while our Government gives and loans money to countries so that they can subsidize foreign ships.

All of this is part of our foreign aid program where we have run out of money and now we are giving away the jobs of American workers.

This is the cost and the penalty that the American people are paying for giving their money in building factories all over the world except within the borders of our own Nation. Just how much more are the American people going to stand of this greatest and grandest giveaway of all time?

The American people are going to get unemployment compensation and dole. The American people are going to get retraining for other jobs already in surplus. The American people are going to get $200 to move out of town. While the American people are going to get this, our jobs are going to be given all over the world. The giveaway in America has been transferred from money to the giveaway of American jobs.

I have never voted for this type of giveaway just as I never voted for the money giveaway.

The Improved Philippine War Damage Claims Bill

EXTENSION OF REMARKS

OF

HON. THOMAS G. MORRIS

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. MORRIS. Mr. Speaker, on May 9 of this year I regretted that I had no alternative but to join my colleagues in defeating H.R. 8617 which aimed at completing payments due on outstanding war damage claims in the Philippines. I opposed H.R. 8617 not because it would have benefited some Filipinos, but rather because it was a weak bill and did not include sufficient safeguards against large windfall profits accruing to undeserving claimants.

The Philippine Rehabilitation Act of 1946, which initiated the payment of these war claims, contained very specific requirements that the funds we provided would either compensate those who had already rehabilitated their damaged property or else—when such previous investment was not feasible—those who committed themselves to reinvesting the amount they received in such a way as to benefit the Philippine economy. Section 104(c) of the 1946 act reads:

> All of the provisions of this title shall be subject to the requirement that, to the fullest extent practicable, the Commission shall require that the lost or damaged property be rebuilt, replaced, or repaired before payments of money are actually made to claimants under this title: *Provided*, That if the Commission determines it is impossible for any reason beyond the control of the claimant, or is impractical to rebuild, replace, or repair the lost or damaged property, the Commission may make payment to the claimant without making said requirement; *Provided, however*, That as a condition to the making of such payment, the Commission shall require that the whole of such payment shall be reinvested in such manner as will further the rehabilitation or economic development of the Philippines; *And provided further*, That nothing in this subsection shall preclude the partial payment of claims as the rebuilding, replacing, or repairing of the property progresses.

The basic weakness of H.R. 8617 was that it waived this requirement, except for those now living outside the Philippines. By not assuring that the funds actually were related to the development of the Philippine economy, the way was left open for certain interests to obtain windfall cash payments.

The new Philippine war claims bill, H.R. 11721, corrects this deficiency and requires that "all payments under this act in amounts over 25,000 pesos—about $6,400—or equivalent value in dollars shall be subject to the provisions of section 104(c) of the Philippine Rehabilitation Act of 1946." This amendment assures that the larger claimants have invested or will invest sums equal to the amount they will receive under this act in the rehabilitation and economic development of the islands.

Another way that the bill has been strengthened has been by a reduction in the time allowed the Foreign Claims Settlement Commission for the completion of the payments. In the earlier debate some of the Members feared that its affairs might drag on indefinitely. H.R. 11721 requires that the Foreign Claims Settlement Commission wind up its operations under this legislation within 2 years and 60 days after final passage of the bill.

Mr. Speaker, I am very pleased that the Foreign Affairs Committee took the trouble to bring out an improved bill during this session, particularly since some misunderstandings resulted from our earlier action. Passage of H.R. 11721 gives us an opportunity to demonstrate to the Filipinos that our previous defeat of H.R. 8617 was in no way a manifestation of any ill will or lack of appreciation of our just debt to them. Because this new bill answers the reservations I held concerning the poorly conceived H.R. 8617, I am happy to add my support to H.R. 11721.

The Venezuelan Lottery

EXTENSION OF REMARKS

OF

HON. PAUL A. FINO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. FINO. Mr. Speaker, while we in Congress persist in refusing to capitalize on the natural gambling spirit of the American people and while we stubbornly continue to ignore the tremendous revenue-producing features of a national lottery in the United States, most of the countries throughout the world continue to treat and respect gambling as an instinctive and universal human trait which brings pleasure to the people and financial benefits to government treasuries.

I would like, Mr. Speaker, to bring to the attention of the Members of this House some interesting facts and figures which I have gathered from some of these countries where the wheels of fortune spin on behalf of the public welfare.

VENEZUELA

This small South American nation, with a population of less than 7 million, last year took in over $48 million, of which over $30 million was given out in prizes leaving about $19 million as revenue for the treasury.

Venezuela uses this income from gambling wisely. The great bulk of this revenue was used for the benefit of hospitals and schools, and the remainder was devoted to other government purposes.

Mr. Speaker, with our taxes rapidly rising and with the need for new sources of revenue to meet our public demands becoming more pressing, is there a more painless or sensible way of raising Government revenue than a national lottery? Venezuela does not think so.

Long Historic Friendship Between American and Spanish Peoples

EXTENSION OF REMARKS

OF

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. BOLAND. Mr. Speaker, ancient Spain, occupied for 800 years by the Moors, was a land where Moslem and Jewish philosophers transmitted to Christian Europe the heritage of the ancient world. The cities of Granada, Cordoba, and Seville are known today as symbols of the intellectual and cultural heritage of their country. The Christian reconquest of Spain at the turn of the 16th century marked the start of an era in which the Spanish nation played a remarkably important part in the growth of Christian belief. The attachment to catholicism provided the basis for the historic unity of a great nation. This was also the era of discovery and exploration, in which Spain became known as the discoverer of new worlds, the ruler of an imperial domain the like of which the world had never seen, the symbol of a civilization which at one time was a world civilization. The exploits of Spain's explorers, like the philosophical and religious contributions of its thinkers, demonstrated the greatness of Spain to the world. Art and architecture unmatched anywhere contributed to the splendor of European culture during the Middle Ages.

Spain was among the first of the European states to develop a modern army and administrative system. During the last two centuries, it has been a land in flux, a land in which abrupt changes in governments and forms of government contrasted with the historic continuity of the Spanish nation. This process reached a tragic climax during the thirties, when internal differences resulted in civil war. The Spanish Civil War of 26 years ago marked the first great setback to international communism.

In recent years, relations between Spain and the United States have been based on close cooperation between the two Governments. Negotiations between representatives of the two countries resulted in arrangements, concluded in 1953, for the building of U.S. Air Force and naval bases on Spanish soil, for the granting of economic aid to Spain, and for the modernization of the Spanish armed forces with American help. The American policy of seeking close relations with our Spanish ally is not a question of party politics. When Secretary of State Dean Rusk, speaking during a recent visit to Madrid, praised the Spanish Government for its efforts in defense of the Western alliance, he was reaffirming a policy which had been stated many times by the late John Foster Dulles. We are now in a period in which both Spain and the United States are deeply engaged in rising to the challenges of the modern world. The historic friendship between the Spanish and American peoples will ease the burden facing both nations.

REA's 5-Millionth Hookup

EXTENSION OF REMARKS

OF

HON. JOSEPH M. MONTOYA

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. MONTOYA. Mr. Speaker, it was my privilege, early last month, to be present when a miracle happened, and to participate in a ceremony which symbolized one of the most constructive accomplishments of the American people and their Federal Government.

Out in my State of New Mexico there lives a rancher named John McGuffin. John, and his wife Margaret, and her 87-year-old mother, Mrs. Margaretha Walter, have lived, for the last 20 years on a 12-section spread in a remote red sandhill area of blue sage and broomweed. John McGuffin runs about 90 head of cattle. His place is 30 miles from the nearest town—Tatum—and his nearest neighbor is nearly 5 miles away.

Until last July 2 these three sturdy people lived a life which would shock a good many average Americans. For the most part they went to bed with the chickens, because their only means of illumination after dark was kerosense lamps and lanterns. They used water sparingly, because it was pumped for them by a none-too-reliable windmill. Television was something they had heard about but could not use, because they did not have electricity. Refrigeration was not for them. They kept some beef and fryers in a locker plant at Tatum, and when they wanted to indulge in these delicacies, John McGuffin had to make a 60-mile round trip. Despite crippling arthritis, Mrs. McGuffin scrubbed the family laundry clean on an old-fashioned washboard, and smoothed it with sadirons heated on wood-burning stoves. Their means of communication were negligible, because they had no telephone, and their participation in the broader life of the country and the State was minimal.

The McGuffins and Mrs. Walter are proud, substantial, even heroic American citizens. Independent and resourceful, they met and mastered the challenges of their isolated life, and accepted its special burdens without complaint.

Last July 2 a miracle happened on the McGuffin ranch. The Lea County Electric Cooperative, of Lovington, N. Mex., ran a line 3½ miles out to the McGuffin ranch, and its was electrified. This was the 5-millionth electric hookup to be made by REA-financed rural electric systems. At the same time the Leaco Rural Telephone Cooperative—another REA borrower—installed modern dial equipment in the McGuffin home. Within minutes the McGuffins found a whole new way of life, and I was proud to be present, along with REA Administrator Norman M. Clapp and others, at the happy ceremony which marked this occasion. Today, for the first time in their lives, the McGuffins have abundant light and power. They have refrigeration. They have modern kitchen and laundry equipment and appliances. They can communicate. They live safer lives. Their horizons have broadened enormously.

To me, the electrification of the McGuffin ranch is a symbol of governmental responsibility and private initiative at their very best. Back in the philosophy of the Rural Electrification Administration is the principle of area coverage. And it was through the application of this principle of area coverage that the McGuffins finally were able to get electricity. The Lea County Electric Cooperative serves the town of Lovington. In such a populous area the consumer density is relatively high. For some distributors in the electric industry this would mean attractive profits. But REA-financed rural electric cooperatives do not work on the profit principle. They use the relatively high revenues from the populous areas to help offset the cost of extending electric service to the more remote sections. That's what area coverage means. John McGuffin will not have to dip down into his own pocket to pay for those lines which reached out to his remote ranch. He will pay only a modest bill each month.

I believe it will be a source of considerable satisfaction to many of us in Government to know that this 5-millionth hookup of a rural consumer by an REA-financed rural electric cooperative is a symbol of far more substantial achievement. It is a curious fact that, when the REA program first got underway some 27 years ago, many people thought there was no need for it. They said that all the farmers who needed electricity were getting it. At that time only about 11 percent of U.S. farms enjoyed central-station electric service. Today over 97 percent of U.S. farms receive central-station electric light and power, and systems financed by REA furnish service to more than 50 percent of the Nation's farm and other rural establishments.

This service is made possible through self-liquidating Government loans, and in the fall of last year the U.S. Treasury received the billionth dollar in repayment of the principal of these loans. Not only did this represent $172 million in principal payments ahead of due dates, but it was in addition to nearly a half-billion dollars paid in interest.

It should not surprise us to know—but I think that we should note—that the dimensions of the rural electrification challenge are changing. With 97 percent of the Nation's farms electrified the problem is no longer the simple business of running in a line and turning on the lights. The farm and rural resident has learned to live with electricity, and to rely upon electricity in doing his job. The power demands of farm and rural consumers double about every 7 years. This increasing consumer demand for power is a direct reflection not only of the substantial progress of farm and rural people in the United States, but of their attainment of ever-higher standards of living. The pressure of rural electrification is liquidating underprivilege in the remote sections of the Nation, and releasing a constructive dynamic into the economy and the culture of our land, in which we all share.

A quarter-century ago those who said this job did not need doing, were wrong. Today, those who say it is done are equally wrong. It is not done; it is only begun. Certainly the Rural Electrification Administration stands well up among those felicitous mechanisms of Government which contribute simultaneously, importantly, and consistently both to the economic and cultural stability and progress of our Nation.

The Soviet Union Resumes Atmospheric Testing

EXTENSION OF REMARKS

OF

HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. KOWALSKI. Mr. Speaker I read with profound regret the grim news that the Soviet Union has once again resumed nuclear testing in the atmosphere.

It is now nearly a year since the dialog of terror was begun again, with the breaking of the test moratorium by the Soviet Union. It is difficult to believe the world, through testing, has moved closer to disarmament and peace.

It is estimated that the latest Soviet nuclear explosion was in the 40-megaton range, a size calculated to appall anyone who entertains doubts about the massive power of the Soviet Union. In this respect, the Soviets have failed. No one seems to care very much.

A year ago the Soviet resumption of testing was greeted with shock and violent protest in this country and throughout the world. Today I hear very little protest in the United States. The newspaper editorials for the most part seem content to observe smugly that the tests are being kept secret from the Russian people.

It appears that in the space of a few months, conditioned by our own testing, we have become insensible to what we once branded as a crime against humanity. The terror bombs cease to hold any terror for us. We have stopped trying to think about the unthinkable prospect before us, the annihilation of the human race. We have become the victims of our own propaganda.

Many like to think this round of testing is the last round, and greet the latest news with a sense of relief. Each series is the last series and each war is the last war.

The widespread apathy among the American people toward Soviet testing and our own is an ominous as the tests themselves. It is as dangerous for our survival.

Continued testing by either side brings us closer to material and spiritual disaster.

Hospital and Medical Care for Service-Connected Peacetime Veterans

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. LANE. Mr. Speaker, within the past 20 years, Congress has accomplished more for the benefit of those who served in the Armed Forces during a time of war, than all the previous Congresses of our history.

In going all out for war veterans we had the support of public opinion and the satisfaction of knowing that we were doing everything possible to care for our sick and disabled war veterans—helping their comrades to improve their job-skills, or complete their higher education, or to buy a home or a farm.

The far-reaching and constructive program of benefits that we provided for millions of these veterans, assisted them in making a successful adjustment to civilian life, and contributed to the progress and prosperity of the Nation.

It was proof of our everlasting gratitude to those who had defended our free society with their lives.

But in concentrating on legislation to benefit them, we overlooked the smaller group of peacetime veterans who also served the Nation because they were ready to defend it if war should come.

No one maintains that wartime and peacetime veterans should be treated alike because there are unbridgeable differences in the respective risks and sacrifices that they experienced. By the same reasoning, however, we should not carry this distinction to extremes by generously rewarding one group while denying the legitimate rights of the other group.

Every Member of Congress has found himself in the uncomfortable position of trying to explain to a peacetime veteran suffering from a noncompensable disability incurred or aggravated by his service that he was not eligible for hospital and medical care at a facility operated by the Veterans' Administration.

To excuse it as an oversight on the part of Congress was unconvincing because this unintentional discrimination has closed the Veterans' Administration medical doors to these veterans for many years.

War veterans now are entitled to hospital care and outpatient treatment for disabilities which they incurred in service even in those cases where they were not discharged for disability, or were not awarded compensation.

I believe that the same consideration should be extended to peacetime veterans who, at present, are entitled to treatment only if they were discharged for service-connected disability or are receiving compensation for such disabilities. If they fail to meet one of these eligibility conditions, they may not be granted hospitalization or outpatient treatment for a service-connected condition that is rated as less than 10 percent disabling.

Authorization of hospital and medical care for service-connected peacetime veterans is long overdue, and S. 3109, awaiting the President's action, will correct that neglect.

Protection for Rainbow Bridge National Monument

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 8, 1962

Mr. PELLY. Mr. Speaker, as passed by the Congress the upper Colorado storage project contained a special provision forbidding the construction of any reservoir in a national monument. In addition, as a part of the specific authority for the construction of Glen Canyon Dam, the Secretary of the Interior was obligated and required to undertake whatever steps were necessary for the protection of the Rainbow Bridge National Monument.

Inasmuch as the preservation of this world-famous national phenomenon is of vital concern to millions of our fellow citizens, I wrote the following letter under date of July 17 to Secretary Udall:

> DEAR MR. SECRETARY: Under the Upper Colorado Storage Project Act, construction of any reservoir or national monument is forbidden. Also, as I recall, under the authority to construct Glen Canyon Dam, you, as Secretary of the Interior, are required to provide full protection from any physical damage to the Rainbow Bridge National Monument.
>
> I am also advised that the Department of the Interior considers the appropriation for the Rainbow Bridge protective project a closed issue in this Congress.
>
> In view of this fact, I shall appreciate being advised of how the Department of the Interior plans to meet its statutory obligation, if, as you predict, Congress fails to make the protective appropriation this year.
>
> I am sure you have some plans in this connection, such as preventing storage in the Glen Canyon Reservoir until the protective appropriation is provided, and I shall be most interested in hearing what they are.
>
> Sincerely,
>
> THOMAS M. PELLY,
> *Representative in Congress.*

So far the Secretary has failed to favor me with the courtesy of a reply.

Meanwhile I have come into possession of a well prepared and fully documented thesis on this whole matter by Dr. William R. Halliday, a national authority on conservation, residing in Seattle, Wash. Dr. Hallidays' thesis, generally speaking, is highly technical. Nevertheless, in view of the fact that the Department of the Interior considers the appropriation for the Rainbow Bridge protective project a closed issue in this Congress, and in view of Mr. Udall's refusal to disclose whatever plans he has, if any, to provide protection for the Rainbow National Monument, as required by law, I think it appropriate to read certain portions of Dr. Halliday's statements into the RECORD at this point:

> Like every feature of this planet, and probably of the universe, Rainbow Bridge is only a transient feature. At most, its life expectancy is measured in millions of years, and there is an infinitesimal chance that it might collapse at any time. However, its solid bases and the limitation of present forces of rapid erosion to the inner channel of the canyon, well away from the buttresses, strongly suggests that it is quite possible that under present conditions, Rainbow Bridge will outlast the human race, just as it undoubtedly predates human civilization. Rainbow Bridge is widely recognized as one of the world's greatest individual features. Any manmade interference with conditions now prevailing at the great span which might possibly shorten its longevity and reduce it to a period of time which can be measured appropriately in human lifetimes would be a matter of grave concern to every citizen.

In this connection, Dr. Halliday who has conducted a personal survey of the monument refers to studies that have been made and has this to say:

> As nearly as can be determined, geological studies of Rainbow Bridge and Rainbow Bridge National Monument have been conducted by three bureaus of the Interior Department. Each has been the subject of an "administrative report", an intradepartmental format not normally released for public distribution. In this case, however, the Bureau of Reclamation has distributed copies of two of these "Administrative Reports" rather widely (Bu. of Rec., 1959; Hansen, n.d.). The third report, which expressed radically different conclusions, has not been released, and is known to the public only through a fragmentary quotation of the report of an unnamed National Park Service geologist by an Interior Department official. That quotation stated in part:
>
> "However, by far the most serious effect of floodwaters reaching the bottom of the watercourse beneath the span would be the danger of undermining the buttresses of the bridge itself. Standing (sic) water would dissolve cementing materials in the rock causing the sides of the water (sic) to slough. It is conceivable that the water could be, in a relatively few years, sufficient to caues the weakening of the ledges beneath the ends of the bridge and the collapse of the bridge itself."
>
> As a result, the concern of the National Park Service was sufficient that it formally requested a great reduction in the height of Glen Canyon Dam to preclude any such danger.
>
> Details of this National Park Service study and report have never been made public. Nevertheless, in denying this request by the National Park Service, Congress took specific action to protect Rainbow Bridge and the national monument. Two sections of the Upper Colorado Storage Project Act specifically forbid any invasion of the national monument by the reservoir such as is now proposed (Halliday, 1961).
>
> The administrative restriction of the National Park Service report is in striking contrast to the wide distribution by the Interior Department and especially its Bureau of Reclamation of the two administrative reports quoted so widely as support for the opposite viewpoint. One of these "geologic reports" is a Bureau of Reclamation report; the other, the "Hansen report." The Hansen reconnaissance report refers to a further report on "the geological setting of the Rainbow Bridge area," by a Lloyd Calder, "BuRec Report No. G–126," but no such report has been distributed to the public, and it cannot be stated whether or not this is partially or entirely identical to the "preliminary report" (BuRec, 1959).
>
> That "preliminary report," devoted only 15 lines to the geology and 9½ lines to ground water conditions at Rainbow Bridge. It is a "brief presentation of the engineering analyses of field investigations of facilities for protection of the monument. Other important nonengineering phases of the overall problem are not appraised in this report, and consequently no recommendations are made herein as to the final solution of the problem" (BuRec, 1959, p. 3). It contains no data by which a judgment can be made of the adequacy of the investigation of the geology and ground water conditions in question. As will be pointed out below, certain undocumented assertions in this "preliminary report" are not in accord with those of the "Hansen report." In any event, its 24½ lines of rather cursory text on geology and ground water do not constitute an intensive study of the ground water and geological situation at Rainbow Bridge.
>
> The third governmental study, and the second widely quoted "geological report" was "a brief geological examination of Rainbow Bridge National Monument and vicinity," by Wallace R. Hansen, an engineering geologist of the U.S. Geological Survey. Hansen stated:
>
> "The purpose of this examination was to obtain an independent opinion as to the geologic feasibility of various proposed measures intended to protect the monument, under the provisions of Public Law 485, from impairment by the waters of Glen Canyon Reservoir" (Hansen, n.d., p. 1).
>
> In addition to his stated assignment, Hansen also conducted "examinations of Rainbow Bridge." It appears to be of some importance that although this was to be an "independent opinion," Hansen stated that "the sites of all proposed barrier dams described by the Bureau of Reclamation were visited, but only cursory examinations were made of sites A, C, and an additional site referred to as the 'Narrows,' inasmuch as these sites are discounted as impractical by both the National Park Service and the Bureau of Reclamation." (It is site C which has been chiefly discussed as the most effective protective project (Halliday, 1961)). Hansen also referred repeatedly to Forbidden Canyon as Forbidding Canyon—a curious error.
>
> Hansen spent only 3 days (Hansen, n.d., p. 1) in this reconnaissance of 8 well-separated areas: (1) Rainbow Bridge; (2) the intake portal site upstream from the National Monument; (3) the outlet portal site in upper Aztec Canyon; (4) damsite A; (5) damsite B; (6) damsite C; (7) damsite "Narrows" and (8) "the first major tributary downstream from Rainbow Bridge" (Hansen, n.d., p. 1 and p. 12).
>
> Hansen did not state how much time was devoted to Rainbow Bridge and its immediate surroundings, but on the basis of three 12-hour workdays, it seems doubtful that Hansen spent as many hours in this "intensive" study as I did in my admittedly inadequate study. The present Director of the Geological Survey (Nolan, 1962a and b), and the Secretary of the Interior (Udall, 1962) have refused to make public the length of Hansen's study of this or any of the other

seven areas. Since Hansen failed to mention the limestone member of the Navajo sandstone which I found so easily in 1953, it seems doubtful that this study termed "intensive" (Udall, 1962) by those concealing its actual length actually was an even more cursory reconnaissance than mine or that of the Bureau of Reclamation in 1959.

Further on in his report, Dr. Halliday outlines the four major threats to Rainbow Bridge as follows:

> Proximity of the fluctuating reservoir to Rainbow Bridge would pose at least four major threats to the stability and continued existence of Rainbow Bridge:
>
> 1. Undercutting of one or both buttresses by the altered flow of Bridge Creek atop the deposits within the zone of fluctuation.
> 2. Development and collapse of solution cavities and other karstic or pseudokarstic phenomena in limestone units of the formations beneath or adjacent to Rainbow Bridge, as a result of alterations in ground water flow as a result of the fluctuating reservoir.
> 3. Leaching out of the natural cementing materials in the canyon walls by the fluctuating reservoir.
> 4. Effects of the weight of the reservoir, including earthquakes, differential subsidence and other movement, and collapse of karstic or pseudokarstic cavities in nonlimestone rocks.

Finally, Dr. Halliday comes to the following conclusions:

> "Intensive" Interior Department studies supposedly assuring the safety of Rainbow Bridge in the presence of the fluctuating Glen Canyon Reservoir are inadequate and appear to have been distorted for political purposes. An additional Interior Department study with contrary conclusions has been suppressed except for a short quotation mentioned during a 1954 hearing. The present Secretary of the Interior and Director of the U.S. Geological Survey have refused to reveal the current status of Geological Survey knowledge on many vital matters pertaining to this problem. Contrary to widespread statements of political origin, there are at least four major reasons why the fluctuation of Glen Canyon Reservoir in Bridge Canyon would greatly expedite the collapse of Rainbow Bridge which otherwise may well outlast mankind.

Based on the above information, Mr. Speaker, and in view of the importance of preserving this world-famous geological phenomenon, it seems to me that Congress should call on the Secretary to disclose in detail his plans for the preservation of the Rainbow Bridge National Monument prior to the adjournment of this Congress and before undertaking water storage in the Glen Canyon Reservoir.

Spain's Struggle Against Communism

EXTENSION OF REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. FLOOD. Mr. Speaker, in the mid-1930's Spain was in political, economic, and social turmoil. In this confusion a leftwing, Communist-oriented group under the name Popular Front came into power early in 1936. This popular front government seemed determined to rule Spain with an iron hand, and in many of its moves, aims, and tactics the people detected the hands of Moscow-trained and Kremlin-oriented communism. In the course of a few months many churches, seminaries, monastic establishments and other public institutions were set on fire. General and partial strikes were rampant, and a veritable chaos broke loose. The country was in a serious crisis while Communist elements were working feverishly for securing a firm foothold there. Great numbers of the people, and certain key leaders became aware of the serious situation, and began their fight against their government, which turned out to be their long and successful fight against the agents of communism.

This historic and epoch-making revolt, this beginning of the Spanish Civil War in July of 1936, was the first real fight of a people in Western Europe against communism. This was not just a civil war in which Spaniards fighting Spaniards, but it was an ideological war in which great world forces were arrayed against each other. Today, 26 years after the beginning of that fight, and on the 23d year after its successful conclusion, we salute the freedom-loving and gallant people of Spain.

J. Edgar Hoover: A Tribute

EXTENSION OF REMARKS

OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. PELLY. Mr. Speaker, the United States is blessed with many able and dedicated public servants, but few have served their country with the high distinction, uncompromising loyalty, and all-out devotion of J. Edgar Hoover. It is a privilege to pay tribute to this great American.

For 38 years, as Director of the Federal Bureau of Investigation, Mr. Hoover has been serving the cause of freedom and justice in the United States. He came to this post in 1924, a young lawyer 29 years of age. Today, at 67, he is one of our most revered public servants. He has literally devoted his entire life to the cause of keeping America free from her two worst enemies—crime and communism.

In building up the FBI over the years into what is today the finest crime detection agency in the free world, Mr. Hoover has, from the beginning, been meticulous in maintaining that justice must be above politics. When he accepted the directorship 38 years ago, he did so on condition that appointments to the FBI would be made solely on merit and promotions based on proven ability. Only men of spotless character are eligible for appointment as special agents, and nothing short of a college education, supplemented by training in the law, will suffice as prerequisites for these positions of public trust.

As a dedicated leader in the field of law enforcement, Mr. Hoover has been a prime mover in creating a professional stature for the American policeman. In so doing, he has increased the understanding of the responsibilities of law enforcement officers throughout the world.

He has been ever alert to the need to bring principles of science to bear on crime detection as well as law enforcement. The FBI Identification Division and the FBI Technical Laboratory are famous throughout the world. Today, the FBI has the world's largest collection of fingerprints—more than 150 million sets are on file. Every month, some 1,300 fugitives are identified through fingerprints.

In his 38 years as FBI Director, Mr. Hoover has created an agency which is the model of efficiency and effectiveness. Last year, the fines, savings, and recoveries made by the FBI totaled approximately $150 million—an amount exceeding the funds spent to operate the FBI for the entire year.

Mr. Hoover is proud, and all Americans can be proud, that conviction in FBI cases brought to trial average over 95 percent. It is in the category of the phenomenal that during World War II no successful act of enemy-directed sabotage occurred in the United States.

It is a singular commentary on Mr. Hoover's stewardship of the FBI that he has diligently and scrupulously avoided all roads that would lead to the FBI becoming a national police force—a hated Gestapo or a GPU. Mr. Hoover could have used his power to ask Congress to make the FBI an independent agency. He is the first to point out the dangers of a dictatorial national police agency to a free society. Today, the Federal Bureau of Investigation remains a department under the Attorney General of the United States.

Mr. Hoover's great love of freedom and his keen awareness of the subtle erosions of freedom which can take place through overcentralization has resulted in one of the finest examples of Federal-State-local cooperation in our history. Both the famous FBI Identification Division and the experts and facilities of the FBI Technical Laboratory—the largest of its kind in the world—are available to all law-enforcement agencies throughout the Nation. The FBI National Academy in Washington offers the same type of training given its own special agents to local, municipal, county, and State law-enforcement officers. Local agencies in every State in the Union have sent their men to the Academy—police organizations in many foreign countries have requested that the benefits of an FBI training be extended to their personnel. The FBI not only provides these and other cost-free cooperative services, but also, upon request, provides expert testimony in local courts in connection with evidence they have examined. Thus, the FBI is in partnership with every community across the Nation.

Not only has Mr. Hoover dedicated his life to combating organized crime; he has been a stalwart and articulate leader in our struggle against communism. Time and time again, he has availed himself of every opportunity to make Americans more fully aware of the dangers of communism and to exhort us to fight this menace not only by being against it, but by being for the American ideal and by working for the cause of liberty and justice.

Notwithstanding all this and the fact that Mr. Hoover is known as "Mr. Integrity" of the law enforcement world, occasionally we hear rumor that there are some in high political places who would like to have him replaced by someone more responsive to control and for exploitation of the 6,000 special agents in the FBI and their antiracketeering and antisubversion activities.

Public opinion, of course, as long as Mr. Hoover is in charge would rebel at any such political maneuver. Thus any smear attack on him should be examined to try and discover the motive behind it.

Mr. Speaker, one such recent attack on Mr. Hoover should be thus scrutinized. I refer to the remarks of Wilbur H. Ferry, vice president of the Fund for the Republic made on August 6, 1962, in Seattle as luncheon speaker at the Western States Democratic Conference.

In this speech the Director of the FBI was accused of having built a false legend of Communist strength.

The vicious distortions of facts in the "Ferrytale" should not be dignified were it not that the speech in question was to a formal and important political party conference. As such, it smacks of undermining a great American by a means of influence through the Democratic administration's policy.

On this account I point out that Mr. Ferry referred to J. Edgar Hoover's warning against Soviet espionage in the United States.

> This is an old whine of the FBI chief—

Commented Mr. Ferry, adding—

> and its success year after year is a tribute to the trance into which his sermons throw Americans, not excepting Congressmen.

Using the old technique of ridicule he described Mr. Hoover as "a spy swatter" and his work against communism as mischiefmaking.

Mr. Speaker, I am proud, let me say, to acknowledge having contributed through my vote in this House to the remarkable record of the past 10 years where we have appropriated every cent recommended by Mr. Hoover for operation of the FBI.

Finally, Mr. Speaker, as additional tribute to Mr. Hoover, because I believe him to be one of the great Americans of the 20th century and because I believe him to be as close to irreplaceable as any mortal man can be, I introduced legislation on August 14, 1962, H.R. 12898, which relates to the appointment of the Director and Associate Director of the FBI, when the present incumbent, J. Edgar Hoover, ceases to serve by reason of retirement or for reasons beyond the control of mortal man. This legislation, if enacted, would require that the new Director and any subsequent Director thereafter be appointed by the President, by and with the advice and consent of the Senate, for a term of 15 years, the same provisions applying also to the Associate Director.

Mr. Speaker, I realize it is too late to expect action on H.R. 12898 in this Congress, but I hope and plan if I am a Member of the 88th Congress, to reintroduce this legislation and push for its early consideration.

Respect for the service and achievement of one of America's greatest living patriots is not a partisan matter. Nor is contempt for those who ridicule patriotism.

Opportunity and freedom survive, thank God, in spite of those who belittle and besmudge the ideals and systems that America holds dear.

This is because of the high morals and dedication of men like J. Edgar Hoover to whom I pay this sincere tribute today.

All Americans owe a debt of gratitude to J. Edgar Hoover, a great American, and a great leader of the free world.

The Revere Journal, of Revere, Mass., Honored as the Best Weekly Newspaper of the 10,000 Circulation Class in the Nation

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. LANE. Mr. Speaker, this is not the first time that the Revere Journal, published in Revere, Mass., has been found worthy of mention in the pages of the Congressional Record.

The Journal is an independent and courageous weekly that is much closer to the heartbeat of its subscribers than the big city dailies. In an age where the trend toward centralization of power at the top is smothering the voice of the individual, the little Journal, loyally supported by subscribers who are better known as friends and neighbors, maintains the quality that reflects its New England character.

Being a weekly, it does not have to leap for the readers' attention with sensational headlines. The Journal has leisure to report some of the good things in community life, for it understands that true reporting must encompass more than the coverage of crime, corruption, disaster, and scandal.

Much of its modest success is due to the confidence it inspires in its readers. Most of them know the genial publisher, Sidney Curtis. When he stops to talk with them on the street, he asks about the boy who is serving with the Army in Germany, or the daughter's approaching marriage. Sidney's interest in people keeps him in touch with public opinion. He knows whether most of them favor or oppose the controversial motion that is coming up before the school committee at its next meeting. Because of his many personal contacts he knows where folks stand on the larger issues involving the State and the Nation. It is no wonder that the employees of the Journal are so proud of their paper and their publisher.

At the recent annual convention of the Accredited Home Newspapers of America that was held in Washington, D.C., the Revere Journal won national recognition. Sidney Curtis was presented with the top award for general excellence of weekly newspapers in the under 10,000 circulation class.

Congratulations to all who share in the accomplishments of the Revere Journal.

Crusade Against Narcotics

EXTENSION OF REMARKS

OF

HON. VICTOR L. ANFUSO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. ANFUSO. Mr. Speaker, David Schulte, a distinguished New Yorker who has served his city and State in public life for many years and who now holds office on the city's board of correction, has long been a leader in combating crime and corruption in all walks of life. He has recently returned from an extensive trip to Europe where he studied the elements of crime and its effect on the societies of other countries and how their experiences can be put to use in solving our problems here in the United States.

Mr. Schulte also brought back with him an unusual idea which is now being put into effect in the city of New York. It is the "Citizens Crusade Against Narcotics," a program that is enrolling every interested citizen in a huge organization spread throughout the city with each member acting as a watcher, keeping an alert eye for the dope pusher and peddler as well as for the addict himself. It is hoped that every citizen of New York will eventually become a member of this crusade to help wipe out this scourge.

Mr. Schulte has asked the advice of such distinguished personalities as Mr. Kingsbury-Smith, publisher of the New York Journal American, a newspaper which many months ago was instrumental in beginning an all-out attack on the narcotics problem. The Journal American and Mr. Kingsbury-Smith should be commended for their forthrightness and distinguished public service.

I am also happy to serve on the board of advisers of this crusade along with other public officials of the city of New York. The crusade is in its beginning and may prove a most effective way of helping to stamp out this menace. Mr. Schulte should be commended as well for his courage in this undertaking.

I take note, also, of the Special Conference on Narcotics which the White House has scheduled for September 27 and 28. I hope the Attorney General, who is serving as General Chairman of this event, will make it a point to call upon Mr. Schulte to be present and to be a member of this distinguished Conference. His experience will be invaluable.

Foreign Motion Picture Production

EXTENSION OF REMARKS

OF

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. DENT. Mr. Speaker, my attention was recently called to a pamphlet being sent to many Members of Congress dealing with the problem of production of motion pictures abroad by American companies. Since I have some familiarity with this matter, many of my colleagues asked my views about it.

It will be recalled that our subcommittee on the impact of imports and exports on American employment, in the course of its investigations and hearings, had also studied this particular motion picture situation. This was done at the behest of numerous union groups in California who complained that American workers were suffering from this new type of foreign competition.

Our subcommittee held 2 days of hearings and I personally conferred with both employee and employer leaders in California and Washington before and after the hearings. Subsequently, we issued a report in which we made specific findings and recommendations, chief of which was that the most effective way to meet this so-called runaway motion picture production was for closer cooperation between the producers and the craft unions and guilds in Hollywood. I may add, parenthetically, that we found that the greatest spur to foreign production was not basically the much lower labor costs abroad as it is large government subsidies by certain foreign governments who use their movies as a powerful propaganda and communications medium in a world in which three-fourths of the people still do not have the doubtful privilege of radio and television.

Subsequently, in the 3 months since the issuance of our committee report, I was pleased to learn of several concrete and specific steps that had been taken in an effort to reduce the amount of American production abroad and at the same time actually to increase production of films in the United States.

As an example, one of the most expensive films now scheduled, the biblical story entitled "The Greatest Story Ever Told," is to be shot almost in its entirety in the United States. The unions know that on spectacle type pictures employing thousands of persons substantial savings could be made abroad and therefore they modified certain union contract provisions. Similarly, the producers always have recognized that the efficiency and expertness of Hollywood artisans resulted in lower costs despite higher wage rates.

Thus, a realistic appraisal of facts and a sincere consideration of each other's problems by both employees and employers resulted not only in shifting some pictures back from foreign locale but more importantly gives promise of even greater benefits. It was this type of constructive labor-management discussion and consideration that our committee had recommended, along with a number of other points which the people of Hollywood are now pursuing in a six-point jointly adopted labor-management program.

I was, therefore, surprised and dismayed when I read the pamphlet, entitled "Awake America," currently being circulated through the efforts of the officials of three Hollywood local unions, the photographers, the electricians, and the grips. The pamphlet would have the reader believe that American motion picture producers are involved in some kind of a conspiracy to move their production abroad; that they are monopolists but ironically also perfectly willing to yield this lucrative monopoly to foreign producers; that the Government ought to do something about this; and finally they advocate that all foreign-produced movies ought to be boycotted.

Now, I yield to no man on this floor in fighting for the protection of American labor and American industry against unfair foreign competition. I think my colleagues know something of my efforts along this line. But I just could not understand some of the absurdities in the pamphlet and so I promptly wired Hollywood for the facts. I sent identical telegrams to the head of all Hollywood movie labor unions and to the principal spokesman for the producers, asking them bluntly to tell me the facts.

Here is the text of the telegram to George Flaherty, president of the American Federation of Labor Film Council, and to Charles Boren, executive vice president of the Association of Motion Picture Producers:

> Are you aware that pamphlet entitled "Awake America" purporting to come from three Hollywood unions is being widely distributed here? The pamphlet is completely contrary to reports I have had that a series of joint labor-management conferences have been held with the object of finding ways and means to sharply reduce so-called runaway production. Has there been a change in the situation? In the light of our committee hearings and subsequent report and recomendations I would appreciate a progress report and your frank comments.

The next day I received a telegram signed by both Mr. Flaherty and Mr. Boren. This is what they said:

> In reply to your telegraphic inquiry concerning pamphlet entitled "Awake America" and your request for progress report on our joint labor-management conference to reduce so-called runaway production please be advised as follows:
>
> (1) Such pamphlet, signed by business agents of three local unions which are not affiliated with Hollywood AFL Film Council, was not authorized by and does not reflect the position or attitude of our joint labor-management committee representing 19 local unions of the International Alliance of Theatrical Stage Employees, with 12,000 members; 7 local unions of the basic crafts, with 6,000 members: The Screen Actors Guild, Screen Extras Guild, Directors Guild of America, Writers Guild of America, West; and the member companies of the Association of Motion Picture Producers and the Alliance of Television Film Producers.
>
> (2) Since February 1, 1962, frequent meetings of our joint labor-management committee representing these responsible elements in the motion picture industry have been held and additional meetings are scheduled to further implement this six-point program (with which you are familiar) adopted on April 17, 1962, to attack the principal causes of foreign runaway production and to encourage increased U.S. film production.
>
> (3) There has been no lessening of our joint determination to do everything possible to solve these pressing economic problems. To the contrary, at the last two committee meetings a far-reaching and effective plan was developed to seek removal of unfair trade barriers and competitive disadvantages which handicap American domestic film production. Eric Johnston, president of the Motion Picture Association of America, Inc., and Ralph Hetzel, executive vice president of the Motion Picture Export Association, personally came to Hollywood to participate in the development of this plan with members of our joint committee.
>
> (4) Our joint committee will continue to seek practical solutions of these difficult and complex problems, and will welcome the constructive assistance of the Congress and appropriate Government agencies along the lines of the six-point program referred to above.
>
> Thank you for your continued interest in this cooperative effort of our joint labor-management committee.

Mr. Speaker, I think the answer is pretty obvious.

The answer is that the overwhelming majority of the Hollywood craft unions and guilds are engaged in a serious and constructive program of cooperation with the producers aimed at reducing foreign production and increasing domestic production.

The answer is that the sponsors of the pamphlets are the officials of three unions not members of the Hollywood Film Council and that views expressed therein are the views of the minority—and certainly they have a right, even if they are the expressed views of the full membership of the three unions involved.

The answer is that the participating union officials and the responsible studio executives in Hollywood are equally concerned about the problem, are doing something about it together, and both are resolved that America shall remain, as it has been, the preeminent movie capital of the world.

Under the circumstances, Mr. Speaker, I believe that my colleagues should evaluate the pamphlet for what it is, not for what it seems, and not become unduly concerned. For myself, I prefer to await continuing reports of the progress made by those who are doing something about the problem instead of confusing the picture by hurling wild charges about it.

Representative Fulton's Stand on H.R. 12580

EXTENSION OF REMARKS

OF

HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 8, 1962

Mr. FULTON. Mr. Speaker, on Friday, July 20, 1962, I left for Patrick Air Force Base at Cape Canaveral, Fla., on official business of the House Science and Astronautics Committee. This was in connection with the Mariner I Venus launch, and a meeting with Pratt & Whitney executive and research organization in regard to the difficulties encountered on the Centaur hydrogen engine program.

Had I been able to be present, I would have voted "aye" on rollcall No. 169 on the passage of H.R. 12580, the State, Justice, Commerce appropriations bill.

HOUSE OF REPRESENTATIVES

THURSDAY, AUGUST 9, 1962

The House met at 12 o'clock noon.

The Reverend William D. Slates, Fort Ashby, W. Va., offered the following prayer:

Almighty, all wise, all loving God, whom to know is life eternal, unto Thee we turn this day in grateful praise for Thy loving kindness. Open our minds to greater knowledge of Thee; then shall we render unto Thee a deeper love and fuller commitment of our lives.

Forgive us our national and personal sins. Grant us great sympathy with all the peoples of the earth in their quest for life and liberty. Help us share our blessings with others. Enable us to stand for righteousness and truth against their enemies. Lead us in paths of peace.

Bless, we pray, all those in seats of government. May they be guided and sustained by Thy Holy Spirit. In Jesus' name. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 23. An act to authorize the Secretary of the Interior to construct, operate, and maintain the Arbuckle reclamation project, Oklahoma, and for other purposes;

H.R. 3372. An act for the relief of Barbara W. Trousil, Edward G. Trousil, and Robert E. Trousil;

H.R. 5139. An act for the relief of Helena M. Grover;

H.R. 10276. An act to change the name of the Petersburg National Military Park, to provide for acquisition of a portion of the Five Forks Battlefield, and for other purposes;

H.R. 11400. An act to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing;

H.R. 11405. An act to provide for the maintenance and repair of Government improvements under concession contracts entered into pursuant to the act of August 25, 1916 (39 Stat. 535), as amended, and for other purposes; and

H.R. 12547. An act to amend the act of August 7, 1946, relating to the District of Columbia hospital center, to extend the time during which appropriations may be made for the purposes of that act.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 8134. An act to authorize the sale of the mineral estate in certain lands;

H.R. 10566. An act to provide for the withdrawal and orderly disposition of mineral interests in certain public lands in Pima County, Ariz.;

H.R. 10651. An act to amend title 28, United States Code, with respect to fees of U.S. marshals, and for other purposes;

H.R. 10652. An act to continue for a temporary period the existing suspension of duties on certain classifications of spun silk yarn; and

H.R. 10928. An act to transfer casein or lactarene to the free list of the Tariff Act of 1930.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 55. An act to authorize the establishment of the Fort Bowie National Historic Site, in the State of Arizona, and for other purposes;

S. 1878. An act to add certain lands to the Wasatch National Forest, Utah, and for other purposes;

S. 2771. An act for the establishment of a Commission on Science and Technology;

S. 3013. An act to amend the act of July 2, 1940, as amended, relating to the recording of liens on motor vehicles and trailers registered in the District of Columbia, so as to eliminate the requirement that an alphabetical file on such liens be maintained;

S. 3153. An act to guarantee electric consumers in the Pacific Northwest first call on electrical energy generated in Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes;

S. 3314. An act to amend the District of Columbia Public School Food Services Act;

S. 3317. An act to amend provisions of law relating to personal property coming into the custody of the property clerk, Metropolitan Police Department, and for other purposes;

S. 3574. An act to extend the International Wheat Agreement Act of 1949; and

S. 3580. An act to amend the Atomic Energy Community Act of 1955, as amended, to provide for the disposal of federally owned properties at Los Alamos, N. Mex., and for other purposes.

COMMITTEE ON APPROPRIATIONS

Mr. SHEPPARD. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tomorrow night to file a report on the bill making appropriations for military construction for the Department of Defense, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HORAN. Mr. Speaker, I reserve all points of order on the bill.

COMMITTEE ON FOREIGN AFFAIRS

Mr. MORGAN. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs may have until midnight Friday next to file a report on the bill S. 2768.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CRIME IN THE DISTRICT OF COLUMBIA

Mr. CHAMBERLAIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CHAMBERLAIN. Mr. Speaker, I rise to voice, in the strongest terms, my shock and indigation at the recent robbery of Mrs. Isabell Hathaway, of Lansing, Mich., only a few blocks from this Chamber. Such incidents—and they are apparently on the increase—cannot be tolerated, especially in the Nation's Capital. If American citizens cannot visit their seat of government without fear of being attacked and robbed, how can we talk of freedom in this country? How can we point to our Capitol dome as the symbol of freedom for the rest of the world?

Frankly, I am not certain as to just what the situation here requires in order to get results and to make the District of Columbia safe, but I do know that effective action can and must be taken. If an expanded police force is needed, then let us have it. If stronger procedures for dealing with criminal suspects are required, then let us permit them. Whatever is demanded—and I intend to make inquiries to find out—we, as Members of the Congress of the United States and as inhabitants of the District of Columbia, cannot permit ourselves to be insensitive to the needs of the District government necessary to assure the safety of all residents and visitors in the Nation's Capital. If we do not provide what is necessary to protect this community against criminal activity, we have breached our responsibility to the American people.

JOE GLEN SMITH, OF SAN MATEO, CALIF.

Mr. YOUNGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. YOUNGER. Mr. Speaker, this is an important day for thousands of Joe Smiths in this country, for one of their number has been selected to visit the Capital to see the workings of the Government, but more especially to see how the accounts of all Joe Smiths are kept separately by the Social Security Administration.

Our district was honored because one of our Joe Smiths was chosen for this experiment. He is Joe Glen Smith, of San Mateo, Calif., accompanied by his wife, Maxine, daughter Becky, 5, and son Hal, 3. Their tour will be recorded by news and television to the end that our citizens who are paying into social security will be better informed as to how their records are kept at the recordkeeping center in Baltimore and how their Government operates here in Washington.

This Joe Smith is an airline employee who spends his spare time in herb gardening and has over 35 varieties of herbs growing in his backyard under that wonderful California climate which we enjoy in San Mateo.

To their credit, these Joe Smiths are making this trip at their expense.

HERBERT HOOVER

Mr. BROWN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The **SPEAKER.** Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BROWN. Mr. Speaker, tomorrow, August 10, is the 88th birthday of our beloved former President, Herbert Hoover, at which time, in the little community in which he was born, West Branch, Iowa, he will speak at the dedication of a Presidential library created by a recent act of Congress. It may be of interest to all of us to remember that the author of that particular act was the Speaker of the House of Representatives, the gentleman from Massachusetts [Mr. McCormack]. Former President Truman and other dignitaries will be present and will participate in the dedication of this tribute to a great American.

As Mr. Hoover's address cannot be used for a press release until noon Washington time on August 10, I shall request permission to insert a copy of his speech in the Appendix of the daily Congressional Record of August 10, which, of course, will not be printed and distributed to the public until after the dedicatory address has been delivered.

I am taking this action because I believe it most applicable that the Congressional Record carry the address of this great former President, Herbert Hoover, on the day he delivers it—his 88th birthday. I am sure that every Member of the Congress, regardless of political affiliation, joins me in expressing the hope that this great humanitarian and servant of the people, Herbert Hoover, may live to celebrate many more birthdays in good health.

Mr. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. BROWN. I yield to the gentleman from Louisiana.

Mr. BOGGS. I should like to associate myself with the most appropriate remarks the distinguished gentleman from Ohio has made in connection with the 88th birthday of former President Hoover. He has lived a long, productive, and useful life and has been a great credit to our country.

Mr. BROWN. I thank the gentleman.

CALL OF THE HOUSE

Mr. ASPINALL. Mr. Speaker, I make the point of order that a quorum is not present.

The **SPEAKER.** Evidently a quorum is not present.

Mr. BOGGS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 194]

Abernethy
Albert
Alexander
Andersen, Minn.
Ashley
Baring
Barrett
Bass, N.H.
Blatnik
Blitch
Bromwell
Celler
Chiperfield
Collier
Colmer
Cramer

Schwengel
Scranton
Seely-Brown
Shipley
Smith, Miss.
Spence
Stephens
Taber
Thompson, La.
Van Pelt
Wilson, Ind.
Winstead
Wright
Yates
Zelenko

The **SPEAKER.** On this rollcall 361 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERSONAL ANNOUNCEMENT

Mr. BAILEY. Mr. Speaker, on yesterday, on rollcall No. 193, I was absent due to an important conference with the new Secretary of Health, Education, and Welfare. Had I been present, I would have voted "yea."

OFFICE OF PUBLIC WORKS COORDINATION AND ACCELERATION

Mr. SISK, from the Committee on Rules, reported the following privileged resolution (H. Res. 755, Rept. No. 2159) which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 10113) to establish an Office of Public Works Coordination and Acceleration; to authorize the preparation of a plan for acceleration of public works when necessary to avoid serious nationwide unemployment levels; and for other purposes, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed four hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Public Works now in the bill and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of the bill H.R. 10113, it shall be in order in the House to take from the Speaker's table the bill S. 2965 and to move to strike out all after the enacting clause of said Senate bill and to insert in lieu thereof the provisions contained in H.R. 10113 as passed by the House.

COMMITTEE TO INVESTIGATE AND REPORT ON CAMPAIGN EXPENDITURES

Mr. SISK, from the Committee on Rules, reported the following privileged resolution (H. Res. 753, Rept. No. 2160), which was referred to the House Calendar and ordered to be printed:

Resolved, That a special committee of five Members be appointed by the Speaker of the House of Representatives to investigate and report to the House not later than January 3 1963, with respect to the following matters:

(1) The extent and nature of expenditures made by all candidates for the House of Representatives in connection with their campaign for nomination and election to such office.

(2) The amount subscribed, contributed, or expended, and the value of services rendered, and facilities made available (including personal services, use of advertising space, radio and television time, office space, moving-picture films, and automobile and any other transportation facilities) by any individual, individuals, or group of individuals, committee, partnership, corporation, or labor union, to or on behalf of each such candidate in connection with any such campaign or for the purpose of influencing the votes cast or to be cast at any convention or election held in 1962 to which a candidate for the House of Representatives is to be nominated or elected.

(3) The use of any other means or influence (including the promise or use of patronage) for the purpose of aiding or influencing the nomination or election of any such candidates.

(4) The amounts, if any, raised, contributed, and expended by any individual, individuals, or group of individuals, committee, partnership, corporation, or labor union, including any political committee thereof, in connection with any such election, and the amounts received by any political committee from any corporation, labor union, individual, individuals, or group of individuals, committee, or partnership.

(5) The violations, if any, of the following statutes of the United States:

(a) The Federal Corrupt Practices Act.

(b) The Act of August 2, 1939, as amended, relating to pernicious political activities, commonly referred to as the Hatch Act.

(c) The provisions of section 304, Public Law 101, Eightieth Congress, chapter 120, first session, referred to as the Labor Management Relations Act, 1947.

(d) Any statute or legislative Act of the United States or of the State within which a candidate is seeking nomination or reelection to the House of Representatives, the violation of which Federal or State statute, or statutes, would affect the qualification of a Member of the House of Representatives within the meaning of article I, section 5, of the Constitution of the United States.

(6) Such other matters relating to the election of Members of the House of Representatives in 1962, and the campaigns of candidates in connection therewith, as the committee deems to be of public interest, and which in its opinion will aid the House of Representatives in enacting remedial legislation, or in deciding contests that may be instituted involving the right to a seat in the House of Representatives.

(7) The committee is authorized to act upon its own motion and upon such information as in its judgment may be reasonable or reliable. Upon complaint being made to the committee under oath, by any person, candidate, or political committee, setting forth allegations as to facts which, under this resolution, it would be the duty of said committee to investigate, the committee shall investigate such charges as fully as though it were acting upon its own motion, unless after a hearing upon such complaint, the committee shall find that the allegations in such complaint are immaterial or untrue. All hearings before the committee, and before any duly authorized subcommittee thereof, shall be public, and all orders and decisions of the committee, and of any such subcommittee, shall be public.

For the purpose of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized to hold such public hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the Eighty-seventh Congress, to employ such attorneys, experts, clerical, and other assistants, to require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to administer such oaths, and to take such testimony as it deems advisable. Subpenas may be issued under the signature of the chairman of the committee or any subcommittee, or by any member designated by such chairman and may be served by any person designated by any such chairman or member.

(8) The committee is authorized and directed to report promptly any and all violations of any Federal or State statutes in connection with the matters and things mentioned herein to the Attorney General of the United States in order that he may take such official action as may be proper.

(9) Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default, or who having appeared, refuses to answer any question pertinent to the investigation heretofore authorized, shall be held to the penalties prescribed by law.

That said committee is authorized and directed to file interim reports whenever in the judgment of the majority of the committee, or of a subcommittee conducting portions of said investigation, the public interest will be best served by the filing of said interim reports, and in no event shall the final report of said committee be filed later than January 3, 1963, as hereinabove provided.

LEGISLATIVE PROGRAM FOR WEEK OF AUGUST 13

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ARENDS. Mr. Speaker, I take this time in order to ask the acting majority leader if he can tell us the program for next week.

Mr. BOGGS. Mr. Speaker, at the conclusion of the legislative program for today it is my intention to ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The program for next week is as follows:

Monday is District Day, and we have scheduled eight bills from the Committee on the District of Columbia, as follows:

S. 1918: Retirement benefits, Park Police, firemen, Secret Service.

H.R. 12727: Medical care, police and fire departments.

S. 2357: Regulation, life and accident insurance.

S. 3315: Assessments of property.

H.R. 12689: Amend, an act to establish a code of law.

H.R. 8563: Amend, Life Insurance Act, veterans' organizations.

H.R. 11698: Appointment of new trustees in deeds of trust.

H.R. 10188: Regulation of buildings, Georgetown area.

These bills may not necessarily be called in the order to which I have just read them.

In addition, we have scheduled H.R. 1341, motor vehicles, safety standards, and H.R. 9045, Government interests in copyrights and trademarks.

For Tuesday and the balance of the week:

The military construction appropriation bill, 1963.

S. 1005: Federal Reserve branch banks, building construction.

H.R. 8874: Authorization, Bank Service Corporation Act.

H.R. 12336: Amend, Atomic Energy Act.

For Thursday we have scheduled the public works appropriation bill for 1963.

Conference reports may be brought up at any time, and any further program will be announced at a later date.

Mr. ARENDS. May I ask the acting majority leader if there will be rollcall votes on Monday or Tuesday of next week?

Mr. BOGGS. Yes. There are no contested primaries scheduled.

Mr. ARENDS. I thank the gentleman.

TRADING WITH THE ENEMY ACT

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution, House Resolution 745, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3460) to amend section 9(a) of the Trading With the Enemy Act, as amended. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from California [Mr. SMITH], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 745 provides for the consideration of H.R. 3460, a bill to amend section 9(a) of the Trading With the Enemy Act, as amended. The resolution provides for an open rule with 1 hour of general debate.

H.R. 3460 would amend section 9(a) of the Trading With the Enemy Act to provide that upon a determination by the President, in time of war or national emergency, that the interest and welfare of the United States require the sale of any property or interest claimed in any suit filed under this subsection and pending on or after the date of enactment of this legislation, the Alien Property Custodian or any successor officer or agency may sell the same, with the net proceeds of such sale being deposited in a special Treasury account pending the entry of final judgment in the suit. Claimants would have the right to elect whether to accept the net proceeds of such sale or to waive their claim to such proceeds and seek just compensation instead. If just compensation is sought, the court hearing the pending suit would determine the amount which constitutes just compensation, and enter an order therefor, which would be a judgment against the United States, to be satisfied first out of the net proceeds of the sale, with any balance being paid in the same manner as are other judgments in cases arising under section 1346 of title 28, United States Code.

Insofar as the legislation will affect property vested during World War II, its principal purpose is to authorize the Attorney General to effect the sale of approximately 93 percent of the outstanding shares of stock of General Aniline & Film Corp., which is the sole remaining company in active operation under the supervision of the Office of Alien Property. These shares, which were vested in the Alien Property Custodian in 1942 under the provisions of the Trading With the Enemy Act, are presently the subject of a suit for their return under section 9(a) and cannot be disposed of pending the termination of the suit unless this bill is enacted.

General Aniline & Film is engaged in the manufacture and distribution of a variety of products in the photographic, dyestuff, and chemical industries. It is the second largest producer of photographic materials in the United States, one of the largest dyestuff producers and a leader in the manufacture of copying machines and allied products. The corporation has total assets of approximately $170 million, and employs over 8,000 people, being extremely important to the welfare of the areas in which its facilities are located, principally in New York, New Jersey, Kentucky, Alabama, Michigan, California, Illinois, and Colorado. A significant portion of its output goes to the defense agencies of the Government.

Mr. Speaker, I urge the adoption of House Resolution 745.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as stated by the gentleman from California [Mr. Sisk], House Resolution 745 is an open rule providing 1 hour of debate for the consideration of H.R. 3460. My understanding of this measure is precisely the same as that of the gentleman from California, so I will not repeat his statement but simply ask to be associated with his remarks.

May I simply say in addition to his remarks that the maintenance of General Aniline & Film Corp. as a strong, productive, and competitive organization under the control of nonalien interests is important to the public interest and welfare and would promote the national interest. The proposed legislation would accomplish this, while at the same time safeguarding private interests through its provision for substituting the proceeds of sale or just compensation for the property itself. Also important is the factor that this legislation would make it possible for the Government to rid itself of its unnatural role as owner of a private competitive business.

The property will be sold to the highest bidder. The money will go into the U.S. Treasury. In my opinion this legislation is long overdue. We ought to get rid of the ownership of this last piece of property which we are operating as a going concern and dispose of it in this particular way.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield.

Mr. GROSS. Will the proceeds of this sale be earmarked for the payment of war claims, or blanketed into the general funds of the Federal Treasury?

Mr. SMITH of California. At the hearing before the Rules Committee inquiry was made as to that. Our understanding is that it will be sold under the provisions of section 12 of the Trading With the Enemy Act which says it has to be an advertised sale.

I imagine it would be effected by the act we passed yesterday dealing with the war claims, but after a certain length of time any balance of the proceeds would be covered into the Treasury.

Mr. MACK. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield.

Mr. MACK. The proceeds of the sale would be held in trust pending the outcome of suits now underway in the courts. The proceeds will be held in a special trust fund.

Mr. SMITH of California. When those suits are disposed of, any funds available would go into the Federal Treasury.

Mr. MACK. The gentleman is entirely correct. When the suit or suits are disposed of the funds will be available for the payment of war claims and would go into the war claims fund.

Mr. GROSS. Mr. Speaker, will the gentleman yield further?

Mr. SMITH of California. I yield to the gentleman.

Mr. GROSS. Is the pending legislation necessary in order for the Alien Property Custodian to sell this property? Or does it set up conditions which are not now available to the Alien Property Custodian?

Mr. SMITH of California. It is my understanding that this legislation is necessary because of this long, involved suit that is pending in the courts at the present time and that may go on for a great many years. We would like to get out of the operation of this General Aniline and Film Corp.

A great many properties have been sold under the Trading With the Enemy Act over the years. This is the last corporation we are operating. I understand it is now in the possession of the Attorney General who took over from the Alien Property Custodian.

Mr. ROBISON. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield.

Mr. ROBISON. I think an answer to the gentleman's inquiry is found in the statement included in a letter from the Department of the Treasury, by Mr. Robert H. Knight, its General Counsel, in which the following statement is made:

> Under the present provisions of law any claim for the return of vested property, no matter how ill founded, can at any time before sale bring to a standstill the orderly process of liquidating vested property. The enactment of the proposed legislation would avoid the delay and waste involved in the present procedures and would allow disposition of vested property within a reasonable period of time after vesting.

If the gentleman will yield further, the litigation in this instance has gone on for 14 years. Those of us who are interested in this great corporation think it is time to return it to the free enterprise system.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I think we should be plain on the intent of Congress at this time because it is left up in the air by the remarks of the gentleman from Illinois. If this stock is turned into a fund, which is held in trust, and the fund is turned over to the Treasury to be paid into the war damage claims fund, it is taking away from these claimants the basis on which the suit is entered.

At this time we should make clear what the intention of the Congress is as to these funds. There has been an answer previously by the gentleman from Illinois. The gentleman from Arkansas was not present. The answer was, I believe, that the proceeds of these funds would first be put into a trust fund, then would go into a war claims fund. If that is the case, what is the intent of Congress? Are we depriving the claimants of the basis of their suit, first by authorizing the sale, then putting in the war damage fund the proceeds of the sale?

Mr. HARRIS. I was here a moment ago during the colloquy when the gentleman from Illinois very appropriately answered the question.

Let me say that we are not changing the policy on war claims legislation at all by this legislation. The intent of the Congress as to what will happen to the vested fund is not involved here at all. That was decided many years ago.

This legislation is for the purpose of selling a particular industry, the General Aniline & Film Corp.

Mr. FULTON. The intent of this act is not to change existing law in that respect?

Mr. HARRIS. Insofar as the claimants are concerned, they are not affected at all.

Mr. SMITH of California. Mr. Speaker, I have no further requests for time.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING SECURITIES AND EXCHANGE COMMISSION TO DELEGATE CERTAIN FUNCTIONS

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 747 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

> *Resolved,* That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 2135) to authorize the Securities and Exchange Commission to delegate certain functions. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from California [Mr. Smith], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 747 provides for the consideration of S. 2135, a bill to authorize the Securities and Exchange Commission to delegate certain functions. The resolution provides for an open rule with 1 hour of general debate.

S. 2135 would authorize the Securities and Exchange Commission by published order or rule to delegate certain of its functions to a division of the Commission, an individual Commissioner, a hearing examiner, or an employee or employee board, and provides for appeals of actions taken under certain of such delegations. The Commission would retain a discretionary right to review any action taken under delegated authority, and the vote of one member of the Commission would be sufficient to bring any such action before the Commission for review.

The enactment of this legislation would result in no additional cost to the Government.

Mr. Speaker, I urge the adoption of House Resolution 747.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as stated by the gentleman from California [Mr. SISK], House Resolution 747 does provide for 1 hour debate on an open rule for the consideration of S. 2135.

Mr. Speaker, my understanding of the purpose of this bill is precisely the same as that stated by the gentleman from California [Mr. SISK] and I associate myself with the gentleman's remarks. In addition to his statements may I call the attention of the Members of the House to the fact that last year we did pass Reorganization Plan No. 1 of 1961 which had for its purpose the same purpose as S. 2135. The other body thought that the reorganization plan went too far and it was not passed by that body. This bill, as passed by the other body, is designed to take care of its objection to Reorganization Plan No. 1 of 1961 which was passed last year by the House.

Mr. Speaker, I know of no objection to the bill and I know of no objection to the rule.

Mr. BROWN. Mr. Speaker, would the gentleman yield?

Mr. SMITH of California. I would be glad to yield to the gentleman from Ohio.

Mr. BROWN. In connection with the legislation which this rule will make in order to consider at this time, the legislation itself does provide for the establishment of new methods and new procedures in the Securities and Exchange Commission, somewhat in line with the provisions of Reorganization Plan No. 1 of 1961 which was submitted by the President, but after it eliminated some of the objectionable features of this reorganization plan which caused the Senate to reject it. Some of us who were on the Subcommittee on Government Organization at that time did oppose the reorganization plan then. I know of no objection to the legislation as it is now written and do not feel that it would be harmful in any way. I hope the bill will receive unanimous support.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from Iowa.

Mr. GROSS. I regret that I have not read all the report—is the majority minus one provision, as contained in the reorganization proposals of last year contained in this proposal before us?

Mr. BROWN. If the gentleman will yield——

Mr. SMITH of California. I yield to the gentleman from Ohio.

Mr. BROWN. No. Any one member of the Commission can bring the matter up before the full Commission whether he has been connected with the investigation or not, and any one member of the Commission——

Mr. GROSS. The gentleman will recall that in the reorganization plan last year, as with other reorganization plans, there was the provision that a majority of the Commission, minus one—which meant a minority of the Commission—could control the Commission and would be dominant? That feature, the gentleman says, is out of this bill; is that correct?

Mr. BROWN. That is my understanding.

Mr. GROSS. I am glad to hear that.

Mr. SMITH of California. Mr. Speaker, I note that the gentleman from Arkansas [Mr. HARRIS] is shaking his head in the affirmative and perhaps he would like to respond to that statement.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from Arkansas.

Mr. HARRIS. The gentleman is correct. As it was passed in the House last year, two members of the five-member Commission could bring a matter before the full Commission. Under the provisions of this bill any one member can bring it to the Commission for consideration.

Mr. SMITH of California. Mr. Speaker, I have no further requests for time.

Mr. SISK. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SALE OF VESTED ASSETS

Mr. MACK. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3460) to amend section 9(a) of the Trading With the Enemy Act, as amended.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 3460, with Mr. ROONEY in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. MACK. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, the purpose of this bill is to take the Government out of the business of managing a large industrial firm; namely, the General Aniline & Film Corp.

Operation of this huge concern has been under Government control since the majority shares were vested by the Justice Department as enemy property at the start of American participation in World War II.

It seems likely that litigation over ownership of these shares will be prolonged for many years. This means that Government operation of this industry will continue indefinitely unless the pending bill is enacted.

General Aniline is a major company in a growth industry but the legal consequences of Government control have retarded its normal development. Because of its present status the company cannot raise the equity capital needed to expand. It cannot offer adequate inducements to attract and keep young executives. This is bad for its employees, the minority American stockholders, and for the communities across the country where General Aniline plants are located.

The prescription needed to restore this company to economic health is a strong dose of free enterprise.

It is time for the Government to get out of General Aniline and let free enterprise take over.

This is the solution offered by the pending bill, H.R. 3460.

Section 9(a) of the Trading With the Enemy Act—40 Stat. 419; 50 U.S.C. App. 9(a)—as amended, permits any person, other than an enemy or ally of an enemy, claiming interest in any vested property, to institute a suit for the return of such property. It also expressly enjoins the Attorney General—successor to the Alien Property Custodian—from disposing of any such claimed property prior to the final judgment in any such suit.

The reported bill would amend section 9(a) to provide that upon a determination by the President, in time of war or national emergency, that the interest and welfare of the United States require the sale of any property or interest claimed in any suit filed under this subsection and pending on or after the date of enactment of this legislation, the Alien Property Custodian or any successor officer or agency may sell the same, with the net proceeds of such sale being deposited in a special Treasury account pending the entry of final judgment in the suit. Claimants would have the right to elect whether to accept the net proceeds of such sale or to waive their claim to such proceeds and seek just compensation instead. If just compensation is sought, the court hearing the pending suit would determine the amount which constitutes just compensation, and enter an order therefor, which would be a judgment against the United States, to be satisfied first out of the net proceeds of the sale, with any balance being paid in the same manner as are other judgments in cases arising under section 1346 of title 28, United States Code.

Insofar as the legislation will affect property vested during World War II, its principal purpose is to authorize the Attorney General to effect the sale of approximately 93 percent of the outstanding shares of stock of General Aniline & Film Corp., which is the sole remaining company in active operation under the supervision of the Office of Alien Property. These shares, which were vested in the Alien Property Custodian in 1942 under the provisions of the Trading With the Enemy Act, are presently the subject of a suit for their return under section 9(a) and cannot be disposed of pending the termination of the suit unless this bill is enacted.

General Aniline & Film is engaged in the manufacture and distribution of a variety of products in the photographic, dyestuff, and chemical industries. It is the second largest producer of photographic materials in the United States, one of the largest dyestuff producers and a leader in the manufacture of copying machines and allied products. The corporation has total assets of approximately $170 million, and employs over 8,000 people, being extremely important to the welfare of the areas in which its facilities are located, principally in New York, New Jersey, Kentucky, Alabama, Michigan, California, Illinois, and Colorado. A significant portion of its output goes to the defense agencies of the Government.

Section 12 of the Trading With the Enemy Act provides the manner in which the property shall be sold. I should like to point to the significant portion of this section which says that any property sold under the Trading With the Enemy Act shall be sold only to American citizens, at a public sale to the highest bidder, after public advertisement of time and place of sale which shall be where the property or a major portion thereof is situated unless the President stating the reasons therefor, in the public interest, shall otherwise determine. In this connection, I would like to insert for the RECORD the history of previous sales of large companies which have been made by the Alien Property Custodian under the provisions of this law.

The first of the larger companies sold by the Alien Property Custodian was American Potash & Chemical Corp. The vested interest in this corporation, consisting of 90.8 percent of its outstanding capital stock, was sold as a result of a sealed bid public offering in March 1946 to a syndicate of Glore, Forgan & Co., Kuhn, Loeb & Co., and Lehman Bros. The sale price was approximately $15½ million.

The second company of substantial size sold by the Alien Property Custodian was the American Bosch Corp. The vested interest, consisting of 77.4 percent of its outstanding capital stock was sold in July 1948 as a result of a sealed bid public offering to Arma Corp. The sale price was approximately $6,100,000. The shares were registered with the Securities and Exchange Commission prior to the offering.

In December 1948 the Alien Property Custodian sold the American Bemberg Corp. and the North American Rayon Corp., for a combined price of $17,100,000. The sale was made as a result of a sealed bid public offering to Beaunit Mills, Inc. Prior to the offering the shares were registered with the Securities and Exchange Commission.

Maywood Chemical Works were sold as a result of public auction in January 1949 to the issuing corporation for $847,500.

In March 1952 the Schering Corp. was sold through the medium of a sealed bid public offering to the underwriting corporation headed by Merrill Lynch, Pierce, Fenner & Beane. The sale price was $29,132,000. These shares were registered with the Securities and Exchange Commission prior to the offering.

In 1953 the vested interest in the General Dyestuff Corp. consisting of 100 percent of its capital stock was sold to General Aniline & Film Corp. at a private sale for 65,000 shares of the class A stock of the purchasing corporation. The private sale was based on a finding that the interdependence and close business relationship of both corporations made such a sale desirable. General Dyestuff Corp. was subsequently merged into General Aniline & Film Corp.

NEED FOR LEGISLATION

Under existing law, the control of General Aniline & Film Corp. will remain in Government hands during the pendency of litigation. Under Government management, the company has been unable to raise new capital or pursue executive incentive plans in keeping with that of other large industrial corporations, and consequently it has been difficult for the company to maintain itself in a strong competitive position and to attract outstanding research and executive personnel. Indeed, the injunctive provision of section 9(a), which this bill seeks to amend, has itself been invoked to hamper the company in desirable expansion attempts. A recapitalization plan attempted in 1956 was enjoined at the behest of the plaintiff, and another attempt in 1960 to amend the charter was likewise enjoined on the plaintiff's motion. In each case the court ruled that the proposed company plans would alter the nature of the property which was the subject of the suit in violation of the retention provisions of section 9(a). Accordingly, the Attorney General was enjoined from voting his stock in favor of either of those plans.

The maintenance of General Aniline & Film Corp. as a strong, productive, and competitive organization under the control of nonalien interests is important to the public interest and welfare and would promote the national interest. The proposed legislation would accomplish this, while at the same time safeguarding private interests through its provision for substituting the proceeds of sale or just compensation for the property itself. Also important is the factor that this legislation would make it possible for the Government to rid itself of its unnatural role as owner of a private competitive business.

Unless this legislation is enacted, it is unlikely that at any time in the immediately foreseeable future it will be possible to return the operation of General Aniline & Film Corp. to private ownership and operation. Litigation concerning this vested asset first began in 1948, and has continued to the present time, with no end in sight at present. Over 250,000 documents need to be interpreted and analyzed, and somewhere in the neighborhood of 1,700 persons have intervened in the pending action. A summary of the complex litigation involving this company is set forth below.

SUMMARY OF LITIGATION

A summary of the litigation involving General Aniline & Film Corp. was set forth in the 1960 Annual Report of the Office of Alien Property, Department of Justice, as follows:

> The most important litigation in the Office and perhaps the largest case involving the U.S. Government is *Societe Internationale, etc.* (*I. G. Chemie*) (also known as "Interhandel") v. *Kennedy, et al.* (U.S. District Court for the District of Columbia).
>
> This is an action under section 9(a) of the Trading With the Enemy Act by a Swiss holding company to recover approximately 93 percent of the stock of General Aniline & Film Corp. valued at approximately $123 million. The district court dismissed the complaint in December 1953 because of the plaintiff's failure to produce papers and documents as ordered. The court of appeals affirmed the dismissal but granted a period of grace within which the plaintiff could comply. The Supreme Court denied a petition for certiorari. After the expiration of the period of grace the district court concluded that the production made by the plaintiff was not complete and that full disclosure could not be made under Swiss law and affirmed its earlier dismissal. The court of appeals affirmed, and the Supreme Court granted certiorari. On June 16, 1958, the Supreme Court reversed the order of dismissal and remanded the case to the district court for further proceedings.
>
> After remand to the district court, proceedings were instituted to modify the order of reference to remove from the authority of the special master the trial of the issues of law and fact in this case and to leave within his functions only the supervision of discovery and other pretrial matters. This motion was denied and, upon appeal to the court of appeals under the Interlocutory Appeals Act, the court of appeals by a divided court affirmed the denial. The Supreme Court denied certiorari on November 14, 1960.
>
> In the fall of 1958 I. G. Farbenindustrie in liquidation sought to intervene in the district court action to assert and have adjudicated its prevesting ownership interest in the vested shares of stock. This motion was denied on December 19, 1958, because Farben, as an admitted enemy, was barred from asserting any interests which it might have in vested property under the Trading With the Enemy Act. No appeal was taken.
>
> Prior to the granting of certiorari by the Supreme Court, proceedings before the International Court of Justice were instituted against the United States by the Swiss Government to have that Court adjudge that the United States was under an obligation to restore to the plaintiff its assets in this country or, in the alternative, for an adjudication that the dispute should be submitted to judicial settlement, arbitration, or conciliation in accordance with outstanding treaties. The United States interposed preliminary objections to the petition of the Swiss Government challenging the jurisdiction of the International Court of Justice. These preliminary objections were heard at The Hague in November 1958. By its decision of March 21, 1959, the International Court upheld one of the five objections of the United States; namely, that the petition of the Swiss Government was not yet admissible before the Court because I. G. Chemie had not yet exhausted its judicial remedies in the courts of the United States. The Court did not reach the objection to its jurisdiction which had been based upon the Connally reservation.
>
> In the latter part of 1959, General Aniline & Film Corp. proposed to its stockholders a resolution to amend its certificate of incor-

> poration to remove the redemption features from the A shares. The purpose of such amendment was to permit the use of those shares in the acquisition of plants and other properties deemed necessary for the growth and continued competitive status of the company. This proposal failed because the Attorney General was enjoined by the district court on motion of the plaintiff from voting his stock in favor of that resolution. The district court ruled that the removal of the redemption features from the A stock would alter or change the character of the vested property in a manner prohibited by section 9(a) of the Trading With the Enemy Act.
>
> Beginning in the summer of 1958, after the reversal of the order of dismissal and the remand of the case to the district court, the plaintiff produced for the inspection of the Attorney General some 246,000 papers and documents of the N. Sturzenegger & Cie. Bank. The inspection of these papers still continues. In May 1960, the Attorney General sought, through the State Department, authorization from the Swiss Government for his officials and employees to enter upon Swiss soil to perform official functions there in the form of examining and copying the books of N. Sturzenegger & Cie. to the limited extent that such books were being made available. This application is still pending.

FURTHER PROCEEDINGS

Further proceedings relating to this litigation were set forth in the 1961 Annual Report of the Office of Alien Property, Department of Justice, as follows:

> The case of *Societe Internationale, etc.* (I. G. Chemie) (also known as Interhandel) v. *Kennedy, et. al.*, brought under section 9(a) of the Trading With the Enemy Act to recover approximately 93 percent of the stock of General Aniline & Film Corp., continues to be the most important litigation in the Office.
>
> Since reversal of the dismissal of the case by the Supreme Court in 1958 and its remand to the U.S. district court for further proceedings, the major efforts of the Office have been toward obtaining the production of the records of the plaintiff's private Swiss banking affiliate, H. Sturzenegger & Cie., ordered by the district court in 1949. Nearly 250,000 Sturzenegger documents have been produced by the plaintiff, the inspection of which is currently being carried on, but the books of account of the Swiss bank, numbering over 100, must be inspected by the defendants in Switzerland and this requires the permission of the Swiss Government.
>
> In May 1960 permission was sought through the Department of State for officials of this Office to enter Switzerland for the purpose of examining and copying the books of H. Sturzenegger & Cie.; and on February 10, 1961, the Swiss Federal Council granted the application of the Attorney General but so qualified its authorization that in April 1961 the Department of State was requested to obtain clarification or modification of the conditions imposed by the Swiss. One of the conditions was that the books and records inspected, or copies thereof, or information contained therein, were not to be transmitted to any third persons not parties to the suit and, in particular, not to I. G. Farben in liquidation.
>
> During the pendency of the application for permission to inspect the Sturzenegger books in Switzerland, plaintiff moved before the master for a protective order limiting the Attorney General in the use of all documents, books, and records produced and to be produced by the plaintiff by preventing the Government from showing or turning over such records or their contents to I. G. Farben or its representatives. This motion was granted on February 14, 1961, and an order was entered on March 21, 1961, which prohibits the defendants from exhibiting or delivering to Farben or its representatives any documents produced by the plaintiff under the order of discovery as a quid pro quo for the production of information by Farben, but it does not prevent the defendants from exhibiting or delivering copies of such papers to Farben in a bona fide effort to obtain discovery of relevant information. To the extent that this order permits the use of information obtained through discovery to obtain further discovery from third persons not parties to the suit, the authorization granted by the Swiss Federal Council is in conflict.
>
> The latest proceeding in this litigation is a motion for a protective order filed by the Attorney General on June 9, 1961, to stay the deposition of the executive vice president of General Aniline & Film Corp., started by the plaintiff on May 3. The Government's motion is based on the general rule of priorities in discovery procedures and seeks an order deferring the deposition of the General Aniline & Film official with its concomitant production of documents until defendants have been afforded an opportunity to inspect and copy the Sturzenegger books of account.
>
> The suits of some 1,700 stockholders in I. G. Chemie, who were permitted to intervene in the main action, are still in the pretrial discovery stage.

CONCLUSION

All agencies of the Government concerned with the disposal of alien property strongly favor this legislation, particularly the Department of Justice and the Treasury Department.

Mr. Chairman, I recognize that there is a constitutional question involved in the sale of this corporation. Some people will argue that we cannot sell this property until the litigation to which I have referred has been finally resolved. However, the present Attorney General of the United States and the Attorneys General in the previous administration, in recommending this legislation, are definitely of the opinion that the sale would be constitutional. I would accept the verdict of the Attorneys General in this respect.

I urge the House to pass this bill.

Mr. SPRINGER. Mr. Chairman, I believe the gentleman from Illinois [Mr. MACK] has explained the bill very well in detail. I would like to point out that the reports of the executive department and the agencies on the bill, H.R. 1078, a bill identical to H.R. 3460, are shown as an appendix to this report. The Departments of Justice and the Treasury favor the enactment of this legislation and the Department of State and the Bureau of the Budget have no objection. May I say so far as I know there were no objectors appearing to testify in opposition to the bill.

Mr. Chairman, I yield 5 minutes to the gentlewoman from New Jersey [Mrs. DWYER].

Mrs. DWYER. Mr. Chairman, the bill now pending before the House is an extremely important one, and I urge our colleagues to give it their serious and sympathetic consideration. The practical effect of H.R. 3460 would be to permit the Department of Justice to sell to private interests the approximately 93 percent of the outstanding shares of stock of the General Aniline & Film Corp. which the Department's Alien Property Custodian now holds under the authority of the Trading With the Enemy Act.

General Aniline & Film occupies an important place in the economy of Union County, N.J., and other areas in which its plants are located. As a leading producer of photographic, dyestuff, and chemical products, its position is particularly essential to the national security in times of war or national emergency. Today, in fact, a substantial portion of its production goes to Government agencies. There is every reason, therefore, for Congress to free this company from Government control, permit its stock to be purchased by private interests, and thereby encourage its healthy growth as a vital part of our economy.

It is significant, Mr. Chairman, that General Aniline & Film is the sole remaining company in active operation which is still controlled by the U.S. Government as a result of its seizure during World War II as enemy-controlled property. As the committee report explains, disposal of the company previously has been prevented under existing law by virtue of the long-pending suit against the Government brought by a large number of claimants to the company's assets. While the bill would amend the law in this respect, it would also protect the legitimate interests of the claimants, in the event the courts rule in their favor, by providing for just compensation to be paid from proceeds of the sale of company stock. Under the circumstances, I believe this is a completely fair solution for all concerned, especially since it is not in the best interests of the Government to allow this stalemated situation to continue.

Under Government management, it has been impossible for General Aniline & Film to raise new capital or to undertake an expansion of its operations. The company has been further handicapped in attracting and retaining executive and research personnel and a skilled labor force generally. Major company plans for reorganization and expansion have been blocked by appeals to the very provision of law which this bill seeks to amend. As a result, the company's competitive position has been greatly weakened.

One of the effects of this weakened position, Mr. Chairman, has been a disappointing employment situation at the company's various plants. Lagging employment at the General Aniline & Film plant in Linden, N.J., and elsewhere would be given much needed stimulus by passage of this legislation.

As the sponsor of a bill similar to the committee bill, I am pleased to note that the legislation has the wholehearted support of both labor and management. In addition, the Departments of Justice and the Treasury have reported that they favor enactment of the bill and the Department of State and the Bureau of the Budget have indicated they have no objections to its passage.

I believe the record shows, Mr. Chairman, that this is sound and constructive legislation. I hope the House will approve it without delay.

Mr. MACK. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. O'BRIEN].

Mr. O'BRIEN of New York. Mr. Chairman, I rise in support of H.R. 3460.

The district which I have had the honor to represent for the last 11 years is included in the territory, the home territory in a sense, of this corporation. I might say, Mr. Chairman, that if we had a bill here today proposing that the Government of the United States enter into a $200 million business engaged in the manufacture of dyestuffs, films, and so forth, there would not be a single affirmative vote for it. Conversely today we are asking you by passing this bill to help take the Government out of a large, in fact, enormous, private industry.

The company has been shackled for a number of years by legal maneuvers. The various cases have gone up and down to the Supreme Court like a legal yo-yo. Let me say I am not criticizing the activities of the Government in its management of this corporation, because the book value of General Aniline since the Government took it over has gone from approximately $37 million to $139 million, and it is estimated that a public sale might produce as much as $200 million.

The question might very well arise: Why, then, do we want to get the Government out of business?

In the first place, I do not think the Government should be in any more businesses than it has to be.

In the second place, this development, this growth, during these years, spectacular as it has been, is only, in my opinion, 50 percent of the growth which could have been accomplished if the company had been as free to operate as freely as other private industries.

We talk a great deal about the need in this country for business expansion. In my considered judgment, here is a business which is bursting to expand. This bill, in my opinion, is fair in its terms to those who have claims before the courts. Instead of the physical property, the stock, these people will be permitted under this legislation to continue their suit, but in this instance they will be fighting for a share of the money which goes into escrow, and that could be as much as $200 million. I would think that even the attorneys who have been very busy in this field during the last 14 years would consider $200 million a rather large pot of honey.

I might point out, too, that the bill was reported unanimously by the committee. As far as the employees in my particular area are concerned, their interest is mainly in job security. There is a feeling that while the possibility exists that this plant physically might be turned over to some alien government, that their jobs, their opportunities for advancement, are not secure. The passage of this bill would lift that cloud from their heads, as well as the heads of 7,000 other employees scattered around the country, employees of General Analine.

Mr. ROBISON. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield to the gentleman from New York.

Mr. ROBISON. As one who has cosponsored this legislation with the gentleman from New York for the past 5 years, it is a real pleasure to rise in support thereof on behalf of the 3,600 General Analine employees who live and work in my district.

I want to associate myself with the remarks of the gentleman from New York, and pay special tribute to him because he has worked long and diligently on behalf of our common goal; that is, the return of this great corporation to the free enterprise system.

I would like also to express my appreciation to the chairman of the full committee, Mr. HARRIS; also the gentleman from Illinois, Mr. MACK, chairman of the subcommittee, for his careful and thorough consideration.

Mr. FARBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield to the gentleman from New York.

Mr. FARBSTEIN. I would like to go to something more fundamental and irrespective of what the gentleman anticipates the future of the company may be.

I would like to know whether I understand correctly the situation as it will exist on the passage of this legislation. It is true that any claim anyone may have, irrespective of when it may have risen, those claims will be transferred from the property as it presently exists in physical assets to a fund that will be created as the result of the sale of the present property that is in the hands of the Alien Property Custodian? Is that a correct understanding of the situation?

Mr. O'BRIEN of New York. The gentleman is exactly correct. I might point out this fund, in my opinion, will be five times as great as the book value of the corporation when the U.S. Government took it over.

Mr. FARBSTEIN. I want to ask another question: I am singularly disturbed about the fact that this was enemy property at the time of the beginning of the Second World War. Now, is there any possibility that the I. G. Farben industries, or any of these German, these Nazi companies, will be permitted in any manner, shape, or form to come into possession of any of this property that you seek to dispose of by sale or otherwise?

Mr. O'BRIEN of New York. If this bill becomes law, they will be forever barred from taking over the physical properties involved.

Mr. FARBSTEIN. I thank the gentleman.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. Yes, I yield to the gentleman from California.

Mr. HOLIFIELD. As I understand the first lines on page 2 of the report, they preclude any enemy or an ally of an enemy from participating in the distribution of these funds; is that correct?

Mr. O'BRIEN of New York. It bars any enemy or allied enemy.

Mr. HOLIFIELD. If the gentleman will yield further, it says from instituting suit. But I assume that that would be their method of obtaining it—the waiving of suit, and not putting in a claim would not be a subterfuge by which a former investor in the I. G. Farben industry could come in and substantiate himself as a legal entity in court?

Mr. O'BRIEN of New York. To the same extent that I. G. Farben is barred now, they will be barred from getting any part of that money which is held in escrow.

Mr. HOLIFIELD. If the gentleman will yield further, then aliens other than enemy aliens or allies of enemy aliens who have claims against the German company would be eligible to file a claim, or would this be confined to American citizens who have claims against the former German Government?

Mr. O'BRIEN of New York. No. The principal claimant is a Swiss concern. So the nonenemy aliens would be entitled to bring suit for any part of this money that was placed in trust.

Mr. HOLIFIELD. In your investigation have you gone behind the facade of the Swiss corporation? As we all well know, in Switzerland there are a great many holdings vested in the names of gangsters and other undesirable characters under numbered bank accounts which are confidential as far as the Swiss law is concerned. So you have not gone behind the Swiss facade of the Swiss claimants?

Mr. O'BRIEN of New York. No, we have not. I would hope if behind that facade there were any of the characters which the gentleman mentioned that they would not get a penny of this money.

Mr. HOLIFIELD. I share the gentleman's hope, but I wonder what position we would be in if a Swiss corporation which, in fact, was a corporation in which these Nazis have an interest at the present time, applied as a claimant—if this would not be a subterfuge by which the funds would be distributed to former Nazi claimants too?

Mr. O'BRIEN of New York. If that could be proved in court I assume that existing law would bar any payments to them.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield to the gentleman from Arkansas, the chairman of the full committee.

Mr. HARRIS. I have asked the gentleman to yield in order to try to help clear up the question which has been asked, because I think it should be made very clear for the RECORD.

In the first place, this bill has nothing to do with the claimants insofar as the claims against the Government are concerned. In the second place, the bill provides for the placing of the proceeds of the sale into a special trust fund. This is made necessary because of the litigation to determine whether or not the owners or any part of the owners were enemies of our Government during the war. The Attorney General takes the position—permit me to say to the gentleman from California [Mr. HOLIFIELD]—that the owners of this industry were enemies of the United States at the time the property was seized, and that is the issue in litigation, which the courts will determine.

Mr. HOLIFIELD. Mr. Chairman, if the gentleman will yield further——

Mr. O'BRIEN of New York. I yield to the gentleman from California.

Mr. HOLIFIELD. And if they were proved to be enemies of the Government then what is the situation?

Mr. HARRIS. If they were proved to be enemies of the Government then they will be denied any part of these funds.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I shall be glad to yield to the gentleman from Colorado.

Mr. ROGERS of Colorado. The able chairman of our committee has pointed out that this has nothing to do with the right of an individual enemy or otherwise in making his claim. This only goes to the right of the Attorney General of the Government of the United States to dispose of this property. That is the only issue as I understand it. This bill is not confined alone to the so-called film company, is it?

Mr. O'BRIEN of New York. No.

Mr. ROGERS of Colorado. My question then is: Suppose a man says he was not an enemy and therefore his property should not have been forfeited, that the Government has no right to take it under the Trading With the Enemy Act, but the Attorney General proceeds under this bill to sell the property and the court subsequently finds that the Attorney General was wrong; now, has that citizen of the United States who may have been deprived of his property any right to anything other than the proceeds of the sale?

Mr. O'BRIEN of New York. I would say his only right would lie against the proceeds of the sale.

Mr. ROGERS of Colorado. Does not the gentleman think it is going quite a way to enact a piece of legislation which would permit officials without proper hearing of the individuals in a court to deprive those persons of their property?

Mr. O'BRIEN of New York. I might say to the gentleman that it is my understanding from the testimony of the Attorney General and others, that virtually all of the property in the category the gentleman mentions is covered by General Aniline & Film.

Mr. ROGERS of Colorado. If it is limited to that, that is one problem.

The CHAIRMAN. The time of the gentleman from New York [Mr. O'BRIEN] has again expired.

Mr. SPRINGER. Mr. Chairman, I yield the gentleman 3 minutes.

Mr. ROGERS of Colorado. Mr. Chairman, pursuing the matter further, if the objective of this legislation is to get the U.S. Government out of this business, that is one thing. The other question is the right of the U.S. Government to seize property and then sell it, within the discretion of the Executive, and limit the rights of the individual who owned the property and who in the first instance should not have had the property taken away from him. Because then his only recourse will depend on what they get out of the proceeds of the sale. What I want to make clear, so that there will be no misunderstanding about it, is this: Can the U.S. Government under this bill, if in its opinion the property belongs to an alien whose property is subject to forfeiture, seize the property and sell it; and then if it turns out they are wrong, what chance has a man got to get his property back?

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN of New York. I yield to the chairman of the committee.

Mr. HARRIS. Mr. Chairman, I would be glad to respond to the gentleman and will say to him that the individual who may find himself in the position the gentleman describes is protected, in my judgment. The bill itself provides on page 3:

> If the court finds that the claimant has established an interest, right, or title in any property in respect of which such an election has been served and filed, it shall proceed to determine the amount which will constitute just compensation for such interest, right, or title, and shall order payment to the claimant of the amount so determined.

And so forth. On page 2 of the report it is explained what the right of the claimant would be.

It states that the Alien Property Custodian may sell the property, with the net proceeds of such sale being deposited in a special Treasury account pending entry of final judgment in the suit. Further, claimants would have the right to elect whether to accept the net proceeds of such sale or to waive the claim to the proceeds and seek just compensation instead. So I think the answer to the gentleman's question is that the claimant is well protected.

Mr. O'BRIEN of New York. But he is not limited to the fund, and if the Chief Executive, or whoever proceeds to sell this property, makes a mistake and sells it too low, then the Treasurer of the United States would make it up.

Mr. HARRIS. That is true. He is protected by his own sale.

Mr. ROBISON. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROBISON. Mr. Chairman, I rise in support of H.R. 3460, which is truly a bipartisan measure.

My distinguished friend and colleague, the gentleman from New York [Mr. O'BRIEN], and I, have introduced comparable bills in the 85th, the 86th, and in this, the 87th Congress. My bill in this Congress being known as H.R. 1078 which bill was the subject of the several departmental reports set forth in the committee report accompanying H.R. 3460.

However, the bipartisanship approach to this subject goes back further and extends beyond this. The gentleman from New York [Mr. O'BRIEN] and my congressional predecessor, the Honorable Sterling Cole, introduced comparable bills in both the 83d and the 84th Congresses, and, as the RECORD will also show, this type of legislation has been endorsed or requested by the last three administrations. The first such request was made in a letter, dated January 12, 1949, addressed to the Speaker of the House of Representatives of the 81st Congress and signed by the Assistant to the then-Attorney General of the Truman administration, a Mr. Peyton Ford.

Also, in 1952, the then-Attorney General, the Honorable Howard McGrath, appeared before the subcommittee of the Committee on Appropriations of the House of Representatives, and made a personal appeal in behalf of the Truman administration for the passage of such legislation. Later in the same year, his successor, Attorney General McGranery, likewise gave his endorsement to the proposal.

And so it has gone, with all Attorneys General from Mr. McGrath on down to the present Attorney General endorsing, in some fashion, the legislative proposal set forth in H.R. 3460.

What is that proposal, Mr. Chairman? Well, it is basically a very simple one, although that may seem a strange word to use considering the complexities surrounding the more general subject of vested enemy assets and of war claims, a portion of which were touched upon yesterday. However, this bill does not treat with the—for many of us—difficult philosophical questions involved in a consideration of the full or partial or the no return of such vested assets. It does not propose, indeed, to give anything to anyone, or to take away anything from anyone.

Instead, it has one simple purpose and one purpose alone. That is to permit the President—if he determines such action to be in the interest and welfare of the United States—to authorize the Alien Property Custodian, or his successor, to sell in accordance with applicable law any so-called vested asset which is in his custody pursuant to the workings of the Trading With the Enemy Act, notwithstanding the fact that litigation is pending for the return of such property.

Under the factual situation before us, this bill has an effect only on the majority interest which the Custodian presently holds in the General Aniline & Film Corp.—an interest which, as I understand it, amounts to some 93 percent of the Custodian's actual holding of some 97 percent of the outstanding shares of such company, which is the sole remaining company in active operation under the supervision of the Office of Alien Property. That stock cannot now, under existing law, be sold because of the existence of pending international litigation over the validity of the vesting thereof, which litigation began in 1948—some 14 years ago—and, like the fabled brook of Tennyson bids fair to go on forever. This is litigation which has been in and out of the International Court of Justice—the World Court—and has been before the Supreme Court of the United States on at least four different occasions. And, as Deputy Attorney General Byron R. White said in his letter of August 11, 1961, as set forth in the committee report:

> The termination of [such] litigation is not in sight.

The involved history of that litigation is set forth, rather briefly, in the committee report; there is no need for me to go into it further here except to point out that for so long as that litigation continues—unles this bill is passed—the various components of General Aniline & Film Corp. here in the United States will have to continue under the handicap of governmental ownership and operation.

Although those components have operated in the black under the supervision of the Custodian—which fact is a very real tribute to the loyalty and energies of the nearly 8,000 American citizens who are employed therein—I do not think there can be any question but that governmental control, which has of necessity been of the trusteeship type, has considerably hampered the realization of the full growth potential thereof even in their highly competitive fields.

This is a competition which, in the nature of things, is certainly bound to become ever more keen in the next few years as a resurgent Western Europe and Japan move further into the chemical, camera, and film industries. In view of that, I venture to suggest that it might very well be in keeping with our Government's trustee-like duty, here, to dispose of the General Aniline stock at a favorable time for doing so, which would be an added reason—apart from our own national interest—for enactment of this bill.

Most of us, I assume—at least on this side of the aisle—are also all in favor of getting the Government out of business. Well, here is an opportunity to do so, in legislation which—as Mr. White also says—will make "it possible for the Government to rid itself of its unnatural role as owner of a private competitive business."

And this can be done, under H.R. 3460, without adversely affecting the interests of any party to that seemingly endless lawsuit because our bill provides that the net proceeds of the sale—a public sale, by the way, to the highest bidder who, under the law, must be an American citizen or a business enterprise controlled by American citizens—must be covered into the U.S. Treasury where they would be held as trust funds against the eventual settlement of such litigation either by way of judicial proceedings or by negotiation. In other words, the net cash proceeds of such sale would substitute for the shares of stock now held by the Custodian, and this important and vital industry would finally be returned to the free-enterprise system—something that is dictated not only by the national interest but by the interests of General Aniline's faithful employees, some 3,600 of whom I am privileged to represent.

As I said at the start, Mr. Chairman, this is not a partisan measure. Everyone interested in the future growth and prosperity of this corporation—its management, insofar as they are free to speak, its employees, the AFL–CIO in behalf of some 16 affiliated local unions representing over half of those employees, the minority stockholders, and many organizations including the U.S. Chamber of Commerce—has endorsed this legislation. It is time it was passed because—as the report says on page 4 thereof:

> Unless this legislation is enacted, it is unlikely that at any time in the immediate forseeable future will it be possible to return the operation of General Aniline & Film Corp. to private ownership and operation.

In behalf of General Aniline's 8,000 employees and the communities in which its plants are located, I urge your favorable consideration of H.R. 3460.

Mr. SPRINGER. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. Younger].

Mr. YOUNGER. Mr. Chairman, to me the answer to the gentleman from Colorado is shown in lines 17 and 18 on page 3, which reads:

> If there is a balance in excess of what the property is sold for, then the balance, if any, shall be payable in the same manner as are judgments in cases arising under section 12346 of title 28, United States Code.

So that if the claimant got a judgment in excess of what the Alien Property Custodian sold the property for, he could get the additional claim out of the U.S. Government.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. YOUNGER. I yield.

Mr. ROGERS of Colorado. If the chief objective of this legislation is to get the Government out of the business of running the General Aniline & Film Corp., why not limit it to that purpose and not make it a general piece of legislation?

Mr. YOUNGER. That might be done, but they have other properties also. This bill would cure not only this particular property but properties in future wars if we ever get into them and have the same situation.

Mr. ROGERS of Colorado. That brings us to a question that came from the gentleman's State in World War II, right after Pearl Harbor. The gentleman recalls that Japanese citizens and descendents thereof were immediately moved, some to my State, and their property taken. Is it possible that if you pass this legislation the same situation might arise as in 1942, when they seized all those people and their property? Under this bill the Chief Executive would have the authority to sell the property and, it having been sold, they would then be limited to a suit in damages.

Mr. YOUNGER. They are not limited at all.

Mr. ROGERS of Colorado. They are limited first of all in making an election. What is wrong with the courts' making a determination in the usual manner? The gentleman says there may be others than this case.

Mr. YOUNGER. I do not know of any, but it would cover other cases, I think, without question.

Mr. ROGERS of Colorado. Does not the gentleman think that is a dangerous precedent?

Mr. YOUNGER. No, I do not.

Mr. ROGERS of Colorado. When the only objective in this proposal is to permit the sale of the General Aniline & Film Corp.

Mr. YOUNGER. No. I think we ought to pass general legislation at this time. We ought not to have to come here to pass legislation every time the Property Custodian wants to move.

Mr. ROGERS of Colorado. After all, it may be American citizens whose properties are forfeited and sold, sold to somebody else in accordance with the procedures in this case. I am sure there is going to be some question in view of the magnitude of this corporation. Are we going to be able to sell it and get a fair market price for it under this legislation? Is it then to be left to the executive branch to say when it is right? Is that not the intent of this legislation?

Mr. YOUNGER. That is my intent and that is why I support it. I want to see a law passed here that would give the Alien Property Custodian the right to dispose of this property rather than be forced to keep it on hand or hold it just because somebody has filed a suit, whether the suit can be sustained or not. All this does is to give him the right to sell and it prescribes a method by which the claimant has the right to go into court, and if the claim amounts to more than the amount which was received from the sale of the property, he can get judgment against the Government.

Mr. ROGERS of Colorado. Of course, we recognize the U.S. Government has the right to condemn property under the principle of eminent domain, for governmental purposes. That is one right the Government has. But this is another matter in which it becomes the property, maybe, of the U.S. Government under the Trading With the Enemy Act; and then again it may not. Then, if the courts are not to be permitted to determine who is the proper owner then you are changing our form of government.

Mr. SPRINGER. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. King].

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. KING of New York. I yield to the gentleman.

Mr. HARRIS. I have asked the gentleman to yield to me at this point so that we can clear up this question. Let us make it very clear to the gentleman from Colorado that there is no device being used here to try to bring in something in this legislation which was not intended. In the first place, for all practical purposes, there is nothing else involved here except the General Aniline property. The report on this bill sets out on page 2 that the sole remaining company in active operation under the supervision of the Office of the Alien Property Custodian is the General Aniline property. That is all that is involved.

In answer to the other question the gentleman raised as to why this bill was in general terms, I would say that this same bill has been pending before the Congress for several years. And at the time it was first introduced other properties may have been involved in similar suits. So the legislation was couched in general terms to amend section 9(a) of the act.

This provision of law expressly enjoins the Attorney General, successor to the Alien Property Custodian, from disposing of any property prior to the final judgment in any suits which may be pending. We had to do something to overcome that provision of law and this was the way it was done. So I can assure the gentleman, all rights are protected and there is no attempt to deprive anybody else of any of their rights regarding any property.

Mr. Chairman, I thank my colleague, the gentleman from New York, for yielding.

Mr. KING of New York. Mr. Chairman, I commend my colleague, the gentleman from New York [Mr. O'BRIEN], for bringing this important legislation before the House.

Several hundred residents of my district are employed at the Rensselaer plant of the General Aniline & Film Corp. Enactment of H.R. 3460 into law will give them job assurance—for others it will mean job opportunities.

There are two major arguments in support of this legislation. One has already been discussed by the distinguished gentleman who preceded me and that is the desirability of getting the Government out of a business it should not operate and does not desire to operate.

The second reason for approval of this bill lies in the fact that General Aniline & Film, freed of the shackles of Government control and operation and thus enabled to enter fully into the competitive market of private enterprise, surely will expand greatly.

This will provide more jobs and important business growth at a time when such growth is so essential to our economic well-being. I am happy to support the bill now before the Committee and urge its approval.

Mr. SPRINGER. Mr. Chairman, I have no further requests for time.

Mr. MACK. Mr. Chairman, I have no further requests for time. I suggest that the Clerk read the bill.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 9(a) of the Trading With the Enemy Act, as amended, is amended by striking out the period at the end thereof and inserting in lieu thereof a colon and the following: "*Provided further,* That upon a determination made by the President, in time of war or during any national emergency declared by the President, that the interest and welfare of the United States requires the sale of any property or interest or any part thereof claimed in any suit filed under this subsection and pending on or after the date of enactment of this proviso the Alien Property Custodian may sell such property or interest or part thereof, in conformity with law applicable to sales of property by him, at any time prior to the entry of final judgment in such suit. No such sale shall be made until thirty days have passed after the publication of notice in the Federal Register of the intention to sell. The proceeds of any such sale shall be deposited in a special account established in the Treasury, and shall be held in trust by the Secretary of the Treasury pending the entry of final judgment in such suit. Any recovery of any claimant in any such suit in respect of the property or interest or part thereof so sold shall be limited to the net proceeds of such sale, or, if more than one claimant, then to each claimant's proportionate share of the net proceeds of such sale, unless such claimant, within sixty days after receipt of notice of the amount of the net proceeds of sale, or if more than one claimant, then notice of the amount of claimant's asserted proportionate share of the net proceeds of sale, serves upon the Custodian and files with the court an election to waive all claims to the net proceeds and to claim just compensation instead. If the court finds that the claimant has established an interest, right, or title in any property in respect of which such an election has been served and filed, it shall proceed to determine the amount which will constitute just compensation for such interest, right, or title, and shall order payment to the claimant of the amount so determined. An order for the payment of just compensation hereunder shall be a judgment against the United States and shall be payable first from the net proceeds of the sale in an amount not to exceed the amount the claimant would have received had he elected to accept his proportionate part of the net proceeds of the sale, and the balance, if any, shall be payable in the same manner as are judgments in cases arising under section 1346 of title 28, United States Code. The Alien Property Custodian shall, immediately upon the entry of final judgment, notify the Secretary of the Treasury of the determination by final judgment of the claimant's interest and right to the proportionate part of the net proceeds from the sale, and the final determination by judgment of the amount of just compensation in the event the claimant has elected to recover just compensation for the interest in the property he claimed."

With the following committee amendments:

On page 1, line 9, strike out "requires" and insert in lieu thereof "require".

Page 2, line 3, after "Alien Property Custodian" insert "or any successor officer, or agency".

Page 2, line 9, after "The" insert "net".

Page 3, line 13, strike out "Any recovery" and all that follows down through the period in line 23, and insert in lieu thereof the following: "Any recovery of any claimant in any such suit in respect of the property or interest or part thereof so sold shall be satisfied from the net proceeds of such sale unless such claimant, within sixty days after receipt of notice of the amount of net proceeds of sale serves upon the Alien Property Custodian, or any successor officer or agency, and files with the court an election to waive all claims to the net proceeds, or any part thereof, and to claim just compensation instead."

Page 3, line 20, after "Alien Property Custodian" insert "or any successor officer, or agency".

The committee amendments were agreed to.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, on page 16 of the report I note that the purpose of this bill is to amend section 9(2) of the Trading With the Enemy Act to empower the President, in time of war or national emergency, to determine that the interest and welfare of the United States require the sale of any property or interest claimed in any suit filed under this subsection which is pending on or after the date of enactment. I am curious to know whether this is still considered to be a time of war or national emergency? And would this sale be conducted under the acceptance of the fact that this is a time of war or national emergency?

Mr. MACK. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. MACK. Yes; we are in a time of emergency now.

Mr. GROSS. So this property, if the pending legislation is enacted, would be sold in a time of national emergency; is that it? The national emergency would be considered to exist?

Mr. MACK. The gentleman is correct.

Mr. GROSS. Would that be because of the Korean war or World War II? What constitutes the present national emergency? Let me put it that way.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. HARRIS. Proclamation No. 2194 issued by the President of the United States on December 16, 1950, proclaims the existence of a national emergency. This order has not been rescinded.

Mr. GROSS. Then the authority stems from the Korean war?

Mr. HARRIS. Yes.

I do not think we ever had the termination of the World War II emergency, because, as the gentleman may very well remember, after the Legislative Reorganization Act of 1946 was enacted we had a question each year as to whether or not the Congress was legally in session after the 31st of July. The gentleman remembers very well that history.

Mr. GROSS. So the Korean emergency still exists. I have heard from a number of people that insist the United Nations won the war in Korea. Evidently the war has not been won in Korea.

Does the gentleman agree to that? Evidently the United Nations did not win the war in Korea.

Mr. HARRIS. I may say to the gentleman I have my own views and my own feelings about that. Whatever you might call it, some call it police action.

Mr. GROSS. Yes, police action, quote and unquote.

Mr. HARRIS. I do not think that we could with this legislation, important as it is, try to settle an issue which the country has not been able to settle. The United Nations has not been able to settle it in 12 years.

Mr. GROSS. If it were left to the United Nations, it would never be settled. I think the gentleman will admit that. At any rate, I think this is a reasonable piece of legislation. However, I am interested in the fact that it is predicated upon a war emergency that some people like to tell you was ended long ago.

Mr. BRUCE. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to my friend from Indiana.

Mr. BRUCE. I think the gentleman from Iowa has made an important point in bringing up this declaration of emergency. The chairman states that in his judgment it was Korea, but even elsewhere this country is still operating under that emergency proclamation, and that is why some of us have so many reservations as to policy.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ROONEY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3460) to amend section 9(a) of the Trading With the Enemy Act, as amended, pursuant to House Resolution 745, he reported the bill back to the

House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

AUTHORIZING THE SECURITIES AND EXCHANGE COMMISSION TO DELEGATE CERTAIN FUNCTIONS

Mr. HARRIS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 2135) to authorize the Securities and Exchange Commission to delegate certain functions.

The SPEAKER. The question is on the motion offered by the gentleman from Arkansas.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill S. 2135, with Mr. Rooney in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Arkansas [Mr. Harris] will be recognized for 30 minutes, and the gentleman from Illinois [Mr. Springer] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Arkansas [Mr. Harris].

Mr. HARRIS. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, this bill, which is a Senate bill, S. 2135, would authorize the Securities and Exchange Commission by published order or rule to delegate certain of its functions to a division of the Commission, an individual Commissioner, a hearing examiner, or an employee or employee board, and provides for appeals of actions taken under certain of such delegations. The Commission would retain a discretionary right to review any action taken under delegated authority, and the vote of one member of the Commission would be sufficient to bring any such action before the Commission for review.

Mr. Chairman, this legislation is not new. We have had this before the House heretofore; that is, the general plan. This House approved the reorganization plan of the President last year dealing with this subject matter. As has been said earlier today, the other body failed to concur, but they did precisely in connection with the reorganization of the Securities and Exchange Commission what we did in the House with reference to the reorganization plan of the Federal Communications Commission. We did not like it. So we killed it and we rewrote the reorganization plan ourselves, just as we did with the Interstate Commerce Commission. The Senate did rewrite the reorganization plan respecting the Securities and Exchange Commission plan and reported and passed it. We have it here today. Therefore, insofar as the House is concerned it is not a new problem at all. It is one that is recognized as having merit and as being justified.

Mr. Chairman, permit me to say this: A general explanation of it, incidentally, is going to be put in my remarks in case anyone has any calls or request for anything in connection with it. Permit me to say this, however: In our special subcommittee investigation in 1958, 1959, and 1960, among many problems that we developed, was one of efficient administration in these major regulatory agencies of the Government. Members have heard me talk about delays, redtape, bureaucratic action and many things that make it difficult for our people to get the service to which they are entitled and in some instances I might say that these administrative agencies or regulatory agencies have almost bogged down to a standstill.

That made it necessary that we do something about it, and our committee has done something about it. We have been working on it since. This is the fifth of the six major regulatory agency reorganizations. This means that in this Congress we have dealt with five of the six major regulatory agencies of this Government. The only one left is the Federal Power Commission. The Senate has passed a reorganization plan similar to these for the Federal Power Commission, and in the last few days I have been considering the scheduling of that in our committee, and perhaps before the end of the session we will get the benefit of whatever good may come from that, in order to expedite the work before it.

Furthermore, as a result of the work of our committee the question of ex parte representations has been one of the big problems. We made recommendations which our committee, I believe unanimously, approved in this regard. We proposed legislation on it. We got into a great deal of discussion and controversy over it, because the kind of discussion we had created a great deal of interest and brought to our attention the many complicated problems connected with it.

The other body took a different approach to it and endeavored to bring something out of it, as we did in the House with the legislation that is proposed here. Out of this whole activity came another approach. The President set up an administrative conference of the United States which is headed by Judge Prettyman, who is now retired, a former Chief Judge of the Circuit Court of Appeals of the District of Columbia, and a very able man. I cannot think of a man who would be more able to head such an important conference.

He has the confidence not only of those in Government but of the bar associations and the Judicial Conference as well. That Conference has been moving along to help expedite these problems and resolve this very knotty problem. I am glad to report to the House, I am glad to have this opportunity to report to the House that in a recent meeting of this Conference the provisions of H.R. 14 of the last Congress have virtually been adopted, with one or two minor exceptions. So you can see that our committee has been giving a lot of consideration and thought and study to these major regulatory agencies in order that they may be armed with the machinery more efficiently to perform their own duties.

I think I can say, Mr. Chairman, that these agencies, in view of these matters and others that I have referred to, are now, in my judgment, performing an excellent job, generally speaking. They are endeavoring to carry out their work and to perform their duties in the interests of the American people. I do not mean by that to imply that any former members of these commissions have not done so in a general way. There are certain individuals whose resignations were brought about, but generally speaking there is no implication to be taken adverse to the membership of the commissions. I do say that, generally speaking, today these commissions are endeavoring to perform their jobs in a manner permitted by their abilities and with the equipment and machinery they have.

Mr. Chairman, I do not mean to imply that there are not other things that can be done. I think there is a lot of delay yet and I am hoping, with constant attention, such as we are giving to these regulatory agencies, with the limited staff we have in the old Legislative Oversight Committee, that progress will be had.

The purpose of that is to keep a constant vigil over these administrative agencies in order that we may help them to improve their procedures and that the Congress will do its duty in bringing about better administrative processes and improve the procedures in these fields. So this proposal we have here today is another attempt at this broad objective of ours in ultimately bringing about the strengthening of our processes in the regulatory agencies of this Government in order that the people of this country may benefit thereby.

This is a good bill, it has merit, it is justified, and I heartily commend it to you for your consideration and approval.

EXPLANATION OF BILL

Section 1(a) of the bill would authorize the Commission, "by published order or rule" to delegate "any of its functions to a division of the Commission, an individual Commissioner, a hearing examiner, or an employee or employee board," with certain exceptions. Section 1(b), subject to certain limitations and restrictions, would require the Commission to "retain a discretionary right to review" delegated action within a time and in a manner to be prescribed by rule. Section 1(c) would provide that delegated action becomes final action if the Commission declines review or if no review is sought within the time specified by rule.

Section 2 would authorize the Chairman of the Commission to name the particular persons, including Commissioners, who are to perform functions once the whole Commission has determined that those functions are to be delegated.

The first proviso in section 1(a) would expressly limit the power to delegate by making that power subject to section 7(a) of the Administrative Procedure Act. Briefly, section 7(a) requires that hearings on all rulemaking where notice or hearing is required by the "basic" statute (the one which confers the rulemaking power) and on all adjudications required by the basic statute to be determined on the record after opportunity for an agency hearing, shall be presided over by the agency itself (the Commission), one or more members of the agency or a hearing examiner appointed in compliance with the Administrative Procedures Act.

Thus under this first proviso in section 1(a) of the bill the Commission could not delegate the function of conducting hearings of the type just described to staff personnel but only to Commissioners or to hearing examiners.

Under the second proviso in section 1(a) the function of general rulemaking, as distinguished from rules of particular applicability, may not be delegated to anyone.

The power to delegate all rulemaking, as well as all adjudication, was questioned at the hearings which preceded the Senate defeat of Reorganization Plan No. 1 of 1961. This proviso is to make it clear that general rulemaking is not to be delegated.

Section 1(b) contains six limitations on the Commission's discretion not to review delegated action. The first one was contained in the original Senate version of the bill; the second one was suggested by the Commission when the bill was before the Senate Banking and Currency Committee; and the remaining four were suggested by the New York Stock Exchange.

The first proviso in section 1(b), which was in the original draft of the bill, would make review by the full Commission mandatory if one of the five members requested review either on his own motion or on a petition by a party. Reorganization Plan No. 1 would have required a minimum of two Commissioners to compel a review.

The next proviso in section 1(b) would compel the full Commission to review upon request, whenever acceleration of a registration statement under section 8(a) or effectiveness of a posteffective amendment under section 8(c) of the Securities Act of 1933 was denied at any delegated level.

The remaining provisions of section 1(b) of the bill were suggested to the Senate by the New York Stock Exchange. These provisions cover for the most part areas in which the Commission contemplates delegation, if any, only to a limited extent.

Under section 12(d) of the Securities Exchange Act of 1934 an application for registration of a security to be listed on any registered exchange becomes effective 30 days after the Commission receives certification from the exchange, unless the Commission accelerates the effective date. The proviso in section 1(b) of the bill would compel full Commission review if a party adversely affected by denial of such an acceleration requested it.

The next proviso in section 1(b) would require full Commission review whenever requested by a person adversely affected by any delegated action which suspends, denies, or revokes a broker-dealer registration pursuant to section 15(b) of the Securities Exchange Act.

The next proviso would grant mandatory review by the full Commission to any party adversely affected by any delegated action which suspends, denies, or withdraws the registration of a stock exchange or which suspends or expels a member of such an exchange pursuant to section 19(a) of the Securities Exchange Act.

Finally, any delegated action which suspends trading on an exchange pursuant to section 19(a) of the Securities Exchange Act would have to be reviewed by the full Commission if an adversely affected party so requested.

The Committee on Interstate and Foreign Commerce conducted hearings on May 29 at which the members of the Securities and Exchange Commission appeared in unanimous support of the bill. Statements were received from the Bureau of the Budget, the Department of Justice, and the Civil Service Commission supporting the bill as being in accord with the objectives of Reorganization Plan No. 1 of 1961. A letter was received for the record from the New York Stock Exchange, which last year had appeared in opposition to the reorganization plan, supporting S. 2135, in view of the changes which had been made in it from the reorganization plan. No one appeared or submitted a statement opposing the measure.

The committee urges the passage of the bill.

Mr. SPRINGER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, after sitting for some 8 months as a member of the Oversight Committee a few years ago we came to certain conclusions. After having several of these agencies before us we did come to one definite conclusion, which was that the work simply had to be expedited. There were cases that had been there on the docket for years.

When we had the agencies before us, and the chairmen and commissioners of the various agencies testified, we found that the method of conducting the work under the rules of the commission simply made it impossible to push their work ahead and to expedite matters. As a result of all this, we came in in early 1961 with Reorganization Plan No. 1, and we had several weeks of hearings and coming to the House we thought that we had a reasonably good bill. The bill did pass the House. However, when it went over to the Senate there was strenuous opposition, and the plan was defeated. However, the Senate then did rewrite the bill, taking out most of the features to which there had been strenuous objections by various groups in the country.

Now we come to this particular bill. I think that we can expedite the work of this particular Commission. Section 2 would expressly authorize the Chairman of the Commission to name the particular persons, including Commissioners, who are to perform functions once the whole Commission has determined that those functions are to be delegated.

From this brief summary of the basic structure of the bill as to section 2, it is apparent that it would provide the broadest possible power to delegate, subject only to the limitations and safeguards which we have put in the bill.

The committee believes that the instant bill, S. 2135, is consistent with the objectives we have sought in our hearings in the House. This legislative measure looks toward the expediting of the work of this regulatory agency in the interest of the public. As the result of all this, the committee does urge the passage of the bill.

May I say to my colleague that I know of no opposition to the bill.

Mr. HARRIS. Mr. Chairman, I have no further requests for time, and I suggest the Clerk read.

Mr. SPRINGER. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in addition to its existing authority, the Securities and Exchange Commission, hereinafter referred to as the "Commission", shall have the authority to delegate, by published order or rule, any of its functions to a division of the Commission, and individual Commissioner, a hearing examiner, or an employee or employee board, including functions with respect to hearing, determining, ordering, certifying, reporting, or otherwise acting as to any work, business, or matter: *Provided, however,* That nothing herein contained shall be deemed to supersede the provisions of section 7(a) of the Administrative Procedure Act of 1946 (60 Stat. 241), as amended: *And provided further,* That nothing herein contained shall be deemed to authorize the delegation of the function of rulemaking as defined in the Administrative Procedure Act of 1946, as amended, with reference to general rules as distinguished from rules of particular applicability, or of the making of any rule, regulation, or order pursuant to section 19(b) of the Securities Exchange Act of 1934.

(b) With respect to the delegation of any of its functions, as provided in subsection (a) of this section, the Commission shall retain a discretionary right to review the action of any such division of the Commission, individual Commissioner, hearing examiner, employee, or employee board, upon its own initiative or upon petition of a party to or an intervenor in such action, within such time and in such manner as the Commission shall by rule prescribe: *Provided, however,* That the vote of one member of the Commission shall be sufficient to bring any such action before the Commission for review: *And provided further,* That in the event action at a delegated level (1) denies any request for action pursuant to section 8(a) or section 8(c) of the Securities Act of 1933 or the first sentence of section 12(d) of the Securities Exchange Act of 1934; (2) suspends, denies, or revokes a broker-dealer registration pursuant to section 15(b) of the Securities Exchange Act of 1934; (3) suspends, denies, or withdraws any registration or suspends or expels a member of a national securities exchange pursuant to section 19(a) of the Securities Exchange Act of 1934; or (4) suspends trading on an exchange pursuant to section 19(a) of the Securities Exchange Act of 1934, a person or party adversely affected by such action shall be entitled to review by the Commission.

(c) Should the right to exercise such review be declined, or should no such review be sought within the time stated in the rules promulgated by the Commission, then the action of any such division of the Commission, individual Commissioner, hearing examiner, employee, or employee board, shall, for all purposes, including appeal or review thereof, be deemed the action of the Commission.

SEC. 2. In addition to the functions transferred by the provisions of Reorganization Plan Numbered 10 of 1950 (64 Stat. 1265), there are hereby transferred from the Commission to the Chairman of the Commission the functions of the Commission with respect to the assignment of Commission personnel, including Commissioners, to perform such functions as may have been delegated by the Commission to Commission personnel, including Commissioners, pursuant to section 1.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. ROONEY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (S. 2135) to authorize the Securities and Exchange Commission to delegate certain functions, pursuant to House Resolution 747, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the third reading of the bill.

The bill was ordered to be read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

ADJOURNMENT OVER

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. GROSS. Mr. Speaker, reserving the right to object, a week ago today, I questioned the majority leader as to when we might expect some signs of a sine die adjournment, and he could not help me very much. Now we have the acting minority leader——

Mr. BOGGS. Majority—if you do not mind.

Mr. GROSS. The acting majority leader, I stand corrected—I wonder if he could give us any help. I note he has been down to the White House with our distinguished Speaker and others discussing the "must" bills that the President insists this Congress must enact. I wonder if the gentleman could give us any information as to when we might get to go home and smell the roses in the rose gardens in Iowa.

Mr. BOGGS. The gentleman is a conscientious Member and is always talking about how well we are taken care of here, and I am certain the gentleman does not mind staying here on the job until we complete the business that we must complete.

Mr. GROSS. Well, that is hardly encouraging. Could the gentleman give us any indication as to when we might expect sine die adjournment?

Mr. BOGGS. No; I would rather not hazard a guess. We could be here for quite a while—and I hope the gentleman is enjoying it.

Mr. GROSS. I hope the gentleman is wrong about being here quite a while.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

DISPENSING WITH BUSINESS IN ORDER UNDER CALENDAR WEDNESDAY RULE ON WEDNESDAY NEXT

Mr. BOGGS. Mr. Speaker, I ask unanimous consent to dispense with the business in order under the Calendar Wednesday rule on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

SPECIAL COMMITTEE TO INVESTIGATE CAMPAIGN EXPENDITURES OF CANDIDATES FOR HOUSE OF REPRESENTATIVES

Mr. BOLLING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution, House Resolution 753.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, That a special committee of five Members be appointed by the Speaker of the House of Representatives to investigate and report to the House not later than January 3, 1963, with respect to the following matters:

(1) The extent and nature of expenditures made by all candidates for the House of Representatives in connection with their campaign for nomination and election to such office.

(2) The amount subscribed, contributed, or expended, and the value of services rendered, and facilities made available (including personal services, use of advertising space, radio and television time, office space, moving-picture films, and automobile and any other transportation facilities) by any individual, individuals, or group of individuals, committee, partnership, corporation, or labor union, to or on behalf of each such candidate in connection with any such campaign or for the purpose of influencing the votes cast or to be cast at any convention or election held in 1962 to which a candidate for the House of Representatives is to be nominated or elected.

(3) The use of any other means or influence (including the promise or use of patronage) for the purpose of aiding or influencing the nomination or election of any such candidates.

(4) The amounts, if any, raised, contributed, and expended by any individual, individuals, or group of individuals, committee, partnership, corporation, or labor union, including any political committee thereof, in connection with any such election, and the amounts received by any political committee from any corporation, labor union, individual, individuals, or group of individuals, committee, or partnership.

(5) The violations, if any, of the following statutes of the United States:

(a) The Federal Corrupt Practices Act.

(b) The Act of August 2, 1939, as amended, relating to pernicious political activities, commonly referred to as the Hatch Act.

(c) The provisions of section 304, Public Law 101, Eightieth Congress, chapter 120, first session, referred to as the Labor Management Relations Act, 1947.

(d) Any statute or legislative Act of the United States or of the State within which a candidate is seeking nomination or reelection to the House of Representatives, the violation of which Federal or State statute, or statutes, would affect the qualification of a Member of the House of Representatives within the meaning of article I, section 5, of the Constitution of the United States.

(6) Such other matters relating to the election of Members of the House of Representatives in 1962, and the campaigns of candidates in connection therewith, as the committee deems to be of public interest, and which in its opinion will aid the House of Representatives in enacting remedial legislation, or in deciding contests that may be instituted involving the right to a seat in the House of Representatives.

(7) The committee is authorized to act upon its own motion and upon such information as in its judgment may be reasonable or reliable. Upon complaint being made to the committee under oath, by any person, candidate, or political committee, setting forth allegations as to facts which, under this resolution, it would be the duty of said committee to investigate, the committee shall investigate such charges as fully as though it were acting upon its own motion, unless, after a hearing upon such complaint, the committee shall find that the allegations in such complaint are immaterial or untrue. All hearings before the committee, and before any duly authorized subcommittee thereof, shall be public, and all orders and decisions of the committee, and of any such subcommittee, shall be public.

For the purpose of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized to hold such public hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the Eighty-seventh Congress, to employ such attorneys, experts, clerical, and other assistants, to require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to administer such oaths, and to take such testimony as it deems advisable. Subpenas may be issued under the signature of the chairman of the committee or any subcommittee, or by any member designated by such chairman and may be served by any person designated by any such chairman or member.

(8) The committee is authorized and directed to report promptly any and all violations of any Federal or State statutes in connection with the matters and things mentioned herein to the Attorney General of the United States in order that he may take such official action as may be proper.

(9) Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default, or who having appeared, refuses to answer any question pertinent to the investigation heretofore authorized, shall be held to the penalties prescribed by law.

That said committee is authorized and directed to file interim reports whenever in the judgment of the majority of the committee, or of a subcommittee conducting portions of said investigation, the public interest will be best served by the filing of said interim reports, and in no event shall the final report of said committee be filed later than January 3, 1963, as hereinabove provided.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

Mr. BOLLING. Mr. Speaker, this is the usual resolution which passes the House about this time every year. It was reported out of the Rules Committee this morning unanimously. It provides for a select committee of five to oversee the elections this fall. I know of no objection to it from either side.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

THE CASE OF HARRY SYLVESTER JONES

Mr. RIVERS of South Carolina. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS of South Carolina. Mr. Speaker, I was shocked and outraged—but scarcely surprised—to read in this morning's Washington Post an editorial which asserts that Harry Sylvester Jones is "an unfortunate young man" who has become a "serious community menace" not because of his own depraved misconduct, but because he has been neglected by the community; because he has not been given special privileges.

Harry Sylvester Jones, Mr. Speaker, is the young Negro ex-convict who was arrested yesterday in connection with the brutal rapes of three white women and the vicious knife attack on Miss Mary Lou Kosterlitsky, a longtime able and respected employee of this body. He promptly confessed all these unspeakable crimes, explaining them away with the statement that he had committed them because he was "timid" and did not know how to ask a girl for a date. God help Washington if Jones had not been timid.

This is the man whom the Washington Post calls an unfortunate young man. I would wonder, Mr. Speaker, if the Washington Post regards the women who were violated by Harry Jones as fortunate women. From all I can read in the editorial, it probably does regard them as fortunate, for the editorial which expresses such deep concern about Harry Jones expresses no concern whatsoever for the women he has so viciously brutalized.

I predicted on this floor yesterday, Mr. Speaker, that the great diligence of the Metropolitan Police Department in running Harry Jones to earth would be thwarted and frustrated by some court in the District of Columbia which would somehow find a way to turn Harry Jones loose to continue his assaults on innocent women. I believe the editorial, which I include as a part of my remarks, is the first step in the campaign to free Harry Jones:

> COMMUNITY FAILURE
>
> The arrest of a 24-year-old former convict on charges of having raped three Washington women in the last month and with having stabbed a Congressman's aid as she was praying in a church brings to light another tragic failure on the part of this community. This man was sent to the National Training School for Boys in connection with housebreaking at the age of 15. Since then he has been repeatedly arrested and has served time in several Federal prisons. He is well known to the juvenile court, the board of public welfare, the police, the District of Columbia General Hospital, and the Youth Correction Center.
>
> Many of those who have studied the case of this unfortunate young man have been well aware of his need for psychiatric care. He is reported to have told the police and others who have had supervision over him that he has an irresistible sex urge. Yet he seems to have been shifted from one institution to another, from one set of officials to another, until, on his release last February without any supervision, because his term had expired, he became a serious menace to the community. Our judicial, penal, and psychiatric agencies failed to grapple effectively with a problem of the utmost interest to the entire city.
>
> The arrest was accomplished by the meticulous collection of fingerprints and careful detective work, apparently without any of the shortcuts in which the police sometimes indulge. For this the police are entitled to commendation and thanks from the community. But the total record of the case, as reported in this newspaper today, discloses gross inadequacies in dealing with a man who was known to be a grave community problem. How many times will crimes of this sort have to be repeated before this city will begin to provide the kind of constructive program that is needed?

THE TEAMSTERS UNION AND FREEDOM OF THE PRESS

Mr. BECKER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include a letter.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BECKER. Mr. Speaker, on Monday of this week, I called the Attorney General's attention to the very fine and wonderful publicity he has had in certain areas of personal triumphs and expressed the hope that he might get around to doing something about the affairs of our people, Jimmy Hoffa, racketeers, and other criminals and lawbreakers.

Today I sent a letter to the Attorney General of the United States calling his attention—in the event he is not aware of it—to the restriction of freedom of the press in Cleveland, Ohio.

I read an article from the Wall Street Journal of August 8, 1962, as follows:

> Deliveries of the Cleveland Press were delayed by the Teamsters Union because of a comment in a full-page advertisement by the International Association of Machinists that was critical of the Teamsters. The Press is an afternoon Scripps-Howard newspaper. The Teamsters resumed deliveries of later editions after the Press removed two lines in the IAM advertisement. The ad was part of a campaign for votes in a representation election between the IAM and the Teamsters at Gabriel Co.

This evidence of the Teamsters Union in forcing the censoring of an advertisement in the Cleveland Press is certainly in violation of the Constitution of the United States.

I am wondering why our Attorney General, Robert Kennedy, has not taken proper action against Hoffa's Teamsters Union, for I remember at one time Hoffa was supposed to be a target of our present Attorney General.

AUGUST 9, 1962.

Hon. ROBERT F. KENNEDY,
Attorney General of the United States, Justice Department, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: I am enclosing herewith an article appearing in the Wall Street Journal of August 8, 1962, that is self-explanatory. The article is as follows:

"Deliveries of the Cleveland Press were delayed by the Teamsters Union because of a comment in a full-page advertisement by the International Association of Machinists that was critical of the Teamsters. The Press is an afternoon Scripps-Howard newspaper. The Teamsters resumed deliveries of later editions after the Press removed two lines in the IAM advertisement. The ad was part of a campaign for votes in a representation election between the IAM and the Teamsters at Gabriel Co."

Isn't this in violation of the Constitution dealing with freedom of the press? Since when has any union or union leader the right to coerce any newspaper from printing advertisements or news items it sees fit to do?

Mr. Attorney General, are you going to prosecute the Teamsters Union for this violation? Certainly you must agree that Jimmy Hoffa and his teamsters have no right to suppress news or newspapers and prevent the truth from reaching the people.

What are you going to do? I haven't seen any statement from you about this in light of all the publicity you have been receiving in the past of which I made mention on the floor of the House on Monday, August 6, 1962.

Sincerely,

FRANK J. BECKER,
Member of Congress.

THE FEED GRAIN PROGRAM AND AGRICULTURAL LOANS

Mr. BECKWORTH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BECKWORTH. Mr. Speaker, I desire to call your attention to some facts and figures that were submitted for the CONGRESSIONAL RECORD by Senator WILLIAMS of Delaware, and are to be found on pages 15902, 15903, 15904, 15905, 15906, and 15907. These figures show that when the feed grain program was written it helped the small farmer in this way. Some of the amounts in dollars mentioned are roughly these: $94,000, $53,000, $64,000, $65,000—also some other very large amounts.

I hope the Members of the House will help me ascertain this: In addition to these amounts mentioned, assist me to find out how many of these companies or individuals received Commodity Credit Corporation loans on, not one crop, not on two crops, not on three crops, but on four crops.

For example, if the information furnished one is correct, we have one county in Texas where more than 2,200 farmers received commodity loans on 4 crops.

Mr. Speaker, I say that it is time that this Congress and the people of this country become interested in knowing just how huge are the Commodity Credit Corporation loans that go to very, very few people or companies. Help us to get the information.

I include some of the tables I have referred to and some other comments:

Value of payment in kind feed grain certificates issued to producers under 1961 feed grain program

California Packing Corp.:	
Woodland, Calif	$7,298.28
Crystal City, Tex	7,881.95
Total	15,180.23
Reynolds Metals Co., Henderson, Ky	12,984.32
American Crystal Sugar Co., Rocky Ford, Colo	10,791.54
Ford Motor Co., Belleville, Mich	5,394.88

Two large banks likewise qualified as "farmers" eligible for payments under the 1961 feed grains program. These were:

Milliken Trust Co., Decatur, Ill	$6,434.62
Northern Trust Co., Chicago Ill	41,253.68

Two colleges also established eligibility as "farmers," and thereby were eligible for payments under the Kennedy-Freeman program.

University of Illinois, Urbana, Ill	$6,598.43
St. Benedict's College, Atchison, Kans	11,575.69

Two penitentiaries qualified as "farmers" under the 1961 Kennedy-Freeman farm program, and were thereby eligible for payments.

Glades State Prison Farm, Belle Glade, Fla	$6,818.40
Louisiana State Penitentiary, Angola, La	45,414.00

Two airports are listed as eligible "farmers" under this program, and received payments as follows:

Waterloo Municipal Airport, Waterloo, Iowa	$5,846.75
Kearney Municipal Airport, Kearney, Nebr	6,707.70

Even the city of St. Louis, Mo., was classified as a "farmer" under the 1961 Kennedy-Freeman feed grains program, and collected $12,203.91; and a motel—Sand & Sage Motel, Inc.—in Dimmitt, Tex., was listed as a "farmer," and collected $9,409.04.

The Delta & Pine Land Co., of Scott, Miss., qualified as a "farmer," and collected $11,409.68. This operation is not even owned by Americans; it is owned by the Fine Spinners & Doubles, Ltd., of Manchester, England. Just how a British corporation in Manchester, England, owning land in America, could qualify as an American farmer eligible for subsidy payments, is something only the imagination of a New Frontiersman could comprehend.

The wonder boy from Texas was on this gravy train: Billie Sol Estes qualified as a farmer, and collected $22,875.24 from the Department of Agriculture, under the 1961 Kennedy-Freeman feed grains program. This payment to Mr. Estes appears in the report in the name of Agriculture Inc., Post Office Box 155, Girvin, Tex., but the record shows that this was one of Mr. Estes' operations.

ENTRY INTO UNITED STATES OF ALIEN SKILLED SPECIALISTS

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the gentleman from Rhode Island [Mr. ST. GERMAIN] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. ST. GERMAIN. Mr. Speaker, this bill will facilitate the entry into the United States certain relatives of our citizens and permit the immediate entry of alien skilled specialists who are needed by businesses and educational institutions throughout the Nation. The bill would permit the entry of sons, daughters, brothers, and sisters of U.S. citizens who have been on the waiting lists since 1954. This will help to protect the family ties of thousands of our citizens who have immigrated here. It is a humane liberalization of the existing statute that will help many Rhode Island families. There are several cases in my State that have been brought to my attention in the last several months which can be concluded successfully by approval of this bill.

The bill also provides for the entry of several hundred skilled specialists needed by businesses or educational and medical institutions throughout the Nation. This is not, however, a relaxation of our methods of immigration procedure. Before any of the specialist requests are approved for entry the Office of the Attorney General will make a full investigation and the American petitioner for the specialists must make full documentation of the need for the services of the person.

This, Mr. Speaker, is a bill to aid Rhode Islanders while providing a measure of flexibility that will prove functional for other areas of the country. Quick action by the Congress will be most beneficial to thousands of our immigrant citizens. Those who will be aided by the legislation join with me in urging action because of the time element. This bill should be given attention before the adjournment of this Congress.

STATE SENATOR RALPH C. MAHAR, OF ORANGE, MASS.

Mr. KEITH. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. CONTE] may extend his remarks at this point in the RECORD and include a newspaper article.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Speaker, on Saturday, August 4, the great Commonwealth of Massachusetts, lost one of its most distinguished public servants, State Senator Ralph C. Mahar, of Orange, Mass.

On very few occasions in a lifetime does a man like Ralph Mahar appear on the political scene. At the age of 25 he was elected to serve in the Massachusetts House of Representatives, and served in that august body until 1944, when he was elected to the State senate. It was during my service in the State senate that I met Ralph Mahar, and to him I am indebted for the excellent advice and guidance he gave to me in those early days of my political career. As he progressed in his climb to leadership my admiration and respect for him grew ever greater. He served as chairman of several major committees in the Massachusetts Legislature, and took a sincere interest in the educational system of his beloved Commonwealth. For his contributions in this field he became known as the father of the regional school program in Massachusetts.

His untimely death at the early age of 50 is a great shock to the thousands of people who knew him. Massachusetts has lost a leader without peer; and I have lost a dear personal friend.

Mr. Speaker, as evidence of the high esteem in which Ralph Mahar was held by fellow legislators, friends, and the man in the street, I include at this point in the RECORD the tributes paid to Ralph Mahar as appeared in the Greenfield, Mass., Recorder-Gazette on August 6, and a copy of an editorial from the Northampton, Mass., Daily Hampshire Gazette, on the same date:

[From the Daily Hampshire Gazette, Aug. 6, 1962]

SENATOR RALPH C. MAHAR

The sudden and unexpected death on Saturday of State Senator Ralph C. Mahar at his home in Orange has left Republican leaders in a state of shock and many other citizens mourning the loss of this man, a legislative leader for many years.

Although he was a quiet easygoing campaigner, Senator Mahar was the type of politician who kept in close touch with the people of his district and endeavored to reflect their composite views on matters that came before him while he was a member of both branches of the Great and General Court of the Commonwealth.

An indication of his political strength and the esteem in which he was held was seen in the fact that he was not being opposed by any member of his own party in his bid for reelection to the senate, and this despite the fact he was running in the Franklin-Hampshire district which had been revised to include Northampton 2 years ago.

He was only 25 years of age when he was first elected to serve his home district in the house of representatives and he served in that legislative branch until 1944 when he was promoted to a senate seat, a post he held until his death.

A leader in the fight for educational legislation, Senator Mahar was known as the father of regional schools in this State, and he was a spearhead in many battles to obtain much needed funds for the growth of the University of Massachusetts. He fathered the bill in 1947 that changed the State college to a university, considered this State institution his "pet project" and he fostered many other measures including the law to establish the Soldiers' Home in Holyoke, and a complete revision of the veterans' laws.

Senator Mahar was a lawyer by profession and it had been reported that he desired to top off his public career with an appointment to the Franklin County probate court judgeship. It was understood in the inner circles of politics that he was going to get renominated, and then withdraw to accept just such an appointment from Gov. John A. Volpe. During the past week a check on the possibility that this appointment would be made brought assurances from members of the Democratic Governor's Council that if the appointment was made it would be confirmed by the council.

The State senator from Orange carried a great deal of weight with members of both political faiths. He will be missed by members of his own family, his legislative friends and the people of his district.

[From the Greenfield Recorder-Gazette, Aug. 6, 1962]

TRIBUTES TO SENATOR MAHAR

ORANGE.—Numerous tributes poured in today from men in all stations of life on the death Saturday of State Senator Ralph C. Mahar.

They came from President John W. Lederle of the University of Massachusetts, from fellow legislators, Republican leaders and from the man in the street.

Dr. Lederle: "The news of Senator Mahar's death comes to me and all members of the university community as a profound shock. His quarter-century in public life has been marked by the highest integrity and competence, by a spirit and dedication that reflected citizenship at its best.

"From the very beginning of his public service, Senator Mahar recognized that education on all levels must have the constant attention of an enlightened government. During his distinguished career, Senator Mahar ably translated this conviction into major accomplishments that have benefited every city and town, every public school and college in this Commonwealth.

"We at the University of Massachusetts are particularly mindful of Senator Mahar's work in this area. It was he who submitted the bill that brought this institution to university level. It was he who with quiet persistence furthered the freedom bill legislation of 1956, by which the university was given the basic means to recruit an outstanding faculty. It was he who stood forthrightly for the granting of greater fiscal authority to the university trustees for the building of a greater University of Massachusetts.

"Over the many years of his service in the legislature, his chairmanship of a number of important legislative committees, notably the committee on education, the senate ways and means committee, and the committee on taxation, has served to indicate how enlightened public service can result in general public improvement.

"The Commonwealth has lost a dedicated servant, a citizen of highest character and strongest competence. I personally have lost a great and good friend. The university community joins me in extending to Mrs. Mahar and her family our deepest sympathy and most sincere regret."

John S. Raymond, chairman of Orange selectmen:

"Selectmen of Orange have lost an intimate, personal friend; the town, a faithful servant; the county, a hard-working individual; and the district, a conscientious legislator."

Carroll E. Adams, president of the Franklin County Republican Club:

"Senator Mahar was an enthusiastic supporter of the Franklin County Republican Club. The county will miss him more than is apparent at the present moment."

Emma L. Blizzard, executive secretary, Mohawk Trail Association:

"Senator Mahar was a stanch leader and supporter of the association. He was a leader in the fight for the alteration of the blue laws for the benefit of everybody. Also he was a leader in the effort to establish the Mohawk Trail vacation area as the 10th vacation area in the State of Massachusetts. Senator Mahar was a friend of everybody and will be greatly missed."

Representative Walter T. Kostanski, Jr.:

"The untimely death of Senator Mahar, my close and personal friend, was shocking, not only to me, but to the entire Commonwealth.

"Highly respected by members of both political parties, his legislative record on Beacon Hill was one of accomplishment, dedication, and perseverance. His contributions to legislation regarding education, taxation, and public health are only a few examples of his achievements during his 25 years in the general court.

"We, the Massachusetts Legislature, have lost a devoted leader and conscientious legislator."

Representative Allan McGuane:

"I join in the general feeling of loss of a very able and conscientious legislator. It was my pleasure to serve with Senator Mahar on the committee on education and to work with him for the location of the Community College in Greenfield. The area will feel the loss of his strong voice in the legislature and his many activities on behalf of the residents of Franklin County."

Raymond M. Trudel, president of the newly organized League of Cities and Towns:

"We have lost a very valuable public servant. He was a man with a rare combination of judgment and an acute awareness of the needs and feelings of his constituents as well as the feeling of the responsibilities of government to the people. He will be an extremely hard man to replace."

Attorney William T. Woodrow, chairman, Orange Republican Town Committee:

"Having been closely associated with Senator Mahar for over 25 years, it is extremely difficult to realize that such a dedicated personality has passed from our midst. The loss to the Commonwealth and the Republican Party is overshadowed only by the deep sense of personal loss to his family and others who so warmly cherished him for his profound convictions, wit, and wisdom."

Jacques Andre Istel, Orange:

"Senator Mahar is dead. The suddenness of this event increases our shock, but no forewarning could have diminished the void left in our midst by this great man. We depended upon his intelligence and experience for advice and upon his courage and integrity for statesmanship. Our loss is shared by the area and the Commonwealth. Our thoughts and friendship go to his wife and daughter at this unhappy time."

Robert A. Spatola, executive secretary, Massachusetts Sport Parachuting Commission:

"It was my pleasure and good fortune to work closely with Senator Mahar in the development of plans for the Sixth World Sport Parachuting Championships. From my brief experience I considered him to be perhaps the most outstanding citizen of Massachusetts. Certainly Franklin County and the sport parachuting movement in the United States owes a great deal to this man.

"He will not be able to see the results of his 2 years of work come to pass, only a short week away, when 25 nations will convene in Orange as a direct result of his efforts. Senator Mahar could well serve as a model and pattern for legislators not only in Massachusetts but throughout all free countries."

Attorney Delbert A. Witty, former county commissioner and Orange town counsel:

"For over 30 years Senator Mahar has been a close personal friend. For most of this period he has represented the people of western Massachusetts at the general court with honor and distinction. His intelligent devotion to his duties as a legislator and his tireless efforts in the service of his constituents has noticeably advanced the cause of good government in Massachusetts.

"The impact of his untimely passing will be realized for a long time, but his record of service will stand as a permanent memorial to a dedicated public servant."

Thomas Geary, sheriff of Franklin County:

"The Commonwealth of Massachusetts has suffered a stunning loss in the death of Senator Ralph C. Mahar. As an exceptionally able legislator he always had the best interest of the State at heart. He will be sorely missed by his legion of friends and my heartfelt sympathy goes out to them and particularly to his immediate family."

Robert W. Henderson, chairman of New Salem selectmen:

"The selectmen of New Salem, on behalf of the people and officials of the town, express their sincere sorrow and deep sense of loss over the death of Senator Ralph C. Mahar. He has been a constant source of information and assistance to this town for the many years he has represented us in the legislature. We will miss his complete knowledge of the working of government, his willingness to impart this knowledge and his assistance wherever and whenever it was needed. Above all we will miss his sincere friendship to the town and people of New Salem."

Ward M. Hunting, chairman, New Salem school committee, and vice president, New Salem Academy trustees:

"I was stunned to hear of Senator Mahar's death. His many contributions to education at all levels in Massachusetts stand as a monument to him. He will be sorely missed and his passing is a great personal loss to me."

Mrs. Carolyn H. Chouinard of New Salem, secretary of Swift River Valley Historical Society, Inc.:

"Senator Mahar, despite his many pressing responsibilities, always had time to advise and assist the Swift River Valley Historical Society. His friendship and interest will be sorely missed."

AMERICAN COMMUNISTS

Mr. KEITH. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. Hiestand] may extend his remarks at this point in the Record.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HIESTAND. Mr. Speaker, it is inconceivable to me that no tangible results can be shown, 10 years after Congress declared members of the Communist Party must register as agents of a foreign government. Surely we are not completely surrounded by incompetence and indifference, as many citizens are compelled by the facts to believe.

I appreciate the difficulties which have faced the Attorneys General over the past 10 years. We have seen the Communists hide behind our own Constitution for their protection. We have seen our constitutional guarantees turned against the welfare of the American people. Judicial review is a valued precept of the Republic. It has contributed to the protection of individual rights. Many of us, however become impatient with its plodding pace.

Mr. Speaker, 10 years is long enough. We cannot afford forever to allow the international agents of the Communist conspiracy to operate within our Nation unidentified and unrestricted. We felt that the Supreme Court action declaring the Internal Security Act constitutional and binding would free the hands of the Attorney General.

To my knowledge, not a single Communist has registered. The people wonder about the future of the Republic when laws for its own protection can be so openly ignored. I submit that we should be taking aggressive action against Communists and communism in this country. We have a law and the people have the right to have that law enforced. If this Attorney General cannot cope with the Communists perhaps the people should demand a new Attorney General who can.

THE REDS—WHAT NOW?

Mr. KEITH. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. Derwinski] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DERWINSKI. Mr. Speaker, even though the appropriation bill as passed by the House and signed by the President permits aid to Communist countries, the facts continue to roll in, demonstrating the complete stupidity of this phase of the foreign-aid program.

I have repeatedly stated that aid to Communist governments perpetuates their false ideology and does not serve the best interests of the people of Poland, Yugoslavia, or any other Red nation. The only practical aid that might be provided the people of Poland and Yugoslavia is help administered by our Government or private groups directly to the public so that they understand the aid comes from us and not from their despotic governments.

The Brooklyn Tablet, an outstanding Catholic publication, in its issue of Saturday, August 4, included editorial comment by Louis F. Budenz entitled "The Reds—What Now?" which presents a clear-cut case of the fallacies of providing aid to Communist governments. The article follows:

The Reds—What Now?—Red Poland Takes Stand Against United States

(By Louis F. Budenz)

A very simple question can be put today. It arises from the summer's debate over whether the United States should give aid to Communist-controlled countries. Red Poland has immediately brought the matter to the fore. If you, Mr. Average American, were to furnish funds to a Mr. X, to repair his fortunes, what kind of conduct would you expect of him? Would you take it lightly if he secretly told a gang of rogues that he would use the money to work with them to damage you?

UNITED STAND

That is precisely what Red Poland is planning to do with American funds to the detriment of the United States. We have the word of the two most prominent Polish Communist leaders to this effect, as they have recorded their views in leading Communist directive organs.

Adam Rapacki is an important man in Communist-dominated Poland. He is known on the international stage as Minister of Foreign Affairs of the Polish People's Republic. He is also a leading member of the Central Committee of the Polish Communist Party.

At the very hour when the U.S. Congress was opening the doors of the U.S. Treasury for aid to the Soviet satellites, Rapacki was telling the comrades of Polish Red plans. He did this in a striking article in the June World Marxist Review, which was entitled "Socialist Diplomacy of Peace in the World Arena." In that article Comrade Rapacki associated Poland on all issues with Soviet Russia. He lined up that nation completely against the United States.

Rapacki's first words were: "The Socialist countries, by virtue of the nature of socialism and the laws of its development, pursue a policy of peace." We are aware by now that "the Socialist countries" are those countries under Communist control and by this declaration Rapacki places them all together in one united stand.

Whence does the danger of war come? Rapacki has the answer: "It is in the nature of imperialism to engender policies fraught with danger of war. Imperialism is the carrier of war."

Translated from Communist jargon, "imperialism" is the United States above all. And so it is that Rapacki insists that the only road to peace is by compelling the United States and other imperialist countries to yield, step by step, to the demands of Soviet Russia.

The central theme of Rapacki's secret intelligence to the comrades of the world is contained in one of those cleverly written statements which so often mark Communist writing. He says that Red Poland and all other Socialist states carry out international policies on the basis of Leninist principles of internationalism. We know from previous discussions that these words are nothing other than declarations of fealty to Soviet Russia.

The Polish Foreign Minister goes forward further to nail this down when he adds in the same sentence that Red Poland follows the decisions of the last two congresses of the Communist Party of the Soviet Union. And beyond that, in carrying out this unified action with Moscow, his country abides by the statement of the Moscow meeting of the 81 Communist Parties.

KEY PHRASES

It is a sign of the contempt which Rapacki has for American ignorance of Communist terminology that he resorts to this phrase. What he is telling the comrades is that Poland pledges itself to work against the United States as the chief bulwark of world reaction and as an enemy of the peoples of the whole world.

Those are the key phrases in the statement of the 81 Communist Parties. It is not then surprising that he follows up such a declaration with praise of Dictator Khrushchev as having brought forward the only plan for "general disarmament."

Rapacki's article is thus a 100-percent promise that Red Poland will continue to vote against the United States in the United Nations and will work elsewhere for our downfall. And that promise goes down to the very last words he writes when he promises our victory, which he has made clear must be a complete Communist victory.

What Rapacki has said is followed up in the Worker of July 15 and July 22 by Wladyslaw Gomulka, Premier of Red Poland. His first phrase is: "If it depended on the Soviet Union only, the prospect of peace would be very bright indeed." It is the United States which is the villian and which must be squelched.

From the words of these gentlemen, a prediction can be made. If the United States gives aid to Red Poland, the money will be used for the spread of communism.

MR. J. EDGAR HOOVER, DIRECTOR, FEDERAL BUREAU OF INVESTIGATION

The SPEAKER. Under previous order of the House, the gentleman from California [Mr. LIPSCOMB] is recognized for 30 minutes.

Mr. LIPSCOMB. Mr. Speaker, I would like to call to the attention of my colleagues the recent derogatory comments against a great American public servant, Mr. J. Edgar Hoover, Director, Federal Bureau of Investigation, made by Wilbur H. Ferry, vice president of the organization known as the Fund for the Republic.

According to the August 7, 1962, issue of the New York Times, Mr. Ferry, speaking before the Western States' Democratic Conference, accused Mr. Hoover of "sententious poppycock" in building a false legend of the strength of communism. Ferry then went on, according to this news story, to state that Mr. Hoover's remarks about the strength of communism are "a mischief-making tapestry of legend and illusion if there ever was one." He referred to the FBI Director—and listen to these highbrow words—as "the indubitable mandarin of anticommunism in the United States" and "our official spy-swatter."

I think my colleagues will agree that the Nation has been most fortunate for all these years to have Mr. J. Edgar Hoover and his organization as our "spyswatter." Mr. Hoover has performed—and is still performing—a magnificent service. Every home and individual in this Nation are more secure today because Mr. Hoover heads the FBI. His contribution has been nationwide; his dedication to duty has been superlative; his loyalty to democratic ideals has been above approach. He has been honored by our Presidents, by the Congress, by countless private organizations and individuals as a public servant who is a determined foe of the criminal and the subversive, who exemplifies the American tradition and works untiringly to make this a better country.

Mr. Ferry's comments reflect him as a highly unrealistic observer of today's world. To criticize Mr. Hoover as falsely representing the danger of communism, reflects a blind man trying to guide traffic at a busy intersection. He just doesn't know what it is all about. Communism today represents the greatest single danger to the existence of our democratic institutions. Communist-bloc powers—Soviet Russia, Red China, and all their satellites—are working vigorously to destroy our Government and set up a Red dictatorship. They would not hesitate to slaughter millions if that advanced their cause. And then to think of a man, supposedly educated, who says that communism is not a danger.

The Communist conspiracy extends to this country. In 1919, the Communist Party, U.S.A., was founded in Chicago. Ever since it has worked as a tool of Moscow. Today it espouses the Kremlin's line. Its highest leader, Gus Hall, is Moscow trained. When once asked in a court of law, "And are you willing to take up arms and overthrow the constituted authorities?" he answered, "When the time comes, yes." William Z. Foster, the old wheelhorse of communism, who served as national chairman of the party in this country, died last year in Moscow. What happened? The Russians gave him a state funeral. Even Nikita Khrushchev himself was there. Would this indicate to anybody but a dreamer that the Communist Party, U.S.A., does not have value for the Russians?

Over the years the Communists have tried to infiltrate many of our organizations and have exercised a strong influence in our Nation. Fortunately, because of the wisdom of the American people, the prosecutions of the Government, and the excellent work of the FBI, Communist influence has been driven back. But it is still there in dangerous form, with the Communist Party still operating.

Think of Harry Gold, the Rosenbergs, David Greenglass—these are Russian spies, and I am mighty glad—as are all patriotic Americans—to use Mr. Ferry's words, that Mr. Hoover "swatted them." The history of international relations might be different today if the Russians had not secured vital atomic secrets from Dr. Klaus Fuchs through Harry Gold.

To call Mr. Hoover's warnings about the danger of communism a "legend" is to distort reality. Mr. Ferry also went on to say that Mr. Hoover's warnings against Soviet espionage is an old line, designed to secure congressional appropriations. This is an insult to every Congressman who ever voted on FBI appropriations. It simply is not true. I am a member of the Subcommittee on Appropriations which passes on FBI appropriations. Mr. Hoover every year comes before our subcommittee and tells us about FBI operations. His presentation is one of the very best I have ever heard. He explains everything in detail, answers our questions, and gives the entire subcommittee a complete accounting of his stewardship. There is nothing secretive; there are no threats; there are no attempts to hoodwink us. Our subcommittee is not, as Mr. Ferry says, thrown into a "trance" about Mr. Hoover's comments about communism. We agree with him because we know that communism is a serious danger. That is the reason Congress very readily votes Mr. Hoover appropriations, because we know he is factually sound in his analysis of communism, that he is a man of vast experience and unquestioned integrity. I personally can state on this count that Mr. Ferry's comments are a fabric of falsehoods, spleen, and unrealistic dreams.

Who is Wilbur H. Ferry? His occupation as vice president of the Fund for the Republic betrays his identity. The Fund for the Republic for years has slyly been promoting the idea that communism is not a danger. It has financially assisted the publication of books and other material espousing this general theme. It is a tax-free foundation, utilizing money from the Ford Foundation for propaganda purposes.

Ferry, as vice president, has been a spearhead of this dangerous folly. In 1958, in a letter to the Citizen Register, Ossining, N.Y., Ferry criticized that paper for supporting Mr. Hoover. I might add that Ferry has been extremely critical of Mr. Hoover for a long time—obviously because in Mr. Hoover he finds a man whose knowledge about communism is far superior to Ferry's.

In 1960, in a letter to the Santa Barbara, Calif., News Press, Ferry more or less argues that unilateral disarmament is the only practical policy for the United States to adopt.

> Red domination of this and other free nations is at least "thinkable."

He apparently is of the "better Red than dead" school, which, to my mind, is a defeatist point of view. As Americans we want to be neither dead nor Red, but have confidence that, through our democratic processes of government, we can survive as a free nation and help other nations of the world—including Russia—attain true freedom. I reject Mr. Ferry's lack of confidence in America.

Perhaps that is why the Militant, organ of the Trotskyites, recently quoted Mr. Ferry very approvingly. In its March 26, 1962, issue, the Militant quoted from Ferry under the caption, "Thought for the Week."

May I say that I—and I believe all thinking Americans—will realize that Mr. Ferry's comments are mere rhetorical dribbles stemming from a lack of understanding of the realities of today's world. America is indeed fortunate to have in Mr. Hoover a man who has a realistic grasp of the subversive nature of communism. For this we say, "Thanks."

HON. HERBERT HOOVER

The SPEAKER. Under previous order of the House the gentleman from Massachusetts [Mr. Morse] is recognized for 5 minutes.

Mr. MORSE. Mr. Speaker, tomorrow a great American statesman and a beloved figure observes his birthday anniversary in the town he was born in 88 years ago. Herbert Hoover will participate in the dedication of the library, named for him, in West Branch, Iowa. There will be stored his official papers, documents which reflect a long and honorable career of public service, a career which I hasten to add he still tirelessly pursues. Not one facet of our rapidly shifting and perplexing world problems escapes his eye or defies his wise analysis and comment. I have been greatly honored in working for implementation of some of his recommendations for economy in government. But I have touched only the fringe of this great man's endeavors. When history records Herbert Hoover's name it will be as one of this century's greatest humanitarians, a man of vast personal courage and dignity, and an unshakeable American patriot.

A little more than a year ago, in an address to a group of young people, President Hoover expressed, in a few beautiful words, our present day need to protect our inheritance of individual freedom:

The Inheritance of the Next Generation

(Mr. Hoover's address as given at Freedom Week celebration, Independence Hall, Philadelphia, Pa., June 27, 1961)

Mr. Mayor, and our friends, big and little, it is a great honor to receive this distinguished medal from the city of Philadelphia.

And, Mr. Mayor, it is with great humility that I speak from this place so hallowed to every American.

It is a privilege to speak to this assembly of high school boys and girls. Your happy faces, your bubbling spirits assure the next generations of Americans.

Too often persons addressing our high school students speak at the level of "be good and you will be happy." I think you can take stronger stuff.

Our purpose here today is to pay tribute to those great men who established a transcendent heritage for the American people. Those men revived the noble concepts of independence of peoples, individual freedom, equality of opportunity, and the dignity of man.

Mankind, in all recorded history, had seldom before had the privileges of freedom. Its revival at that time by the Founding Fathers has now spread to a large part of the world.

You will inherit these freedoms and you will have the sacred duty to maintain them both at home and abroad.

Freedom is a thing of the spirit. But it is not an abstraction. From it comes love of our country. And the spirit of freedom releases the energies and creative impulses of mankind.

Out of this release of creative spirit in America came the homes, the farms, the factories, magnificent schools, great colleges, huge hospitals, superb libraries, museums, churches, highways, telephones, airplanes, radio, and TV. Someday you will inherit them free. They come to you—a gift from the labor and sacrifices of those who have gone before.

You will have the job to operate them, and the job of their improvement is never ended, because new scientific discoveries, new inventions, new ideas, will make all of today's physical things out of date within your lifetime.

It is difficult to believe how fast change comes upon us from the creative spirit of individual freedom.

When I was born—about 87 years ago—there were no electric lights, no telephones, no radio, no TV, no automobiles, no paved roads, no tall buildings, no airplanes, no atomic bombs. There were only small industries; and the railways had only just begun to spread nationwide.

But do not think that my boyhood was spent in privation. We had warm homes. We had good food. We had good homemade clothes. We had the joys of most of the games you play today—even marbles and a form of baseball.

We had inherited good schools, good teachers, and good universities. We had no fears for the future of our country. And every year on the Fourth of July there were repeated to us the inspiring words of the Declaration of Independence. From them came a renewed devotion to the great men who met in this hall 185 years ago, and a heightened faith in America.

Your inheritance of freedom brings you both rights and responsibilities. You have more rights than are spelled out in the Bill of Rights in our Constitution. They have been expanded over the years by law, and by common consent we have interpreted them to include the right of choice.

To retain your inheritance of these rights, you will need not only to know what they are, but to be alert to protest any infraction of them.

Your inheritance of individual freedom cannot be sustained without many restrictions. With changing forces and new inventions also come new methods of evil.

Legislatures devise more and more restrictions. But as to all these restrictions, there is one fundamental test of their wisdom. Do they restrict the creative spirit and the energies which freedom brings? For they are the major impulse of all progress. You should all your life test every legislative act, every social and economic proposal as to whether it unnecessarily limits the energy and the creative spirit in our people.

Today the validity of our beliefs in freedom is at stake over the whole world. You will need take part in that struggle.

You will also inherit the costly burden of our defense against the implacable foe who lurks in the Kremlin. While we hope for the cooperation of other nations in this defense of mankind, in the end the safety of America must rest upon our own armed right arm. Whatever sacrifice this entails, I am confident of your courage.

What I am saying to you is not a recital of trite banalities, for these rights and responsibilities are the base of our American way of life, and in fact, of our civilization.

Perhaps I may give you a note of confidence from my own inheritance of American freedoms. Our country gave me the opportunity of the public school and a training in my profession at a great university.

In my long life, I have lived and worked in countries of freemen, of tyrannies, and of Communist dictators. I have seen liberty die and tyranny rise. I have seen slavery again on the march. But every one of my homecomings from these journeys was for me a reaffirmation of the glory of America. Each time my soul was washed by relief from the grinding poverty of many nations. And I was inspired by the greater kindliness and frankness which come from acceptance of equality and wide open opportunity to all who want a chance. There is no place on the whole earth, except here in America, where every boy and girl can have such a chance.

God bless you.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Tupper (at the request of Mr. Arends), for Monday, August 13, 1962, on account of official business.

Mr. Zelenko (at the request of Mr. Boggs), for today and the balance of the week, on account of official business.

Mr. Dent (at the request of Mr. Boggs), for Wednesday and the balance of this week, on account of official business.

Mr. Stephens (at the request of Mr. John W. Davis), for the remainder of this week on account of the death of his mother.

SPECIAL ORDER GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to Mr. Morse (at the request of Mr. Keith) for 5 minutes today, to revise and extend his remarks, and to include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Congressional Record, or to revise and extend remarks, was granted to:

(The following Members (at the request of Mr. Boggs) and to include extraneous matter:)

Mr. Morgan.
Mr. Stephens.
Mr. Anfuso.
Mr. Powell.
Mr. Toll.

(The following Member (at the request of Mr. Keith) and to include extraneous matter:)

Mr. Fino.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 55. An act to authorize the establishment of the Fort Bowie National Historic Site, in the State of Arizona, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 2771. An act for the establishment of a Commission on Science and Technology; to the Committee on Science and Astronautics.

S. 3013. An act to amend the act of July 2, 1940, as amended, relating to the recording of liens on motor vehicles and trailers registered in the District of Columbia, so as to eliminate the requirement that an alphabetical file on such liens be maintained; to the Committee on the District of Columbia.

S. 3153. An act to guarantee electric consumers in the Pacific Northwest first call on electrical energy generated in Federal plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 3314. An act to amend the District of Columbia Public School Food Services Act; to the Committee on the District of Columbia.

S. 3317. An act to amend provisions of law relating to personal property coming into the custody of the property clerk, Metropolitan Police Department, and for other purposes, to the Committee on the District of Columbia.

S. 3574. An act to extend the International Wheat Agreement Act of 1949; to the Committee on Banking and Currency.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 12547. An act to amend the act of August 7, 1946, relating to the District of Columbia's hospital center, to extend the time during which appropriations may be made for the purposes of that act.

ADJOURNMENT

Mr. JOHN W. DAVIS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 28 minutes p.m.), under its previous order, the House adjourned until Monday, August 13, 1962, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2395. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Willow Beach Resort, Inc., which will authorize the corporation to provide concession facilities and services in Lake Mead National Recreation Area for the term from date of execution of the contract to December 31, 1982, pursuant to 70 Stat. 543; to the Committee on Interior and Insular Affairs.

2396. A letter from the Secretary of Commerce, transmitting a report relative to providing war risk insurance and certain marine and liability insurance for the American public as of June 30, 1962, pursuant to title XII of the Merchant Marine Act of 1936, as amended; to the Committee on Merchant Marine and Fisheries.

2397. A letter from the Secretary of Commerce, transmitting the quarterly report of the Maritime Administration of the Department of Commerce on the activities and transactions of the Administration under the Merchant Ship Sales Act of 1946 for the period April 1, 1962, through June 30, 1962; to the Committee on Merchant Marine and Fisheries.

2398. A letter from the Under Secretary of Commerce, transmitting a draft of a proposed bill entitled "A bill to amend the act entitled 'An act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes,' approved July 5, 1946, with relation to the importation of trademarked articles and for other purposes"; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DELANEY: Committee on Rules. House Resolution 755. Resolution for consideration of H.R. 10113, a bill to establish an Office of Public Works Coordination and Acceleration; to authorize the preparation of a plan for acceleration of public works when necessary to avoid serious nationwide unemployment levels; and for other purposes; without amendment (Rept. No. 2159). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 753. Resolution authorizing the Speaker of the House of Representatives to appoint a special committee to investigate and report on campaign expenditures of candidates for the House of Representatives; without amendment (Rept. No. 2160.) Referred to the House Calendar.

Mr. THOMPSON of New Jersey: Joint Committee on the Disposition of Executive Papers. House Report No. 2161. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. SPENCE: Committee on Banking and Currency. H.R. 12080. A bill to permit domestic banks to pay interest on time deposits of foreign governments at rates differing from those applicable to domestic depositors; without amendment (Rept. No. 2162). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. S. 538. An act to amend section 205 of the Federal Property and Administrative Services Act of 1949 to empower certain officers and employees of the General Services Administration to administer oaths to witnesses; with amendment (Rept. No. 2163). Referred to the House Calendar.

Mr. DAWSON: Committee on Government Operations. H.R. 11899. A bill to amend the Federal Property and Administrative Services Act of 1949, as amended, to provide for a Federal telecommunications fund; with amendment (Rept. No. 2164). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DAWSON: Committee on Government Operations. H.R. 10134. A bill to authorize the Administrator of General Services to convey certain land in Prince Georges County, Md., to the American National Red Cross; with amendment (Rept. No. 2165). Referred to the Committee of the Whole House.

Mr. DAWSON: Committee on Government Operations. H.R. 7781. A bill to authorize the Administrator, General Services Administration, to convey by quitclaim deed a parcel of land to the Silver Hill Voluntary Fire Department and Rescue Squad; with amendment (Rept. No. 2166). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARING:

H.R. 12845. A bill to repeal section 13a of the Interstate Commerce Act; to the Committee on Interstate and Foreign Commerce.

H.R. 12846. A bill to amend the Trading With the Enemy Act, as amended; to the Committee on Interstate and Foreign Commerce.

H.R. 12847. A bill to amend section 7 of the Clayton Act to give full force and effect to the operation of the provisions of that section applicable to certain railroad consolidations and mergers until December 31, 1963, and for other purposes; to the Committee on the Judiciary.

By Mr. BATES:

H.R. 12848. A bill to amend the act of June 12, 1960, for the correction of inequities in the construction of fishing vessels, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 12849. A bill to authorize the Secretary of the Interior to construct two modern stern ramp trawlers to be used for research, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. CONTE:

H.R. 12850. A bill to amend title 38, United States Code, to provide vocational rehabilitation, education and training, and loan guarantee benefits to persons who served in the Armed Forces on or after January 1, 1962, in combat zones, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. JAMES C. DAVIS:

H.R. 12851. A bill to permit an officer or member of the Metropolitan Police force of the District of Columbia to detain and question persons suspected of committing crimes; and to require bond in the case of certain material witnesses; to the Committee on the District of Columbia.

H.R. 12852. A bill to amend the Juvenile Court Act of the District of Columbia to clarify the functions of the Corporation Counsel in the juvenile court, and for other purposes; to the Committee on the District of Columbia.

H.R. 12853. A bill to amend the Juvenile Court Act of the District of Columbia, in order to reduce the juvenile age limit, and for other purposes; to the Committee on the District of Columbia.

By Mr. HIESTAND:

H.R. 12854. A bill to limit the purposes for which funds appropriated or otherwise made available to the Department of Health, Education, and Welfare may be used; to the Committee on Education and Labor.

By Mr. JOHNSON of Wisconsin:

H.R. 12855. A bill to amend the Agricultural Adjustment Act of 1938 relating to the lease and transfer of tobacco acreage allotments; to the Committee on Agriculture.

By Mr. PETERSON:

H.R. 12856. A bill to amend the Social Security Act to provide a program of health care insurance, through the payment of premiums on private health insurance policies, for individuals aged 65 or over who are fully insured under the old-age, survivors, and disability insurance system; to the Committee on Ways and Means.

By Mr. PUCINSKI:

H.R. 12857. A bill to develop the American merchant marine and to promote the foreign commerce of the United States through the use of mobile trade fairs; to the Committee on Interstate and Foreign Commerce.

By Mr. RODINO:

H.R. 12858. A bill to facilitate the entry of alien skilled specialists and certain relatives of U.S. citizens, and for other purposes; to the Committee on the Judiciary.

By Mr. ST. GERMAIN:

H.R. 12859. A bill to facilitate the entry of alien skilled specialists and certain relatives of U.S. citizens, and for other purposes; to the Committee on the Judiciary.

By Mr. KEARNS:

H.J. Res. 850. Joint resolution authorizing the President of the United States to designate the period from November 26, 1962, through December 2, 1962, as National Cultural Center Week; to the Committee on the Judiciary.

By Mr. DAVIS of Tennessee:

H. Res. 756. Resolution authorizing expenditures incurred by the Special Committee To Investigate Campaign Expenditures to be paid from the contingent fund of the House; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BALDWIN:

H.R. 12860. A bill for the relief of Rolando de la Torre Arceo and John Antony Arceo; to the Committee on the Judiciary.

By Mr. CONTE:

H.R. 12861. A bill for the relief of Col. Carroll E. Adams; to the Committee on the Judiciary.

By Mr. CURTIS of Massachusetts:

H.R. 12862. A bill for the relief of Gloria J. Budge; to the Committee on the Judiciary.

H.R. 12863. A bill for the relief of Jeanette Kaloc; to the Committee on the Judiciary.

By Mr. DOOLEY:

H.R. 12864. A bill for the relief of Mrs. Maria Cecere Grande; to the Committee on the Judiciary.

By Mr. HALL:

H.R. 12865. A bill for the relief of Bienvenido Yikyekan Borromeo; to the Committee on the Judiciary.

By Mr. HOLLAND:

H.R. 12866. A bill for the relief of George Sakellariou; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 12867. A bill for the relief of Ronald C. Kiederling; to the Committee on the Judiciary.

By Mr. SHEPPARD:

H.R. 12868. A bill for the relief of Desmond M. Luck; to the Committee on the Judiciary.

By Mr. ZELENKO:

H.R. 12869. A bill to provide that the vessel *Montauk* may be a U.S.-flag commercial vessel for the purposes of section 901(b) of the Merchant Marine Act, 1936; to the Committee on Merchant Marine and Fisheries.

SENATE

THURSDAY, AUGUST 9, 1962

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

Rev. Frank C. Bourbon, S.J., dean of men, Loyola College, Baltimore, Md., offered the following prayer:

We humbly and sincerely call upon You, Almighty God, for the guidance which each passing day teaches us can come only from You. Without this guidance, which You alone can give, we move, but have no direction.

The signs which we are able to read along the way tell us unmistakably that the road ahead for us, as individuals and as a Nation, will not be easy. We are constantly reminded forcibly of the dangers which surround us. Were we not conscious of Your presence in our lives and in our affairs, we would walk a lonely and terrifying road.

Give us the courage to believe that though the future is hidden from our eyes, it yet belongs to You. Give us the strength to call upon You in all of our needs. Our firm trust in Your assistance at every turn, we pray, will merit for us timely help in every need. May we be led by You, that, in turn, we may lead others to You. In joy or in sorrow, we ask no other reward of You than that You be pleased with our service, and be waiting for us at the end of the path which was chosen for us by You. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, August 8, 1962, was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 7283. An act to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses;

H.R. 10501. An act for the relief of Kenyon B. Zahner; and

H.R. 11880. An act to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 12547) to amend the act of August 7, 1946, relating to the District of Columbia Hospital Center, to extend the time during which appropriations may be made for the purposes of that act, and it was signed by the President pro tempore.

HOUSE BILLS REFERRED OR PLACED ON CALENDAR

The following bills were severally read twice by their titles and referred or placed on the calendar, as indicated:

H.R. 7283. An act to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses; placed on the calendar.

H.R. 10501. An act for the relief of Kenyon B. Zahner; to the Committee on the Judiciary.

H.R. 11880. An act to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes; to the Committee on Foreign Relations.

LIMITATION OF DEBATE DURING MORNING HOUR

On request of Mr. MANSFIELD, and by unanimous consent, statements during the morning hour were ordered limited to 3 minutes.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Charles H. Carr, of California, to be U.S. district judge for the southern district of California.

By Mr. HRUSKA, from the Committee on the Judiciary:

Stanley A. Weigel, of California, to be U.S. district judge for the northern district of California.

By Mr. RUSSELL, from the Committee on Armed Services:

Gen. Maxwell D. Taylor, U.S. Army, for appointment as Chairman of the Joint Chiefs of Staff; and

Gen. Earle G. Wheeler, U.S. Army, for appointment as Chief of Staff, U.S. Army.

By Mr. STENNIS, from the Committee on Armed Services:

Capt. George G. Burkley, Medical Corps, U.S. Navy, assistant physician to the President, for temporary promotion to the grade of rear admiral while serving at the White House.

By Mr. SALTONSTALL, from the Committee on Armed Services:

Victor M. Longstreet, of New Jersey, to be an Assistant Secretary of the Navy.

ADDITIONAL EXECUTIVE REPORTS OF COMMITTEE ON ARMED SERVICES

Mrs. SMITH of Maine. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Temporary appointments of 23 rear admirals in the Navy; temporary appointment in the Marine Corps of 6 major generals and 7 brigadier generals; 3 generals and 1 lieutenant general, to be placed on the retired list of the Army, and the permanent appointment in the Regular Army of 49 brigadier generals. I ask that these names be placed on the Executive Calendar.

The PRESIDENT pro tempore. The nominations will be placed on the Executive Calendar, as requested by the Senator from Maine.

The nominations are as follows:

Levering Smith, and sundry other officers, for temporary promotion to the grade of rear admiral in the Navy;

William P. Battell, and sundry other officers, for temporary appointment to the grade of major generals in the Marine Corps;

Joseph L. Stewart, and sundry other officers, for temporary appointment to the grade of brigadier generals in the Marine Corps;

Gen. George Henry Decker, U.S. Army, to be placed on the retired list in the grade of general;

Gen. James Edward Moore, Army of the United States (major general, U.S. Army); and Gen. Herbert Butler Powell, Army of the United States (major general, U.S. Army), to be placed on the retired list, in the grade of generals;

Lt. Gen. Thomas John Hall Trapnell, Army of the United States (major general, U.S. Army), to be placed on the retired list, in the grade of lieutenant general; and

Brig. Gen. Walter August Jensen, Army of the United States (colonel, U.S. Army), and sundry other officers, for appointment in the Regular Army of the United States.

Mrs. SMITH of Maine. Mr. President, in addition to the above, I report favorably 209 appointments and promotions in the Navy and Marine Corps, in the grade of lieutenant commander and below, and 200 appointments in the Air Force, in the grade of major and below. All of these names have already appeared in the CONGRESSIONAL RECORD, so in order to save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDENT pro tempore. The nominations will lie on the desk, as requested by the Senator from Maine.

The nominations are as follows:

William R. Walker, and sundry other officers, for appointment in the Navy;

John G. Matlack (Army Reserve Officers' Training Corps) for permanent appointment in the Marine Corps; and

Roger R. Bate, and sundry other officers, for appointment in the Air Force.

The PRESIDENT pro tempore. If there be no further reports of committees, the nominations on the Executive Calendar will be stated.

U.S. ATTORNEY

The Chief Clerk read the nomination of James P. Alger, of Utah, to be United States attorney for the district of Guam for a term of 4 years.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

U.S. MARSHAL

The Chief Clerk read the nomination of James R. Berry, of Pennsylvania, to be U.S. marshal for the western district of Pennsylvania.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

COMMITTEE MEETINGS DURING SENATE SESSION

On the request of Mr. MANSFIELD, and by unanimous consent, the Committee on Foreign Relations was authorized to meet during the session of the Senate today.

On request of Mr. MANSFIELD, and by unanimous consent, the following subcommittees were authorized to meet during the session of the Senate today:

The Internal Security Subcommittee of the Committee on the Judiciary.

The Subcommittee on Minerals, Fuels, and Materials of the Committee on Interior and Insular Affairs.

The Permanent Subcommittee on Investigations of the Committee on Government Operations.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON REPROGRAMING ACTION OF NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

A letter from the Administrator, National Aeronautics and Space Administration, Washington, D.C., reporting, pursuant to law, on reprograming action by that Administration at Slidell, La.; to the Committee on Aeronautical and Space Sciences.

PROPOSED LOAN OF DESTROYER TO THE GOVERNMENT OF PAKISTAN

A letter from the Secretary of Defense, reporting, pursuant to law, on the proposed loan of a destroyer to the Government of Pakistan; to the Committee on Armed Services.

REPORT ON U.S. SOLDIERS' HOME

A letter from the Secretary of the Army, transmitting, pursuant to law, a report on the U.S. Soldiers' Home, Washington, D.C., for the fiscal year 1961 (with an accompanying report); to the Committee on Armed Services.

REPORT ON PROVISION OF WAR RISK INSURANCE AND CERTAIN MARINE AND LIABILITY INSURANCE FOR AMERICAN PUBLIC

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on the provision of war risk insurance and certain marine and liability insurance for the American public, as of June 30, 1962 (with an accompanying report); to the Committee on Commerce.

REPORT ON ACTIVITIES UNDER MERCHANT SHIP SALES ACT OF 1946

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on the activities and transactions under the Merchant Ship Sales Act of 1946, from April 1, 1962, through June 30, 1962 (with an accompanying report); to the Committee on Commerce.

REPORT ON EXAMINATION OF PRICING OF CERTAIN ENGINES UNDER CONTRACTS WITH CONTINENTAL MOTORS CORP., MUSKEGON, MICH.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of the pricing of spare engines for fire-crash vehicles under Department of the Air Force fixed-price prime contracts with Continental Motors Corp., Muskegon, Mich., dated July 1962 (with an accompanying report); to the Committee on Government Operations.

PROPOSED CONCESSION CONTRACT IN LAKE MEAD NATIONAL RECREATION AREA, ARIZ.

A letter from the Assistant Secretary of the Interior, transmitting pursuant to law, a proposed concession contract in Lake Mead National Recreation Area, Ariz. (with accompanying papers); to the Committee on Interior and Insular Affairs.

ACQUISITION OF LANDS FOR ADDITION TO ADAMS NATIONAL HISTORIC SITE

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize the acquisition of lands for addition to the Adams National Historic Site (with an accompanying paper); to the Committee on Interior and Insular Affairs.

AMENDMENT OF ACT RELATING TO IMPORTATION OF CERTAIN TRADEMARKED ARTICLES

A letter from the Under Secretary of Commerce, transmitting a draft of proposed legislation to amend the act entitled "An act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes," approved July 5, 1946, with relation to the importation of trademarked articles and for other purposes (with accompanying papers); to the Committee on the Judiciary.

REPORT OF JEWISH WAR VETERANS, U.S.A., NATIONAL MEMORIAL, INC.

A letter from the Treasurer, Jewish War Veterans, U.S.A., National Memorial, Inc., Washington, D.C., transmitting, pursuant to law, a report of that organization, for the period April 1, 1961, to March 31, 1962 (with an accompanying report); to the Committee on the Judiciary.

PETITION

The PRESIDENT pro tempore laid before the Senate a petition signed by Harry J. Duttman, and sundry other citizens of the State of Michigan, praying for an amendment to the Constitution of the United States to protect the right to practice freedom of religion in any and all public buildings, which was referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. YARBOROUGH, from the Committee on Post Office and Civil Service, without amendment:

H.R. 11523. An act to authorize the employment without compensation from the Government of readers for blind Government employees, and for other purposes (Rept. No. 1866).

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, with amendments:

S. 3162. A bill to approve an amendatory repayment contract negotiated with the

Quincy Columbia Basin Irrigation District, authorized similar contracts with any of the Columbia Basin irrigation districts, and to amend the Columbia Basin Project Act of 1943 (57 Stat. 14), as amended, and for other purposes (Rept. No. 1872); and

H.R. 8567. An act to authorize the Secretary of the Interior to create trial boards for the U.S. Park Police, and for other purposes (Rept. No. 1867).

By Mr. GRUENING, from the Committee on Interior and Insular Affairs, without amendment:

S. 703. A bill to validate the homestead entries of Leo F. Reeves (Rept. No. 1869).

By Mr. BYRD of Virginia, from the Committee on Finance, with an amendment:

H.R. 860. An act to repeal certain obsolete provisions of title 38, United States Code, relating to unemployment compensation for Korean conflict veterans (Rept. No. 1868).

By Mr. THURMOND, from the Committee on Armed Services, with amendments:

H.R. 7932. An act to amend the act of July 2, 1958, so as to repeal portions thereof relating to residual rights in certain land on Santa Rosa Island, Fla. (Rept. No. 1871).

By Mr. PELL, from the Committee on Labor and Public Welfare, with amendments:

S. 2511. A bill to provide for the production and distribution of educational and training films for use by deaf persons, and for other purposes (Rept. No. 1870).

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ERVIN:

S. 3624. A bill for the relief of Dr. Diago Aranda; to the Committee on the Judiciary.

By Mr. BIBLE:

S. 3625. A bill for the relief of Zenon Zubieta; to the Committee on the Judiciary.

By Mr. PASTORE:

S. 3626. A bill for the relief of Irene Golato and Clorinda Golato; to the Committee on the Judiciary.

By Mr. MORSE:

S. 3627. A bill for the relief of Lee Sik Ning and Lee Ngar Wai; to the Committee on the Judiciary.

By Mr. SALTONSTALL (for himself and Mr. Jackson):

S. 3628. A bill to amend title 10, United States Code, to authorize the appointment of citizens or nationals of the United States from American Samoa, Guam, or the Virgin Islands to the U.S. Military Academy, the U.S. Naval Academy, and the U.S. Air Force Academy; to the Committee on Armed Services.

By Mr. YOUNG of Ohio:

S.J. Res. 215. Joint resolution authorizing the President of the United States to issue a proclamation declaring Sir Winston Churchill to be an honorary citizen of the United States of America; to the Committee on the Judiciary.

(See the remarks of Mr. Young of Ohio when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTIONS

ANALYZATION OF BENEFIT-COST RATIO OF WATER RESOURCE DEVELOPMENT PROJECTS

Mr. PROXMIRE (for himself and Mr. Lausche) submitted a resolution (S. Res. 374) concerning the discount rate in analyzing the benefit-cost ratio of water resource development projects, which was referred to the Committee on Interior and Insular Affairs.

(See the above resolution printed in full when submitted by Mr. Proxmire, which appears under a separate heading.)

ESTABLISHMENT OF THE SENATE SELECT COMMITTEE ON THE ECONOMIC IMPACT OF NATIONAL DEFENSE

Mr. HART (for himself, Mr. Case, Mr. Clark, Mr. Douglas, Mr. Gruening, Mr. Hartke, Mr. Humphrey, Mr. Javits, Mr. Lausche, Mr. McCarthy, Mr. Muskie, Mr. Pell, Mr. Proxmire, Mr. Randolph, and Mr. Williams of New Jersey) submitted a resolution (S. Res. 375) establishing the Senate Select Committee on the Economic Impact of National Defense, which was referred to the Committee on Armed Services.

(See the above resolution printed in full when submitted by Mr. Hart, which appears under a separate heading.)

WINSTON CHURCHILL

Mr. YOUNG of Ohio. Mr. President, very few individuals in history have made as many notable contributions to their time as Winston Churchill has to the 20th century. The entire world is indebted to him for his leadership in the struggle of freemen against nazism, fascism, and communism.

He is one of the honored few whose names themselves speak for their achievements. As a writer, a historian, and orator—indeed, one of the great masters of all time in the use of the English language—he has earned himself a place among the literary giants of the English-speaking world. In addition, as the son of an American mother and English father, he—more than any other man of our time—truly represents the close friendship between the United States and England.

Mr. President, through the years, he has been one of our Nation's finest friends. He is deserving of the gratitude of all Americans for his contributions to freedom and democracy.

A thousand years from now people in far places will give thanks that in a dark and grave period in history this indomitable man grasped leadership of freemen and women and threw back in bitter defeat the powerful forces of tyranny. His enthusiasm, vigor, and leadership helped crush the terror of nazism, and people were restored to their simple dignity as creatures of God.

In his July 4 speech in Philadelphia, President Kennedy spoke of the hope of an eventual Atlantic Union. I suggest that one way in which we can inaugurate this great hope is by bestowing the high honor of honorary citizenship of the United States upon Winston Churchill. This is something that no man can buy or acquire in any way except through the grateful generosity of the American people. Accordingly, I introduce, for appropriate reference, a joint resolution which will bestow this honor upon Winston Churchill.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 215) authorizing the President of the United States to issue a proclamation declaring Sir Winston Churchill to be an honorary citizen of the United States of America, introduced by Mr. Young of Ohio, was received, read twice by its title, and referred to the Committee on the Judiciary.

HONEST CONGRESSIONAL STANDARDS FOR FEDERAL PROJECTS

Mr. PROXMIRE. Mr. President, on behalf of myself and Mr. Lausche, I submit a resolution calling for honest standards for calculating the costs and benefits of Federal projects.

Mr. President, how would you like to pay for your house at 2½ percent interest—and take 100 years to pay?

Sounds pretty farfetched?

Yet the costs and benefits of all Federal water resource and construction projects are now calculated on the basis of these unrealistic assumptions.

This amounts to gross deception, and if anyone wants to know who is deceived, it is that forgotten man, the American taxpayer.

The outlays for cement and steel for Federal projects are made in present-value dollars, collected now from you, the present taxpayer.

The expected benefits, however, are calculated over a 100-year span—and a dollar's worth of benefits 10, 50, or a hundred years from now is worth a lot less than a dollar today, even if the price level stays constant.

No taxpayer in his right mind would invest funds if he got only 2½ percent interest on them. He could do far better than that by putting them in absolutely safe Government bonds or in a federally insured savings account.

But the return from tax dollars invested in the steel and concrete of Federal projects is discounted at that completely unrealistic 2½ percent figure—even though the lowest long-term rate on Government bonds, which the U.S. Government pays when it borrows money, is now over 4 percent.

Any private individual who has ever tried to borrow money knows that a hundred-year term is outrageously long. Forty years is the absolute maximum usually allowed, and that only in exceptional cases.

But in figuring the benefits on a Federal project, a 100-year lifespan is used automatically. Since many water resource projects and highway projects on the average end their useful life sooner than that, this means that others must be expected to last 200 or 300 years. This assumption is utterly ridiculous.

As a result of these assumptions, the benefits of Federal projects are grossly overstated. The costs are seriously understated. If meaningful assumptions were used, the cost of many multi-million-dollar projects would vastly exceed all alleged benefits.

But in the Alice-in-Wonderland world of Federal projects these economic fallacies and distortions continue. I am therefore submitting a resolution stating that if a longer-than-50-years project life is assumed to calculate benefits, then the minimum rate at which the U.S. Government can borrow money for long periods should be used to calculate the discount over time.

Unless this is done, and ridiculous as it sounds, the American taxpayer would be better off taking the money for these projects, investing it in Government bonds, and making lavish direct cash payments to the beneficiaries of the projects. This cost would be substantially less to the U.S. Treasury.

CONGRESS SHOULD HAVE OWN STANDARDS

It is becoming increasingly apparent to many that the Congress should establish its own methods of determining the economic value of water resource development projects. Three months ago the President made public the new set of criteria and procedures, standards, and policies to be used by executive agencies in the formulation and evaluation of alternative resource development projects. Yet the Congress has yet to consider these procedures to determine if it wants to adopt them as its own, or if it feels that congressional standards ought to be different in any way. There is no reason why Congress must be bound by the standards established in the executive branch of the Government. But there are many reasons why the Congress should have standards which it has explicitly considered and adopted. It may be that the President's set of economic standards for the evaluation of water resource projects will be found to be suitable for the purposes of congressional evaluation in this area. But until the Congress as a whole establishes its own standards, it will be forced to use those established by the executive agencies, regardless of their suitability for resolving the choices that must be made by Congress.

As a start toward the establishment of congressional standards, I am today submitting a resolution which would indicate the size and nature of the discount rate which Congress feels to be appropriate for use in this area. On previous occasions, the Senate has expressed itself on various features of the benefit-cost ratios which are the primary tool used in the evaluation of the economic merit of alternative water resource projects. But it has never explicitly considered and adopted a rate of discount which is a very crucial part of any benefit-cost ratio. A very small change in the size of the discount factor could cause very large changes in the benefit-cost ratio itself. In spite of the importance of the choice of the proper discount rate, Congress has no choice but to use the rate of discount used by the administrative agencies. A very long calculation process is required to work out a benefit-cost ratio using any particular discount factor. If the benefit-cost ratios presented to Congress by the executive agencies have been computed only on the basis of one discount rate, it is not feasible to expect individual Congressmen to repeat the long, involved calculation to obtain a benefit-cost ratio which uses a discount factor which might be felt to be more realistic.

ADMINISTRATION STANDARDS BADLY OVERSTATE VALUE OF PROPOSED PROJECTS

The discount factor and the period used for analysis:

It is not enough to estimate the benefits which are likely to result from some project over either a 50- or 100-year period. In order to compare the future benefits of a project with costs which have to be incurred in the present, it is necessary to obtain the present discounted value of all these future benefits. The only way a dollar receivable a year from now can be compared with a dollar today, is to apply some discount factor to that dollar which is receivable a year from now. The present discounted value of a dollar receivable a year from now is about 0.98 if the discount factor or rate of interest is 2.5 percent, but it is only about 0.96 if the discount factor or rate of interest is 5 percent. This suggests that while the process of discounting is important, the level of the discount rate used is very important.

The concepts behind this arithmetic relation are more difficult to isolate, especially in a particular problem such as this. What is the discount factor supposed to measure? What is the discounting procedure supposed to accomplish besides providing for the comparability of dollar amounts at different points in time?

PRESENT STANDARDS SERIOUSLY MISALLOCATES RESOURCES

One justification for a very high discount factor such as 10 percent is that it is the rate which indicates the rate of return or productivity on private capital, in real terms. The question concerns the best alternative uses of scarce capital. If real resources or real capital can be used in the private sector and yield a 10-percent rate of return, there is little justification for using those scarce resources in some Government project which would not be economically justified unless some very low rate of discount like 2.5 percent, was used. In these terms, the rate of discount used should reflect the real productivity of that capital in the best alternative use. If the alternative use in the private sector is quite profitable with a real rate of return of 10 percent on it, that should be the rate which is used to obtain the present discounted values of the future stream of benefits from the Government project. Otherwise it is possible that resources would be misallocated as the result of using those scarce resources in the Government project, rather than for the more profitable on the private project. The increased yield or profit, in real terms, on the private would tend to be better from the national point of view than would the Government project which would not be justified unless some much smaller rate of discount was used.

The size of the discount factor is thus one way of considering the full social costs of any Government project. The larger the private production which has to be foregone as the result of the Federal expenditure, the larger the discount factor should be, and the less the present value of the future benefits will be. This is just another way of saying that the more private production or benefits in the future which are foregone, the less the present value should be which is placed on the future benefits derived from the Government project.

RATE OF INTEREST ON NATIONAL DEBT IGNORED AS DISCOUNT FACTOR

Another alternative conceptual foundation for the selection of the proper rate of discount is the rate of interest on long-term debt. More specifically it is felt that the rate or yield on long-term marketable U.S. Government obligations can be considered the pure rate of interest; i.e., that rate which is free from any risk premiums and other distortions present in private rates of interest. At the moment this rate would be in the neighborhood of 4 percent. While this is less than the higher rates which reflect private profitability, it is more than the 2.5 percent which is currently being used, and therefore the use of this rate would lower the present value of all the benefits derived from this project.

This view of the proper discount factor has appeal in that the same rate is used to determine the repayment obligations of the power users and municipal water users as would be used to evaluate the benefits. In these terms it might be argued that unless the project has a yield at least as high as that which the Government has to pay to obtain the funds to build the project, the project is not justified. It may also be argued that unless the project yields additional output at the same rate which the Government imposes on those that have to repay to the Government on the reimbursable parts of the project, the project is not economically justified.

The issues involved in the use of this method of selecting the discount factor should not be confused with the issue concerning the repayment responsibility of the irrigating farmers. At the present time they are required to repay some small part of the costs which have been allocated to the irrigation part of the project. But they do not have to pay the interest on that part of the cost which has been allocated to them and which they are obligated to repay. This amounts to a significant subsidy in itself, but it is quite distinct from the issue of using a discount factor which is too low and therefore one which tends to overstate the present value of the benefits.

There is only one argument that is usually made in favor of such a low rate of discount as used by the Bureau of Reclamation. It is argued that any current rate of interest or yield on capital does give an indication or weight to the needs of future generations. Since the Government has a responsibility to look out for the future generations as well as for the present, the Government should not accept discount factors which reflect the present generation's desire to live well now at the expense of future generations. This, of course, is the same idea behind conservation laws which prevent the wasteful use of wasting resources such as timber and oil. There is no known way to objectively determine such a rate of social time preference. It is almost completely a value judgment which can be made only at the highest policymaking levels of Government, if it is made at all. Perhaps Congress is willing to rationalize the present 2.5-percent rate in these terms.

TWO AND ONE-HALF PERCENT DISCOUNT FACTOR SERIOUSLY WRONG

This notion is open to severe criticisms. In the first place, the savings done by individuals influence the rate of interest since such savings are, of course, part of the supply which determines the price of money when combined with the demand for loanable funds. Since the savings done by individuals is frequently for the education of their children and estates for them, the concern for future generations does enter into the present rate of interest. The Government should not be expected to be any more concerned about future generations than the existing electorate.

Also, these projects do not last forever. Sometimes they silt in after 50 years. Thus, we are talking about benefits to the present generation to a large extent, and therefore their preferences should be controlling. In fact, if we are concerned about the future generations, we should not build the dams, since by doing so we are using a scarce resource, damsites, and thus preventing the future generations from getting the most benefit out of them since they may silt up by the time the need for them is the greatest, for either flood control or irrigation.

PROJECT LIFE SERIOUSLY UNREALISTIC

At the present time the Bureau of Reclamation practice is to use the life of the project, or 100 years, whichever amount is shorter. Since it is difficult to predict the life of the project, practice has resulted in 100 years being used. The only benefit-cost ratio which appears in the justification given to the Appropriations Committee is the total benefit-cost ratio for 100 years. The definite plan report includes ratios for both 100 years and 50 years. Until recently, 50 years was used almost entirely. A table indicates the various benefit-cost ratios for various arbitrary periods of 50 and 100 years.

There was a great deal to be said for using a 50-year period instead of a 100-year period. This is especially true as long as the Bureau uses a discount factor which is completely free of any risk element. Whatever one can say about 2.5 percent, it does not approximate in anyway whatsoever a risk premium. Even the long-term Government bond rate of 4 percent might be considered free of any risk premiums. If such a risk premium-free discount factor is going to be used, the period of life should be more conservative. If 100 years is going to be used, the discount factor should contain a risk premium. It should be at least 5 percent if 100 years is going to be used.

A 50-year period should also be considered as the most realistic, since that is the period which is required by law for the irrigators to repay their cost responsibility.

CONGRESSIONAL RESPONSIBILITY REQUIRES ACTION

There are many different justifications, for many different discount rates and periods of analysis to be used in calculating benefit-cost ratios. This is a problem that has attracted much attention by economists, engineers, and other independent experts recently. While this diversity of approach characterizes the scholarly studies that have been made, all of them are similar in one important regard. All feel that the discount rate should be higher than the 2.5 percent currently being used by the executive agencies, and which obtained new administrative approval in the President's newly proposed standards. It is difficult to ignore the arguments and the conclusions of these studies. It would be irresponsible on the part of Congress to continue to use the economic discount rate standards suggested by the administration without explicitly considering these alternatives. It may very well be that there are good reasons why a 2.5-percent discount rate and a 100-year period of analysis can be accepted by Congress. If there are such reasons, they have not yet been made known to Congress, for the good reason that Congress has not yet carefully considered this matter.

The following quotes from these books and journal articles indicate the nature of the problem, and the alternatives which have yet to be considered by Congress.

RESOLUTION PRACTICAL

I feel that this resolution would provide a legitimate compromise between the present practice, and some of these alternative proposals which have so much merit in terms of affecting a more reasonable allocation of scarce tax dollars among alternative uses.

This resolution would make clear congressional intent in this vital area. It would permit the continued use of a 2.5-percent discount rate if the period of analysis is 50 years. This is reasonable since the shorter time period would result in more certain estimates of the future expected benefits being made. And the 2.5 percent might be justified by the reasons suggested earlier, that is such a low rate of discount might be said to reflect this generation's desire to leave more for the subsequent generations.

However, if a 100-year period of analysis is used, then this resolution would indicate that a larger discount factor should be used; namely, the discount factor determined by the current average yield on all long-term Government bonds that currently have more than 10 years to run before maturity. By using a higher discount rate, proper weight is given to the more uncertain benefits which are estimated to come about during the much longer period which has been attributed to the project for purposes of accruing benefits.

The effect of this would be to eliminate some very marginal projects that the administration is currently sending to Congress for approval. An example of this is the Glen Elder project. The following table indicates the benefit-cost ratios under these various assumptions of time period and discount rate. If marginal projects as this were eliminated from consideration, more funds would be freed for more worthy projects.

Benefit-cost of Glen Elder ratios under various assumptions

	Using 2.5 percent factor				Using 4 percent discount factor			
	100 years		50 years		100 years		50 years	
	Direct	Total	Direct	Total	Direct	Total	Direct	Total
Project	1.09	1.18	0.85	0.93	0.72	0.78	0.64	0.69
Irrigation	.71	1.01	.57	.80	.49	.69	.43	.61
Flood control	1.18	1.18	.92	.92	.77	.77	.68	.68
Municipal water	1.81	1.81	1.39	1.39	1.17	1.17	1.03	1.03

I ask unanimous consent that a series of studies be printed in the RECORD at this point from: First, "Water Supply—Economics, Technology, and Policy"; second, "Proposed Practices for Economic Analysis of River Basin Projects"—Report to the Joint Economic Committee on War Resources; third, "Federal Expenditure Policy," a compendium of papers presented to the Joint Economic Committee; fourth, "Magnitude of the Discount Rate for Government Projects," by William L. Miller, of Auburn University; fifth, "Practical Logic of Investment Efficiency Calculations"; and sixth, "Investment in Additional Water Supplies."

The PRESIDENT pro tempore. The resolution will be received and appropriately referred; and, without objection, the material will be printed in the RECORD.

The resolution (S. Res. 374) was referred to the Committee on Interior and Insular Affairs, as follows:

Whereas the sense of the Senate, stated in S. Res. 281, Eighty-fourth Congress and in S. Res. 148, Eighty-fifth Congress, is that the Congress will continue to exercise its constitutional powers to encourage the comprehensive conservation, development, and utilization of the land and water resources of the Nation, and that reports to the Congress in support of authorization of projects for such purposes should (1) include evaluations made in accordance with criteria prescribed by the Congress, and (2) fully disclose the results of studies and analyses of the potential utilizations, costs, allocations, payout, benefits, both direct and indirect;

Whereas previous statements of congressional intent have been silent on the important matter of the proper discount rate (the interest rate on the Federal investment) to be used in such economic analysis of the benefits and costs of prospective water resource development projects, in spite of the fact that a small change in the present discount factor could significantly alter the benefit-cost ratio of many projects, thus affecting the choice of alternative projects;

Whereas if public funds are to be used to best advantage, the most economically feasible projects should be selected for authorization, so that funds are not denied to prospective water resource projects which would yield larger economic benefits over the years, and to insure that public funds are properly allocated to all private and public uses;

Whereas the proper choice of the best projects from many alternative uses requires that a discount rate be used which is realistic in terms of the public interest and all economic factors;

Whereas it is important that any rate of discount used for these important economic choices should be determined by the Congress;

Whereas the estimation of benefits for any project for any future time period includes the evaluation of many uncertainties and imponderables, and the longer the time period for which the projection is being made, the more uncertain the estimated benefits will be;

Whereas the uncertainties associated with a longer period of analysis indicate that the discount rate should be higher so that the more uncertain benefits of the more distant future are not given the same weight as the more certain benefits which are estimated to come about in the near future in determining the selection of alternative water resource development projects; and

Whereas the present policy is to use the same discount rate, which currently is approximately 2.5 per centum, in analyzing the benefit-cost ratio of projects where the period of analysis is more than 50 years and as much as 100 years and of projects where such period is less than 50 years: Now, therefore, be it

Resolved, That it is the sense of the Senate that in cases where the period of analysis with respect to the useful life of a water resource development project is more than 50 years the discount rate used for the purpose of such analysis should be greater than in cases where such period is 50 years or less and should be at least equal to the average rate of interest payable by the Treasury on interest bearing marketable securities of the United States outstanding on the last day of the fiscal year preceding such analysis which on such day had 15 years or more remaining before reaching maturity, such average rate being currently approximately 4 per centum.

The material presented by Mr. PROXMIRE is as follows:

Water Supply—Economics, Technology, and Policy

OBJECTIONS TO THIS SOLUTION

Most of the objections considered earlier in connection with the economic theory of choice in general—in particular, the existence of extra-economic values, the problem of "higher" and "lower" tastes, the dependence of the solution upon the existing distribution of wealth and talents, the existence of market imperfections, and divergences between private and social costs—are also relevant for the economic theory of intertemporal decision; but, since they do not involve the latter in any unique way, we shall not attempt to discuss them further here. There are, however, a number of more or less cogent objections to the classical theory that apply exclusively or with particular force when intertemporal decisions are considered. In the former category is the question of how to weigh the claims of posterity properly as against the claims of current generations. Another, somewhat technical, consideration is the argument that the interest rate is not an outcome of market forces but rather a datum arbitrarily under control of government. In the latter category we will discuss market imperfections peculiar to the capital market itself.

THE CLAIMS OF POSTERITY

The allegation that market determinations of values as between present and future goods and services neglect the claims of future generations is at the heart of the more sophisticated expositions of "conservationist" philosophy. It is true that men do to some extent save for the benefit of their heirs and so do take the claims of future generations into account insofar as these make themselves indirectly felt through the affections of the present generation. But, conservationists may maintain, the market does not of itself provide any direct way for the needs and desires of unborn individuals to influence current choices between consumption for the benefit of the present and investment for the benefit of the future. Consequently, human selfishness being what it is, the decisions actually made through the market are almost bound to be one-sided. According to one view: "It is the clear duty of government, which is the trustee of unborn generations, as well as for its present citizens, to watch over, and if need be, by legislative enactment, to defend the exhaustible resources of the country from rash and reckless spoliation."[1] (We may, as an aside, reiterate the doubts we expressed earlier about such preaching of the "duties of government," with its implicit assumption that government is the repository and defender of social conscience on all economic questions rather than a complex institution composed of human beings with their own self-centered needs and desires.)

If, in fact, the Government seeks deliberately to act as the trustee of future generations, there is a variety of instrumentalities available. For preservation of fish and game resources there are license fees, season and bag limits, protected species, size limitations, and numerical quotas. Subsidies are granted farmers under a number of programs whose official purpose is to encourage them to undertake future-directed investments. Certificates of rapid tax amortization have had somewhat the same effect in the industrial sector, though the official purpose here is development of a mobilization base for national defense. In the case of oil and natural gas, monthly extraction quotas are established by a number of the major producing states. (In this and some other of the instances cited, the allegation has been made that the official purpose of conservation is rather less important than the actual purpose of holding down production for purposes of monopolistic gain.) In a few cases, regulation of one type or another has been applied to prevent drawing-down of underground water levels by pumping.

For the present, however, we want to restrict our consideration to the question of possible intervention through the interest rate to validate the claims of future generations.[2] There are two general ways by which the Government could attempt to counteract the effect of an "excessively" high interest rate or discount of future costs and benefits. The first is to let the market rate govern in the private sphere but, in the Government's own operations, to make decisions on the basis of a somewhat lower rate. This is actually done today, though as a more or less accidental consequence of tax legislation rather than as a deliberate policy. Thus, costs and benefits of Federal projects are normally discounted at rates between 2.5 and 4 percent, whereas even for conservative investments in the private sphere the future is likely to be discounted at a much steeper rate—6 percent after taxes or 10 percent before taxes may not be untypical.[3]

It is simple to show that the existence of differing rates of discount for public and private investments, after adjustment for risk, is undesirable on efficiency grounds. Assuming that the private and public spheres are divided on some principle which need not concern us here, the adoption, say, of a 3-percent discount rate in the public sphere and a 6-percent rate in the private sphere for investments of comparable risk means that there will be investments in the private sphere not undertaken because they will not be justified except for discount rates below, say, 5 percent. Meanwhile, however, projects yielding only 3 percent are being adopted in the public sphere. On efficiency grounds the disparity of interest rates will lead to the adoption of public projects that are less productive than private projects not being adopted. Note that the question of the claims of the future versus the present does not enter into this conclusion. The disparity of interest rates means that, given the aggregate amount of present sacrifice, less is provided for the future when less productive investments are undertaken.[4]

Proposed Practices for Economic Analysis of River Basin Projects

INTEREST AND DISCOUNT RATES AND RISK ALLOWANCES

The values attached to benefits and costs at their time of accrual can be made comparable only after conversion to an equivalent basis for time and degree of certainty of occurrence. Interest and discount rates and risk allowances provide a means for giving monetary expression to differences in the time and certainty of occurrence of benefits and costs.

---

[1] A. C. Pigou, "Economics of Welfare" (4th ed.; London, 1932), p. 29. The views of Pigou and a number of other authors are described in A. Scott, "Natural Resources: The Economics of Conservation" (Toronto: University of Toronto Press, 1955), pp. 88–97.

[2] To the extent that the regulations cited above can be justified on economic grounds, they represent attempts to correct divergences between private and social costs. The magnitude of these divergences, granting that a correction is required, can still only be measured once a rate of discount for intertemporal comparisons is agreed on.

[3] The operative rates in the public and private spheres are discussed in more detail in later sections of this chapter.

[4] This argument implicitly assumes that the public investment is to be compared with the marginal private alternative, holding aggregate investment constant. Another possible approach would be to compare the public investment alternative with the private spending that would result if the tax moneys required for the public investment were left in private hands instead. This would lead to a somewhat different conclusion, since presumably part of the money left in private hands would then be spent for consumption purposes, thus quite possibly leaving less available for future generations despite the higher productivity of capital in the private sphere. Which comparison is the relevant one depends upon the purpose at hand.

Prevailing interest and discount rates for loans and investments usually reflect both the "time" and "risk" elements. The wide range in such rates arises largely out of differences in the estimated risk on various types of loans or investments. However, ways other than adjustments in the interest and discount rate are available in benefit-cost analysis for treating at least part of the risk associated with a particular project. To the extent feasible, direct or specific risk allowances should be made. This would leave the interest or discount rate with the primary function of adjusting estimates for time of occurrence plus residual risks. It would be expected, however, that the total allowance for risk and interest appropriate in the analysis of a Federal project would be comparable with such allowance for private undertakings involving similar risk, uncertainty, and longevity.

Risk allowances: Adjustments for risk take account of the hazards and uncertainties that intervene between the commitment or investment of resources and the accrual of benefits. There are two principal types or categories of risk for which allowance must be made in benefit-cost analysis. One type is predictable, since bases are available to calculate the probability or frequency of losses associated with its occurrence. For predictable risks, the value attached may be converted into a reasonably certain annual amount, either through insurance or an appropriate allowance. To the extent feasible, the value of all predictable risks should be converted to an annual or present worth basis and allowed for either as a deduction from benefits or as an addition to project costs. For example, where losses from fires, storms, pests, and diseases, or the costs of their prevention, if such is possible, can be estimated with reasonable assurance, the returns available to justify investment costs should be reduced accordingly. The estimate of the resulting net returns would thus be as free as possible of all predictable risks.

Risks in the form of uncertainties for which no appropriate basis is available for prediction include the probability of errors in estimating benefits and costs due to such factors as fluctuations in the levels of economic activity, technological changes and innovations, and other unforeseeable developments adversely affecting the cost or value of project services. Risk allowances for this group of uncertainties must be based largely upon judgment, since precise information is not available for calculating their value.

Methods of allowing for uncertainties or unpredictable risks include the use of estimates of benefits that are reasonably conservative; the assumption of a limited economic life, with minimum allowances for salvage, which results in amortization of costs within the limited economic life (see following section); a risk component in the discount rate, safety margin requirements in project formulation, such as designing projects short of the marginal limit on scale of development or including a contingency reserve in project costs to cover unforeseeable developments; and finally, selection only of the more desirable projects.

Summary of recommendations on risk: It is recommended that net returns exclude all predictable risks, either by deducting them from benefits or adding them to project costs, usually on a present worth or annual equivalent basis. Allowance for uncertainties or unpredictable risks in benefit accrual should be made indirectly by the use of conservative estimates of net benefits, requirement of safety margins in planning, or including a risk component in the discount rate.

Interest and discount rates: The monetary values of benefits and costs that accrue at varying times are comparable only if all are adjusted to a uniform time basis. The use of interest rates provides a means for converting estimates to a common time point or period.

Interest and discount arise because of the competing demands that exist for limited supplies of savings available for capital investments yielding returns in the future. The demand for savings stems largely from the opportunities for productive use of capital. With the supply of existing capital and savings limited, opportunities exist for new capital investment that over a period of time will yield a return in excess of the initial investment involved. Thus, the opportunities of obtaining net returns over costs from the utilization of income-yielding goods constitute a major source of demand for savings. The supply of individual savings available for investment is limited principally by the preference of individuals for present over future goods. Because of the higher valuations that individuals place on present goods, a payment in the form of interest is needed to induce savings and compensate for the current use that is forgone. Consequently, interest rates may be considered as an expression of the exchange relationship between present and future goods. This premium or interest rate is the added value of having resources presently available in comparison with future values. For comparison with present costs, the determination of the present worth of goods available in the future involves scaling down or discounting their future values.

With limited amounts of resources available for capital investment, the interest cost of investing such resources in a water development is measured by the rate of return that would be realized if the capital were invested in other uses of comparable risk and duration. This cost is over and above allowances for risk and arises whether a private or public viewpoint is involved. As explained in the preceding section, adequate allowance for risk should be made, to the fullest practicable extent, in the estimates of benefits and costs. On this basis, the minimum interest rate appropriate for use in project evaluation for converting estimates of benefits and costs to a common time basis is the risk-free return expected to be realized on capital invested in alternative uses. At a given time this rate is the projected average rate of return; i.e., yield, expected to prevail over the period of analysis, in the absence of inflationary or deflationary changes in the general price level, on such relatively risk-free investments as long-term Government bonds. Although apparently involving considerations generally similar to those in the projection of prices, only limited attention has been given to the problem of developing projected interest rates. Pending development of a projected rate, the average yield on long-term Federal bonds (preferably rounded to the nearest one-fourth of 1 percent) over a sufficiently long period of time to average out the influence of cyclical fluctuations might be uniformly used by all agencies as an approximation of the expected long-term, essentially risk-free rate.

Use of the minimum risk-free rate assumes that risk elements have been adequately accounted for in the calculations of benefits and costs. If it is found impracticable or impossible to make the estimates of project effects on a risk-free basis, the risk allowance would have to be accounted for by an increment in the interest or discount rate applied to deferred effects. These considerations are of particular significance in evaluating associated costs and converting benefits to present worth or to a uniform annual rate. Thus, in the evaluation of associated costs and irregularly accruing benefits it should be recognized that the relatively risk-free long-term interest rates are inappropriate. The recommended interest rates for evaluating these effects should be those considered to be applicable to participants after analysis of the specific situation.

The economic analysis should also include a comparison of the cost of a project or increment thereof with available alternative means of accomplishing the specific purposes involved. In making such comparisons the project basis for treating interest should also be used for the alternative, with any necessary adjustments for differences in risk.

Summary of interest rate recommendations: It is recommended that estimates of benefits and costs accruing at various times should be made comparable by adjustment to a uniform time basis through the use of projected long-range interest rates. Pending the development of such rates, the average rate of return; i.e., yield, on long-term Federal bonds over a sufficiently long period of time to average out the influence of cyclical fluctuations is considered appropriate for uniform application by all agencies on the condition that adequate allowance has been made for uncertainties and risks. If such allowance is not possible, a component for risk should be included in the interest rate as may be the case for irregularly accruing benefits and associated costs. In comparing the cost of a project or increment thereof with alternative means of accomplishing the purposes involved, the treatment of interest for the alternative should be on a basis comparable with that of the project, with any necessary adjustments for differences in risk.

PERIOD OF ANALYSIS

A number of economic and physical forces limit the economic life of any project. Physical depreciation, obsolescence, changing requirements for project services, and time discount and allowances for risk and uncertainty may limit the present value of future project services. The upper limit of the economic life of a project is reached when the foregoing factors cause the costs of continuing the project to exceed the additional benefits expected from continuation. As so used, the economic life is generally less, and never more, than the physical life of a project.

Although the economic life of a project establishes an upper limit on the period of analysis, it may be desirable to use a period short of this limit for economic analysis in order to provide additional allowance for risk. Conservative estimates of salvage values and of the productive life of initial installations and of replacements, and allowances for operation and maintenance sufficient to provide full operating conditions throughout the period of analysis, justify reducing other allowances for risk and uncertainty.

Furthermore, in certain cases it may be advantageous to gear the period of analysis to the expected economic life of the major initial structure, or, where there is considerable variation in the expected life for various purposes, the probable life for each purpose may be used. The decision whether or not to replace the project at the end of the productive life of the basic structure can be made at a later time and is not an essential consideration or a necessary part of the initial project formulation or justification. In the case of major structural replacements, such as a set of navigation locks, the period of analysis needs to be of sufficient length to cover only the benefits and costs associated with the first or initial cycle of a project, even though economic life may be extended through successive replacements.

The difficulties and the uncertainty associated with estimating the value of remote effects provide another justification for limiting the period of analysis. Even though the character of the basic structures may allow an extended economic life, or the possibilities of replacement may be such as to suggest a continuing life, the limitations on the reliability of estimates projected into the distant future and their small present value when discounted provide reasons for selecting a maximum evaluation period.

It is recommended that a period of analysis of 100 years be considered as the upper limit on economic life. In cases where obsolescence is likely to be an important factor, use of an economic life substantially less than this upper limit, possibly not exceeding 50 years, may be warranted. Justification for the 100-year upper limit lies in the increasing uncertainty involved in predicting the more remote future and in the likelihood that any benefits and costs accruing beyond a 100-year cutoff would be largely offsetting in their amounts. Because of the low present worth of remote benefits, any benefits accruing beyond a 100-year period will seldom change the benefit-cost estimates significantly.

Any resources remaining at the end of the period of analysis should be valued in terms of their nonproject uses. For example, in the case of land, the salvage value should be based on its potential use at the termination of the project, but not to exceed the initial cost or value of the land adjusted for any improvement or damages resulting from the project. For most other remaining resources, the salvage value would be either junk values or values of such goods for use in other locations, after allowance for transportation or reinstallation.

Establishing the length of the period of analysis and the basis for salvage determines the amortization period and the amount of the net capital investment to be amortized. The amortization charge should be sufficient to cover all capital investment costs in excess of salvage during the period of analysis. Either of the two common methods for treating salvage give approximately the same results. One is the deduction of the present worth of salvage from the present investment cost, with the remainder amortized over the period of analysis. The other is to charge interest on the total investment but to amortize only the investment cost in excess of the value of salvage remaining at the end of the period.

The logical basis for estimating benefits and costs accruing during the period of analysis should be in accordance with the changes in productivity or operating capacity expected during the assumed economic life. However, the difficulty of forecasting the rate at which project services are likely to change in amount often necessitates estimates being made on the assumption of full operating capacity throughout the project life. Such procedure in the case where output declines over the course of a project's useful life is likely to overestimate somewhat both benefits and costs. Although the net significance of this procedure is not likely to be serious in the usual case, it may be necessary in the case of some projects to gear estimates to expected levels of operating capacity in calculating both benefits and costs.

Recommendations: It is recommended that the maximum period of analysis be the expected economic life of the project or 100 years, whichever is shorter. Even for projects involving basic structures of more extended life and those having continuing replacement possibilities, it is recommended that a 100-year period of analysis be considered as the upper limit on economic life. Any allowance for salvage should be based on the expected value in nonproject uses at the end of the period of analysis. The amortization charge should be sufficient to cover the capital investment during the period of analysis, calculated on a sinking fund basis using the investment cost interest rates. Except in special cases, the basis for estimating benefits and costs should be under the assumption of maintaining the project at full operating capacity.

The Interest Rate in Cost-Benefit Analysis

(By Arnold C. Harberger, associate professor of economics, University of Chicago)

It would be hard to overstate the importance of the interest rate used in the discounting of benefits and costs to judge the worthwhileness of proposed long-term Federal investments. Suppose a project were expected to yield benefits of $1 million a year beginning 5 years from the initiation of construction and extending indefinitely into the future. Using an interest rate of 2½ percent, we would evaluate this stream of expected benefits at $35.36 million as of the date of initiation of the project. But if we were to use a 6-percent rate, our evaluation would be no more than $12.45 million. The choice of interest rate becomes more critical, the longer the duration of the project in question, and the longer the lag between the beginning of construction and the time when benefits begin to accrue. Clearly, major mistakes can be made if the wrong interest rate is used in evaluation. If the cost of the above project were $20 million, it would be a fine investment if 2½ percent were the right rate and a terrible mistake if 6 percent were the right rate. I propose to argue in this paper that a rate of 6 percent or better is the proper rate to use in evaluating Federal projects. This compares with a rate of 2½ percent most commonly used by the Government agencies which undertake cost-benefit analyses.

The justification most commonly given for the use of the 2½ percent rate is that that is the rate at which the Government can borrow. This, of course, is no longer true; perhaps a 3½ percent rate would accord better with the present state of the money market. Be that as it may, my argument for a rate of 6 percent or better does not depend critically on the state of the money market. It holds equally well for the easy-money days immediately following the Second World War and for the hard-money period through which we are now passing.

The essence of my argument is that there exist and have existed ever since the war widespread opportunities for investments yielding 6 and 8 percent and higher. So long as such opportunities are available, our society does itself a disservice by investing at yields of merely 2½ or 3½ percent. The opportunities I speak of are those at the margins of industrial and agricultural investment, and I suspect it is also true that investment in residential construction might yield close to 6 percent.

Let us consider a typical industrial investment. Let it be financed half out of equity (or retained earnings) and half out of borrowings. What must it yield in order that it be a successful investment in the market sense? Presumably, the total yield should be sufficient to pay the interest on the borrowings and provide a rate of return on the newly invested equity equal to the market rate of return on equity. Taking figures which are reasonably representative of the period since the war, let us assume the interest charge on borrowings to be 4 percent, and the earnings yield of equities to be 10 percent. This earnings yield is, of course, after taxes; the before-tax yield of equity capital has typically been in the order of 20 percent. Thus our typical successful investment yields 4 percent on half the invested funds and 20 percent on the other half, making the rate of return on the whole equal to 12 percent. It may be objected that the 10 percent figure for earnings yield, while representative of the whole postwar period, has been rendered obsolete by the great rise in stock prices that has occurred. For recent years a figure of 7 percent might be better for the after-tax yield of equities. This means 14 percent before tax, and together with a 4 percent borrowing rate applied to half the total capital implies an overall yield on capital of 9 percent, rather than the 12-percent figure obtained earlier.

Another approach to estimating the rate of return on capital in the United States is to compare total income received on account of capital with the total value of the capital itself. Neither of these components is easy to estimate, but much work has been done in recent years to improve our knowledge of both.[1] In spite of the lack of absolute precision in the presently available estimates, one may feel quite confident that the stock of capital in the United States is somewhere between three and four times the national income, and that the income accruing to capital amounts to somewhere between one-third and one-fourth of the national income. Our estimate of the rate of return on capital in the overall economy lies, then, in the range between 6¼ percent (income of one-fourth divided by capital of 4) and 11.1 percent (income of one-third divided by capital of 3), and probably closer to the middle than to the extremes of the range.

In the case of agriculture we have a reasonably good measure of the return on capital in the ratio of the gross rent paid to the value of rented farms. For 12 Corn Belt States this rent/value ratio ranged from an average of 5½ percent in Ohio to an average of 8½ percent in Wisconsin, with most States averaging between 6 and 7 percent. The figures are for 1954–57, and apply to farms rented wholly for cash.[2]
